

Técnicas Reunidas has been awarded an EPC Contract in USA

Técnicas Reunidas (TR) has been awarded a contract by the multinational company Sasol for the execution of the Ethoxylation (ETO) and Guerbet Alcohol Plants, to be located in Sasol's ethane cracker and derivatives complex in Westlake, Louisiana.

The scope of the contract includes the Engineering, Procurement and Construction support (EPCs) for the two Plants. It is the latest Project to be awarded for this new large Petrochemical Complex being built by Sasol in the USA.

Alcohols Ethoxylates are surfactants found in products such as detergents, surface cleaners, cosmetics and for use in agriculture, textiles and paints. Guerbet Alcohols are used in cosmetics, detergents, antifreeze and lubricant additives, among others.

The value of the Contract is approximately 150 million Euro, with a schedule of 30 months and will be done in TR's Madrid and USA offices.

This new project has great importance for TR being selected by such an outstanding company as Sasol.

Sasol is an international integrated chemicals and energy company that leverages the talent and expertise of its more than 31,000 employees in 37 countries. It develops and commercializes technologies, builds and operates world-scale facilities to produce a range of high-value product streams, including liquid fuels, chemicals and low-carbon electricity.

Técnicas Reunidas is one of the leading international engineering and construction companies for oil and gas production, refining and petrochemicals and power generation projects for a broad spectrum of customers throughout the world. Since 1960, TR has designed and built more than 1000 industrial plants worldwide in more than 50 countries.
