Ratings On Class B Notes Issued By Bancaja 7 Placed On CreditWatch Positive

Surveillance Credit Analyst:

Paloma MateoGuerrero, Madrid (34) 91-788-7211; paloma_mateo-guerrero@standardandpoors.com

MADRID (Standard & Poor's) April 2, 2009—Standard & Poor's Ratings Services today placed on CreditWatch positive its credit ratings on the class B notes issued by Bancaja 7 Fondo de Titulizacion de Activos. At the same time, we removed from CreditWatch negative classes A2 and B issued by Bancaja 5 Fondo de Titulizacion de Activos and Bancaja 6 Fondo de Titulizacion de Activos. All the other ratings in these transactions have been affirmed (see list below).

After reviewing the most recent performance information we have received for Bancaja 7, we believe that the likelihood of a positive rating action for the class B notes in this deal has increased.

The level of credit support available to this class has increased due to de-leveraging within the deal, together with the relatively stable performance of the underlying collateral.

We placed classes A and B issued by Bancaja 5 and Bancaja 6 on CreditWatch negative on Nov. 27, 2008 because both deals had exposure to an 'A-2' rated derivative counterparty. The change to our methodology for 'A-2' rated derivative counterparties on Oct. 22 2008 stated that 'A-2' rated derivative counterparties could no longer support 'AAA' ratings on issued notes (see "Related Research"). The affirmation today of the class A notes reflects the replacement of their swap counterparty with an 'A-1' rated entity.

At closing, the issuers entered into interest swap agreements with Bancaja to

provide protection against adverse interest rate movements. On Sept. 23, 2008 we lowered our short-term rating on Bancaja to 'A-2'. Subsequently, Bancaja 5 and Bancaja 6 terminated their interest swap agreements with Bancaja and have now replaced those obligations with Credit Suisse (A+/Stable/A-1) as interest swap provider on terms substantially similar to the previous swaps with Bancaja.

We have also affirmed the rating on the class C notes in those transactions after a full credit and cash flow analysis of the most recent transaction information that we have received. The ratings on these transactions are currently supported by higher credit enhancement levels provided by a cash reserve and subordinated tranches due to transaction amortization, and lower long-term arrears than the later deals.

We will now carry out a more detailed analysis of Bancaja 7 to investigate whether the class B notes can attain a higher rating. We will release the results of this review and any changes to the ratings in due course.

Each deal is a Spanish residential mortgage-backed securities (RMBS) transaction backed by pools of first-ranking mortgages secured over owner-occupied residential properties in Spain. The mortgages were originated by Caja de Ahorros de Valencia, Castellón y Alicante (Bancaja).
