DISCLAIMER

This presentation has been prepared by Banco Popular solely for purposes of information. It may contain estimates and forecasts with respect to the future development of the business and to the financial results of the Banco Popular Group, which stem from the expectations of the Banco Popular Group and which, by their very nature, are exposed to factors, risks and circumstances that could affect the financial results in such a way that they might not coincide with such estimates and forecasts. These factors include, but are not restricted to, (i) changes in interest rates, exchange rates or any other financial variable, both on the domestic as well as on the international securities markets, (ii) the economic, political, social or regulatory situation, and (iii) competitive pressures. In the event that such factors or other similar factors were to cause the financial results to differ from the estimates and forecasts contained in this presentation, or were to bring about changes in the strategy of the Banco Popular Group, Banco Popular does not undertake to publicly revise the content of this presentation.

This presentation contains summarised information and may contain unaudited information. In no case shall its content constitute an offer, invitation or recommendation to subscribe or acquire any security whatsoever, nor is it intended to serve as a basis for any contract or commitment whatsoever.

ASPECTS OF CREDIT DEMAND

HOUSEHOLD INDEBTEDNESS (Y-ON-Y % Δ)

— TOTAL
— Mortgage
— Consumer

Source: Bank of Spain

ASPECTS OF CREDIT DEMAND

RETURNS FROM RESIDENTIAL AND OTHER INVESTMENTS

Residential prices
Spanish Equities (Ibex35)
Mutual funds

Source: Bank of Spain

The attractiveness of residential RE investments vs. Other Alternatives decreased in 2006

Housing prices grew less than other assets (e.g. equities)

ASPECTS OF CREDIT DEMAND

AVERAGE MORTGAGE MATURITY (NEW PRODUCTION)

Increased residential values have led to longer mortgage maturities

INDIVIDUALS WITH OUTSTANDING INDEBTEDNESS

Increased mortgage maturities have boosted the number of individuals with credit outstanding

Source: Bank of Spain - INE

ASPECTS OF CREDIT DEMAND

HOUSE AFFORDABILITY RATIOS

Estimated affordability has continued to deteriorate

- Mortgage debt repayment over disposable income, without fiscal benefits
- Mortgage debt repayment over disposable income, with fiscal benefits

EXPECTED REAL ESTATE TREND

Drivers of credit growth to households (real terms)

Source: Bank of Spain

▶ Medium term, the evolution of the different components, specially interest rates, should lead to a progressive deceleration of loan volumes

EXPECTED REAL ESTATE TREND

- ▶ The sustained deceleration in house prices will lead to a gradual ott-setting of the possible current overvaluation, and to more moderate credit growth.
- ▶ Progressive recovery of exports to Europe and demand due to higher government investment in public works should allow for a soft real estate adjustment to lower & sustainable levels

POPULAR VERSUS BANKING INDUSTRY

- ▶ In an article (published in the bi-monthly bulletin of Bank of Spain) that followed a detailed analysis of the macroeconomic models which were widely used to analyse housing prices, Bank of Spain concluded that*:
 - ▶ The significant house price inflation since 1997 is to some extent a consequence of the low house prices in the years before the start of the boom
 - ▶ The macroeconomic analysis supports the hypothesis of an overvaluation of the housing market in the last few years as a result of supply / demand imbalances, which is compatible with the usual adjustment path of a market subject to notable rigidities
 - ▶ The evidence from the macroeconomic analysis does not support the hypothesis that the recent market boom is due to widespread speculative behaviour or to the favourable tax treatment of the house ownership
 - ▶ The most likely scenario is that of a gradual adjustment of the current overvaluation in the housing market
