### OVERVIEW

- On the Oct. 28, 2013 payment date, Bancaja 11's class C notes defaulted on their interest payment.
- Consequently, we have lowered to 'D (sf)' from 'CCC- (sf)' our rating on the class C notes.
- Bancaja 11 is a 2007-vintage securitization of first-ranking mortgages secured on owner-occupied residential properties in Spain.

MADRID (Standard & Poor's) Nov. 5, 2013--Standard & Poor's Ratings Services today lowered to 'D (sf)' from 'CCC- (sf)' its credit rating on Bancaja 11, Fondo de Titulizacion de Activos' class C notes.

Today's downgrade follows the class D notes' interest payment default on the Oct. 28, 2013 interest payment date (IPD).

As we noted in our previous review on July 5, 2013, the class C notes' rating reflects the proximity of the interest deferral trigger and the reserve fund's full depletion since April 2010 (see "Various Rating Actions Taken In Spanish RMBS Transactions Bancaja 10 And Bancaja 11 Following Review").

The trustee's data for the October 2013 IPD shows that cumulative defaults account for 7.85% of the closing portfolio balance, which is above the 7.40% trigger for the class C notes.

*Rating Lowered To 'D (sf)' On Spanish RMBS Transaction Bancaja 11's Class C Notes Following Interest Payment Default*

The class C notes defaulted on their interest payment on the October 2013 IPD following the breach of the interest deferral trigger and lack of available liquid funds. As our ratings in this transaction address the timely payment of interest and ultimate payment of principal, we have lowered to 'D (sf)' from 'CCC- (sf)' our rating on the class C notes.

Bancaja 11 is a 2007-vintage securitization of first-ranking mortgages secured on owner-occupied residential properties in Spain. Bankia S.A. originated and services the mortgages.
