Moody's notes the above-mentioned transactions are exposed to different levels of commingling risk. Moody's determines this risk to be more limited for transactions with weekly sweeps of collections. This risk for all transactions is mitigated through: (a) increased level of credit enhancement available for these well seasoned transactions; (b) the servicing for multi-originator transactions is split between several servicers.

Moody's has reviewed all the above-mentioned securitisation transactions to assess the impact of the above-mentioned changes on the outstanding ratings. Moody's has concluded to take no rating action as the changes are in line with the transaction documents.

Moody's monitors AyT FTGencat 1, FTA and AyT FTPYME II as described in the report: "Moody's Approach to Rating Granular SME Transactions in Europe, Middle East and Africa", June 2007. Moody's monitors AyT Préstamos Consumo III, FTA as described in the report: "The Lognormal Method Applied to ABS Analysis", July 2000. Moody's monitors the RMBS transactions mentioned above as described in the reports: "Moody's Approach to Rating Spanish RMBS: The "Milan" Model", March 2005, and "Moody's Updated Methodology for Rating Spanish RMBS", July 2008.
