Loans from Caixa Penedes FTGENCAT 1 TDA, FTA and Caixa Penedes PYMES 1 TDA, FTA were granted by Caixa Penedes (now part of Banco Mare Nostrum) and are now serviced by Banco de Sabadell. KEY RATING DRIVERS

RWN Actions:

The RWN actions reflect the vulnerability of the junior and mezzanine notes to uncertain recovery proceeds. For the past two years almost no recovery proceeds have been received by the transactions. As such a sensitivity analysis has been performed by giving no benefit to unsecured recovery proceeds resulting in a reduction of the transaction's overall recovery expectations of up to 10% in absolute terms. In addition uncertainty remains on the banks workout procedures with respect to the repossession of mortgaged property collateral. Consequently the recovery lag has been extended to 10 years. Under these assumptions the rating of the notes could be impacted by up to five notches. The RWN status will be resolved once Fitch receives clarity on the recovery process practices of the respective servicer of these transactions.

AyT Colaterales Global Empresas, Serie Caja Granada I Tranche Affirmation:

The affirmations on all tranches reflect the stable performance of the portfolio delinquencies. Loan in arrears by more than 90 days represent around 3.8% of the portfolio compared to 4.9% a year ago. In addition the credit enhancement on all tranches has increased as a result of portfolio amortisation.

Class C is capped to 'A+sf' as interest payment on this class will likely be deferred under high stresses. The transaction has a class C deferral trigger based on a cumulative default level that is triggered under rating stresses above 'AA-sf' and under low prepayment assumptions.

The class D notes are also affirmed as their current levels of credit enhancement and their position within the deal's structure is commensurate with the current ratings assigned. While class D is not impacted by the sensitivity analysis described under the RWN actions section above, their Outlook is however revised to Negative to reflect the rating

dependence on the ultimate sale and value of the mortgaged collateral.

Caixa Penedes FTGENCAT 1 TDA, FTA Tranche Affirmation:

The affirmation of class A1 and A2 (CA) reflects the increase in credit enhancement due to deleveraging of the transaction. This offsets the deterioration of performance in the portfolio. The 90+ delinquencies have increased from 2.2% in March 2013 to 5.8% in March 2014.

The class B notes are also affirmed as their current levels of credit enhancement and their position within the deal's structure is commensurate with the current ratings assigned. While class B is not impacted by the sensitivity analysis described under the RWN actions section above, their Outlook is however revised to Negative to reflect the rating dependence on the ultimate sale and value of the mortgaged collateral.

Caixa Penedes PYMES 1 TDA, FTA Affirmation:

The affirmation of the class A reflects the stable portfolio performance since the recent full transaction review in February 2014.

Payment Interruption Risk:

Finally the reserve fund of all transactions remained sufficiently funded to provide liquidity support to the structures in the event of payment interruption as a result of a servicer default and can cover the senior notes' interest at a stressed index rate.

RATING SENSITIVITIES

The agency has incorporated a recovery stress test in its analysis to determine the ratings' sensitivity. Under the sensitivity stress described in the RWN actions the junior and mezzanine tranches could be impacted by up to five notches. The remaining tranches are not affected.
