(1) In addition to financial information prepared in accordance with International Financial Reporting Standards (IFRS) and derived from our consolidated financial statements, this report contains certain financial measures that constitute alternative performance measures (APMs) as defined in the Guidelines on Alternative Performance Measures issued by the European Securities and Markets Authority (ESMA) on 5 October 2015 and other non-IFRS measures, including the figures related to "underlying" results, as they are recorded in the separate line of "net capital gains and provisions", above the line of attributable profit to the parent. Further details are provided on page 12 of this report.

For further details of the APMs and non-IFRS measures used, including its definition or a reconciliation between any applicable management indicators and the financial data presented in the consolidated financial statements prepared under IFRS, please see 2018 Annual Financial Report, published in the CNMV on 28 February 2019, our 20-F report for the year ending 31 December 2018 registered with the SEC in the United States as well as the "Alternative performance measures" section of the appendix to this report.

(2) 2018 and 2019 data applying the IFRS 9 transitional arrangements. As indicated by the consolidating supervisor a pay-out of 50%, the maximum within the target range (40%-50%), was applied for the calculation of the capital ratios in 2019. Previously, the average cash pay-out for the last three years was considered.

SANTANDER VISION AND CORPORATE CULTURE

Our success is based on a clear purpose, aim and approach to business.

We are building a more responsible bank

A digital Santander.

To continue growing in a sustainable and profitable way and to accelerate execution, we will remain focused on our digital transformation.

 <p>Our purpose</p> <p>To help people and businesses prosper.</p>	 <p>Our aim as a bank</p> <p>To be the best open financial services platform, by acting responsibly and earning the lasting loyalty of our people, customers, shareholders and communities.</p>	 <p>Our how</p> <p>Everything we do should be Simple, Personal and Fair.</p>
---	--	---

Santander expects to accelerate its digital transformation and the launch of global platforms, which will enable the Group to offer new solutions, products and services to our customers, and compete in the open market for new ones.

Strong corporate culture.

The **Santander Way** is our global culture, fully aligned to our corporate strategy. It includes our purpose, our aim, and how we do business.

Our corporate culture includes eight corporate behaviours...

							
Show respect	Truly listen	Talk straight	Keep promises	Support people	Embrace change	Actively collaborate	Bring passion

...and a strong risk culture where everyone is personally responsible for managing their risks in their day to day work

risk pro
...Everyone's business

Generating confidence and operating responsibly, we contribute value to all our stakeholders

People

- ▶ Santander was one of the 25 best companies to work for at the global level, according to the annual ranking by Great Place to Work based on a survey involving more than 8,000 organisations representing 12 million employees from 90 countries.
- ▶ This ranking reflects the effort and progress made on various initiatives across the Group within our human resources strategy, which aims to be a benchmark employer.
- ▶ To this end, we continued to work on strategic levers such as a common culture (*The Santander Way*), dynamic management of current talent (*Workday* and global central employee platform) and talent for the future (*Strategic Workforce Planning*).

Customers

- ▶ We continued to focus on improving customer loyalty and experience. Progress was reflected in the increase of 1.8 million loyal customers, greater penetration as a percentage of active customers and 6.1 million more digital customers in the last 12 months.
- ▶ Santander Global Platform continues to advance in rolling out its businesses as scheduled, including:
 - Openbank will begin to operate in Germany with a fully digital lending proposal (platform and latest generation mobile phones) that will come on stream in the country by the end of the year.
 - We issued the first bond using end-to-end blockchain technology, positioning us at the forefront of innovation in capital markets and helping our customers in their digital transformation.
- ▶ We also continued to strengthen our traditional branches and develop new models (*SMART*, *Súper Ágil* and *Work Café*), while investing in new generation ATMs and in contact centres.

Shareholders

- ▶ The extraordinary general meeting of shareholders on 23 July approved the capital increase to acquire shares of Santander Mexico from minority interests. The acquisition offer was subscribed by 67% of the targeted shares. As a result, Santander's stake in Santander México increased from 74.96% to 91.65%.
- ▶ The first interim dividend of EUR 0.10 per share charged to 2019's earnings will be paid from 1 November. The board also confirmed its intention to maintain a percentage of the underlying attributable profit in 2019 assigned to the dividend (pay-out) of between 40% and 50%, and the proportion of the dividend in cash is at least the same as last year.
- ▶ Santander Shareholder Relations and the Universia Foundation completed the XI edition of scholarships for university students with disabilities who are Santander shareholders or relatives of shareholders, in order to help these university students prosper and to promote their social, academic and work-place inclusion.

Community

- ▶ The 2019 Dow Jones Sustainability Index (DJSI) recognised Santander as the world's most sustainable bank. This is the first time the bank has led the global index and it was the leader in Europe for the second year running. The magazine Fortune also recognised Santander Brasil as the bank that is most changing the world.
- ▶ Santander joined the Collective Commitment to Climate Action together with 30 other banks in order to speed up the financial sector's transition to a low carbon economy.
- ▶ Banco Santander successfully issued a EUR 1 billion green bond as a starting point for a global plan for sustainable issuances. This issuance falls within the commitment of Responsible Banking to provide more than EUR 120 billion euros in green finance by 2025.

GROUP PERFORMANCE

GROWTH

The Group's strategy is driving growth in loyal and digital customers and is reflected in greater activity in almost all markets

Santander's strategy continued to focus on boosting the loyalty of our customers. Their number rose again in the third quarter and reached 21 million, 1.8 million more than September 2018 (+10%), with individuals up 10% and companies 5%.

The faster pace of digitalisation is producing notable growth in digital customers, whose number increased by 6.1 million (+20%) in the last 12 months to more than 36 million. There was also strong growth in the number of online and mobile phone accesses in the first nine months to 5,742 million (+27% year-on-year) and in monetary and voluntary transactions to 1,634 million (+25%).

“Our diversification across Europe and the Americas is one of the defining characteristics that stands Santander apart from our peers. And because of this, we continue to deliver predictable, profitable growth, and a sustainable dividend through the cycle”

Loyal customers

Millions

Digital customers

Millions

As regards volumes, gross loans and advances to customers (excluding reverse repos) and customer funds were stable in the third quarter, both in euros and in constant euros.

Compared to September 2018 (at constant exchange rates), gross loans and advances to customers (excluding reverse repos) grew 4% and increased in eight of the 10 core markets. Customer funds (+6% year-on-year) rose in nine of them. Growth in demand and time deposits as well as mutual funds.

Solid funding structure and liquidity: net loan-to-deposit ratio of 112% (111% in September 2018).

Activity: Sep-19 vs. Sep-18

% change in constant euros

“In a slowing economy, we have grown volumes, increased profit in almost all the markets in which we operate, and maintained high returns for our shareholders”

GROUP PERFORMANCE

PROFITABILITY

Solid business model based on profitability, efficiency and innovation, which has enabled us to obtain profits on a recurring basis

In a context of lower growth and interest rates, customer revenue remained solid, costs continued to reflect synergies in some countries and provisions increased in line with volumes.

Third quarter attributable profit of EUR 501 million, affected by EUR 1,634 million of net charges, mainly related to the impairment determined by the review of goodwill ascribed to Santander UK (EUR 1,491 million). Excluding these charges, underlying attributable profit was EUR 2,135 million, up 2% quarter-on-quarter and 7% up on the third quarter of 2018 (both 4% higher in constant euros).

Attrib. profit to the parent

EUR million

Earnings per share

Euros

First nine months attributable profit of EUR 3,732 million, affected by net charges of EUR 2,448 million in capital gains and provisions (see page 12). Excluding them, underlying attributable profit (EUR 6,180 million) was 2% higher (+3% in constant euros), after absorbing the markets' negative performance, interest rate reduction, higher costs for foreign currency hedging and the impact of implementing IFRS 16. By countries, underlying attributable profit rose in eight of the 10 core markets.

The efficiency ratio improved quarter-on-quarter and stood below 47%, one of the best among our peers. Underlying RoTE was 11.9% and underlying RoRWA 1.63%.

Efficiency ratio

%

RoTE

%

(*) Not including net capital gains and provisions.

STRENGTH

Santander is strengthening its capital ratios and improving credit quality while maintaining a high level of profitability

The CET1 ratio stood at 11.30% after organically generating 19 basis points in the third quarter and 48 since the beginning of the year. This, combined with a favourable portfolio evolution, enabled regulatory impacts and restructuring costs to be absorbed (-66 bps).

Net tangible equity per share (TNAV) was EUR 4.25, 2% higher than September 2018. In addition, and in terms of value creation per shareholder, the recording between the two dates of the dividend remuneration should be taken into account. Including it, the TNAV per share increased 8% in the last 12 months (+1% in the quarter).

CET1 *

%

(*) Using the IFRS 9 transitional arrangements

Tangible equity per share

Euros

Credit quality continued to improve: the NPL ratio dropped for the ninth consecutive quarter (-4 bps in the third quarter and -40 bps since September 2018) and coverage remained around 67%.

The cost of credit stood at 1% in September, similar to the previous quarter and to the third quarter of 2018.

GRUPO SANTANDER RESULTS

- Third quarter attributable profit to the parent of EUR 501 million, affected by net charges of EUR 1,634 million that are outside the ordinary course performance of our business, mainly the impairment of goodwill ascribed to Santander UK (EUR 1,491 million). Excluding these charges, underlying attributable profit was 2% higher than the second quarter of 2019 and 7% more than the third quarter of 2018 at EUR 2,135 million (+4% in both periods in constant euros).
- First nine months attributable profit of EUR 3,732 million, after recording net charges that are outside the ordinary course performance of our business amounting to EUR 2,448 million in 2019 (EUR 300 million in 2018). Excluding these results, the underlying attributable profit was EUR 6,180 million, 2% more than in the same period of 2018 (+3% in constant euros).
- At the end of September 2019, the results continued to reflect a solid underlying trend. Customer revenue increased and costs began to show the synergies obtained in various units. The efficiency ratio continued to be one of the best in the sector (46.9%).
- In addition, the cost of credit remained at very low levels (1.00%) and profitability ratios were high: underlying RoTE of 11.9% and underlying RoRWA of 1.63%.

➔ Evolution of results compared to the first nine months of 2018

The underlying trends of the P&L remained solid compared to the first nine months of 2018, with customer revenue growing, both net interest income and net fee income, costs reflecting the synergies obtained in various units and a cost of credit remained close to historically low levels.

This good performance, however, is not fully reflected in the attributable profit to the parent because of the recording of a net negative amount of EUR 2,448 million for charges that are outside the ordinary course performance of our business, mainly from the revision of the goodwill ascribed to the UK (EUR -1,491 million), and which have no impact on capital ratios, and restructuring costs for ongoing integrations (EUR -724 million), as set out on page 12 of this report. In addition, the comparison is also affected by the markets' negative performance, interest rate reduction, higher costs for foreign currency hedging and the impact of implementing IFRS 16.

This performance is explained in detail below:

➔ Revenue

- Our revenue structure, where net interest income and net fee income generate more than 95% of total income in 2019, well above the average of our competitors, enables us to grow consistently, limiting the impact that bouts of high volatility could have on our results from financial operations. Total income grew 3% in euros and without the FX impact, with eight of the 10 core markets growing. By lines:

– **Net interest income** rose 5%. Excluding the FX impact, growth was also 5% due to greater lending and deposits, mainly in developing countries, and management of spreads in a lower interest rate environment in many countries in the last 12 months, with particularly low levels in Europe. There was also a negative impact of EUR 208 million from IFRS 16 application.

By markets, the main rises in local currency terms were in Mexico, Uruguay, Poland and Argentina, which increased at double-digit rates, and Brazil and the US, which grew by around 6%. Falls in the UK affected by the pressure of spreads in new mortgage loans and SVR balances (Standard Variable Rate); in Spain and Portugal, due to low interest rates, reduced volumes and the impact of ALCO portfolio sales; and Chile because of lower inflation.

– **Net fee income** rose 3%. The increase without the FX impact was 4%, reflecting the greater customer loyalty combined with the growth strategy in higher value-added services and products. Of note was the growth in the most transactional businesses from cards, insurance, foreign currency and cheques and transfers. On the other hand, decline in net fee income from advising operations and guarantees, affected by reduced activity in the markets.

– **Gains on financial transactions** and other operating income (dividends, equity method income and others), which accounted for less than 5% of total income, fell 21% compared to 2018 when the first quarter of that year was very good in the markets, combined with a higher cost of foreign currency hedging this year.

Net interest income

EUR million

Net fee income

EUR million

→ Costs

- Costs grew 3% in euros and without the FX impact, as a result of investments in transformation and digitalisation, the improvements made to the distribution networks, the slight perimeter impact from the integration of the retail and SME businesses acquired from Deutsche Bank Polska and the impact on Argentina of high inflation.
- In real terms (excluding inflation), costs were 1% lower excluding the FX impact. The Group's aim is to improve our operational capacity and at the same time manage our costs more efficiently adapted to each area, via an exemplary execution of the integrations currently underway and fostering the use of shared services, mainly in Europe, where costs are beginning to reflect the first synergies of integrations, and fell 2.5% in real terms. Of note was the decrease in Spain (-8%) and to a lesser extent, the UK (-3%) and Portugal (-4%). Of note among other countries were Brazil and Chile with flat costs in real terms, despite the ongoing investment to improve the distribution capacity.

The efficiency ratio continued to be a reference in the sector at 46.9%, virtually unchanged from the first nine months of 2018.

→ Impairment or reversal of impairment of financial assets not measured at fair value through profit or loss (net)

- The impairment or reversal of impairment of financial assets not measured at fair value through profit or loss (net) amounted to EUR 6,810 million, 5% more year-on-year both in euros and without the FX impact.
- As part of this item, loan-loss provisions were 5% higher in both euros and without the FX impact. By markets, Mexico, Portugal and Chile fell, while those that increased are linked mainly to countries with stronger growth in volumes.
- The cost of credit remained stable (0.98% in September 2018 and 1.00% in September 2019). In year-on-year terms all main units improved or remained stable, except for the US and Argentina.

→ Impairment on other assets (net)

- The impairment on other assets (net) was EUR 1,547 million (EUR 121 million in the same period of 2018), impacted by the impairment of goodwill ascribed to the UK of EUR 1,491 million.

Total income

EUR million

Operating expenses

EUR million

→ Provisions or reversal of provisions

- Provisions (net of reversal of provisions) amounted to EUR 2,511 million in the first nine months of 2019 (EUR 1,725 million in the same period of 2018). The increase was mainly due to restructuring charges in Spain, the UK and Poland, which are set out on page 12 of this report.

→ Gains or losses on non-financial assets and investments (net)

- This item reflects a profit of EUR 253 million in 2019 (EUR 24 million in the first nine months of 2018). The increase was mainly due to the recording of capital gains from the sale of 51% our stake in Prisma Medios de Pago S.A. and the revaluation of the rest of the stake (49%), with a positive net tax impact in the first nine months of 2019 of EUR 130 million.

→ Gains or losses on non-current assets held for sale not classified as discontinued operations

- This item, which mainly includes the sale and deterioration of foreclosed assets, recorded a loss of EUR 266 million in the first nine months of the year (EUR -158 million in the same period of 2018). The difference was mainly due to the recording of capital losses from the sale of a portfolio of real estate assets in the first quarter of 2019.

→ Profit before tax

- First nine months profit before tax was EUR 8,712 million, 18% lower year-on-year. Excluding the FX impact, the fall was 17%, largely due to the non-recurring charges already mentioned.

→ Income tax

- Income tax was EUR 3,740 million, in line with the same period of 2018.

→ Attributable profit to non-controlling interests

- This amounted to EUR 1,240 million, 9% more year-on-year. Excluding the FX impact, it was 8% higher, mainly due to Brazil, the US and Santander Consumer Finance. The acquisition of minority interests in Mexico had a favourable impact of only one month (around EUR 10 million) but will fully impact the fourth quarter.

→ Attributable profit to the parent

- Profit attributed to the parent was EUR 3,732 million, 35% less than in the first nine months of 2018, both in euros and excluding the FX impact.

- RoE was 5.9%, RoTE 8.3% and RoRWA 1.22% (8.2%, 11.7% and 1.55%, respectively, in the first nine months of 2018). Earnings per share were EUR 0.202 (EUR 0.331 in the first nine months of 2018).

Net loan-loss provisions

EUR million

Attributable profit to the parent

EUR million

Income statement

→ Underlying attributable profit to the parent

- Profit attributed to the parent was affected in 2019 and 2018 by the following net results, which are outside the ordinary course performance of our business and which distort year-on-year comparisons:

First nine months of 2019:

- As part of our annual planning and in accordance with accounting rules, we reviewed the goodwill ascribed to Santander UK, which resulted in the recording of an impairment of EUR 1,491 million in the third quarter at the Corporate Centre.
- Restructuring costs in Spain under the plan for integrating the commercial networks of Banco Popular for a net amount of EUR 600 million, materialised in the second quarter.
- Net charges in the UK of EUR 287 million were recorded, of which EUR 104 million were restructuring costs related to the optimisation plan (EUR 66 million in the first quarter, EUR 26 million in the second and EUR 12 million in the third) and EUR 183 million for PPI provisions (EUR 80 million in the second quarter and EUR 103 million in the third).
- Net capital losses of EUR 180 million for the sale of real estate assets in the first quarter.
- We also recorded restructuring costs of EUR 20 million for the integration process in Poland (EUR 12 million in the first quarter and EUR 8 million in the third).

- Lastly, capital gains from the sale of 51% of our stake in the Argentinian entity Prisma Medios de Pago S.A. and the revaluation of the remaining 49%, generating a capital gain of EUR 130 million (EUR 150 million in the first quarter and an adjustment of EUR -20 million in the third because of the peso's depreciation).

First nine months 2018

- Positive results from the integration in Portugal (EUR 20 million), recorded in the second quarter.
- Charges for restructuring costs: EUR 280 million in Spain and EUR 40 million in the Corporate Centre, both related to Popular's integration, recorded in the second quarter.

Excluding these results from the various P&L lines where they are recorded, and incorporating them separately in the line 'net capital gains and provisions', **underlying attributable profit to the parent was EUR 6,180 million** in the first nine months of 2019, 3% higher year-on-year without the FX impact.

Eight of the 10 core markets increased in their local currencies, and at double digit rates in Brazil, Mexico, the US, Portugal and Argentina.

The only decrease was in the UK, mainly because of competitive pressure on revenue.

As a result, the Group's underlying RoTE was 11.9%, the underlying RoRWA 1.63% and underlying earnings per share EUR 0.352 (EUR 0.349 in the first nine months of 2018).

➤ Third quarter results compared to the second quarter of 2019

The third quarter's attributable profit to the parent is very conditioned by those amounts that are outside the ordinary course performance of our business, which are explained in previous pages.

Excluding these results, underlying attributable profit to the parent was 2% higher quarter-on-quarter in euros and 4% higher without the FX impact, as follows:

- **Total income** increased 3% due to growth in customer revenue in most of the markets.
 - This was due to the recovery in net fee income (+4%), following a good performance in South America, notably in Brazil, and wholesale business. Net interest income was 1% higher, absorbing the further falls in interest rates.
 - Gains on financial transactions and other operating income increased after recording in the second quarter the contribution to the Single Resolution Fund and higher income in the third quarter from portfolio sales.

- **Operating expenses** rose 1% driven by North America and South America (partly due to high inflation in Argentina and the salary review in Brazil), while they continued to fall in Europe, mainly in Spain and Santander Consumer Finance.

- **Loan-loss provisions** rose 16% as they normalised following a second quarter when they were low due to the seasonality of SC USA and SCF's portfolio sales.

GRUPO SANTANDER BALANCE SHEET

- Compared to September 2018, both gross loans and advances to customers (excluding reverse repos) as well as customer funds increased.
- Gross loans and advances to customers excluding reverse repos rose 4% year-on-year in euros and in constant euros, with eight of the 10 core countries growing, particularly developing markets (+10% overall).
- Customer funds increased 6% year-on-year both in euros and constant euros, with rises in nine of the 10 core countries. Widespread growth in deposits (excluding repos) and mutual funds, the latter due to the better performance in recent months (+12% in constant euros since December 2018).

➔ Loans and advances to customers

Gross loans and advances to customers rose to EUR 916,003 million in September 2019, 6% growth year-on-year.

The Group uses **gross loans and advances to customers excluding reverse repos** for the purpose of analysing traditional commercial banking loans.

• **Compared to September 2018**, gross loans and advances to customers excluding reverse repos and the exchange rate impact increased 4%, with the following evolution by countries:

- Increase in eight of the 10 core units, particularly all developing countries, which overall grew 10%: Poland (+26%), partly because of the increased perimeter, Argentina (+17%), due to peso balances as well as the impact of the currency's depreciation on dollar balances, Brazil (+8%), Chile (+7%) and Mexico (+4%).

- As regards mature markets, where overall growth was 2%, notable growth in the United States (+10%, with growth in SC USA and SBNA) and Santander Consumer Finance (+7%),

with rises in all countries that comprise it. The UK's balances increased 2%, as mortgage and other retail loan growth was offset by the reduction of commercial real estate exposures.

- The only declines were in Portugal and Spain, markets that continued to deleverage and where gross loans and advances to customers excluding reverse repos fell by 1% and 6%, respectively. Portugal was affected by the sale of non-productive portfolios, and Spain by lower wholesale balances and with institutions.

• **Quarter-on-quarter**, gross loans and advances to customers, excluding reverse repos and the exchange rate impact, were stable. Growth of 14% in Argentina due to the peso's depreciation (-12% in euros), 4% in Chile, 3% in Brazil and 2% in Poland, while the remaining countries almost maintained their balances, except for Spain which declined 3% because of lower wholesale balances.

• Loans and advances to customers maintained a balanced structure at the end of the third quarter: individuals (47%), consumer credit (17%), SMEs and companies (24%) and SCIB (12%).

Gross loans and advances to customers (Excl. reverse repos)

EUR billion

Gross loans and advances to customers (Excl. reverse repos)

% operating areas. September 2019

➔ Customer funds

Customer deposits amounted to EUR 814,285 million, 5% growth in the last 12 months (in euros).

The Group uses **customer funds** (customer deposits excluding repos, and including mutual funds) for the purpose of analysing traditional retail banking funds.

• **Compared to September 2018**, customer funds increased 6%. Excluding the exchange rate impact, growth was also 6%, as follows:

–By markets, funds rose in all of them, except for Mexico (-1%) as it is focused on improving the cost of funding. Of note were Poland (+21%), Chile (+17%), the US (+12%) and Argentina (+10%). More moderate growth in Spain and the UK (+3%) and Santander Consumer Finance (+4%).

–By products, demand deposits rose 6% and time deposits 5%. The former in all units except Mexico and the latter in eight countries, notably the US, Argentina and the UK. Mutual funds rose 7%, with rises in all units except the UK.

• **In the third quarter**, customer funds remained virtually stable, both in euros and excluding exchange rate impacts, with stable balances and growing in most of the 10 core units:

–By products, demand deposits were stable as the decline in Spain and Mexico offset the growth in other countries. Time deposits rose 1%, while mutual funds grew 3%, particularly in Chile and Portugal.

–Customer funds continued to be well diversified by products: 60% are demand deposits, 21% time deposits and 19% mutual funds.

As well as capturing customer deposits, Grupo Santander, for strategic reasons, maintains a selective policy of issuing securities in the international fixed income markets and strives to adapt the frequency and volume of its market operations to the structural liquidity needs of each unit, as well as to the receptiveness of each market.

• In the first nine months, the Group issued:

–Medium- and long-term senior debt amounting to EUR 15,203 million and covered bonds placed in the market of EUR 6,031 million.

–There were EUR 13,108 million of securitisations placed in the market.

–Issuances to meet the TLAC (Total Loss-Absorbing Capacity) requirement amounting to EUR 2,599 million, in order to strengthen the Group's situation (senior non-preferred: EUR 1,531 million, preferred: EUR 1,068 million).

–Maturities of medium- and long-term debt of EUR 19,963 million.

• The net loan-to-deposit ratio was 112% (111% in September 2018). The ratio of deposits plus medium- and long-term funding to the Group's loans was 114%, underscoring the comfortable funding structure.

• Special mention must also be made of the EUR 1 billion green bond issued in October to start the Bank's global sustainable debt issuance plan, through this seven-year senior preferred debt bond. The spread was midswap plus 0.65%, thanks to strong demand (5.5 times the amount to be issued), and the large number of investors.

SOLVENCY RATIOS

- The CET1 ratio reached 11.30% following the organic generation of 19 bps in the quarter and continued to absorb regulatory impacts.
- Tangible equity per share was EUR 4.25, 2% higher than September 2018 (+8% including the dividend recorded and announced between both dates).
- The fully loaded leverage ratio was stable at 5.05% in the third quarter.

At the end of September 2019, the total phased-in capital ratio stood at 14.71% and the CET1 ratio (phased-in and fully loaded) at 11.30%, comfortably meeting the minimum levels required by the European Central Bank on a consolidated basis (13.178% for the total capital ratio and 9.678% for the CET1 ratio).

In the quarter, we continued to generate capital organically, +19 bps, as a result of underlying profit and the active management of risk weighted assets. As such, the organic generation in the year was 48 basis points.

This organic generation, together with favourable market movements benefiting from the held to collect and sell portfolios (due to falling interest rates), a slight positive perimeter impact (sale of Prisma and the acquisition of minority interests in Mexico) as well as the negative 13 bps impact from restructuring costs.

As a result, the fully loaded CET1 ratio would have been 11.83% before the accounting and regulatory impacts recorded in this period (-53 bps, mainly because of the IFRS 16 application and TRIMs).

Had the IFRS 9 transitional arrangement not been applied, the total impact on the CET1 would have been -23 bps.

In April 2019, the European Central Bank published the aggregate result of its Supervisory Review and Evaluation Process (SREP) carried out in 2018. Santander has lower capital requirements than the average of SSM banks. This positive differential was wider in 2018 than in 2017.

%

QoQ evolution	
Organic generation	+19 bps
Others	-2 bps
Regulatory impacts	-17 bps

(1) Restructuring costs (-13 bps); Prisma (+2 bps); Share buyback Mexico (+4 bps), Other (+2 bps).

(2) IFRS 16 (-19 bps); models and TRIM (-28 bps); Other (-6 bps).

(*) All 2018 and 2019 data was calculated using the IFRS 9 transitional arrangements, unless otherwise indicated. As indicated by the consolidating supervisor, a pay-out of 50%, the maximum within the target range (40%-50%), was applied for the calculation of the capital ratios in September 2019. Previously, the average cash pay-out for the last three years was considered.

RISK MANAGEMENT

- Santander maintained its medium-low risk profile in the third quarter with steady credit quality, low risk market activity focused on servicing our customers and limited exposure to operational events.
- The NPL ratio decreased to 3.47%, while cost of credit remained at 1% levels. Coverage remained virtually stable at 67%.
- Despite increased uncertainty and volatility in the geopolitical scenario, our market risk exposure remained at low levels.
- The operational risk profile remained stable with a similar distribution of losses by category in the quarter.

➔ Credit risk management

The positive trend in credit quality remained stable during the third quarter, supported by the positive year-on-year evolution of the NPL ratio, and stable coverage and cost of credit.

Non-performing loans amounted to EUR 34,326 million, similar to the second quarter. Excluding the exchange-rate impact, the volume of NPLs was also steady, with a slight increase in Brazil, Poland and Argentina offset by the US and the UK.

The Group's NPL ratio decreased slightly to 3.47% (-4 bps QoQ and -40 bps YoY). Significant reductions were observed in Portugal, the US, Chile and Spain on a year on year basis. The ratio increased in Brazil, Poland motivated by Deutsche Bank Polska's retail and SME business portfolio integration process, and Argentina due to the country's complex economic situation.

Loan-loss provisions made in the third quarter amounted to EUR 2,435 million, 14% greater than in the second quarter, mainly driven by seasonality in SC USA and extraordinary sales of charged-off portfolios in SCF in the second quarter.

Cumulative loan-loss provisions also increased year-on-year adding up to EUR 6,748 million (+5%), mainly led by the US portfolio growth and Argentina, as well as lower recoveries from portfolio sales in SCF.

The cost of credit remained at similar levels compared to the previous quarter and on a year-on-year basis reflecting the stability of the loan portfolio's credit quality.

%

Coverage ratio

Sep-18 Dec-18 Mar-19 Jun-19 Sep-19

Total loan-loss reserves amounted to EUR 23,112 million. Coverage at the end of September 2019 was 67% for the Group. It should be taken into account that in Spain and the UK, a large part of their portfolios has real estate collateral and therefore require lower coverage levels.

The Group's coverage by IFRS 9 stages remained stable on a year-on-year basis, with no significant movements.

Coverage ratio by stage

➔ Market risk

The global corporate banking trading activity risk is mainly interest rate driven, focused on servicing our customer's needs and measured in daily VaR terms at 99%. In the third quarter, VaR fluctuated around an average value of EUR 12.9 million and reached EUR 20.2 million, mainly as a result of the market volatility

and the exposure to interest rate risk in Brazil, always within the established limits. These figures are low compared to the size of the Group's balance sheet and activity. In addition, there are other positions classified for accounting purposes as trading (total VaR of EUR 13 million at the end of September 2019).

NOTE: In the Latin America, United States and Asia portfolios, VaR corresponding to the credit spreads factor other than sovereign risk is not relevant and is included in the interest rate factor.

➔ Structural and liquidity risk

- With regards to structural exchange rate risk, Santander's CET1 ratio coverage remained around 100% in order to protect it from foreign currency movements.
- In structural interest rate risk, during the third quarter, despite being a period of high volatility, mainly due to the US-China trade disputes, political situations in Italy and Argentina, Brexit and greater tensions in the Middle East, no relevant impact was generated in the ALCO activity.
- In liquidity risk during the third quarter, the Group kept a comfortable position, supported by a strong and diversified liquidity buffer, with ratios remaining well above regulatory limits.

➔ Operational risk

- The operational risk profile remained stable in the third quarter, although the volume of claims related to legacy Payment Protection Insurance (PPI) cases in the UK increased, at the deadline of the redress process. The cumulative impact from PPI claims in the year is EUR 183 million, which is higher than in the same period of last year, although this impact is lower than those announced by other competitors.
- In relative terms, levels of losses by Basel categories were similar, with those derived from civil claims with customers and external fraud representing the main proportion.
- Specific risk-monitoring frameworks continued to improve such as those for suppliers (focusing in actions to ensure compliance with the EBA Guidelines), the most significant change management processes (including digitalisation initiatives), as well as the implementation of fraud mitigating measures in the main units (Mexico, the UK and Brazil).
- Cybersecurity, a key area for the Group, continues to improve. Progress continued in the second half of 2019 in our cybersecurity transformation programme in order to strengthen detection, response and protection mechanisms. New policies have been developed and deployed to enhance management and control over critical IT infrastructure and assets.

GENERAL BACKGROUND

Economic activity slowed in the third quarter of 2019, particularly in mature economies, due again to trade negotiations, the uncertainty over Brexit and geopolitical uncertainties. The forecast for global growth is 2.9% (3.6% in 2018).

Slower growth was accompanied by a downward revision of inflation expectations. The balance of risks remains inclining toward lower growth, particularly due to the aforementioned political economy factors. In these circumstances, central banks put into effect more expansive policies. The central banks of the US, the Eurozone, Brazil, Mexico and Chile cut interest rates and maintain a downward bias.

Country	GDP change ¹	Economic performance
 Eurozone	+1.2%	The economy slowed because of lower growth in world trade and the uncertainty over the trade war and Brexit. Business expectations in the third quarter did not indicate improvements. The annual rate of inflation came down to 0.8% in September. The ECB took new monetary softening measures.
 Spain	+2.1%	The National Statistics Institute's review showed that the economy was not as strong as first estimated. Growth decelerated a little in the second quarter and in the third job creation weakened. Inflation slipped to 0.1% in September because of lower oil prices.
 Poland	+4.6%	Growth was slower in the second quarter. Domestic demand continued to be the main engine of growth. The unemployment rate remained at historic lows (3.2% in the second quarter). Inflation in September (2.6%) was still above target (2.5%). The benchmark interest rate, however, was held at 1.5%.
 Portugal	+2.0%	The economy lost a little steam in the second quarter and is expected to lose more because of the high external exposure (exports represent 48% of GDP). The jobless rate declined further to 6.3%. Inflation was negative for the third month running (-0.1% in September).
 United Kingdom	+1.7%	The economy contracted in the second quarter after growing strongly in the first due to the stock building in the face of a possible no deal Brexit. This performance could be repeated in the third quarter. Inflation in September fell to 1.7% and the unemployment rate dropped to 3.8% in the second quarter. The base rate remained at 0.75%.
 Brazil	+0.7%	The economy surprised upwards in the second quarter (+0.4%), driven by construction. Although the third quarter indicators are modest, they continued to reflect a gradual recovery. Inflation was still low (2.9% in September) and expectations below the target of 4.25%. The central bank cut its benchmark rate in the third quarter by 100 bps to 5.50% and intimated there would be further cuts.
 Mexico	+0.2%	Growth stagnated in the second quarter, due to lower investment and external demand's positive contribution. The central bank lowered its benchmark rate in the third quarter by 50 bps to 7.75%, the first cut in five years. Further cuts are expected in the coming quarters in an environment of moderate inflation (3.0% in September) and relative exchange rate stability.
 Chile	+1.8%	Growth accelerated in the second quarter, driven by investment in construction but lower exports. The central bank cut its benchmark rate by 50 bps in the second quarter to 2% (100 bps so far this year) and suggested more cuts. Inflation remained low (2.1% in September), below the 3% target.
 Argentina	-2.5%	The economy showed signs of improvement (+0.6% vs. -5.8% in the first quarter), but the financial volatility since August makes consolidation difficult. Inflation rose in the third quarter, following the moderation shown since April and the central bank raised interest rates and introduced capital controls.
 United States	+2.5%	GDP growth slowed in the second quarter due to the fall in investment and lower global growth. The unemployment rate remained close to its historic low (3.5% in September) but inflation (measured by the underlying private consumption deflator) was below the target of the Fed (1.8% in August), which cut its funds rate by 50 bps in the third quarter to 1.75-2%.

(1) Year-on-year change H1'19.

DESCRIPTION OF SEGMENTS

The segment reporting is based on financial information presented to the chief operating decision maker, which excludes certain items included in the statutory results that distort year-on-year comparisons and are not considered for management reporting purposes. This financial information (underlying basis) is computed by adjusting reported results for the effects of certain gains and losses (e.g.: capital gains, write-downs, impairment of goodwill, etc.). These gains and losses are items that management and investors ordinarily identify and consider separately to better understand the underlying trends in the business.

The Group has aligned the information in this operating segment section in a manner consistent with the underlying information used internally for management reporting purposes and with that presented throughout the Group's other public documents.

The Group executive committee has been determined to be the chief operating decision maker for the Group. The Group's operating segments reflect the organisational and management structures. The Group executive committee reviews the internal reporting based on these segments in order to assess performance and allocate resources.

The segments are differentiated by the geographic area where profits are earned, and by type of business. The financial information of each reportable segment is prepared by aggregating the figures for the Group's various geographic areas and business units. The information relates to both the accounting data of the units integrated in each segment and that provided by management information systems. In all cases, the same general principles as those used in the Group are applied.

The businesses included in each of the business areas in this report and the accounting principles under which their results are presented here may differ from the businesses included and accounting principles applied in the financial information separately prepared and disclosed by our subsidiaries (some of which are publicly listed) which in name or geographical description may seem to correspond to the business areas covered in this report. Accordingly, the results of operations and trends shown for our business areas in this document may differ materially from those of such subsidiaries.

At the beginning of July 2019, we announced that, starting with the financial information for the first half of 2019, we would carry out a change in our reported segments to reflect our current organisational and management structure.

This change in our reported segments aims to align the segment information to how segments and units are managed and has no impact on accounting figures at the Group level. The main changes, which have been applied to segment information for all periods included in the consolidated financial statements, are the following:

Primary segments

1. Creation of the new geographic segment Europe that includes the existing units under the previous Continental Europe segment (Spain, Portugal, Poland and Santander Consumer Finance) plus the UK (that was previously a segment on its own and is now a unit under the segment Europe).
 - The UK is aligned with the ring-fencing structure, including products and services distributed to our retail customers and the majority of our business customers. The businesses excluded are now incorporated in the rest of Europe.
 - Spain now includes the Real Estate Activity Spain unit, previously included in the rest of Europe, and it excludes some treasury businesses now reported in the rest of Europe and the online bank Openbank is now incorporated in the new digital segment (Santander Global Platform).
 - Rest of Europe, included within the Europe segment, comprises mainly (i) CIB businesses such as Banco Santander, S.A. branches outside of Spain (including the businesses excluded from the UK as a result of ring-fencing) as well as Spain's treasury business and (ii) Private Banking's Wealth Management & Insurance businesses in Switzerland, mutual funds in Luxemburg and Insurance in Zurich.
2. Creation of the new geographic segment North America that comprises the existing units under the previous US segment plus Mexico.
3. Creation of the new geographic segment South America that comprises the existing units under the previous Latin America segment except for Mexico.
4. Creation of a new reporting unit segment, Santander Global Platform, which includes our global digital services under a single unit:
 - Our fully digital bank Openbank and Open Digital Services.
 - Global Payments Services: payments platform to better serve our customers with value propositions developed globally, including Superdigital, Pago FX and our recently launched global businesses (Global Merchant Services and Global Trade Services).
 - Digital Assets: common digital assets and Centres of Digital Expertise which help our banks in their digital transformation.

Secondary segments

5. The Real Estate Activity Spain unit, that was previously a segment reported on its own, is now included in Retail Banking.
6. The insurance business, previously included in Retail Banking, is now included in the Wealth Management segment, which was renamed Wealth Management & Insurance.

7. The new digital segment (Santander Global Platform) is also incorporated as a secondary segment.

8. Finally, the change in reported segments also includes adjustments of the clients of the Global Customer Relationship Model between Retail Banking and Santander Corporate & Investment Banking and between Retail Banking and Wealth Management & Insurance.

The changes in the secondary segments have no impact on the primary segments.

To allow better quarter-on-quarter and year-on-year comparability, and as was published in the Relevant Fact in July 2019, the Group has provided the quarterly 2018 and first quarter of 2019 data on a new basis, in accordance with the new structure of the Group.

After these changes, the operating business areas are structured in two levels:

Primary segments

This primary level of segmentation, which is based on the Group's management structure, comprises five reportable segments: four operating areas plus the Corporate Centre. The operating areas are:

Europe: which comprises all the business activities carried out in the region. Detailed financial information is provided on Spain, Portugal, Poland, Santander Consumer Finance (which incorporates all the region's business, including the three countries mentioned herewith) and the UK.

North America: which comprises all the business activities carried out in Mexico and the US, which includes the holding company (SHUSA) and the businesses of Santander Bank, Santander Consumer USA, Banco Santander Puerto Rico, the specialised unit Banco Santander International and the New York branch.

South America: includes all the financial activities carried out by the Group through its banks and subsidiary banks in the region. Detailed information is provided on Brazil, Chile, Argentina, Uruguay, Peru and Colombia.

Santander Global Platform: includes our fully digital bank Openbank and Open Digital Services, Global Payments Services (Superdigital, Pago FX, Global Merchant Services, Global Trade Services) and Digital Assets (Centres of Digital Expertise, InnoVentures and Digital Assets).

Secondary segments

At this secondary level of segment reporting, the Group is structured into Retail Banking, Santander Corporate & Investment Banking, Wealth Management & Insurance and Santander Global Platform.

Retail Banking: this covers all customer banking businesses, including consumer finance, except those of corporate banking, which are managed through Santander Corporate & Investment Banking, and asset management, private banking and insurance, which are managed by Wealth Management & Insurance. The results of the hedging positions in each country are also included, conducted within the sphere of each one's assets and liabilities committee.

Santander Corporate & Investment Banking (SCIB): This business reflects revenue from global corporate banking, investment banking and markets worldwide including treasuries managed globally (always after the appropriate distribution with Retail Banking customers), as well as equity business.

Wealth Management & Insurance: Includes the asset management business (Santander Asset Management), the corporate unit of Private Banking and International Private Banking in Miami and Switzerland and the insurance business (Santander Insurance).

Santander Global Platform: includes our fully digital bank Openbank and Open Digital Services, Global Payments Services (Superdigital, Pago FX, Global Merchant Services, Global Trade Services) and Digital Assets (Centres of Digital Expertise, InnoVentures and Digital Assets).

In addition to these operating units, which report by geographic area and businesses, the Group continues to maintain the area of **Corporate Centre**, that includes the centralised activities relating to equity stakes in financial companies, financial management of the structural exchange rate position, assumed within the sphere of the Group's assets and liabilities committee, as well as management of liquidity and of shareholders' equity via issuances.

As the Group's holding entity, this area manages all capital and reserves and allocations of capital and liquidity with the rest of businesses. It also incorporates amortisation of goodwill but not the costs related to the Group's central services (charged to the areas), except for corporate and institutional expenses related to the Group's functioning.

As described on the previous page, the results of our business areas presented below are provided on the basis of underlying results only and including the impact of foreign exchange rate fluctuations. However, for a better understanding of the actual changes in the performance of our business areas, we provide and discuss the year-on-year changes to our results excluding such impact.

On the other hand, certain figures contained in this report, including financial information, have been subject to rounding to enhance their presentation. Accordingly, in certain instances, the sum of the numbers in a column or a row in tables contained in this report may not conform exactly to the total figure given for that column or row.

EUR 3,640 Mn

Underlying attributable profit

EUROPE

Highlights (changes in constant euros)

- Given the current macroeconomic environment characterised by lower for longer interest rates, we are working on our franchise to simplify our business model and structures and operate in a more integrated way in the medium-term.
- In terms of volumes, in an environment of lower economic growth, gross loans and advances to customers (excluding reverse repos) rose 2% year-on-year and customer funds 5%.
- Underlying attributable profit for the period amounted to EUR 3,640 million, down 4% compared to the first nine months of 2018, due to lower gains on financial transactions (markets) and net fee income (mainly CIB) and higher provisions. Conversely, net interest income increased and costs fell.

Strategy

Santander's subsidiaries in Europe are managed according to their local priorities. At the same time, initiatives are being considered to enable greater integration of businesses, shared services and cost saving measures. For example:

- Integration of the different technological platforms and acceleration of the Bank's digital transformation, to help improve the customer experience and expand the distribution channels for our products and services.
- Continued obtention of additional synergies from the ongoing integration processes, especially in the case of Popular in Spain and the retail and SME business of Deutsche Bank Polska in Poland.
- And finally, simplification of our business model, reducing the number of products to gain efficiency and agility, but maintaining a full value proposition that is capable of meeting the daily needs of our individual customers and offering tailored solutions for SMEs and large companies.

All of this, with the medium-term objective to obtain EUR 1 billion of additional savings, based on our global capabilities to strengthen operational efficiency in the region.

Business performance

Gross loans and advances to customers (excluding reverse repos) increased by 2%, driven by strong organic growth in SCF (France, Spain and Nordic countries) and the integration of Deutsche Bank Polska's retail and SME business in Poland.

Customer funds increased by 5% mainly due to higher retail deposits in Spain, and the inclusion of balances of the retail and SME business from Deutsche Bank Polska in Poland.

Results

Underlying attributable profit amounted to EUR 3,640 million in **the first nine months of 2019**, 4% less than in the same period of the previous year. By lines:

- Revenue was down 1%. In an environment very low interest rates, net interest income increased by 1%, supported by higher volumes in SCF, the increase in Poland and the CIB business. This increase is offset by lower gains on financial transactions (markets) and net fee income (mainly CIB).
- Costs decreased 1% (-2.5% in real terms) reflecting the first savings from our optimisation processes.
- Higher provisions due to the integration in Poland and lower levels of SCF portfolio sales. Cost of credit remained at very low levels (0.25%).

Compared to the previous quarter, underlying attributable profit rose 9% due to higher gains on financial transactions, net fee income recovery and the contribution to the Single Resolution Fund (SRF) recorded in the second quarter. Costs continued to fall.

EUR 1,185 Mn

Underlying attributable profit

Spain

Highlights

- After the successful integration of Banco Popular with the migration of all offices and customers to the Santander platform, we are focusing on optimising the commercial network.
- Further improvement in customer spreads (+23 bps vs. Q1'18), due to the effect of lower cost of funds (+20 bps) and the better yield on loans (+3 bps).
- Sustained reduction in costs quarter after quarter (-7% year-on-year), meeting the efficiencies committed with the integration of Popular.
- The first nine months underlying attributable profit was 3% higher year-on-year at EUR 1,185 million, mainly due to lower costs.

Commercial activity

Sustained commercial dynamism with year-on-year growth in business combined with increased profitability in all segments and products.

We are taking advantage of Santander's capabilities and the positive commercial dynamism in companies (focusing on value-added products), which was reflected in the 11% growth year-on-year in international business activity. Consumer credit rose 24% year-on-year, driven by pre-concession and digital subscriptions.

The main drivers of loyalty continued to grow, increasing customer transactions. Growth in cards turnover and point-of-sale terminals was 13% and 9%, respectively, and 5% in new insurance premiums, once this business was reorganised with the new joint ventures of Mapfre¹ and Aegon.

For the second year running, we were rated the best contact centre of any sector, and for the fifth year running the best in the financial sector.

The fourth *Work Café* was opened in Madrid, strengthening our bid for a new commercial model focused on capturing business in the office and maximising digitalisation (80% of customers are digital).

Business performance

Gross loans and advances to customers (excluding reverse repos) were affected by the deleveraging in wholesale banking due to the market environment and the move toward a capital efficient model, while new mortgages do not yet offset maturities. The stock of consumer loans, however, increased in the year.

Customer funds increased by EUR 8,825 million in the year, mutual funds grew by EUR 1,455 million and demand deposits by EUR 12,780 million, partially offset by lower time deposits.

Results

The first nine months underlying attributable profit was 3% higher year-on-year at EUR 1,185 million. By lines:

- In a low interest rate environment, net interest income fell 2%, due to decreased volumes and the impact of IFRS 16, partially offset by the improvement in customer spreads. Excluding the IFRS 16 impact, net interest income rose 1%.
- Net fee income fell 7%, due to lower activity at SCIB and moving toward more conservative mutual funds. Gains on financial transactions rose 24%, due to active portfolio management, taking advantage of market movements.
- Operating expenses continued to fall strongly (-7% year-on-year) due to the efficiencies resulting from Popular's integration and the optimisation efforts.

Compared to the second quarter, the third quarter underlying attributable profit was 45% higher because of lower costs and loan-loss provisions, active portfolio management and the recording in the second quarter of the SRF contribution.

These results do not include restructuring costs from the integration of Banco Popular.

Santander Consumer Finance

Highlights (changes in constant euros)

- SCF continues to be the European consumer finance leader, with critical mass and among the Top 3 in its markets in Europe. Gross loans and advances to customers (excluding reverse repos) rose 7% and new lending 5% year-on-year.
- Total income increased 3% year-on-year, largely due to net interest income and net fee income which, together with cost control, pushed up net operating income by 3%.
- Underlying attributable profit for the first nine months was EUR 995 million (virtually unchanged year-on-year). Good performance of revenue and the cost of credit still at low levels for this business.
- Continued high profitability: RoTE above 15% and RoRWA of more than 2%.

Commercial activity

SCF continued its growth based on its solid business model, enabling it to confront new market trends: diversification by country, scale, leadership in efficiency and risk and recovery systems that allow it to maintain a better performance than its European competitors in the key metrics.

Management continued to focus on boosting auto finance and increasing consumer finance through strengthening digital channels.

The auto business in SCF continued to grow despite the fall in car sales in Europe (-2% in the first nine months), due to the good performance of the brands with which SCF operates, via more than 115 captive agreements.

Business performance

New lending rose 5% year-on-year, underpinned by commercial agreements in several countries. Of note: Italy (+13%), France (+9%) and Spain (+6%).

Customer deposits (excluding repos) amounted to almost EUR 38,000 million and continues to be a factor that differentiated us from our competitors. Balances rose 1% in the quarter, due to various measures taken to complete the digital transformation plan.

Recourse to wholesale funding amounted to EUR 12,968 million. Customer deposits (excluding repos), issuances and securitisations covered 74% of net loans.

Results

First nine months underlying attributable profit of EUR 995 million, in line with that of the same period of 2018:

- Net interest income rose 4% due to higher volumes and net fee income (+3%).
- Costs rose at a slower pace (+3%) with an efficiency ratio of 44%, in line with that of the previous year, benefiting from efficiency projects in several units.
- The cost of credit remained at low levels (0.38%), reflecting a conservative risk appetite and a solid credit management policy. The NPL ratio was 2.25%, 20 bps lower than in the first nine months of 2018.
- The largest profits were generated by Germany (EUR 248 million), the Nordic countries (EUR 224 million) and Spain (EUR 170 million).

Compared to the second quarter of 2019, underlying attributable profit was 2% higher despite the rise in loan-loss provisions driven by lower portfolio sales in the quarter, driven by higher income and lower costs.

EUR 828 Mn

Underlying attributable profit

United Kingdom

Highlights (changes in constant euros)

- Business activity remained robust with a further increase in mortgages, digital and loyal customers as well as improved customer experience.
- Mortgage lending continued to grow as we carry on supporting our customers and strengthening our franchise in a very competitive market. Customer funds increased driven by a successful retail savings campaign, the 1|2|3 Business Current Account and higher deposit inflows in CIB.
- Underlying attributable profit was 19% lower than the first nine months of 2018, reflecting the continued competitive pressure on mortgage margins and SVR volumes attrition.

Commercial activity

We continue to focus on building stronger customer relationships and a seamless customer experience. This has allowed us to significantly improve customer satisfaction in the last 3 years.

The number of loyal customers continued to grow year-on-year with individual customers +5%, SMEs and corporates +8%. Loyal customers as a percentage of total active customers rose 2 pp to 32%.

Digital innovation and adoption continues to drive change in the organisation. We have attracted 383,000 digital customers in the last 12 months (+7%), retained 60% of refinanced mortgage loans online (+5 pp year-on-year), and 52% of current accounts (+8 pp) and 63% of credit cards (+2 pp) were opened through digital channels.

Our multi-year strategic transformation programme, announced earlier in the year, has predominantly focused on the restructure of the retail branch network and reshaping our corporate business.

Business performance

Gross loans and advances to customers (excluding reverse repos) increased over the last 12 months. Growth in mortgage lending was partially offset by managed reduction in CRE lending.

Customer funds increased 3%, backed by higher retail savings and corporate deposits.

Results

Underlying attributable profit in **the first nine months** of EUR 828 million, down 19% year-on-year (excluding FX impacts):

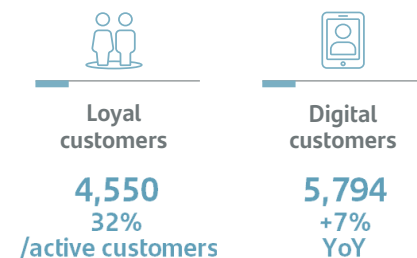

- Total revenue 10% lower due to continued competitive pressure on mortgage margins and SVR attrition, net fee income reduction, due to overdraft and insurance, and lower gains on financial transactions.
- Costs reduced 1%, reflecting the first cost savings from our transformation programme. In real terms (excluding inflation), costs were 3% lower.
- Loan-loss provisions increased by 22%, partly due to releases in 2018, although the cost of credit remained at very low levels (8 basis points) and the NPL ratio decreased to 1.08%, supported by prudent approach to risk management.

Compared to the **second quarter of 2019**, underlying attributable profit fell by 22%, as higher provisions and lower trading gains were partially offset by improved net fee income (following a weak second quarter), flat costs and lower tax rate.

These underlying results do not include the impact of the transformation programme and additional PPI charges related to legacy cases ahead of the deadline of the redress process (together totalling EUR 115 million in the quarter, EUR 287 million in the year).

EUR 385 Mn

Underlying attributable profit

Portugal

Highlights

- The Bank continued its commercial and digital transformation, marketing new products for companies, SMEs and university students, and making the granting of new mortgages simpler and faster.
- Market shares in new lending to companies and mortgages remained around 20%, in a market that is still deleveraging.
- Underlying attributable profit increased 12% year-on-year, due to lower costs from optimising the structure and a very low cost of credit.

Commercial activity

The Bank continued its strategy to tailor products and services to customers' needs, focusing on increasing the number of customers and their loyalty:

- The commercial transformation continued, with a competitive offer of cards for university students, renewed benefits in *Mundo 1/2/3* and a strengthened presence in the agrifood and tourism segments. As a result of this strategy, loyal customers already account for 45% of active customers.
- We also continued to transform the branch network, focused more on the customer experience, with two *Work Cafés* opened in Lisbon and Coimbra, and a new Smart Red office at Lisbon's airport.
- The Bank continued its policy of local proximity and offering non-financial solutions (*Santander Advance Empresas*). Events included *Box Santander Advance*, management courses for company executives and the scholarship programme.

Business performance

Gross loans and advances to customers (excluding reverse repos) were 1% lower than a year ago, although they remained stable this year because of more new mortgages and loans to companies.

Customer funds excluding repos increased 8% year-on-year, spurred by the growth in deposits and mutual funds.

Results

The first nine months underlying attributable profit rose 12% year-on-year to EUR 385 million. By lines:

- Total income increased 3%, driven by net fee income (+4%) and gains on financial transactions because of ALCO portfolio sales, while net interest income fell 1%, in line with the year-on-year dynamic of the stock of credit and low interest rates.
- Costs declined further, enabling net operating income to rise 9% and the efficiency ratio to improve 2.9 pp to 44.8%.
- Provisions were slightly positive due to greater recoveries, mainly in the first quarter of 2019. The NPL ratio improved significantly to 4.90% from 7.43% in September 2018, and the cost of credit was 0%.

Compared to the second quarter of 2019, underlying attributable profit was slightly lower mainly because of reduced gains on financial transactions due to higher ALCO portfolio sales in the second quarter.

EUR 245 Mn

Underlying attributable profit

Poland

Highlights (changes in constant euros)

- Santander is the second largest bank in Poland in terms of assets. The main management focus is on improving customer relationships, maximising business income and obtaining synergies.
- Loans and advances to customers (excluding reverse repos) grew 5% in the year to September and customer funds 1% driven by active liquidity management and the cost of deposits.
- In the first nine months of the year, underlying attributable profit was boosted by the Deutsche Bank Polska acquisition and faster growth in revenue than in costs, though it was negatively impacted by the greater BFG and Banking Tax contributions.

Commercial activity

The Bank is focused on synergy achievement and improving customer relationships:

- We opened the first *Work Café* in the country, expanding this new customer relationship model, which drives increased attraction and loyalty, into Poland.
- Since its launch in September 2017, more than 1.75 million *As I Want It* accounts have been opened providing flexibility and responding to customer needs.
- As part of the Group's sustainability objectives, a Santander-led consortium of 5 banks signed a PLN 2 billion ESG (Environmental, Social and Governance) loan with one of Poland's main energy utilities. It was the first transaction of this type in Poland and Eastern Europe.
- In September 2019 Santander Bank Polska was ranked at the first position in the *Newsweek's* Friendly Bank ranking in the Traditional Banking category and the second position in the Internet Banking category. Additionally, we were named the Best Investment Bank in Poland in *Euromoney Awards for Excellence 2019* in the quarter.

Business performance

Year-on-year, loans and advances to customers excluding reverse repos grew strongly, mainly due to the integration of the retail and SME businesses of Deutsche Bank Polska. In the year to September (a period not affected by the acquisition), loans increased 5%. The third quarter had record cash loan sales, with volumes doubling those of Q3'18. As such market share in new sales increased to 13%.

There was similarly strong year-on-year growth (+22%) in deposits favoured by the acquisition. In the year to date, customer funds increased less than credit, +1%, due to active liquidity management relating and cost of deposit optimisation.

Results

Underlying attributable profit of EUR 245 million in **the first 9 months of 2019**, 6% more than in the same period in 2018:

- Positive top line growth, benefiting from the integration of Deutsche Bank Polska's retail and SME business, where gross income increased 16% and efficiency improved 2 pp.
- Loan-loss provisions increased by almost 40% year-on-year, in line with the Bank's expectations, mainly due to the larger portfolio.
- Other income was affected by the higher BFG and Banking Tax contributions, the latter adding to fiscal pressures as it is non-deductible.

Compared to the second quarter of 2019, underlying attributable profit was up 8%, driven by positive NII (due to repricing of deposits since June) and net fee income growth, flat costs and lower LLPs. This positive evolution was partially offset by the higher dividend income that is seasonally recorded in the second quarter.

NORTH AMERICA

Highlights (changes in constant euros)

- In North America, the US and Mexico are managed according to their local strategic priorities, while increasing coordination and cooperation between the two units.
- In volumes, there was year-on-year growth both in gross loans and advances to customers and in customer funds.
- In results, underlying attributable profit increased 20% year-on-year, driven mainly by customer revenue and the continued improvement in efficiency.

EUR 1,278 Mn

Underlying attributable profit

Strategy

In the United States, SBNA's strategy focuses on improving customer satisfaction through our digital channels and branches and continuing to pursue our Lead Bank initiatives in Commercial Banking. In SC USA, the focus is to drive originations growth and improve profitability via pricing and risk management. In addition, SC USA started a stock repurchase programme.

In Mexico, the main objectives are to improve the distribution network and develop digital channels to attract new customers and increase their loyalty.

Coordination between the units has increased. We continue to pursue joint initiatives, such as:

- Continued development of the USMX trade corridor. SCIB and Commercial Banking are working to deepen relationships with existing clients and increase client acquisition in both countries, which is reflected, among others, in corridor revenue growth (SCIB: +39%; Commercial: +19%).
- Launch of a same-day remittance service from Santander US branches to beneficiaries in Mexico in the fourth quarter.
- Joint technology initiatives between the countries.

Business performance

Gross loans and advances to customers (excluding reverse repos) increased 9% year-on-year, driven by strong growth in the US (+10%). More moderate growth quarter-on-quarter.

Solid trend in customer funds (excluding repos), up 7% year-on-year, mainly due to the growth in time deposits at SBNA and corporate deposits at the New York branch. Mutual funds increased by 6%.

Results

In the first nine months of the year, underlying attributable profit was EUR 1,278 million (16% of the Group's total operating areas), up 20% year-on-year.

- Good performance in total income at both units, driven by both net interest income (+7%) and net fee income (+5%).
- Expenses grew less than revenue, resulting in an improvement in the efficiency ratio to 42% (1 pp better than in the same period 2018). Cost control in the US, (+0.9% in real terms) and increases in Mexico relating to the investment plan.
- Provisions were up 7%, principally as a result of increased volumes in the US. The NPL ratio was fell to 2.21% and coverage rose to 156%. The cost of credit remained virtually unchanged at 2.93%.

In the quarter, the underlying attributable profit decreased 23% affected by the increased provisions in the US, which are seasonally lower in the second quarter.

EUR 619 Mn
Underlying attributable profit

United States

Highlights (changes in constant euros)

- The strategy is focused on improving customer satisfaction at SBNA and at SC USA on deepening relationships with auto manufacturers and dealer groups to increase originations.
- In volumes, the improved year-on-year trend in gross loans and advances to customers excluding reverse repos continues to drive higher revenue to help offset the impact of rate decreases.
- Underlying attributable profit increased 27% in the first nine months of the year compared to the same period of 2018, due to a strong top line performance, with total revenue up 8% resulting in an improved efficiency ratio.

Commercial activity

In 2019, Santander US remains focused on the following strategic priorities:

- **Santander Bank:** Retail Banking's digital and branch transformation initiatives remain key to enhancing customer experience and growing customers and deposits. Commercial Banking continues to see gains from its "Lead Bank" strategy, winning relationships with US companies that Santander can serve uniquely. SBNA's joint initiative with SC USA in auto finance continues to generate high volumes, having originated USD 5 billion in the first three quarters of the year.
- **Santander Consumer USA:** The key levers to drive profitability remain increasing originations and management of credit risk and pricing. In Q2, the agreement with Fiat Chrysler was amended, strengthening SC USA's partnership and establishing an operating framework through 2023. In addition, SC USA has begun the repurchase of USD 1.1 billion of common stock in the market since August 2019.

Business performance

Gross loans and advances to customers (excluding reverse repos) improved 10% year-on-year (+1% in the quarter) due to lending growth in retail banking (auto) and commercial banking. Originations increased 11% year-on-year at SC USA, mainly driven by Chrysler capital loans (+52%).

Customer funds increased slightly quarter-on-quarter though strong growth year-on-year (+12%) boosted by time deposits at SBNA and corporate deposits at the New York branch.

Results

Underlying attributable profit in the first three quarters of 2019 of EUR 619 million, is 27% more than in the same period of 2018. The year-on-year comparison of net interest income and provisions is affected by methodological changes in the accrual of TDRs* made at the end of 2018, though with almost no impact on bottom line results.

- Total revenue up 8% (+5% ex. TDRs*) due to higher loan and leasing volumes.
- Costs increased 3% driven by higher Personnel and Technology spend, though the efficiency ratio is 2 percentage points better than in 2018.
- Loan-loss provisions were up 10% (+2% ex. TDRs*) driven mainly by the higher loan balances across the portfolio.

Compared to the previous quarter, underlying attributable profit declined due to higher provisions at SC USA (due to seasonally low provisions in the second quarter).

(*) TDR: Troubled debt restructuring

EUR 659 Mn

Underlying attributable profit

Mexico

Highlights (changes in constant euros)

- The digital and operational transformation strategy together with an innovative value offer is reflected in greater customer attraction and increased loyalty.
- Gross loans and advances to customers (excluding reverse repos) increased, notably payroll, mortgages and credit cards. Customer funds fell 1% due to the management of spreads, although growth in deposits from individuals and SMEs continued.
- Underlying attributable profit was up 14% year-on-year, underpinned by the good performance of customer revenue income and loan-loss provisions, which more than offset the rise in costs.

Commercial activity

The commercial strategy remained focused on improving the distribution model and boosting the use of digital channels in order to attract new customers with new products and services:

- The distribution model strategy continued to progress, with the transformation of 475 branches and the number of latest generation full function ATMs reaching 981.
- The *Santander Plus* programme has captured more than 6.7 million customers, 52% of them new ones.
- We also launched *Gastos Médicos Santander* in alliance with GNP Seguros, the first insurance of this kind in Mexico, offered directly in bank branches.
- In digital strategy:
 - *SúperMóvil* has the new functionality of cardless cash withdrawals from ATMs simply, safely and free of commissions.
 - We inaugurated *Isla Financiera Santander* in several shopping centres, an innovative proposal that combines digital banking with personal advice.
 - Strategic alliance with CONTAQi and InnoHub, fintech developers specialised in the SME segment, that will boost our value-added offer and strengthen our leadership in this segment.

Strong year-on-year growth of digital (+51%) and mobile banking customers (+69%).

Business performance

Gross loans and advances to customers (excluding reverse repos) increased 4% year-on-year, while maintaining the focus on profitability. Loans to individuals rose 7% with notable growth in payroll loans (+11%), mortgages (+7%) and credit cards (+7%). Large corporate loans increased 5% and SMEs 2%.

Customer funds decreased 1%, as time deposits, which grew 6%, did not offset the fall in demand deposits impacted by increased interest rates. Those of individuals were up 9%, reflecting the good performance of the strategy of attracting and retaining customers.

Results

The first nine months underlying attributable profit was 14% higher than in the same period of 2018 at EUR 659 million. By lines:

- Net interest income rose 10%, driven by increased volumes and higher average interest rates. Net fee income grew 5%, mainly from cards and insurance, and gains on financial transactions fell because of weak activity in the markets.
- Operating expenses increased 7%, reflecting the ongoing investment plans.
- Loan-loss provisions fell 1%, with good credit quality in all metrics.

Compared to the second quarter of 2019, profit was 7% higher due to the good performance of net interest income and lower provisions.

EUR 2,977 Mn

Underlying attributable profit

SOUTH AMERICA

Highlights (changes in constant euros)

- In South America, the focus is to accelerate profitable growth and lead the retail financial industry. To this end, we have a strategy that seeks to strengthen a more connected regional network and facilitate the expansion of successful businesses to other countries in the region.
- In activity, there was a volume growth in the last 12 months. Increases in all countries, where we are capturing new business opportunities.
- Regarding results, underlying attributable profit increased by 18% year-on-year, boosted by revenue.

Strategy

The units in the region continued identifying initiatives that allow the businesses to expand, further leveraging positive experiences in other markets, for example:

- In **auto financing**, we are using the Group's experience and the development of this business in Brazil to boost growth in other countries. In Colombia, for example, we have signed two alliances with digital vehicle platforms to strengthen our position. In terms of **financing goods and services**, we plan to export Uruguay's successful model to Brazil and to other regions.
- In **payment methods**, where Santander is one of the largest credit card issuers and merchant acquirers in the region, we are exploring e-commerce strategies, instant domestic and international transfers and the roll-out of *Getnet*, our acquiring business in Brazil, to the rest of Latin America. We also launched *Superdigital* in Chile, following our expansion strategy to other regions.
- Further developed the **retail franchise**, in particular the mass market segment, through increased penetration of new channels. Sales through digital channels already account for a high percentage of the total in Brazil and Argentina, and continued growing in Chile, driven by the new offers launched in the *Life* model. The *Work Café* experience is being developed further, with the opening of new branches in Chile, Argentina and Brazil in the quarter.

Business performance

Gross loans and advances to customers (excluding reverse repos) increased in all units. With regard to September 2018, Uruguay grew 15%, Brazil 8% and Chile 7%. Colombia and Peru present very high growth rates but from smaller bases.

Customer funds also rose in the last 12 months and in all units. Demand deposits (+14%), time deposits (+4%) and mutual funds (+10%) increased year-on-year.

Results

Underlying attributable profit in the first nine months of the year amounted to EUR 2,977 million (38% of the Group's total operating areas), up 18% year-on-year due to:

- Total income increased 9%, underpinned by the sound performance by commercial revenue, driven by higher volumes, spread management and increased loyalty. Net interest income rose 8% and net fee income increased by 15%.
- Costs reflect commercial transformation plans, greater digitalisation of the retail network, reviews of collective wage agreements and high inflation in Argentina.
- Loan-loss provisions increased at a slower pace than credit, enabling the cost of credit to improve by 10 bps in the last twelve months to 2.90%. In credit quality, the NPL ratio was 4.81% and coverage was 90%.

In the quarter, underlying attributable profit rose 2% driven by customer revenue and gains on financial transactions.

EUR 2,249 Mn

Underlying attributable profit

Brazil

Highlights (changes in constant euros)

- The focus on customer service combined with an efficient and profitable model enabled us to keep on growing in the current environment.
- Increased volumes with loans gaining selective market share while the cost of credit declined in the last 12 months.
- Strong revenue growth, underpinned by increased volumes, combined with controlled costs were reflected in a notable improvement in the efficiency ratio to 32%.
- Sustainable quarterly underlying attributable profit growth to EUR 2,249 million in the first nine months (+19% year-on-year), with RoTE of 22%.

Commercial activity

We continued to progress in our strategic actions, including:

- We were recognised as the Best Bank in Brazil and the Best Bank in Latin America by *Euromoney 2019* and as the bank that is most changing the world by *Fortune*.
- We were also chosen as one of the Best Companies to Work For in Brazil for the fourth year running by GPTW (*Great Place to Work*).
- We continued to expand our shops specialised in agribusiness and microcredits to strategic regions in the centre of the country where we have less presence. This was reflected in an increase in agribusiness volumes market share and the strong expansion of *Prospera* customers, which almost doubled to close to half a million.
- We continued to be the leader in the auto segment, with a 25% market share in loans to individuals.
- We were pioneers in launching a solution that enables POS users with Bluetooth in the market to take advantage of the *Getnet* offer without having to acquire a new POS. We also launched the *POS SuperGet Mobile*.
- In cards, we launched new functions in the *App Way*, such as instantaneous P2P transfers, division of accounts between mobile phone contacts and payments via QR code, which increased the transaction capacity of the more than 7 million active users.

Business performance

Loans grew 8% year-on-year, with profitable gains in market share. Of note was the performance in the individuals (+16%) and consumer finance (+16%) segments.

Customer funds rose 6% year-on-year. Deposits increased 4%, driven by demand deposits (+12%).

Results

First nine months underlying attributable profit of EUR 2,249 million (+19% year-on-year). Of note:

- Net interest income rose 6% year-on-year, with better spreads from credit and liabilities, partly offset by lower market margins.
- Net fee income grew 12% year-on-year, with rises in almost all lines. Of note: cards (+11%) and insurance (+18%).
- Operating expenses increased 4%, less than revenue, which helped improve the efficiency ratio to 32.4% (-82 bps year-on-year).
- Our solid risk management is reflected in stable provisions. The cost of credit dropped to 3.85% (-32 bps), the NPL ratio was 5.33% and coverage 101%.

Compared to the second quarter of 2019, underlying attributable profit rose spurred by higher customer revenue and lower provisions.

Highlights (changes in constant euros)

- We continued to focus on the commercial and digital transformation in order to attract new customers and boost loyalty, launching new products which achieved a record rise in new customers in the quarter.
- Business growth with acceleration in some segments, mainly individuals.
- First nine months underlying attributable profit increased 6% year-on-year, benefiting from the performance of markets and lower provisions.

EUR 473 Mn

Underlying attributable profit

Commercial activity

We continued the strategy focused on offering an attractive profitability backed by our digital transformation:

- We continued to transform the network, opening more *Work Café* branches in the quarter and continuing with the pilot of *Work Café 2.0*, with good initial results in efficiency and productivity.
- The satisfactory evolution of the *Santander Life* products produced a strong rise year-on-year in new *Life* customers. Of note are the latest offers such as *Cuenta Life* (a digital demand account) and the new credit card associated with the *Meritolife* programme which allows accumulation of Latam air miles.
- In June, we presented *SúperHipoteca*, a differential mortgage that offers a maturity of more than 30 years and is aimed at individuals under the age of 35.
- In July, we completed the soft launch of *Superdigital* and made subsequent improvements to the platform. The hard launch is set for the fourth quarter.

All these measures led to a record rise in new customers in the third quarter, doubling the number of an average quarter.

Business performance

Gross loans and advances to customers (excluding reverse repos) rose 7% year-on-year, underpinned by mortgages (+11%), consumer finance (+10%) and large corporates (+5%). Loans to SMEs rose 3%.

Customer funds rose 17%, with 19% growth in demand deposits and 30% in mutual funds.

Results

First nine months underlying attributable profit of EUR 473 million, 6% higher year-on-year. Of note were:

- Gross income increased 2%, driven by a 94% rise in gains on financial transactions (due to the results of customer treasury and ALCO portfolios). Net interest income was impacted by lower inflation than in 2018 and the repricing of operations to lower interest rates. Net fee income fell 6% partly because of wholesale business.
- Operating expenses rose because of investments in technology and branches.
- Loan-loss provisions were 9% lower and the cost of credit improved to 1.06% (-12 bps). The NPL ratio decreased to 4.48% and coverage was 57%.

Compared to the second quarter of 2019, underlying attributable profit increased slightly, as higher gains on financial transactions and lower costs more than offset the fall in net interest income due to lower inflation.

EUR 97 Mn

Underlying attributable profit

Argentina

Highlights (changes in constant euros)

- Since August, the Argentinian economy has been suffering from a relative weakening of the local currency and an increase in the risk premium, against a backdrop of a downward revision to the macroeconomic outlook.
- We continued to focus on our four strategic pillars: selective growth, customer experience, efficiency and transformation.
- Santander is the largest privately-owned bank in Argentina by business volume (loans + deposits + mutual funds).
- First nine months underlying attributable profit of EUR 97 million. The year-on-year comparison is favoured by high interest rates and impacted by a greater monetary adjustment for inflation than in 2018.

Commercial activity

The commercial strategy is focused on transactional business and customer service improvements. Of note were the following in the third quarter:

- *Launch of iU*: a dedicated proposal for 18 to 31-year-olds which includes financial and non-financial benefits, such as mentoring, scholarships to study and an online platform for distance learning, among others.
- *VIP banking*: a subsegment for the Bank's notable customers in order to offer them a tailored customer care model and exclusive experiences.

In addition, we continued to advance in the digital transformation of the main processes and products. Loyal customers accounted for 47% of active customers and digital ones 75% (+4% year-on-year).

Business performance

Gross loans and advances to customers (excluding reverse repos) were impacted by recession and higher interest rates, with growth of 17% year-on-year, below inflation in this period. The peso denominated portfolio increased, driven by inflation-adjusted products (mortgages, auto finance) and by cards, while dollar balances declined in the currency of origin.

Customer deposits (excluding repos) rose 11%. Local currency deposits grew 28% (backed by demand and time deposits) and foreign currency ones declined (-6%; -33% in currency of origin, in line with the financial sector dynamics). The excess liquidity is placed in central bank notes.

Results

First nine months underlying attributable profit of EUR 97 million, 111% more than in the same period of 2018, including a greater negative impact from the high inflation adjustment than in 2018.

As regards the main income statement lines:

- Revenue rose 86%, growing above inflation. Net interest income rose 123%, underpinned by higher interest rates and higher volumes of central bank notes. Net fee income increased 83% driven by greater foreign currency transactions and income from accounts and cash deposits.
- Costs surged 85%, hit by the inflationary environment and the peso's depreciation.
- Loan-loss provisions amounted to EUR 182 million, with an NPL ratio of 3.64% affected by the environment and higher provisions in the individuals segment. Coverage remained high at 134%.

Uruguay

EUR 111 Mn

Underlying attributable profit

Highlights (changes in constant euros)

- The Group is the country's leading privately-owned bank, doing business with all segments and with a strategy focused on retail banking, improving efficiency and enhancing the quality of service.
- Underlying attributable profit rose 16%, spurred by the good performance of customer revenue and improved efficiency.

Commercial activity and business performance

Santander continued to focus on improving customer satisfaction and increasing loyalty. Loyal customers rose 23% and now account for 25% of active customers.

We continued to advance in our digital transformation strategy and in modernising channels. The number of digital customers increased 8% (digital penetration of 48%, up from 45% in September 2018), while transactions via digital channels rose 34% year-on-year.

The Group's consumer finance companies lead the local market, with a market share of more than 22%, driven by the commercial activity. In line with our strategy of innovation and contributing to people's progress, we launched *Prosperá*, which satisfies the demand for microcredits to small businesses.

Gross loans and advances to customer (excluding reverse repos) grew in target segments, products and currencies: +12% in consumer credit and cards and +15% in the national currency portfolio. Customer deposits (excluding repos) in pesos grew 14% and foreign currency deposits increased 8% year-on-year.

Results

First nine months underlying attributable profit of EUR 111 million, 16% higher year-on-year:

- Gross income rose 16%, with increases in both net interest income and net fee income.
- Operating expenses rose at a slower pace than total income, improving the efficiency ratio to 42.6% (-106 bps year-on-year).
- Similar loan-loss provisions year-on-year. High coverage (110%) and cost of credit at 2.39%.

Compared to the second quarter of 2019, underlying attributable profit rose 13%, backed by net interest income and gains on financial transactions.

Peru Highlights (changes in constant euros)

The strategy remained focused on the corporate segment, the country's large companies and the Group's global customers.

The auto loan financial entity continued to expand its business within the Group's strategy of increasing its presence in this business.

First nine months underlying attributable profit of EUR 31 million (+6% year-on-year). Total income rose 20% underpinned by higher net interest income and gains on financial transactions. The efficiency ratio improved to 33.0% (-1.9 pp year-on-year).

The NPL ratio was 0.77%, coverage was very high and the cost of credit only 0.33%.

Colombia Highlights (changes in constant euros)

Activity in Colombia remained focused on SCIB clients, large companies and corporates, contributing solutions in treasury, risk hedging, foreign trade, confirming, custody and development of investment banking products supporting the country's infrastructure plan. In line with this objective, we closed the financing of one of the most important road infrastructure projects in August; an 8-year USD 575 million loan, participated by development institutions, commercial banks and institutional investors.

We are also working to increase the profitability of auto finance and consolidate our position in this market with digital propositions. We have signed two alliances: the first with *Chekar.co*, a fully digital platform for buying and selling vehicles, and the second with *Tucarro.com* of *Mercado Libre*, where the user can request and have a loan approved in six minutes. The origination share reached 2.3% (+72 bps in 12 months).

Gross loans and advances to customers (excluding reverse repos) rose 40%, with growth in all business segments. Of note was the fourfold rise in auto finance. Customer deposits (excluding repos) rose 33%.

The first nine months underlying attributable profit was EUR 17 million (EUR 5 million in the same period of 2018). Total income grew 106%, underpinned by net interest income and fee income from the financing of the road infrastructure. Excluding this, revenue would have grown 53%.

SANTANDER GLOBAL PLATFORM (SGP)

Highlights

- Santander Global Platform continued to progress in its digital transformation objectives, launching and developing various initiatives according to the envisaged schedule.
- Our goal is to extend the benefits of the talent and scale of the Group to the payment and digital businesses with higher growth, building platforms only once for all of our banks which allow us to offer the best digital services aimed at retail customers, merchants, SMEs and corporates.
- Of note in the third quarter was the launch of Openbank in Germany with the support of Open Digital Services, as well as the *Trade Club Alliance* platform within the strategy of Global Trade Services.

Strategy

Our goal is to extend the benefits of the talent and scale of the Group to the payment and digital businesses with higher growth, building platforms only once for all of our banks which allow us to offer the best digital services aimed at retail customers, merchants, SMEs and corporates.

The area continued to advance in the following priorities according to schedule:

• Openbank (our digital bank) and Open Digital Services (ODS):

- In Spain, Openbank continued its good rate of activity with a large customer base and with volumes and the number of transactions growing at double-digit rates. This business growth goes hand in hand with high levels of transactionality and productivity per customer and employee.
- Open Digital Services (ODS) is creating a new banking platform with a complete range of products, which will be used for Openbank's international expansion.

ODS has enabled the launching of Openbank in Germany, where it will operate with a very complete value proposition from the beginning, including a current account and an associated debit card with access to all the main systems of mobile payments.

In the same way, we plan to roll out to the Netherlands and Portugal in 2019 and in Argentina and Mexico in 2020.

Openbank is the first bank in the world to provide customers with a free password and data manager, with the highest security standards, as well as an option that enables users to restrict the use of their cards in various channels and countries and for certain periods of time.

It also makes available to its customers in Germany its automated investment platform (*Roboadvisor*, investments based on objectives and micro-investments).

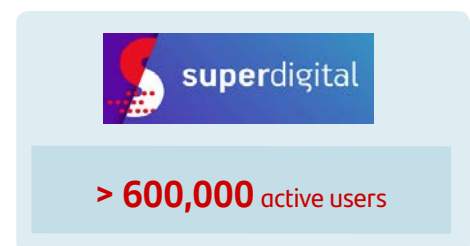

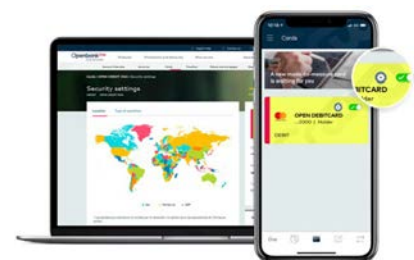

Additionally of note is that Openbank is also developing its position as a responsible bank via the products offered. When users use their cards, they can donate money to charities, and also be able to incorporate socially responsible investment vehicles to their portfolios of managed funds.

• Global Payments Services:

- Superdigital is aimed at the unbanked population, and already has more than 600,000 active users. It was launched in Chile with the same technology as in Brazil.
- Pago FX, aims to create an app for the open market and has already requested a licence to operate in the UK and a European passport.
- Global Merchant Services, a global acquiring solution, taking advantage of *Getnet's* capabilities, continues to advance in developing a unique open

(*) Loyal customers

technological platform in the cloud. With more than one million merchants, it will be rolled out in a first phase in Mexico, followed by the rest of Latin America.

- Global Trade Services, aimed at more than 200,000 companies with international activity, is also progressing in its development and roll-out in the first quarter in 2020, and aims to be operating in all the Group's countries next year.

As part of the plans of the Global Trade Services platform, we launched, along with 13 other global banks, the *Trade Club Alliance* in October. This alliance came out of the *Santander Trade Club*, launched by Santander in 2015 to create a digital platform to connect companies between Europe and Latin America.

The *Trade Club Alliance* is an exclusive global network of banks which aims to strengthen and simplify international trade. It offers an innovative digital platform that provides SMEs and corporate customers with full information on international trade in more than 180 countries, including analysis of currencies, market trends, legal and regulatory context, information on sectors, logistical requirements, etc. It also gives buyers and sellers the opportunity to connect with trusted partners throughout the world.

In short, this digital platform will foster the international growth of companies. By 2022, it is expected to include more than 90% of global trade corridors and support more than one million companies worldwide.

• Digital Assets:

- The Centres of Digital Expertise continue leveraging the Group's scale and ensuring all countries and businesses have access to the most innovative technologies. Examples in the third quarter were:
 - We issued the first bond of the market using end-to-end blockchain technology. The USD 20 million bond opens the door to a new disruptive technology that will make business more efficient and simple, positioning us at the forefront of innovation in capital markets and allowing us to help our customers in their digital transformation.
 - Focused on creating more personalised customer experiences, fostering operational excellence and improving risk management, through the use of artificial intelligence and machine learning, priority use cases have been identified and are being implemented across countries. As of end of the third quarter, those priority use cases are being deployed across 8 countries (including Brazil, Spain, Poland and Mexico) as well as across businesses such as SCIB.
- *InnoVentures*, our venture capital investments in the fintech ecosystem, continued to grow. As at end-September, it had invested more than USD 100 million in 28 companies. The latest investments are:
 - *Trulioo*, a global provider of identity verification based in Canada.
 - *Securitize*, a US start-up that helps to issue and manage digital assets with blockchain.
 - *Klar*, a Mexican company specialised in financial services solutions to improve the current conditions of credit and debit cards.
- Lastly, in the rest of Digital Assets, we continued to advance in the *Globile* mobile platforms, as well as *Open Platform* to develop corporate projects.

CORPORATE CENTRE

Highlights

- The Corporate Centre's objective is to aid the operating units by contributing value and carrying out the corporate function of oversight and control. It also carries out functions related to financial and capital management.
- The underlying attributable loss was higher compared to the first nine months of 2018, mainly due to higher costs related to foreign currency hedging and increased stock of issuances.

Strategy and functions

The Corporate Centre contributes value to the Group in various ways:

- It makes the Group's governance more solid, through global control frameworks and supervision.
- Fostering the exchange of best practices in management of costs and generating economies of scale. This enables us to be one of the most efficient banks.
- It contributes to the launch of projects that will be developed by global business areas.

It also coordinates the relationship with European regulators and develops functions related to financial and capital management, as follows:

- **Financial Management functions:**
 - Structural management of liquidity risk associated with funding the Group's recurring activity, stakes of a financial nature and management of net liquidity related to the needs of some business units.
 - This activity is carried out by the different funding sources (issuances and other), always maintaining an adequate profile in volumes, maturities and costs. The price at which these operations are made with other Group units is the market rate plus the premium, which in liquidity terms, the Group supports by immobilising funds during the term of the operation.
 - Interest rate risk is also actively managed in order to soften the impact of interest rate changes on net interest income, conducted via high credit quality, very liquid and low capital consumption derivatives.
 - Strategic management of the exposure to exchange rates in equity and dynamic in the countervalue of the units' annual results in euros. Net investments in equity are currently covered by EUR 27,023 million (mainly Brazil, the UK, Mexico, Chile, the US, Poland and Norway) with different instruments (spot, fx, forwards).
- **Management of total capital and reserves: efficient capital allocation to each of the units in order to maximise shareholder's return.**

Results

First nine months underlying attributable loss of EUR 1,637 million, 23% higher than in the same period of 2018, largely because of three factors: the higher costs related to foreign currency hedging, the higher stock of issuances and, to a lesser extent, IFRS 16.

Operating expenses were 11% lower driven by ongoing streamlining and simplification measures.

RETAIL BANKING

Highlights (changes in constant euros)

- The Group continued to focus on enhancing customer satisfaction, covering their needs and boosting loyalty. At end of September 2019, the Group had nearly 144 million customers, of which 21 million are loyal.
- Underlying attributable profit of EUR 5,862 million in the first nine months, 6% higher than in the same period of 2018 due to customer revenue and improved efficiency.
- Santander was named the Best Bank in Latin America and the Best SME Bank in Western Europe by *Euromoney*.

EUR 5,862 Mn

Underlying attributable profit

Commercial activity

Santander wants to be the reference bank for customers of all income levels, offering them the services and products that best meet their needs. Furthermore, we are fostering entrepreneurship, helping SMEs and other companies via loans and non-financial support. We launched various commercial initiatives in the third quarter, including:

- In individuals, we continued to strengthen our business with new differentiated products. In Chile, for example, we launched new proposals for the mass market segment within the *Life* strategy, enabling us to significantly increase the number of new customers. In Argentina we launched *Banca VIP*, a new customer care model for this subsegment.
- In auto finance, we continued to expand the business in some countries. For example in Colombia, via new alliances to boost our position in the market.
- In the segment of SMEs, we continued to move forward with products such as *Prospera* in Brazil, a microfinance and loan programme for entrepreneurs which now has close to half a million customers, almost twice that of last year. This programme was also launched in Uruguay to satisfy the demand of small businesses.
- Of note in companies were strategies such as those implemented in the US with the Lead Bank project to strengthen our relationships with US companies. We also formed part of the financing of one of the most important road infrastructure projects in Colombia and we led the consortium of banks for the loan to one of the main state energy companies in Poland. In addition, we contributed non-financial solutions, such as *Santander Advance Empresas* in Portugal, offering management courses for executives and a programme of scholarships.

These initiatives are part of our strategy focused on improving customer satisfaction and experience, and we continue with the branch network transformation through the opening of new *Work Café* branches (new openings in Chile, Portugal, the UK and Poland in the quarter), *Smart Red* branches and full function ATMs in Mexico.

All of these measures helped to boost the number of total customers to nearly 144 million, as well as increase the number of loyal customers (+10% individuals and +5% companies year-on-year).

Results

The first nine months underlying attributable profit rose 6%, driven by the good dynamics in customer revenue (+5%) and improved efficiency. Of note was the performance of North America and South America (+20% and +16%, respectively, in underlying attributable profit).

EUR 1,335 Mn

Underlying attributable profit

CORPORATE & INVESTMENT BANKING

Highlights (changes in constant euros)

- We continued to grow strongly in the US, Europe, Mexico, Chile and the Andean region.
- The strength of our value-added products (Cash Management, Trade Finance, Debt Capital Markets and Project Finance), more than offset interest rate declines. In Global Markets, diversification in America partly offsets the lower dynamism in Europe.
- Underlying attributable profit was 10% higher year-on-year, driven by growth in revenue and lower loan-loss provisions.

Commercial activity

- **Cash management:** we kept the focus on growing in our main markets (Europe and Latin America), innovating in the digitalisation of businesses, both in the origination and the development of products.
- **Export & Agency Finance:** double-digit growth year-on-year, particularly in Latin America and Europe.
- **Trade & Working Capital Solutions:** strong growth in all products, particularly in receivables finance, structured trade and trade funding. Of note was the positive evolution in the US and Asia.
- **Corporate Finance:** in M&A we strengthened our position as the leader in advising the renewable energy sector, with operations such as advising Iberdrola on the sale of 40% of East Anglia 1, the UK's largest offshore wind farm, and advising Blackrock on the sale of its investments in wind farms in Spain.
- **Debt Capital Markets:** we issued the first end-to-end blockchain bond, an example of Santander's innovation in the capital markets and the first step towards a potential secondary market for mainstream security tokens¹. The Group maintained its leadership in Latin America and remained in the upper part of the issuance tables for European corporates, and is also a reference for green bond issuances.
- **Syndicated Corporate Loans:** in line with our responsible banking strategy, Santander is increasing its range of sustainable finance products via green loans and loans linked to sustainable indices such as loans to Carrefour and Acciona.
- **Structured Financing:** the Group held its global leadership position in Project Bonds, having issued more globally than any other bank and was the third by volumes. The focus on the renewable energy sector needs to be highlighted: more than 25 financings during 2019. Santander is the leader in Latin America in financial advice, both in terms of numbers and volumes.
- Higher contribution year-on-year from **markets' activity:** the positive evolution of markets in the Americas partially offset the reduced business activity in Europe. Good sales performance in Brazil, Chile, and the US, particularly in corporate segments, as well as in management of books in Argentina, Chile and the US.

Results

The first nine months underlying attributable profit was 10% higher at EUR 1,335 million, underpinned by growth in most businesses, particularly the results of Global Transaction Banking and Global Debt Financing.

Revenue growth and lower provisions absorbed the higher costs in transformational projects.

WEALTH MANAGEMENT & INSURANCE

Highlights (changes in constant euros)

- Assets under management reached EUR 383,000 million (+6% year-on-year).
- Underlying attributable profit was 10% higher than in the first nine months of 2018.
- Total contribution (net profit + net fee income) of EUR 1,843 million (+8% year-on-year).

EUR 697 Mn

Underlying attributable profit

Commercial activity

We continued to progress in our plan to make us the best wealth manager in Europe and Latin America. Some of the most relevant initiatives in the quarter are:

- In **Santander Asset Management (SAM)**: we continued to strengthen our range of products, notably with the global launch of new Santander GO funds, which offer clients strategies of specialist managers.
- In **Private Banking**: we launched a global value proposition so clients can access a global platform of products and services that cover their global needs. We also continued to focus on developing digital tools.
- In **Insurance**: we completed the value offer with the objective of becoming a leader in all markets, types of insurance and segments. For example, we launched *Gastos Médicos Santander* in Mexico, the first insurance of its kind in Mexico sold via banking branches.

Business performance

Total assets under management grew to EUR 383,000 million, 6% more than in September 2018 and with rises in Private Banking as well as at SAM:

- Strong growth in net sales at SAM in 2019 (EUR 5,250 million), increasing market share in most of our countries, particularly in Spain, Portugal, Chile and Poland.
- Of note in Private Banking was growth in Brazil (+11%) and Chile (+10%). Customer loans grew by 5%.

In Insurance, the volume of premiums in the first nine months increased 9% year-on-year, especially in Brazil and Poland.

Results

Underlying attributable profit was EUR 697 million for **the first nine months**, 10% growth year-on-year:

- Higher revenue, from both the growth in net interest income, in line with the rise in lending, as well as the higher contribution from insurance.
- Total fee income generated by the area grew by 5% and accounted for 29% of the Group's total.
- Operating expenses were 2% higher, due to our investments in platforms.
- Recovery of provisions from the fall in doubtful loan positions in Spain and Portugal.

The total contribution to the Group (including net profit and total fees generated net of taxes) was **EUR 1,843 million**, 8% growth year-on-year.

RESPONSIBLE BANKING

Santander strives every day to contribute to the progress of people and companies in a Simple, Personal and Fair way in all that we do and to earn the confidence of our employees, customers, shareholders and society.

In order to meet our commitment to be a more responsible bank and help society address the main global issues, we have identified two challenges: adapt to the new business environment and contribute to more inclusive and sustainable growth, with the following goals for the coming years:

Santander's Responsible banking targets

More information on our public commitments in responsible banking can be found on our [website](#).

1. According to a well-known external source in each country (Great Place to Work, Top Employer, Merco, etc.).

2. Senior positions represent 1% of total workforce.

3. Calculation of equal pay gap compares employees of the same job, level and function.

4. Financially empowered people (mostly unbanked and underbanked), through products and services and social investment initiatives, to get access to the financial system, receive tailored finance and increase their knowledge and resilience through financial education.

5. Includes Santander's overall contribution to green finance: project finance, syndicated loans, green bonds, capital finance, export finance, advisory, structuring and other products to help our clients in the transition to a low carbon economy. Commitment from 2019 to 2030 is EUR 220 billion.

6. In those countries where it is possible to certify renewable sourced electricity for the properties occupied by the Group.

7. People supported through Santander Universities initiative (students who will receive a Santander scholarship, will achieve an internship in an SME or participate in entrepreneurship programmes supported by the bank).

8. People helped through our community investment programmes (excluded Santander Universities and financial education initiatives).

Third quarter highlights

Banco Santander is ranked the world's most sustainable bank in the Dow Jones Sustainability Index. This is the first time the reference index in the international sphere has put Santander as the world leader and was also first in Europe for the second year running. The index evaluates the Group's performance in the economic, environmental and social dimensions.

Banco Santander is one of the founding members of the Principles for Responsible Banking, signed in September at the climate summit in New York. The signatories of these principles are committed to strategically aligning their business to the UN's Sustainable Development Goals and to the Paris Agreement on climate change.

Santander and the 30 other banks who signed the principles also announced a Collective Commitment to Climate Action, setting out specific objectives to align their activity to the Paris Agreement.

In October, Banco Santander issued a EUR 1 billion green bond for the first time, under a global strategy of sustainable issues for the coming years. The funds from this bond will be used to finance solar energy and wind power projects.

Great Place to Work Institute recognised Santander as one of the best companies to work for in the world, ranking it 24th in the 25 best companies.

Following the appointment of Pamela Walkden as an independent director to Santander's board in September, we will have 40% women directors, in line with our long term goal of 40-60% represented by either gender. This appointment is subject to the corresponding authorisations.

In addition, and aligned with our responsible banking commitments, we have financially empowered more than 470,000 million people through our microfinance programmes and helped more than 800,000 through our community investment programmes in the first half of the year.

We also continued to form part of various sustainability indices, facilitating non-financial information to the markets, investors and ESG analysts.

CORPORATE GOVERNANCE

A responsible bank has a solid governance model with well-defined functions, it manages risks and opportunities prudently and defines its long-term strategy watching out for the interests of all its stakeholders and society in general

→ Capital increase. Change to by-laws

Once the period of the public offer to acquire all the shares representing the capital stock of Banco Santander México, S.A., Institución de Banca Múltiple, Grupo Financiero Santander México not owned by Grupo Santander ended, 67% of the shares accepted the offer.

In order to meet the exchange, Banco Santander proceeded, by virtue of what was agreed at the extraordinary general meeting of shareholders on 23 July 2019, to issue 381,540,640 new shares of EUR 0.50 nominal value each, which meant an increase in the Bank's capital stock of EUR 190,770,320 (approximately 2.35% of Banco Santander's capital stock before the increase).

After this, Banco Santander's capital stock amounted to EUR 8,309,057,291, represented by 16,618,114,582 shares of EUR 0.50 nominal value each, having changed Article 5 of the by-laws regarding the capital stock.

→ Changes in the board in the third quarter

The appointments committee announced on 24 September 2019 the incorporation to the board of Pamela Walkden as an independent director.

Pamela Walkden will take the place of Carlos Fernández, who had been an independent director since 2015. Her appointment will become effective when the corresponding approvals have been received, and will be submitted for ratification at the next general meeting of shareholders.

→ Changes in the organisational structure of the Group's senior management in the third quarter

The board approved the appointment of Marjolein van Hellemond-Gerdingh as the Group's chief compliance officer, which will be effective when the regulatory approvals have been obtained.

Marjolein van Hellemond-Gerdingh, who will report to Keiran Foad, the chief risk officer, replaces Mónica López-Monís who was recently appointed head of supervisory and regulatory relations.

EVENTS AFTER QUARTER END

On 21 October, the agreement to sell Grupo Santander's retail and commercial banking franchise in Puerto Rico to FirstBank Puerto Rico for approximately USD 1.1 billion was announced. The sale includes Santander's 27 bank branches in Puerto Rico and total assets of USD 6.2 billion. The transaction is expected to close in the middle of 2020, subject to regulatory approvals. The consummation of the transaction will lead to an increase in the Group's CET1 capital of 5-6 basis points and immaterial impact on Santander Group attributable profit.

SANTANDER SHARE

→ Shareholder remuneration

The board approved the first dividend in of EUR 0.10 per share to be paid from 1 November. The amount is equal to that paid a year ago between August (EUR 0.065) and November (EUR 0.035).

As announced in 2018, as of this year shareholders will receive the dividend in two payments instead of the previous four.

The board also confirmed its intention to maintain a percentage of the underlying attributable profit in 2019 assigned to the dividend (pay-out) of between 40% and 50%, and the proportion of the dividend in cash is at least the same as last year.

→ Share price performance

The Santander share is listed in five markets, in Spain, Mexico and Poland as an ordinary share, in the UK as a CDI and in the US as an ADR.

The main markets reported gains in the first nine months of the year. In Spain, the Ibex 35 rose 8.3% and in Europe, the Stoxx 50 rose 18.0%.

The European banking sector, in a context of economic deceleration, was influenced by the change in the stance of monetary policies of the main central banks, mainly the European Central Bank, which delayed interest rate hikes beyond 2020. The leading European banking index, DJ Stoxx Banks fell 0.4%, while the MSCI World Banks index rose 6.6%.

The Santander share price ended September at EUR 3.737, 6% lower, as it was additionally affected by some uncertainties in regions where Santander operates, such as Argentina, pending the presidential elections, the UK due to Brexit, and Poland because of the ruling on Swiss franc mortgages.

Comparative share performance

SANTANDER SHARE

In terms of total return, the Santander share fell 3.1% in the first nine months, while the DJ Stoxx Banks rose 4.6%.

The share price as we went to press was EUR 3.979, +6.5% in the last month.

→ Market capitalisation and trading

At 30 September 2019, Santander was the largest bank in the Eurozone by market capitalisation and the 23rd in the world among financial entities (EUR 62,094 million).

The share's weighting in the DJ Stoxx 50 was 1.6%, 7.6% in the DJ Stoxx Banks and 12.9% in the Ibx 35.

A total of 13,719 million shares were traded in the first nine months for an effective value of EUR 56,671 million, the largest figure among the shares that comprise the EuroStoxx (liquidity ratio of 84%).

The daily trading volume was 72 million shares with an effective value of EUR 297 million.

ALTERNATIVE PERFORMANCE MEASURES (APM)

In addition to the financial information prepared under IFRS, this consolidated directors' report contains financial measures that constitute alternative performance measures ('APMs') to comply with the guidelines on alternative performance measures issued by the European Securities and Markets Authority on 5 October 2015 and non-IFRS measures.

The financial measures contained in this consolidated directors' report that qualify as APMs and non-IFRS measures have been calculated using the financial information from Santander but are not defined or detailed in the applicable financial information framework or under IFRS and have neither been audited nor reviewed by our auditors.

We use these APMs and non-IFRS measures when planning, monitoring and evaluating our performance. We consider these APMs and non-IFRS financial measures to be useful metrics for management and investors to facilitate operating performance comparisons from period to period. While we believe that these APMs and non-IFRS financial measures are useful in evaluating our business, this information should be considered as supplemental in nature and is not meant as a substitute of IFRS measures. In

addition, other companies, including companies in our industry, may calculate such measures differently, which reduces their usefulness as comparative measures.

The APMs and non-IFRS measures we use in this document can be categorised as follows:

Underlying results

In addition to IFRS results measures, we present some results measures which are non-IFRS measures and which we refer to as underlying measures. These underlying measures allow in our view a better year-on-year comparability as they exclude items outside the ordinary course performance of our business which are grouped in the non-IFRS line management adjustments and are further detailed on page 12 of this report.

In addition, the results by business areas in the 'Geographic businesses' section are presented only on an underlying basis in accordance with IFRS 8, and reconciled on an aggregate basis to our IFRS consolidated results to the consolidated financial statements.

Consolidated profit	7,177	(300)	6,877
Non-controlling interests	(1,135)	—	(1,135)
Attributable profit to the parent	6,042	(300)	5,742

(1) Includes exchange differences.

Explanation of adjustments:

Restructuring costs: The net impact of EUR -300 million on profit relates to restructuring costs in connection with the integration of Grupo Banco Popular, as follows: EUR -280 million in Spain, EUR -40 million in the Corporate Centre and EUR 20 million in Portugal.

Profitability and efficiency ratios

The purpose of the profitability and efficiency ratios is to measure the ratio of profit to capital, to tangible capital, to assets and to risk weighted assets, while the efficiency ratio measures how much general administrative expenses (personnel and other) and amortisation costs are needed to generate revenue.

Ratio	Formula	Relevance of the metric
RoE (Return on equity)	$\frac{\text{Attributable profit to the parent}}{\text{Average stockholders' equity}^{(1)} \text{ (excl. minority interests)}}$	This ratio measures the return that shareholders obtain on the funds invested in the entity and as such measures the company's ability to pay shareholders.
RoTE (Return on tangible equity)	$\frac{\text{Attributable profit to the parent}}{\text{Average stockholders' equity}^{(1)} \text{ (excl. minority interests)} - \text{intangible assets}}$	This is a very common indicator, used to evaluate the profitability of the company as a percentage of its tangible equity. It's measured as the return that shareholders receive as a percentage of the funds invested in the entity less intangible assets.
Underlying RoTE	$\frac{\text{Attributable profit to the parent}}{\text{Average stockholders' equity}^{(1)} \text{ (excl. minority interests)} - \text{intangible assets}}$	This indicator measures the profitability of the tangible equity of a company arising from ordinary activities, i.e. excluding results from non-recurring operations.
RoA (Return on assets)	$\frac{\text{Consolidated profit}}{\text{Average total assets}}$	This metric, commonly used by analysts, measures the profitability of a company as a percentage of its total assets. It is an indicator that reflects the efficiency of the company's total funds in generating profit over a given period.
RoRWA (Return on risk weighted assets)	$\frac{\text{Consolidated profit}}{\text{Average risk weighted assets}}$	The return adjusted for risk is an derivative of the RoA metric. The difference is that RoRWA measures profit in relation to the bank's risk weighted assets.
Underlying RoRWA	$\frac{\text{Underlying consolidated profit}}{\text{Average risk weighted assets}}$	This relates the underlying attributable profit (excluding non-recurring results) to the bank's risk weighted assets.
Efficiency ratio	$\frac{\text{Operating expenses}^{(2)}}{\text{Total income}}$	One of the most commonly used indicators when comparing productivity of different financial entities. It measures the amount of funds used to generate the bank's total income.

(1) Stockholders' equity = Capital and Reserves + Accumulated other comprehensive income + Attributable profit to the parent + Dividends.

(2) Operating expenses = Administrative expenses + amortisations.

(1) Averages included in the RoE, RoTE, RoA and RoRWA denominators are calculated using 4 months' worth of data in the case of quarterly figures (from June to September in Q3 and March to June in Q2) and 10 months in the case of 9M data (from December to September).

(2) For periods less than one year, and if there are results in the net capital gains and provisions line, the profit used to calculate RoE and RoTE is the annualised underlying attributable profit to which said results are added without annualising.

(3) For periods less than one year, and if there are results in the net capital gains and provisions line, the profit used to calculate RoA and RoRWA is the annualised underlying consolidated profit, to which said results are added without annualising.

(4) The risk weighted assets included in the denominator of the RoRWA metric are calculated in line with the criteria laid out in the CRR (Capital Requirements Regulation).

Credit risk indicators

The credit risk indicators measure the quality of the credit portfolio and the percentage of non-performing loans covered by provisions.

Ratio	Formula	Relevance of the metric
NPL ratio (Non-performing loans)	$\frac{\text{Non-performing loans and advances to customers, customer guarantees and customer commitments granted}}{\text{Total Risk}^{(1)}}$	The NPL ratio is an important variable regarding financial institutions' activity since it gives an indication of the level of risk the entities are exposed to. It calculates risks that are, in accounting terms, declared to be non-performing as a percentage of the total outstanding amount of customer credit and contingent liabilities.
Coverage ratio	$\frac{\text{Provisions to cover impairment losses on loans and advances to customers, customer guarantees and customer commitments granted}}{\text{Non-performing loans and advances to customers, customer guarantees and customer commitments granted}}$	The coverage ratio is a fundamental metric in the financial sector. It reflects the level of provisions as a percentage of the non-performing assets (credit risk). Therefore it is a good indicator of the entity's solvency against client defaults both present and future.
Cost of Credit	$\frac{\text{Allowances for loan-loss provisions over the last 12 months}}{\text{Average loans and advances to customers over the last 12 months}}$	This ratio quantifies loan-loss provisions arising from credit risk over a defined period of time for a given loan portfolio. As such, it acts as an indicator of credit quality.

(1) Total risk = Total loans and advances and guarantees to customers (performing and non-performing) + non-performing contingent liabilities.

Credit risk	Sep-19	Jun-19	Sep-19	Sep-18
NPL ratio	3.47%	3.51%	3.47%	3.87%

Other indicators

The market capitalisation indicator provides information on the volume of tangible equity per share. The loan-to-deposit ratio (LTD) identifies the relationship between net customer loans and advances and customer deposits, assessing the proportion of loans and advances granted by the Group that are funded by customer deposits.

The Group also uses gross customer loan magnitudes excluding reverse repurchase agreements (repos) and customer deposits excluding repos. In order to analyse the evolution of the traditional commercial banking business of granting loans and capturing deposits, repos and reverse repos are excluded, as they are mainly treasury business products and highly volatile.

Ratio	Formula	Relevance of the metric
TNAV per share (Tangible equity net asset value per share)	$\frac{\text{Tangible book value}^{(1)}}{\text{Number of shares excluding treasury stock}}$	This is a very commonly used ratio used to measure the company's accounting value per share having deducted the intangible assets. It is useful in evaluating the amount each shareholder would receive if the company were to enter into liquidation and had to sell all the company's tangible assets.
Price / tangible book value per share (X)	$\frac{\text{Share price}}{\text{TNAV per share}}$	Is one of the most commonly used ratios by market participants for the valuation of listed companies both in absolute terms and relative to other entities. This ratio measures the relationship between the price paid for a company and its accounting equity value.
LTD ratio (Loan-to-deposit)	$\frac{\text{Net loans and advances to customers}}{\text{Customer deposits}}$	This is an indicator of the bank's liquidity. It measures the total (net) loans and advances to customers as a percentage of customer funds.
Loans and advances (excl. reverse repos)	Gross loans and advances to customers excluding reverse repos	In order to aid analysis of the commercial banking activity, reverse repos are excluded as they are highly volatile treasury products.
Deposits (excl. repos)	Customer deposits excluding repos	In order to aid analysis of the commercial banking activity, repos are excluded as they are highly volatile treasury products.
PAT + After tax fees paid to SAN (in Wealth Management & Insurance)	Net profit + fees paid from Santander Asset Management to Santander, net of taxes, excluding Private Banking customers	Metric to assess Wealth Management & Insurance's total contribution to Grupo Santander profit.

Local currency measures

We make use of certain financial measures in local currency to help in the assessment of our ongoing operating performance. These non-IFRS financial measures include the results of operations of our subsidiary banks located outside the Eurozone, excluding the impact of foreign exchange. Because changes in foreign currency exchange rates do not have an operating impact on the results, we believe that evaluating their performance on a local currency basis provides an additional and meaningful assessment of performance to both management and the company's investors.

The Group presents, at both the Group level as well as the business unit level, **the real changes in the income statement as well as the changes excluding the exchange rate effect**, as it considers the latter facilitates analysis, since it enables businesses movements to be identified without taking into account the impact of converting each local currency into euros.

Said variations, excluding the impact of exchange rate movements, are calculated by converting P&L lines for the different business units comprising the Group into our presentation currency, the euro, applying the average exchange rate for the first nine months of 2019 to all periods contemplated in the analysis.

The Group presents, at both the Group level as well as the business unit level, **the changes in euros in the balance sheet as well as the changes excluding the exchange rate effect** for loans and advances to customers excluding reverse repos and customer funds (which comprise deposits and mutual funds) excluding repos. As with the income statement, the reason is to facilitate analysis by isolating the changes in the balance sheet that are not caused by converting each local currency into euros.

These changes excluding the impact of exchange rate movements are calculated by converting loans and advances to customers excluding reverse repos and customer funds excluding repos, into our presentation currency, the euro, applying the closing exchange rate on the last working day of September 2019 to all periods contemplated in the analysis.

The average and period-end exchange rates for the main currencies in which the Group operates are set out in the table below.

Exchange rates: 1 euro / currency parity

	Average (Income statement)		Period-end (balance sheet)

- **TNAV:** Tangible net asset value
- **TRIM:** Targeted review of internal models
- **VaR:** Value at Risk
- **WM&I:** Wealth Management & Insurance

Important information

Non-IFRS and alternative performance measures

In addition to the financial information prepared in accordance with International Financial Reporting Standards ("IFRS"), this report contains certain financial measures that constitute alternative performance measures ("APMs") as defined in the Guidelines on Alternative Performance Measures issued by the European Securities and Markets Authority (ESMA) on 5 October 2015 (ESMA/2015/1415en) and other non-IFRS measures ("Non-IFRS Measures"). The financial measures contained in this report that qualify as APMs and non-IFRS measures have been calculated using the financial information from Santander Group but are not defined or detailed in the applicable financial reporting framework and have neither been audited nor reviewed by our auditors. We use these APMs and non-IFRS measures when planning, monitoring and evaluating our performance. We consider these APMs and non-IFRS measures to be useful metrics for management and investors to facilitate operating performance comparisons from period to period. While we believe that these APMs and non-IFRS measures are useful in evaluating our business, this information should be considered as supplemental in nature and is not meant as a substitute of IFRS measures. In addition, other companies, including companies in our industry, may calculate or use such measures differently, which reduces their usefulness as comparative measures. For further details of the APMs and non-IFRS Measures used, including its definition or a reconciliation between any applicable management indicators and the financial data presented in the consolidated financial statements prepared under IFRS, please see 2018 Annual Financial Report, published in the CNMV on 28 February 2019, our 20-F report for the year ending 31 December 2018 registered with the SEC in the United States as well as the section "Alternative performance measures" of the annex to this report.

The businesses included in each of our geographic segments and the accounting principles under which their results are presented here may differ from the included businesses and local applicable accounting principles of our public subsidiaries in such geographies. Accordingly, the results of operations and trends shown for our geographic segments may differ materially from those of such subsidiaries.

Forward-looking statements

Santander cautions that this report contains statements that constitute "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by words such as "expect", "project", "anticipate", "should", "intend", "probability", "risk", "VaR", "RoRAC", "RoRWA", "TNAV", "target", "goal", "objective", "estimate", "future" and similar expressions. These forward-looking statements are found in various places throughout this report and include, without limitation, statements concerning our future business development and economic performance and our shareholder remuneration policy. While these forward-looking statements represent our judgment and future expectations concerning the development of our business, a number of risks, uncertainties and other important factors could cause actual developments and results to differ materially from our expectations. The following important factors, in addition to those discussed elsewhere in this report, and in our annual report on Form 20-F for the year ended December 31, 2018, filed with the U.S. Securities and Exchange Commission, could affect our future results and could cause outcomes to differ materially from those anticipated in any forward-looking statement: (1) general economic or industry conditions in areas in which we have significant business activities or investments, including a worsening of the economic environment, increasing in the volatility of the capital markets, inflation or deflation, and changes in demographics, consumer spending, investment or saving habits; (2) exposure to various types of market risks, principally including interest rate risk, foreign exchange rate risk, equity price risk and risks associated with the replacement of benchmark indices; (3) potential losses associated with prepayment of our loan and investment portfolio, declines in the value of collateral securing our loan portfolio, and counterparty risk; (4) political stability in Spain, the UK, other European countries, Latin America and the US (5) changes in laws, regulations or taxes, including changes in regulatory capital and liquidity requirements, including as a result of the UK exiting the European Union and increased regulation in light of the global financial crisis; (6) our ability to integrate successfully our acquisitions and the challenges inherent in diverting management's focus and resources from other strategic opportunities and from operational matters while we integrate these acquisitions; and (7) changes in our ability to access liquidity and funding on acceptable terms, including as a result of changes in our credit spreads or a downgrade in our credit ratings or those of our more significant subsidiaries. Numerous factors could affect the future results of Santander and could result in those results deviating materially from those anticipated in the forward-looking statements. Other unknown or unpredictable factors could cause actual results to differ materially from those in the forward-looking statements.

Forward-looking statements speak only as of the date of this report and are based on the knowledge, information available and views taken on such date; such knowledge, information and views may change at any time. Santander does not undertake any obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

No offer

The information contained in this report is subject to, and must be read in conjunction with, all other publicly available information, including, where relevant any fuller disclosure document published by Santander. Any person at any time acquiring securities must do so only on the basis of such person's own judgment as to the merits or the suitability of the securities for its purpose and only on such information as is contained in such public information having taken all such professional or other advice as it considers necessary or appropriate in the circumstances and not in reliance on the information contained in this report. No investment activity should be undertaken on the basis of the information contained in this report. In making this report available Santander gives no advice and makes no recommendation to buy, sell or otherwise deal in shares in Santander or in any other securities or investments whatsoever.

Neither this report nor any of the information contained therein constitutes an offer to sell or the solicitation of an offer to buy any securities. No offering of securities shall be made in the United States except pursuant to registration under the U.S. Securities Act of 1933, as amended, or an exemption therefrom. Nothing contained in this report is intended to constitute an invitation or inducement to engage in investment activity for the purposes of the prohibition on financial promotion in the U.K. Financial Services and Markets Act 2000.

Historical performance is not indicative of future results

Statements as to historical performance or financial accretion are not intended to mean that future performance, share price or future earnings (including earnings per share) for any period will necessarily match or exceed those of any prior period. Nothing in this report should be construed as a profit forecast.

This document is a translation of a document originally issued in Spanish. Should there be any discrepancies between the English and the Spanish versions, only the original Spanish version should be binding.
