Explanations:

¹⁾ AmRest Group took up 82% and Starbucks 18% of the share capital of the newly-established companies in Poland, Czechia and Hungary. Starting from the ninth year Starbucks has an unconditional option of increasing its shares to a maximum of 50%. In the event of a disputed take-over or change of control over the Company and/or its shareholders, Starbucks will be entitled to increase its share to 100% by purchasing shares from the Group. According to Company's Management assessment as at the day of this report issuance, there are no indicators making the mentioned above options realisable. The Group acquired 100% of shares in Romanian and Bulgarian entities being the sole operators on these markets. In Germany the Group acquired 100% of shares in a key operator on this market.

²⁾ The fee is revalorised at the beginning of each calendar year by the inflation rate.

³⁾ Preliminary franchise fees and marketing costs might be changed if certain conditions set in the agreement are met.

⁴⁾ Validity period of franchisee agreement, therefore licenses for Burger King restaurants opened in Poland in period from 1 March 2009 till 30 June 2010, and also for newly-opened restaurants in Poland was extended from 10 to 20 years since date of restaurant opening, however without the option of prolongation for the next 10 years, which was provided in the original development agreement with AmRest Sp. z o.o. In relation to restaurants opened in Poland in the period from 1 March 2009 to 30 June 2010 and in relation to restaurants opened after this period (for franchise agreements for 20 years) the initial franchise payment was increased from USD 25.000 to USD 50.000.

The Company's performance in Q3 2018

Sales

The revenues of AmRest Group in Q3 2018 amounted to EUR 392.3 million, representing a 23.2% growth over the year (EUR +73.8 million compared to Q3 2017). In most of the markets positive LFL trends continued in Q3 2018, while 242 new restaurants were added to the portfolio during last 12 months. Top line growth was additionally supported by consolidation of M&A projects finalized in 2017 and 2018. The revenues of the Core business, i.e. adjusted for recent M&As (acquisition of Pizza Hut and KFC businesses in France, Germany and Russia, Bacoa chain in Spain and pizzaportal.pl) amounted to EUR 342.1 million in Q3 2018 and were 11.6% higher than year ago.

Accumulated revenues of the Group for the first three quarters of 2018 grew by 25.6% to EUR 1 104 million.

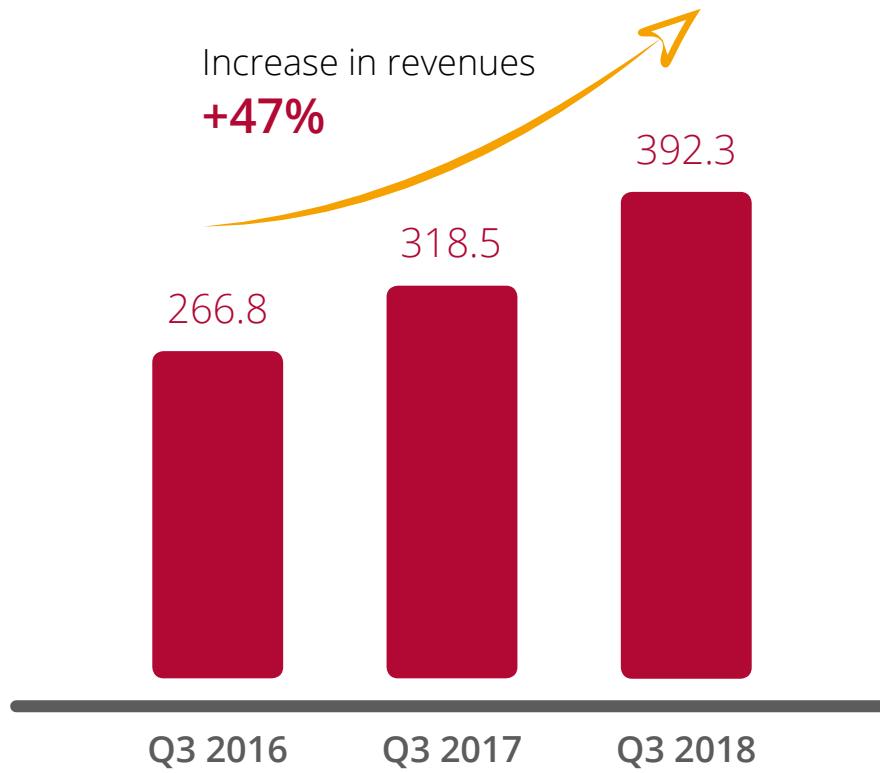

The highest dynamics in revenues in Q3 2018 was observed in Western Europe. The 33.3% top line growth was mainly driven by consolidation of new businesses acquired in France and Germany as well as solid revenues reported by Spanish market (11% increase in sales in Q3 2018 resulting from positive LFL trends and new openings). During the last 12 months, the Group opened 76 new restaurants in Western Europe.

The revenues of Russian division amounted to EUR 42.7 million in Q3 2018. Solid growth of 29.1% vs LY was achieved on the back of a double-digit LFL growth in KFC business, continued organic expansion (31 restaurants opened in the last 12 months) and finalized acquisitions within KFC and Pizza Hut brands. In local currency, the revenues increased by nearly 42% in Q3 2018.

Positive sales trends in Q3 2018 were observed in China, where Blue Frog brand reported LFL growth for the quarter. Additionally, AmRest expanded its business in the region by opening 10 new restaurants in the last 12 months. The revenues of Chinese division in Q3 2018 amounted to EUR 19.4 million and were 21.7% higher than year ago.

In Central and Eastern Europe, the revenues reached EUR 186.3 million in Q3 2018. The 15.6% growth over the year was mainly driven by solid LFL trends in all major brands in the region, as well as further expansion of AmRest's portfolio. In the last 12 months the Group opened 125 new restaurants in Central and Eastern Europe.

Profitability

In Q3 2018 the financial results of AmRest Group were shaped by a solid performance of the Core business and dilutive impact of integration and consolidation of recent M&A projects. Total EBITDA of the Group amounted to EUR 49.7 million, growing by nearly 6% over the year. At the same time, EBITDA margin decreased by 2.1pp to 12.7%. The EBITDA of AmRest's core operations (i.e. excluding all 2017 and 2018 M&A projects) amounted to EUR 51.5 million in Q3 2018 and was 12.1% higher than year ago. As a result, the EBITDA margin of the Core business improved by 0.1pp to a record high level of 15.1%.

AmRest's profits in Q3 2018 were impacted by growing labor cost, which increased by 33% over the year (+1.7pp compared to Q3 2017). Such dynamics were mainly driven by continued pressure on labor in Central European markets as well as consolidation of Western European businesses, characterized by relatively higher labor cost.

Operating profit of the Group (EBIT), supported by relatively lower cost of depreciation and amortization (-0.3pp), amounted to EUR 27.5 million in Q3 2018. The EBIT margin stood at 7% and was 1.8pp lower than year ago. Net profit attributable to AmRest shareholders in Q3 2018 reached EUR 18 million, while net profit margin decreased by 1.7pp to 4.6%.

Net debt at the end of Q3 2018 equaled EUR 379 million and the leverage stood at 2.33.

Similar to previous quarters, profitability of the Central and Eastern Europe division remained under the pressure from growing labor cost, partially offset by relatively lower costs of food. The EBITDA profit in the region grew by 15.4% to EUR 31 million in Q3 2018, while EBITDA margin remained flat at 16.6%. On the back of positive LFL trends and a strict discipline on the cost side, all major markets in CEE improved margins. At the same time, the profitability of Other CEE segment was impacted by a green field investment into KFC in Austria and Slovenia.

The profitability of Russian division improved by 4.9% in Q3 2018 (EBITDA grew by EUR 0.3 million), while EBITDA margin decreased by 2.8pp to 12.4%. The results of Russian division were primarily driven by a solid performance of KFC business (20%+ growth of EBITDA) and dilutive impact of recently acquired Pizza Hut chain in the region, where restructuring processes are required in order for the business to break even.

The EBITDA reported by Western Europe division amounted to EUR 14.5 million in Q3 2018 (EUR -1.8 million compared to last year). Spanish market remained flat on EBITDA profit of EUR 13.7 million, with EBITDA margin declining by 2.4pp in Q3 2018. Such results were driven by solid performance of La Tagliatella, accelerated development of KFC business (8 new restaurants opened in the last 12 months) and launch of Blue Frog brand (4 restaurants operating as at the end of Q3 2018). In Germany, the EUR 1 million EBITDA profit in Q3 2018 came from a solid performance of Starbucks business (5.2% EBITDA margin) partially offset by weaker results of KFC and Pizza Hut businesses, which require further investments and integration efforts. The Other Western Europe segment reported flat results, which was a mix of successful turnaround of KFC France business, soft performance of Pizza Hut France and one-off transaction costs of EUR 0.8 million related to takeover of 9 KFC restaurants in Q3 2018.

The purchase price was expected at EUR 33.3 million. Final purchase price would be determined as at the day of the transaction closing.

Estimated revenues of the restaurants in 2017 amounted to EUR 40 million.

It was the intention of the parties that the closing of the transaction, including transfer of ownership of KFC Business and payment of the purchase price, should occur till end of the year 2018 (the “Completion”). The Completion is contingent upon some additional conditions, such as concluding additional agreements ensuring restaurants proper functioning after Completion, consultation with works council and health and safety committee of KFC France and lack of the material adverse change (“MAC”).

Simultaneously, the Group informed about signing on 26 July 2018 of the Development Agreement between AmRest Opco and KFC France setting forth the development plans of the KFC brand in France. In the opinion of the Group there is a great potential for growing KFC brand in Western Europe. Acquisition of several of KFC French restaurants will contribute to strengthening the partnership with Yum! Brands and AmRest’s leadership position of restaurant operator in Europe as well as drive the value creation for AmRest’s shareholders.

As at date of this Report AmRest took over from KFC France all 15 equity restaurants.

In the past fiscal year the network generated system sales of approx. PLN 103m. The consolidated revenue of Telepizza Poland amounted to about PLN 73.3m.

* The restatement was described in Annex to the Interim Report for 9 months ended 30 September 2018.

Basis of preparation of the consolidated interim report

Accounting figures presented in this condensed consolidated report were prepared in accordance with the International Financial Reporting Standards and their interpretations adopted by the International Accounting Standards Board ("IASB") in the form approved for application on the territory of the European Union by virtue of the IFRS Regulation (the European Commission 1606/2002) ("IFRSs").

Amounts in this consolidated interim report are presented in euro (EUR), rounded off to full millions with one decimal place.

The preparation of this Condensed Consolidated Interim Report requires the Board of Directors to make certain assumptions, judgments and estimates, which are reflected in the applied accounting policies and affect the value of assets and liabilities, revenues and expenses disclosed in this Condensed Consolidated Interim Report. The estimates and the related assumptions, which are made on the basis of experience and various factors deemed relevant in given circumstances, are the basis for valuation of the assets and liabilities which do not directly result from other sources. Actual results may differ from the estimates.

The most significant estimates and assumptions concern the valuation of property, plant and equipment, intangible assets, including goodwill, revaluation allowances for accounts receivable and inventories, provisions, contingent liabilities and adjustment to the valuation of deferred tax assets. During the period covered by this Report, there were no material changes in the value of estimates disclosed in the previous reporting periods.

The accounting policies described in the annual consolidated financial statements as at 31 December 2017 have been applied consistently in all periods presented in this Condensed Consolidated Interim Report and have been applied consistently by all members of the Group with exceptions of the amendments of IFRSs applicable from 1 January 2018 and changes presented below. Since 1 January 2018 the Group applied requirements of IFRS 9 and IFRS 15, however as stated in the annual consolidated financial statements, the impact on numbers starting from 1 January 2018 was not significant. Details were presented in the Condensed Consolidated Financial Statements for 6 months ended 30 June 2018.

Change of the presentation currency and level of aggregation of data

In the second half of 2017 the current shareholders of AmRest decided on change of domicile from Wroclaw, Poland to Madrid, Spain. Respective legal documents were submitted to Spanish Court on 1 March 2018. On 14 March 2018 the Company received the confirmation and reported on both Warsaw and Madrid Stock Exchange that as at 12 March 2018 the Spanish Court approved the change of domicile and registered AmRest's domicile in Madrid.

The annual reporting for year 2017 (for both separate and consolidated financial statements) was prepared in accordance with IFRSs and was published on 8 March 2018 in PLN thousands.

Decision about changing the domicile caused considerations of changing the presentation currency of the Group from PLN to EUR. Taking into account, among others matters listed below, the Group decided to change its presentation currency into EUR, as currency that better responds to the needs of users of consolidated financial reports:

- AmRest is a global restaurant operator conducting its activities in many countries and currency zones. Large number of the companies from the Group use EUR as a functional and presentation currency.

- The vast majority of acquisitions done by AmRest are conducted in EUR.
- With the change of domicile Group will be required to report its financial statements both on Warsaw Stock Exchange (where it is quoted) and on Madrid Stock Exchange (where it is domiciled). EUR is a widely used currency in presentation of financial statements of entities domiciled in Spain.
- Warsaw Stock Exchange allows to publish reports in EUR.
- EUR is a widely used in financial reporting, especially by entities domiciled in European Union.
- Long term development plan includes investments in Western Europe where EUR is a functional currency.
- The Group also changed its internal reporting into EUR.

The change of presentation currency under IFRSs is being considered as a change in the accounting policy and should be applied retrospectively. Change of the presentation currency had no impact on assets, liabilities and total equity but impacts translation the particular equity positions.

Subsequently, in order to present information better and more clearly, data was aggregated into millions of EUR with one decimal place.

Details regarding to those changes were presented in the annex to this Report.

Changes in the Cash Flow Statement

In 2017 the Group decided to change the presentation of interests paid and received in the cash flow statement. The change was inspired by the desire to reflect better the nature of the transactions as well as the growing magnitude of cash flow. Interests are now presented in the financing activities instead of operating activities (Adjustment 2). As a result, cash flow statement presented in the published condensed consolidated report for Q3 2017 had to be restated. The following table presents details.

Seasonality of sales

In the case of the AmRest Group, the seasonality of sales and inventories is not significant, which is typical to the restaurant business. The restaurants record the lowest sales in the first quarter of the year, which is attributable primarily to fewer people dining out. The highest sales are achieved in the fourth quarter mostly because of the pre-Christmas period, when particularly high sales are reported by the restaurants situated in shopping malls.

Segment reporting

AmRest as a Group of dynamic developing entities running operations in many markets and various restaurant business segments is under constant analysis of the Board of Directors. This Board is also constantly reviewing the way how business is analysed and adjust it accordingly to changing Group Structure as a consequence of strategic decisions. Operating segments are set on the basis of management reports used by the Board of Directors during making strategic decisions. - i. On 30 July 2018 at AmRest Sp. z o.o. a tax inspection began regarding VAT returns for the period December 2017 – March 2018.

On 29 August 2018 the Company received the tax protocol and on 12 September 2018 the Company submitted its reservations.

Despite the lack of final decision from tax office, in August 2018 Company has received from tax office cash payments for VAT receivables related to described VAT settlements (with respective interests).

In all issued decisions the tax authorities of the first instance have indicated an incorrect classification of the operations run by the Company, with regards to the Value-Added Tax Act (sales of goods vs. sales of gastronomic services) as well as inconsistency between the actual state described in the Company's individual binding tax rulings and the actual state (except for decision in respect to the period of March 2018 received by the Company on 20 August 2018).

The Company does not agree with the claims raised by the Head. The circumstances of the case and the allegations of the Head have been thoroughly analysed by the Company and its tax advisors, who found the Head's standpoint to be completely unjustified and against the law. In the opinion of the Company, the individual binding tax rulings issued by the Minister of Finance present a reliable and true actual state and consequently have protective power according to Article 14k and Article 14m of the Tax Ordinance Act.

Additionally, the matter of applying 5% VAT rate to the take-away segment was verified and confirmed by positive decisions issued by the Head in 2014 (inspections for October, November and December 2013).

The Company would like to draw attention to the fact that administrative courts in many cases present a standpoint consistent with the Company's. Also, the case law of the European Court of Justice presents such an approach.

According to the statement of reasons issued on 22 January 2018 by the Head of the Lower Silesia Tax and Customs Office, the reason for missing the tax proceedings deadline was the re-examination of the collected evidence in order to state a view on the correctness of VAT rate applied, taking into account the different approach in current case law of administrative courts and review bodies.

Furthermore, the Company insist that the case should be determined with application of Article 2a of the Tax Ordinance Act of 29 August 1997 (which states that, when the provisions of the law are not clear the case should be resolved in favour of the taxpayer).

The Company analysed the risk in regards to ongoing tax inspections and assessed the risk as less than 50%. In reference to the IAS 37, in the Company' opinion there is no legal obligation and any cash outflows require a higher probability of materialisation of the risk. Therefore, it was resolved that as at 30 September 2018 and as at the date of publication of this Report there are no obligating events, so there are no grounds for booking the provisions for the aforementioned risk.

It should be noted that in first two decisions issued by Tax Administration Chamber and in decision issued by the Head of the Lower Silesia Tax and Customs Office – as stated above - it was confirmed that individual tax ruling issued by the Minister of Finance to the Company should have protective power and there is no basis for assessment any additional tax.

As described above in August 2018 Company has received from tax office cash payments relating to VAT tax receivables. In total Company received over EUR 10 million of cash which is a settlement of the VAT tax receivables presented in these Condensed Consolidated Interim Report.

Modifications of the information presented for comparative purposes

AmRest Holdings SE (“AmRest” or “Company”) informs that on 14 March 2018 received a confirmation of the registration on 12 March 2018 of its registered office in Pozuelo de Alarcón, Madrid, Spain.

Conversion to the Spanish GAAP

As a consequence of the change of domicile of the Company and as per the provisions established in the Spanish General Accounting Plan the Separate Financial Statements have been prepared in accordance with Spanish Accounting Standards harmonized with the International Accounting Standards and the internal commercial law.

The Company has analysed the differences of criteria between the principles used previously to present Financial Statements (IFRS) and the Spanish regulations and has made the correspondent adjustments retrospectively calculating the effects from the earlier reporting period from which information is available.

The effects of the adjustments are identified in the Annex to the Interim Report for 9 months ended 30 September 2018.

The presentation of the financial statements of the previous periods was also adapted to the formats and classifications of accounts established in the Spanish General Accounting Plan.

Change of the presentation currency

The Separate Financial Statements as at December 2017 and as of September 2017 that were previously published on the Warsaw Stock Exchange in Polish zlotys (PLN) were translated into the current presentation currency euro (EUR) following the procedures set out in the standards for the preparation of consolidated annual accounts that implement the precepts of the Commercial Code.

The resulting translation differences were recognised in the equity.

Change of the functional currency

The Company prepared an analysis of reassessment of its functional currency and concluded that since 1 January 2018 euro (EUR) is considered the functional currency of AmRest Holding SE.

The Company has applied translation procedures to new functional currency prospectively since the date of change (i.e. 1 January 2018) as it is established in the article 59.3 of the Rules for Formulation of Consolidated Annual Accounts (NFCAC).

Trade and other receivables

Trade and other receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months from the balance sheet date that are classified as non-current assets.

These financial assets are initially valued at their fair value, including transaction costs that are directly attributable to them, and at amortized cost, recognizing the accrued interest based on their effective interest rate and the discount rate that equals the value in books of the instrument with all of its estimated cash flows until maturity. Notwithstanding the foregoing, loans for commercial transactions with maturity not exceeding one year are valued, both at the time of initial recognition and subsequently, at their nominal value, provided that the effect of not updating the flows is not significant.

At least at the end of the year, the necessary valuation corrections are made for impairment of value if there is evidence that the amounts owed will not be collected.

The amount of the impairment loss is the difference between the book value of the asset and the present value of the estimated future cash flows discounted at the effective interest rate at the time of initial recognition. The value corrections as well as, where appropriate, their reversal are recognized in the abbreviated profit and loss account.

Investments in the equity of group companies, jointly controlled entities and associates

Group companies are those over which the Company exercises control, either by exercising effective control or by virtue of agreements with the other shareholders. Joint ventures are companies which are jointly controlled with third parties. Associates are companies in which there is significant influence, but not control or joint control with third parties.

They are valued at their cost minus, where applicable, the accumulated amount of the corrections for impairment of value. However, when there is an investment prior to qualification as a group, multi-group or associate company, the carrying amount of the investment is considered as investment cost before having that qualification. The previous valuation adjustments recorded directly in equity remain in this until they are written off.

If there is objective evidence that the book value is not recoverable, the appropriate valuation corrections are made for the difference between their book value and the recoverable amount, understood as the greater amount between their fair value less costs to sell and the current value of the cash flows derived from the investment. Unless there is better evidence of the recoverable amount, in estimating the impairment of these investments, the net equity of the investee company is taken into account, corrected for the tacit capital gains existing on the valuation date. The value correction and, if applicable, its reversal is recorded in the abbreviated profit and loss account for the year in which it occurs.

Financial Investments

The company classifies Financial Investments in Equity instruments that it intends to hold for an unspecified period and that do not comply with the requirements to be classified in other categories of financial assets; as available for sale. These investments are recorded under "Non-current assets," unless it is probable and feasible that they will be sold within 12 months. They are initially measured at fair value; which in the absence of evidence to the contrary is the transaction price plus directly attributable transaction cost.

Financial assets available for sale are subsequently measured at fair value, without deducting any transaction costs incurred on disposal. Changes in fair value are accounted for directly in equity until the financial asset is derecognised or impaired, and subsequently recognised in the income statement.

Interest and dividends from financial assets

Interest and dividends accrued on financial assets after acquisition shall be recognised as income. Interest shall be accounted for using the effective interest rate method, while dividends shall be recognised when the equity holder's right to receive payment is established.

Upon initial measurement of financial assets, accrued explicit interest receivable at the measurement date shall be recognised separately, based on maturity. Dividends declared by the pertinent body at the acquisition date shall also be accounted for separately. "Explicit interest" is the interest obtained by applying the financial instrument's contractual interest rate.

If distributed dividends are clearly derived from profits generated prior to the acquisition date because amounts have been distributed which are higher than the profits generated by the investment since acquisition, the difference shall be accounted for as a deduction in the carrying amount of the investment and shall not be recognised as income.

Debt and Trade and other payables

Financial liabilities included in this category shall initially be measured at fair value. In the absence of evidence to the contrary, this shall be the transaction price, which is equivalent to the fair value of the consideration received, adjusted for directly attributable transaction costs. Nonetheless, trade payables falling due within one year for which there is no contractual interest rate, and called-up equity holdings expected to be settled in the short term can be measured at their nominal amount, provided that the effect of not discounting the cash flows is immaterial.

The financial liabilities included in this category shall subsequently be measured at amortised cost. Accrued interest shall be recognised in the income statement using the effective interest rate method.

Contributions received as a result of joint account contracts and similar agreements shall be measured at cost plus or minus the gain or loss, respectively, attributable to the nontrustee ventures.

Nonetheless, payables falling due within one year initially measured at the nominal amount, in accordance with the preceding section, shall continue to be measured at that amount.

Own equity instruments

In transactions carried out by the Company with its own equity instruments, the amount of these instruments shall be recognised in equity as a change in capital and reserves without valuation adjustments. Under no circumstances may it be accounted for as a financial asset of the Company and no profit or loss may be recognised in the income statement. Expenses arising on these transactions, including costs incurred on issuing the instruments such as lawyer, notary and registrar fees; printing of prospectuses, bulletins and securities; taxes; advertising; commissions and other placement expenses – shall be accounted for directly in equity as a reduction in reserves.

Costs incurred on an own equity transaction that is discontinued or abandoned shall be recognised as an expense.

Foreign currency transactions

In the second half of 2017 the current shareholders of AmRest decided on change of domicile from Wroclaw, Poland to Madrid, Spain. Respective legal documents were submitted to Spanish Court on 1 March 2018. On 14 March 2018 the Company received the confirmation and reported on both Warsaw and Madrid Stock Exchange that as at 12 March 2018 the Spanish Court approved the change of domicile and registered AmRest's domicile in Madrid.

The annual reporting for year 2017 (for both separate and consolidated financial statements) was prepared in accordance with IFRSs and was published on 8 March 2018 in PLN thousands.

Decision about changing the domicile caused considerations of changing the functional currency of AmRest Holdings SE from PLN to EUR.

To determine that the functional currency of AmRest Holdings is EUR were taking into consideration the following factors:

- AmRest is a global restaurant operator conducting its activities in many countries and currency zones. Large number of the companies from the Group use EUR as a functional and presentation currency which brings consequently that the origin of funds that the subsidiaries distribute to its parent company are denominated in EUR;
- The vast majority of acquisitions done by AmRest are conducted in EUR and the Long-Term Development Plan includes direct investments from AmRest Holdings in Western Europe where EUR is a functional currency;
- An important part of the net cash flows from Financing activities are EUR denominated and it is expected that these amounts increase proportionally to new acquisitions mentioned above;
- As a general rule EUR is the functional currency and presentation currency of the entities domiciled in Spain.

The Separate Financial Statements as at December 2017 and for September 2017 that were previously published on the Warsaw Stock Exchange in Polish zlotys (PLN) were translated into the current presentation currency euro (EUR) following the procedures set out in the standards for the preparation of consolidated annual accounts that implement the precepts of the Commercial Code.

Income Tax

The income tax is the amount that for this concept is accrued during the intermediate period and it is comprised of the current income tax and the deferred tax.

Both the current income tax and the deferred tax are recognised in the income statement. Nevertheless, the tax effect related to items that are registered directly in the condensed net equity is recognised in the net equity accordingly.

Assets and liabilities for current tax will be valued for the amounts that are expected to be paid or recovered by the tax authorities, in accordance with the regulations in force or approved and pending publication on the closing date of the fiscal year.

Deferred taxes are calculated according to the liability method, on the temporary differences that arise between the tax bases of the assets and liabilities and their book values. However, if deferred taxes arise from the initial recognition of an asset or a liability in a transaction other than a business combination that at the time of the transaction does not affect either the accounting result or the taxable basis of the tax, they are not recognised. The deferred tax is determined by applying the regulations and tax rates approved or about to be approved on the date of the abbreviated balance sheet and which is expected to be applied when the corresponding deferred tax asset is realised, or the deferred tax liability is settled.

Deferred tax assets are recognised to the extent that it is probable that future tax profits will be available to offset the temporary differences. Deferred taxes are recognised on temporary differences that arise in investments in subsidiaries, associates and joint ventures, except in those cases in which the Company can control the timing of the reversal of the temporary differences and it is also probable that these will not reverse in a foreseeable future.

Revenues Recognition

The amounts related to income derived from equity investments in group companies are an integral part of the net amount of the turnover of a holding company. „Based on the provisions of consultation B79C02 of the Institute of Auditors and Censors of September 2009. Therefore, the result on the execution of stock option plan by employees is presented in the turnover of the Company.

Share Base Payments transactions

The fair value of work performed by the employees for a consideration payable in options increases costs. The total amount which has to be taken to the income statements over the vesting period is based on the fair value of options received. As at each balance-sheet date entity verifies its estimates connected with number of options expected to vest. The impact of the potential verification of initial estimates is recognized by the Group in the income statement in correspondence with equity. The proceeds from the exercise of options (net of transaction costs directly related to the exercise) are recognized in share capital (at nominal value) and in supplementary capital, in share premium.

For share-based payment transactions in which the terms of the arrangement provide either the entity/the Company or the counterparty with the choice of whether the entity settles the transaction in cash or by issuing equity instruments, the entity/the Company shall account for that transaction, or the components of that transaction, as a cash-settled share-based payment transaction if, and to the extent that, the entity has incurred a liability to settle in cash or as an equity-settled share-based payment transaction if, and to the extent that, no such liability has been incurred.

The subsequent settlement of the liability follows the requirements for a cash-settled share-based payment.

The Company incurred a liability measured at fair value, taking into account the period of service/vesting period and any changes in value are recognized in investments at the end of the period.

At the date of settlement the Company shall remeasure the liability to its fair value. The actual settlement method selected by the employees, will dictate the accounting treatment:

- if cash settlement is chosen the payment will reduce the entirely recognised liability. Any equity component previously recognised will remain within equity, but it could be reclassified to other components of equity;
- if the settlement is in shares, the balance of the liability is transferred to equity being consideration for the shares granted. Any equity component previously recognised shall remain within equity.

In the parent company books the operation represents a contribution to the subsidiary that is made effective through the personnel service it receives in exchange for the equity instruments of the parent company the options delivered represents in general a greater value of the investment that the parent company has in the equity of the subsidiary.

When there is compensation agreement or recharge from the parent to subsidiary this operation represents a separated corporate operation of distribution/recuperation of the investment instrumented through the share base payment plan.

Explanation for the modifications of the comparatives in the Condensed Consolidated Interim Report for 9 months ended 30 September 2018

In second half of 2017 the current shareholders of AmRest decided on change of domicile from Wroclaw, Poland to Madrid, Spain. Respective legal documents were submitted to Spanish Court on 1 March 2018. On 14 March 2018 the Company received the confirmation and reported on both Warsaw and Madrid Stock Exchange that as at 12 March 2018 the Spanish Court approved the change of domicile and registered AmRest's domicile in Madrid.

The annual reporting for year 2017 (for both separate and consolidated financial statements) was prepared in accordance with IFRSs and was published on 8 March 2018 in PLN thousands.

Decision about changing the domicile caused considerations of changing the presentation currency of the Group from PLN to EUR. At the end of the day, taking into account among others matters listed below, the Group decided to change its presentation currency into EUR, as currency that better responds to needs to users of consolidated financial reports

- AmRest is a global restaurant operator conducting its activities in many countries and currency zones. Large number of the companies from the Group use EUR as a functional and presentation currency.
- The vast majority of acquisitions done by AmRest are conducted in EUR.
- With the change of domicile Group will be required to report its financial statements both on Warsaw Stock Exchange (where it is quoted) and on Madrid stock exchange (where is domiciled). EUR is a widely used currency in presentation of financial statements of entities domiciled in Spain.
- Warsaw Stock Exchange allows to publish reports in EUR.
- EUR is a widely used in financial reporting, especially by entities domiciled in European Union.
- Long term development plan includes investments in Western Europe where EUR is a functional currency.
- The Group changed its internal reporting into EUR.

The change of presentation currency under IFRSs is being considered as a change in the accounting policy and should be applied retrospectively. Change of the presentation currency had no impact on assets, liabilities and total equity but impacts translation the particular equity positions.

For the purpose of translation comparative data the following rules were applied:

- For share capital, which is actually issued in EUR – historical values in EUR were assigned. Share capital value is not material.
- For share premium items historical movements were analysed. Material share capital increases were translated using historical exchange rate from date of transaction.

- Treasury shares transaction since year 2015 were recalculated for all movements.
- FIFO is used for treasury shares disposals. Consequently, treasury shares were translated into EUR using historical costs.
- For share based payments (“SBP”) transactions recognized in 2015 and later on an average exchange rate for each year (years 2015- 2016) or for each quarter (year 2017) was applied.
- Non-controlling interest transactions were recognised at historical exchange rate.
- For translation of profit or loss positions and retained earnings recognised in 2015 and earlier an average exchange rate for each quarter was applied and for those recognised in 2016 and 2017 monthly exchange rate was applied for each group company. As a consequence quarterly consolidated data for each line of income statements are effectively translated with different exchange rates.
- As a consequence of the above transactions new balance of currency translation reserve was determined. Exchange differences needed to be established at new, for group operations where functional currency is other than EUR. Differences between currency translation reserve were recognised in other comprehensive income.
- For translation of all the assets and liabilities closing rate was applied.
- Cash flow positions referring to profit and loss positions were translated with monthly average exchange rate for each company. For those referring to acquisitions historical exchange rates were applied and for all other positions a quarterly average exchange rate was applied. The difference resulting from translation of cash flow was presented in effect of foreign exchange rate movements.

Subsequently, in order to present information better and more clearly, data was aggregated into EUR millions with one decimal place.

Details regarding to those changes are presented in the tables below.

Explanation for the modifications of the comparatives in the Separate Interim Report for 9 months ended 30 September 2018

AmRest Holdings SE (“AmRest” or “Company”) informs that on 14 March 2018 it received a confirmation of the registration on 12 March 2018 of its registered office in Pozuelo de Alarcón, Madrid, Spain.

As a consequence of the change of domicile of the Company and as per the provisions established in the paragraph 3 of the Spanish General Accounting Plan the Separate Financial Statements have been prepared in accordance with Spanish Accounting Standards harmonized with the International Accounting Standards and the internal commercial law.

The Company has analysed the differences of criteria between the principles used previously to present Financial Statements (IFRSs) and the Spanish regulations and has made the correspondent adjustments retrospectively calculating the effects from the earlier reporting period from which information is available.

The financial statements as of September 2017 that were previously published on the Warsaw Stock Exchange in Polish zlotys (PLN) were translated into the current presentation currency euro (EUR) following the procedures set out in the standards for the preparation of consolidated annual accounts that implement the precepts of the Commercial Code.

The resulting translation differences are recognised in the equity. The financial statements as of December 2017 and September 2017 that were previously published on the Warsaw Stock Exchange in Polish zlotys (PLN) were translated into the current presentation currency euro (EUR) following the procedures set out in the standards for the preparation of consolidated annual accounts that implement the precepts of the Commercial Code.

Subsequently, in order to present information better and more clearly, data was aggregated into EUR millions with one decimal place.

EXPLANATION FOR THE MODIFICATIONS OF THE COMPARATIVES IN THE INTERIM REPORT FOR 9 MONTHS ENDED 30 SEPTEMBER 2018

Change of the presentation currency and level of aggregation of data

In second half of 2017 the shareholders of AmRest decided on change of domicile from Wroclaw, Poland to Madrid, Spain. Respective legal documents were submitted to Spanish Court on 1 March 2018. On 14 March 2018 the Company received the confirmation and reported on both Warsaw and Madrid Stock Exchange that as at 12 March 2018 the Spanish Court approved the change of domicile and registered AmRest's domicile in Madrid.

The annual reporting for year 2017 (for both separate and consolidated financial statements) was prepared in accordance with IFRSs and was published on 8 March 2018 in PLN thousands.

Decision about changing the domicile caused considerations of changing the presentation currency of the Group from PLN to EUR. Taking into account among others matters listed below, the Group decided to change its presentation currency into EUR, as currency that better responds to needs to users of consolidated financial reports

- AmRest is a global restaurant operator conducting its activities in many countries and currency zones. Large number of the companies from the Group use EUR as a functional and presentation currency.
- The vast majority of acquisitions done by AmRest are conducted in EUR.
- With the change of domicile Group will be required to report its financial statements both on Warsaw Stock Exchange (where it is quoted) and on Madrid Stock Exchange (where is domiciled). EUR is a widely used currency in presentation of financial statements of entities domiciled in Spain.
- Warsaw Stock Exchange allows to publish reports in EUR.
- EUR is a widely used in financial reporting, especially by entities domiciled in European Union.
- Long term development plan includes investments in Western Europe where EUR is a functional currency.
- The Group also changed its internal reporting into EUR.

The change of presentation currency under IFRSs is being considered as a change in the accounting policy and should be applied retrospectively. Change of the presentation currency had no impact on assets, liabilities and total equity but impacts translation the particular equity positions.

For the purpose of translation comparative data the following rules were applied:

- For share capital, which is actually issued in EUR – historical values in EUR were assigned. Share capital value is not material.
- For share premium items historical movements were analysed. Material share capital increases were translated using historical exchange rate from date of transaction.
- Treasury shares transaction since year 2015 were recalculated for all movements. FIFO is used for treasury shares disposals. Consequently, treasury shares were translated into EUR using historical costs.
- For share based payments ("SBP") transactions recognised in 2015 and later on an average exchange rate for each year (years 2015- 2016) or for each quarter (year 2017) was applied.

Supplementary information to previously released periodic information

(all figures in EUR millions unless stated otherwise)

- Non-controlling interest transactions were recognised at historical exchange rate.
- For translation of profit or loss positions and retained earnings recognised in 2015 and earlier an average exchange rate for each quarter was applied and for those recognised in 2016 and 2017 monthly exchange rate was applied for each group company. As a consequence quarterly consolidated data for each line of income statements are effectively translated with different exchange rates.
- As a consequence of the above transactions new balance of currency translation reserve was determined. Exchange differences needed to be established at new, for group operations where functional currency is other than EUR. Differences between currency translation reserve were recognised in other comprehensive income.
- For translation of all the assets and liabilities closing rate was applied.
- Cash flow positions referring to profit and loss positions were translated with monthly average exchange rate for each company. For those referring to acquisitions historical exchange rates were applied and for all other positions a quarterly average exchange rate was applied. The difference resulting from translation of cash flow was presented in effect of foreign exchange rate movements.

Subsequently, in order to present information better and more clearly, data was aggregated into EUR millions with one decimal place.

Changes in Cash Flow Statement

In 2017 the Group decided to change the presentation of interests paid and received in the cash flow statement. The change was inspired by the desire to reflect better the nature of the transactions as well as the growing magnitude of cash flow. Interests are now presented in the financing activities instead of operating activities (Adjustment 2). As a result, cash flow statement presented in the published condensed consolidated report for Q3 2017 had to be restated. The following table presents details. Adjustment 1 presents the change of presentation currency mentioned above having an impact on the particular CF positions.

Changes in purchase price allocation process

Entrance into German restaurant market – acquisition of KFC restaurants

In the first quarter of 2018 AmRest Group finalised the process of tax settlement of the acquisition of 15 KFC restaurants operating in the German market and completed the purchase price allocation process.

The fair value of goodwill and deferred tax asset presented in the acquisition note in the annual consolidated financial statements as at 31 December 2017 was adjusted: goodwill was decreased by EUR 0.1 million and deferred tax asset was increased by EUR 0.1 million. The fair value of other net assets was not changed.

Adjustments introduced did not materially affect the comparative data presented in this Interim Report for 9 months ended 30 September 2018 for the consolidated statement of comprehensive income; cash flows from operating, investing and financing activities in the consolidated cash flow statement and earnings per share, hence the data were not restated. Acquisition of Pizza Hut Delivery operator on French market

DESCRIPTION OF THE ACQUISITION

On 16 May 2017 AmRest completed the Share Purchase Agreement (“SPA”) between AmRest and Top Brands NV and thereby acquired 100% shares of Pizza Topco France SAS (currently AmRest Topco France SAS).

Within the transaction the master franchisee agreement was also signed, under which AmRest becomes the exclusive master-franchisee and has the right to granting the license to the third parties to operate Pizza Hut Express and Pizza Hut Delivery restaurants (sub-franchise) in France and Monaco.

ALLOCATION OF THE ACQUISITION PRICE

In second quarter of 2018 Group finalised process of allocating the acquisition price to the purchased assets and acquired liabilities.

Below table presents comparison of preliminary purchase price allocation as presented in annual consolidated financial statements for the year ended 31 December 2017 and finally determined values.

Pizza TopCo France SAS (currently AmRest TopCo France SAS)	Preliminary fair value EUR million	Final fair value EUR million
Cash and cash equivalents	0.8	0.8
Property, plant and equipment	1.1	0.4
Intangible assets	6.2	6.2
Other non-current assets	0.1	0.1
Trade and other receivables	1.5	1.3
Inventories and other current assets	0.7	0.7
Deferred tax liabilities	(2.0)	(1.8)
Provisions	(0.4)	(0.4)
Trade and other payables	(3.3)	(3.3)
Net assets acquired	4.7	4.0
Purchase price	12.8	12.8
The fair value of net assets	4.7	4.0
Goodwill	8.1	8.8
Amount paid in cash	12.8	12.8
Acquired cash and cash equivalents	0.8	0.8
Cash outflows on acquisition	12.0	12.0

In final purchase price process allocation Group has in particular verified fair values of property plant and equipment and trade receivables acquired. Based on the purchase agreement, the Group did not acquire some of the receivables from sub- franchisees that arose prior to the takeover of control by AmRest. The Group is required to periodically verify the cash inflows from settling these invoices, and settle with previous owner of PH France business.

Group has recognised in purchase price process the value of intangible asset related to exclusive right of master- franchisee on French market in Delivery and Express area. Total fair value amounted to EUR 6 million. An asset is amortised over its useful life assessed as 10 years.

Supplementary information to previously released periodic information

(all figures in EUR millions unless stated otherwise)

Estimates made and assumptions used are verified by independent entity specialising in such valuations. Deferred tax liability was as well recognised on respective temporary difference between tax and accounting values.

Group also considered potential recognition of other intangible assets such as favourable rental agreements, customer loyalty database and other, and did not identified any other material assets to be recognised.

Goodwill recognised on this acquisition consists mostly of synergies unidentified separately, unexploited market potential and expected economies of scale from combining the current activities of the AmRest Group and the acquired business.

Adjustments introduced did not materially affect the comparative data presented in this Interim Report for 9 months ended 30 September 2018 for the consolidated statement of comprehensive income; cash flows from operating, investing and financing activities in the consolidated cash flow statement and earnings per share, hence the data were note restated. Consolidated statements of financial position as at 31 December 2017 was adjusted to reflect final purchase price allocation figures.

The final fair value of the trademark amounted to PLN 3.9 million (EUR 0.9 million), final fair value of the customer and restaurants databases amounted to PLN 3.9 million (EUR 0.9 million). Estimates made and assumptions used were verified by independent entity specializing in such valuations. Earnings per share - prior period restatement due to share split

On 20 September 2018 the reduction of the nominal value of shares from 1 EUR to 0.1 EUR with exchange ratio 1:10 without any change in share capital was registered by the Commercial Registry (Registro Mercantil) in Madrid.

On 27 September 2018 Krajowy Depozyt Papierów Wartościowych (KDPW) passed a resolution on registration in KDPW of the reduction of the nominal value of the shares from 1 EUR to 0.1 EUR by dividing the total number of AmRest shares (split) in a ratio 1:10. The effective date of split was scheduled for 3 October 2018.

On 3 October 2018 share split was executed. As result the total number of Company shares traded on the Warsaw Stock Exchange (the "WSE") increased to 212 138 930, each of a nominal value of 0.1 EUR.

IAS 33 "Earnings per share" contains requirements to restate prior periods' earnings per share (EPS) for events that change the number of shares outstanding without a corresponding change in resources, such as share split in AmRest.

Consequently the EPS presented in Interim Report for 9 months ended 30 September 2018 takes into account effect of share split register after reporting period, but before report was authorized for issue.

EXPLANATION FOR THE MODIFICATIONS OF THE COMPARATIVES IN THE CONDENSED SEPARATE INTERIM REPORT FOR 9 MONTHS ENDED 30 SEPTEMBER 2018

AmRest Holdings SE ("AmRest" or "Company") informed that on 14 March 2018 it received a confirmation of the registration on 12 March 2018 of its registered office in Pozuelo de Alarcón, Madrid, Spain.

As a consequence of the change of domicile of the Company and as per the provisions established in the Spanish General Accounting Plan the Condensed Separate Financial Statements have been prepared in accordance with Spanish Accounting Standards harmonised with the International Accounting Standards and the internal commercial law.

The Company has analysed the differences of criteria between the principles used previously to present Financial Statements (IFRS) and the Spanish regulations and made the correspondent adjustments retrospectively calculating the effects from the earlier reporting period from which information is available.

The presentation of the Financial Statements of the previous periods was also adapted to the formats and classifications of accounts established in the Spanish General Accounting Plan.

The Separate Financial Statements as at December 2017 and as of September 2017 that were previously published on the Warsaw Stock Exchange in Polish zlotys (PLN) were translated into the current presentation currency euro (EUR) following the procedures set out in the standards for the preparation of consolidated annual accounts that implement the precepts of the Commercial Code.

The resulting translation differences were recognised in the equity.

The Company prepared an analysis of reassessment of its functional currency and concluded that since 1 January 2018 EUR is the functional currency of AmRest Holding SE.

The Company has applied translation procedures to new functional currency prospectively since the date of change (i.e. 1 January 2018) as it is established in the article 59.3 of the Rules for Formulation of Consolidated Annual Accounts (NFCAC).

Subsequently, in order to present information better and more clearly, data was aggregated into EUR millions with one decimal place.

Details regarding to those changes are presented in the tables below.
