

A low-angle, upward-looking photograph of a modern glass skyscraper. The building's facade is composed of large glass panels and dark metal frames. The interior of the building is brightly lit with a warm, yellow light, which is visible through the glass. Several people can be seen silhouetted against the light inside the building. The sky is a clear, pale blue. The overall composition is dynamic, with strong diagonal lines from the building's structure.

This document contains statements that Repsol believes constitute forward-looking statements which may include statements regarding the intent, belief, or current expectations of Repsol and its management, including statements with respect to trends affecting Repsol's financial condition, financial ratios, results of operations, business, strategy, geographic concentration, production volume and reserves, capital expenditures, costs savings, investments and dividend payout policies. These forward-looking statements may also include assumptions regarding future economic and other conditions, such as future crude oil and other prices, refining and marketing margins and exchange rates and are generally identified by the words "expects", "anticipates", "forecasts", "believes", "estimates", "notices" and similar expressions. These statements are not guarantees of future performance, prices, margins, exchange rates or other events and are subject to material risks, uncertainties, changes and other factors which may be beyond Repsol's control or may be difficult to predict. Within those risks are those factors and circumstances described in the filings made by Repsol and its affiliates with the Comisión Nacional del Mercado de Valores in Spain and with any other supervisory authority of those markets where the securities issued by Repsol and/or its affiliates are listed.

Repsol does not undertake to publicly update or revise these forward-looking statements even if experience or future changes make it clear that the projected performance, conditions or events expressed or implied therein will not be realized.

This document does not constitute an offer or invitation to purchase or subscribe shares, pursuant to the provisions of the Royal Legislative Decree 4/2015 of the 23rd of October approving the recast text of the Spanish Securities Market Law and its implementing regulations. In addition, this document does not constitute an offer to purchase, sell, or exchange, neither a request for an offer of purchase, sale or exchange of securities in any other jurisdiction.

The information contained in the document has not been verified or revised by the Auditors of Repsol.

2017 Annual General Meeting: Contents

- ▶ **Sector Environment**
- ▶ **Energy Transition**
- ▶ **2016 Results**
- ▶ **2017 First Quarter Results**
- ▶ **Proposals for the Annual General Meeting**

Sector Environment

Brent

Henry Hub

Persistence of low oil and gas prices, which are slowly recovering

Stable exchange rate

Refining Margin Indicator

Year-on-year growth in demand for gasoline and diesel in Spain

- Growth in demand from 2014, after decreasing 30% in gasoline and 20% in diesel from 2007 to 2014

Favorable environment for Downstream

Source: International Monetary Fund (IMF, WEO Update January 2017) and Repsol Division of Studies

Spain grew 3.2% in 2016

Energy transition

The world needs more energy supply to support its growth

There are future elements that will contain the increase in energy demand

We are unsure how they will eventually impact our societies

Four major challenges posed by the energy context

Distribution of energy consumption

Source: IEA. Data from USA

Industry familiarized with energy transitions

Slowdown in the growth of global energy demand

CAGR: Compound annual growth rate
Source: IEA WEO 2016

All energies will be necessary to meet worldwide growth

Climate change

Urban pollution

Effect

- ▶ Global effect
- ▶ The location of emissions-sources is irrelevant

- ▶ Local effect
- ▶ The location of the source of emissions is important

Factors

- ▶ CO₂ and methane
- ▶ Excess concentration in the atmosphere produces global warming
- ▶ These gases are not poisonous - they are part of life on the planet

- ▶ Basically three pollutants: SO₂, NOx and particles
- ▶ These pollutants can have adverse effects on health

Causes

- ▶ Power generation from coal, fossil fuels and economic and industrial development
- ▶ Up to 68% of emissions come from the energy sector

- ▶ Increased urbanization and vehicle numbers
- ▶ Old diesel cars (NOx)
- ▶ Domestic heating with pellets or coal, and heavy vehicles that generate particles through brake friction and tyre use
- ▶ Use of coal in cities (SO₂)

Each problem must be examined rigurously

The sustainability challenge: climate change and urban pollution

Climate change

Urban pollution

What has been done

- ▶ Kyoto agreement (1997), through Paris (2015)
- ▶ Emissions trading CO₂
- ▶ Agreements between legislators, auto manufacturers and fuels producers
- ▶ EURO regulations and fuel-specifications regulations

Has a reduction been achieved?

- ▶ Still far off
- ▶ Developed countries have curbed emissions
- ▶ Significant growth from emerging economies
- ▶ Varies locally
- ▶ Innovation and technology achieve cuts of 90% in NOx and particles from 90s levels
- ▶ Not enough, due to increased mobility, higher numbers of diesel vehicles and discrepancy with real emissions
- ▶ Domestic heating increasing the use of biomass (pellets)

The solutions must be effective and economically sustainable

With the current national commitments we will be far from the global target of 2°C

Energy: Global CO₂ emissions by sectors

Measures to reduce emissions by sector

Heat and power generation

- ▶ Efficiency
- ▶ Increased renewable, gas and nuclear capacity
- ▶ Reduction in the use of coal
- ▶ CO₂ storage and capture

Transport

- ▶ Increased engine efficiency
- ▶ Renewables: use of biofuels
- ▶ Support to the replacement of old vehicles: PIVE plan (€75 per tCO₂ avoided)
- ▶ AutoGas, natural gas and EV. The MOVEA plan for the purchase of EV is much less efficient (€860 per tCO₂ avoided)
- ▶ New mobility solutions: car sharing, etc.

Industry

- ▶ More efficient industrial processes
- ▶ Renewables for heat generation
- ▶ Use of natural gas instead of more CO₂-intensive alternatives
- ▶ CO₂ storage and capture

Residential

- ▶ Increased efficiency from domestic appliances and lighting
- ▶ Intelligent housing that reduces consumption
- ▶ Building improvements in materials and insulation

Fuente: CO₂ Emissions from Fuel Combustion - Highlights 2016, IEA

All sectors must contribute to the energy transition

**Gasoline, AutoGas, LPG
and Bioethanol**

- ▶ Currently available competitive solutions
- ▶ Since 2001 (Euro 3 Regulations), vehicles incorporate a trivalent catalyst and are no longer a NOx problem

Diesel

- ▶ Competitive solution available in 2019 with Euro 6D Regulations
- ▶ After 2019, in Europe all new diesel vehicles will cease to cause a NOx problem
- ▶ Incentives for the replacement of older diesel vehicles (PIVE plan)

Electric vehicle

- ▶ Currently dependant on significant subsidies and generates the same or more particles due to increased weight. Subsidies destined to people with a higher purchasing power.
- ▶ Requires analysis of the full life cycle (e.g. production, reuse or recycling of batteries)
- ▶ Its development must be aligned with the decarbonization of the electricity mix to be effective

TODAY**Other initiatives**

- ▶ Encourage the use of collective public or private transport
- ▶ Encourage car sharing
- ▶ Urban planning: favour pedestrianized areas and reduce vehicle access to city centers
- ▶ Modernize heating for a more intensive use of natural gas
- ▶ Eliminate energy-intensive industries from city centers and remove coal-fired power plants

Accelerating the renewal of the vehicle fleet will make it possible to move toward ending the problem

OIL AND GAS CLIMATE INITIATIVE

Led by the CEOs of 10 oil and gas companies

OBJECTIVE:
DRIVE
PRACTICAL ACTION
on climate change through collaboration

Representing
20%
of global
OIL AND GAS
PRODUCTION

decrease of combined
**GREENHOUSE GAS
EMISSIONS (GHG)**
from the companies' operations since 2005

The OGCI undertakes to invest \$1 billion to mitigate climate change

How does Repsol address the transition challenge?

Focused on energy efficiency and emissions reduction

- ▶ 4.3 million metric tons of CO₂ /year avoid and an investment of €500 million through 2020
- ▶ Domestic coal price
- ▶ Issue of Green Bond

Technology and new fuels

- ▶ Premium fuels
- ▶ Biofuel mixture
- ▶ Hydrogenated Vegetable Oils
- ▶ AutoGas, natural gas and electricity in automotive
- ▶ New technological developments

Integrated supplier of competitive and sustainable energy

- ▶ Quality assets
- ▶ New business models
- ▶ Advanced mobility services
- ▶ Customer focus
- ▶ Emphasis on natural gas

Team and organizational model ready to address the future

- ▶ A leaner, stronger, and more competitive company
- ▶ Talented, innovative, and committed professionals
- ▶ Culture oriented towards efficiency
- ▶ Long-term vision

Repsol, integrated energy company

The background of the slide is a large-scale industrial facility, likely a refinery or chemical plant, captured at sunset. The sky is a mix of orange, yellow, and blue. The facility is filled with a complex network of pipes, steel structures, and large storage tanks. Some areas are illuminated by artificial lights, creating a contrast with the natural light of the sunset. The overall scene conveys a sense of industrial activity and scale.

2016 Results

Transformation Program

Internal commitment

- ▶ Integration of Talisman
- ▶ Global company with a strong E&P presence
- ▶ Efficiency
- ▶ Sustainability and innovation

Strategic Plan

External commitment

- ▶ Value creation
- ▶ Resilience
- ▶ Efficiency
- ▶ Portfolio management

1. **Value creation** in a \$43.7/barrel environment
2. Reduction of **debt** and payment of **dividends**

Transformation Program and Strategic Plan focused on creating value and generating cash flow

Talisman integration

Growth

- ▶ Increase in production and reserves
- ▶ Increase in operated assets
- ▶ Broad portfolio of projects and exploration opportunities

Production
~700,000 boe/day

Reserves
~2.3 billion boe

Diversification

- ▶ Focus on 3 regions and 3 plays
- ▶ Balance between Upstream and Downstream
- ▶ Increased OECD production

Global portfolio
including more than 40 countries

Synergies
~\$400 million

Value creation

- ▶ Complementary capabilities
- ▶ Cost and management synergies
- ▶ Portfolio flexibility

Recognized exploration

More than 24,000 professionals

Talisman: a transformative operation which has provided growth, diversification and value creation

More than 450 initiatives

~\$400 million in Synergies in 2020

- ▶ More than **250 people** in over **20 countries** working on the integration
- ▶ **94% of initiatives implemented, 65% completed**
- ▶ **95% of synergies from duplication, financial transactions, IT, insurance, asset management and marketing**
- ▶ **88% of captured synergies**

Millions of dollars

Talisman integration has generated synergies amounting \$400 million per year

1. Synergies and efficiencies

More than €1.6 billion

2. Flexibility

Capex reduction: 55%

- ▶ Highest net income of the last four years
- ▶ **Upstream:** increasing results and flexibility
- ▶ **Downstream:** strength of the integrated model
- ▶ Debt reduction (32%)
- ▶ Committed to **sustainability and innovation**

3. Portfolio management

€5.1 billion
of divestments

4. FCF Breakeven

Group: ~\$42/barrel
Upstream: ~\$61/barrel

Repsol creates value and generates cash flow in a low price environment

1. Synergies and efficiencies

	2016 Objectives	Savings earned	
Synergies	€200 M	€300 M	✓
Upstream (Opex & Capex)	€600 M	€800 M	✓
Downstream (Margin and efficiency)	€200 M	€300 M	✓
Corporate (Rightsizing)	€100 M	€200 M	✓
	€1.1 billion	€1.6 billion	> €2.1 billion in 2017

Higher than expected synergies and efficiencies: target of €2.1 billion brought forward to 2017

2. Flexibility

Group Capex⁽¹⁾

Billions
of dollars

1. Repsol and Talisman were two independent companies in 2014

- ▶ Upstream assets at an advanced stage of development
- ▶ Limited presence in new capital-intensive development projects
- ▶ High proportion of **unconventionals**
(Capex adjustable in accordance with crude price)
- ▶ Limited **exploration** commitments
 - ▶▶ ~\$600 millions in 2016 and ~\$700 million forecast in 2017
- ▶ Lower capital needs in Downstream

Flexible investment management

3. Portfolio management

Upstream: €1.6 billion

- ▶ Eagle Ford-Gudrun swap
- ▶ Tangguh (Indonesia)
- ▶ TSP (Trinidad and Tobago)
- ▶ Dilution in Alaska
- ▶ Brynhild (Norway)
- ▶ Exploration licenses in Canada
- ▶ Laminara-Corallina (Australia)

Downstream: €1.6 billion

- ▶ Piped LPG
- ▶ 10% CLH
- ▶ Offshore wind (United Kingdom)
- ▶ LPG Peru and Ecuador

Corporation: €1.9 billion

- ▶ 10% Gas Natural Fenosa

Total divestments: €5.1 billion

Active portfolio management, maintaining the production growth target of 700,000 barrels of oil equivalent per day

4. FCF Breakeven

Group FCF Breakeven

\$/barrel

Upstream FCF Breakeven

\$/barrel

Efficiency programs and cost control have improved Repsol's competitiveness in a low price environment

Figures in millions of euros

	2015 ⁽¹⁾	2016	
Upstream	(925)	52	
Downstream	2,150	1,883	
Corporate and others	627	(13)	
Adjusted Net Income⁽²⁾	1,852	1,922	+ €70M
Inventory effect	(459)	133	
Special items	(2,791)	(319) ⁽³⁾	
Net Income	(1,398)	1,736	+ €3,134M

1. Includes the necessary changes with respect to the information presented for the year ended December 31st, 2015 in relation to the capitalization of geology and geophysics costs for total adjusted net income of -€8 M (-€16 M Upstream and +€8 M Corporation and others) and -€163 M in special items.

2. Recurring net income to CCS (calculated based on inventory valuation at replacement cost).

3. Mainly include staff restructuring costs of €393 M

**The integrated business model resulted in the highest net income
in the last four years**

Adjusted Net Income

Millions of euros

- ▶ Great ability to adapt to the price environment
- ▶ Flexible assets portfolio
- ▶ Savings of more than €900 million
- ▶ Exploration and production in over 30 countries and an operator in 24 of them

Increasing earnings and flexibility in a low price environment

Upstream: improving flexibility and results

North America: Growth

Production: ~182 kboe/day

Gas: 70%

75% operated production

► Unconventional portfolio

Latin America: Production

Production: ~302 kboe/day

Gas: 76%

24% operated production

► Regional scale

Europe, Africa, and Brazil: FCF

Production: ~109 kboe/day

Crude: 83%

6% operated production

► Offshore development (deepwater)

Asia-Russia: Free cash flow and growth

Production: ~98 kboe/day

Gas: 69%

25% operated production

► Self-financed growth

► Exploration potential

First year of integrated management with Talisman with common objectives and strategy

Production

Production by play

~90% of production in key regions (2016-2020)

North America	Latin America	Southeast Asia
---------------	---------------	----------------

More specialized production at the desired levels

► **45 discoveries in the last 9 years**

- 8 of the largest annual discoveries worldwide ⁽¹⁾

► **In 2016 we drilled 19 wells**

- 3 positive
- 5 under assessment

► **Alaska Discovery**

- The largest U.S. onshore conventional hydrocarbons discovery in 30 years
- 1.2 billion recoverable barrels of light crude, equivalent to four years of oil demand in Spain

1. According to IHS
2. In 2017

The largest U.S. onshore conventional hydrocarbons discovery in 30 years

Reserve Replacement Ratio

- ▶ **Reserve Replacement Ratio: 103%**
 - ▶ Seven years above 100%
- ▶ **Organic Reserve Replacement Ratio : 124%**
- ▶ **Increase in reserves**
 - ▶ 2,382 million boe of proved reserves
 - ▶ 75% natural gas
- ▶ **Reserves with higher quality and geographic diversification**

Generation of new reserves maintaining the reduction in investments

Adjusted Net Income

Millions of euros

- ▶ Quality of our **Refining assets**
- ▶ Excellent results in **Chemicals**
- ▶ **Improvement** in the earnings of the **commercial** business units
- ▶ Negative impact from the deterioration of the international situation for Refining and Gas & Power business units in North America
- ▶ High **safety** standards and respect for the **environment** in all operations

Resilience driven by the competitive advantages of our integrated business model

Integrated margin⁽¹⁾ of Refining and Marketing in Europe (Repsol versus sector)

- ▶ **Leadership** in Refining and Marketing integrated margin
- ▶ **Excellent quality** of assets
- ▶ Optimization and **integrated management** of all the business units to **improve the margin**
- ▶ The investments in **efficiency** and operational improvements have allowed us to take advantage of market conditions

1. Calculated as an adjusted operating result (CCS) of R&M, divided by the volume of crude processed for 10 comparable European Companies (Repsol, CEPSA, ENI, Galp, OMV, MOL, Total, PKN Orlen, Hellenic Petroleum, Saras).

A European leader, based on the strength and integration of the commercial and industrial businesses

Refining margin indicator (Spain)

\$/barrel

2016 Utilization

- ▶ Capacity to process **1,000,000 barrels/day**
- ▶ **High utilization** (distillation and conversion)
- ▶ **Robustness** of margin indicator (\$6.3/barrel)
- ▶ **Efficiency:** reduction of energy costs and emissions
- ▶ Important **industrial partners:** Lubricant plant in Cartagena, with SKL
- ▶ Successful **launch** of the modernization project in **La Pampilla** (Peru)

Efficiency in Refining, reducing costs and emissions

Commercial

- ▶ More than **4,700 service stations** in Spain, Portugal, Peru, and Italy
- ▶ Prominent non-oil position, with **strategic alliances**
- ▶ **Very high quality and efficiency products:** Neotech and BiEnergy
- ▶ Lubricants, Asphalts, and Specialized Products: $\approx 50\%$ of sales are **international**
- ▶ **Leaders** in LPG distribution, first in **Spain**
- ▶ **AutoGas:** 745 supply points in Spain and Portugal

Trading and Gas & Power

- ▶ Growth and optimization plan for the **integrated value chain**

Chemicals

- ▶ **Favorable situation:** growth of demand
- ▶ **Competitiveness Plan:** focus on efficiency and differentiation
- ▶ **Flexibility** in raw materials and **logistic** capacity
- ▶ **Increased sales** thanks to the **reliability** of plants and the contribution from **differentiated products**
- ▶ Integrated management of facilities
- ▶ **Strong commercial position** (southern Europe and Mediterranean market)
- ▶ **External recognition:** prizes awarded by European customers

Net debt variation

Billions of euros

- ▶ 32% of net debt reduction
- ▶ Bond issue
- ▶ Repurchase of Talisman bonds
- ▶ Liquidity (€9.347 M) is more than double short-term maturities
- ▶ Maintenance of credit rating

Only company that generates positive free cash flow without divestments at \$42 per barrel

Average prices

Adjusted Net Income

Integrated business model

- ▶ Highly **integrated** company
- ▶ **Optimal size of Upstream**
- ▶ **Leadership** in Downstream
- ▶ **Commercial businesses** focused on the **customer**
- ▶ Skilled and dedicated **team**

Value creation

- ▶ **Optimized portfolio** with focus on key areas
- ▶ **Technology and know-how**
- ▶ Explorer: **discovery in Alaska**
- ▶ ~**2.4** billion of boe proved reserves
- ▶ **Reserve Replacement Ratio: 100%**
- ▶ **Safety and sustainability**

Resilience

- ▶ **Efficiency** in Opex and Capex: €2.1 billion in 2017
- ▶ **Flexibility** in Capex management
- ▶ **Positive cash flow** at \$42/barrel
- ▶ **Sound financial position**
- ▶ Maintenance of our **rating**

Repsol today: a stronger, leaner and more competitive company

- ▶ Key businesses: Upstream and Downstream
- ▶ ~700,000 barrels of oil equivalent/day of production
- ▶ Capacity to process ~1 million barrels/day
- ▶ Committed to the Paris Agreement (COP21)
- ▶ Debt reduction and competitive shareholder return
- ▶ Positive cash flow at ~\$40/barrel

Prepared to face future challenges

Proposals for the Annual General Meeting

- ▶ **First.** Review and approval, if appropriate, of the Annual Financial Statements and Management Report of Repsol, S.A., the Consolidated Annual Financial Statements and Consolidated Management Report, for fiscal year ended 31 December 2016
- ▶ **Second.** Review and approval, if appropriate, of the proposed application of profits for 2016.
- ▶ **Third.** Review and approval, if appropriate, of the management of the Board of Directors of Repsol, S.A. during 2016
- ▶ **Fourth.** Appointment of the Accounts Auditor of Repsol, S.A. and its Consolidated Group for fiscal year 2017
- ▶ **Fifth.** Appointment of the Accounts Auditor of Repsol, S.A. and its Consolidated Group for fiscal years 2018, 2019 and 2020

- ▶ **Sixth.** Increase of share capital in an amount determinable by issuing new common shares having a par value of one (1) euro each, of the same class and series as those currently in circulation, charged to voluntary reserves, offering the shareholders the possibility of selling the scrip dividend rights to the Company itself or on the market. Delegation of authority. Application for official listing of the newly issued shares on the relevant stock exchanges or securities markets
- ▶ **Seventh.** Second increase of share capital in an amount determinable by issuing new common shares having a par value of one (1) euro each, of the same class and series as those currently in circulation, charged to voluntary reserves, offering the shareholders the possibility of selling the scrip dividend rights to the Company itself or on the market. Delegation of authority. Application for official listing of the newly issued shares on the relevant stock exchanges or securities markets

- ▶ **Eight.** Delegation to the Board of Directors on the power to issue fixed income, convertible and/or exchangeable securities for Company shares, as well as warrants (options to subscribe new shares or acquire circulating Company shares). Setting of criteria to determine the terms and types of the conversion and/or exchange and allocation to the Board of Directors of the powers to increase capital as necessary, as well as fully or partially remove shareholders' pre-emptive subscription rights in these issuances. Authorisation for the Company to guarantee security issuances made by its subsidiaries. Nullify the portion of resolution thirteen B) of the General Shareholders' Meeting held on 31 May 2012 that were not used

- ▶ **Ninth.** Re-election of Mr. Rene Dahan as Director
- ▶ **Tenth.** Re-election of Mr. Manuel Manrique Cecilia as Director
- ▶ **Eleventh.** Re-election of Mr. Luis Suárez de Lezo Mantilla as Director
- ▶ **Twelfth.** Ratification of the appointment by co-optation and re-election as Director of Mr. Antonio Massanell Lavilla
- ▶ **Thirteenth.** Appointment of Ms. María Teresa Ballester Fornés as Director
- ▶ **Fourteenth.** Appointment of Ms. Isabel Torremocha Ferrezuelo as Director
- ▶ **Fifteenth.** Appointment of Mr. Mariano Marzo Carpio as Director

- ▶ **Sixteenth.** Advisory vote on the Repsol, S.A. Annual Report on Directors' Remuneration for 2016
- ▶ **Seventeenth.** Implementation of a compensation system referred to the share value for the CEO of the Company
- ▶ **Eighteenth.** Approval, if appropriate, of the inclusion of a target related to the performance of total shareholder return in the 2017-2020 Long Term Multi-Year Variable Remuneration Plan
- ▶ **Nineteenth.** Approval, if appropriate, of the delivery of shares to the Executive Directors as partial payment of their remuneration under the Long-Term Multi-Year Remuneration Plans
- ▶ **Twentieth.** Examination and approval, if appropriate, of the Remuneration Policy for Directors of Repsol, S.A. (2018-2020)

- ▶ **Twenty-first.** Delegation of powers to interpret, supplement, develop, execute, rectify and formalize the resolutions adopted by the General Shareholders' Meeting

In addition, the shareholders will be informed on the amendment to the Regulations of the Board of Directors, pursuant to Article 528 of the Companies Act.

A low-angle, upward-looking photograph of a modern glass skyscraper. The building's facade is composed of large glass panels and dark metal frames. The interior of the building is brightly lit with a warm, yellow light, which is visible through the glass. Several people can be seen walking on different levels of the building. The sky is a clear, bright blue. The overall composition is dynamic and emphasizes the height and modern architecture of the building.
