KEY RATING DRIVERS

European RMBS Rating Criteria

The rating actions reflect the application of Fitch's new European RMBS Rating Criteria. The upgrades and affirmations reflect the levels of credit enhancement (CE) relative to Fitch's asset performance expectations as per the agency's latest rating criteria.

Stable Asset Performance

As of the respective cut-off dates the transactions reported total delinquent loan balances were broadly stable at 8.1%, 7.4% and 5.7% for BBVA RMBS 1, BBVA RMBS 2 and BBVA RMBS 3 respectively, as a percentage of the total balance of performing and delinquent loans. The balances of loans with more than three payments in arrears were also little changed at 0.4%, 0.5% and 0.6% for BBVA RMBS 1, BBVA RMBS 2 and BBVA RMBS 3 respectively.

Performance Adjustment Factor

The calculated performance adjustment factor for each transaction was lower than 100%. However, Fitch applied a floor at 100% to take into account the lack of detailed data regarding loan restructuring and payment loans extensions and the potential effect that these may have had upon historical default rates.

Credit Enhancement (CE)

For BBVA RMBS 1, the class A, B and C notes are amortising on a sequential basis and Fitch expects this to continue given that the reserve fund remains under target. Among the class A notes, the A2 and A3 continue to amortise on a sequential basis. In a stress scenario the class A2 and A3 notes will amortise pro-rata, therefore Fitch has treated the A1 and A2 notes as pari-passu for the purpose of calculating CE of 20%. Fitch has calculated CE of 8.9% and 1% for the class B and C notes respectively.

For BBVA RMBS 2, the class, A, B and C notes are amortising on a sequential basis and Fitch expects this to continue given that the reserve fund remains under target. Among the class A notes, the A2, A3 and A4 notes continue to amortise on a sequential basis. In a stress scenario the class A2, A3 and A4 notes will amortise pro-rata therefore Fitch has treated the class A1, A2 and A3 notes as pari-passu for the purpose of calculating CE of 9.7%. Fitch has calculated CE of 4% and negative 1% for the class B and C notes respectively.

For BBVA RMBS 3, the class, A, B and C notes are amortising on a sequential

basis and Fitch expects this to continue given that the reserve fund remains under target. Among the class A notes, the A1, A2 and A3 notes are amortising in a pro-rata basis since the performance trigger has been breached. Fitch has treated the A1, A2 and A3 notes as pari-passu for the purpose of calculating CE of 3.4%. Fitch has calculated CE of a negative 7.1% and a negative 13.1% for the class B and C notes respectively.

Counterparty Risk

The note ratings are not constrained by counterparty arrangements.

VARIATIONS FROM CRITERIA

The transaction loan-level data shows low historical recovery rates on defaulted loans where the property sale proceeds have been received (i.e. closed loans). As of the latest cut-off dates, the calculated average recovery rates on closed loans was 36%, 43% and 34% for BBVA RMBS 1, BBVA RMBS 2, and BBVA RMBS 3 respectively. Increased average recovery rates are calculated for loans defaulted in 2014 and afterwards, and such cases are relatively small in number. It is also to be noted that future recovery rates would likely be higher than historical recovery rates due to the improved macroeconomic and housing market conditions in SPain. To take into account the low historical recovery rates Fitch applied a loan-level manual valuation adjustment of 20% to all loans in the portfolios for the three transactions.

RATING SENSITIVITIES

A better-than-expected resolution of existing pool of defaulted receivables and an increase in the observed recovery rate could have a positive impact on the note ratings.

A worsening of the Spanish macroeconomic environment, especially employment conditions, or an abrupt shift of interest rates could jeopardise the underlying borrowers' affordability. This could have negative effects on asset performance and negative rating implications.

DATA ADEQUACY

Fitch has checked the consistency and plausibility of the information it has received about the performance of the asset pools and the transactions. There were no findings that affected the rating analysis. Fitch has not reviewed the results of any third-party assessment of the asset portfolio information or conducted a review of origination files as part of its ongoing monitoring.

Fitch did not undertake a review of the information provided about the underlying asset pools ahead of the transactions' initial closing. The subsequent performance of the transactions over the years is consistent with the agency's expectations given the operating environment and Fitch is therefore satisfied that the asset pool information relied upon for its initial rating analysis was adequately reliable.

Overall, Fitch's assessment of the information relied upon for the agency's rating analysis according to its applicable rating methodologies indicates that it is adequately reliable.

Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.
