## **SUMMARY DESCRIPTION OF THE MAIN TERMS AND CONDITIONS OF THE HEDGING AGREEMENTS AND HEDGING TRANSACTIONS**

Not Applicable

## **WEIGHTED AVERAGE LIFE OF THE NOTES, INTERNAL RATE OF RETURN AND ASSUMPTIONS**

### **General**

The yields to maturity on the Class A2017-01 Notes will be sensitive to and affected by the amount and timing of delinquencies, prepayment and payment pattern, revolving and credit card usage, dilution and default on the Purchased Receivables, the level of the relevant interest reference rate, the occurrence of any Revolving Termination Events or Accelerated Amortisation Events or any Fund Liquidation Events, the issuance of a new Note Series, the occurrence of an Optional Early Redemption Event or any Optional Repurchase Event and any other repurchases of the Purchased Receivables by the Seller. Each of such events may impact the weighted average lives, the internal rates of return, and the Duration of the Class A2017-01 Notes.

### **Weighted Average Lives and Internal Rates of Return of the Class A2017-01 Notes**

The “Weighted Average Life” (WAL) of the Class A2017-01 Notes refers to the average amount of time that will elapse from the date of issuance of the Class A2017-01 Notes to the date of distribution

9

to the investor of each Euro distributed in reduction of the principal of such security. The Weighted Average Life of the Class A2017-01 Notes shall be affected by the available funds allocated to redeem the Class A2017-01 Notes.

The “Internal Rate of Return” (IRR) of the Class A2017-01 Notes refers to the rate of return that makes the net present value of all cash flows (both positive and negative) from the investment in the Class A2017-01 Notes equal to zero. The Internal Rate of Return of the Class A2017-01 Notes shall be affected by the available funds allocated to pay interests due on the Class A2017-01 Notes.

The model used for the purpose of calculating estimates presented in this document employs an assumed constant per MPPR (as defined below). The MPPR is an assumed monthly constant rate of payment of principal, when applied monthly, results in the expected portfolio of the Purchased Receivables balance and allows to calculate the monthly principal payment.

The information included in the tables below assume, among other things:

- (a) the Disbursement Date of the Note Series 2017-01 is 12 April 2017;
- (b) the Scheduled Amortisation Starting Date is 26 April 2019;
- (c) the cut-off date is 15<sup>th</sup> March 2017 corresponding to the reference date of the Audited Portfolio;
- (d) that on the Disbursement Date of the Note Series 2017-01, the Outstanding Principal Balances of the Purchased Receivables is equal to the Minimum Portfolio Amount which amounts to EUR 638,000,000 as of such date. New Receivables are purchased (if required) in order to maintain such Minimum Portfolio Amount until the Scheduled Amortisation Starting Date of the Note Series 2017-01;
- (e) that the composition and the amortisation profile of the portfolio of the Purchased Receivables (and the new Receivables purchased during the Note Series Revolving Period of the outstanding Note Series) is similar to the composition and amortisation profile of the performing portfolio as at the cut-off date;
- (f) no new issuance of further Note Series occurs (however for calculation purposes, previously issued and outstanding Notes Series are considered);
- (g) the Seller does not repurchase any Receivables purchased by the Fund;
- (h) the rate of defaults on the Receivables is assumed constant at 5.87%, which is consistent with the one observed by the Seller in January 2017 as described in section 3.5 of the Base Prospectus;
- (i) interest payments on the Receivables will be received, if any at the applicable interest rate offered by SFC which as of the cut-off date stand at 20.04%. No adjustment of the applicable interest rate under the Credit Card Agreements is offered by SFC;
- (j) the Fund excess margin is constant and sufficient to cover the assumed rate of defaults on the Receivables;

9

- (k) a constant monthly principal payment rate (**MPPR**). In respect of the Class A Notes, the assumed MPPR is: (i) 2% in respect of scenario 1; (ii) 4% in respect of scenario 2; and (iii) 6% in respect of scenario 3, according to the following tables. These scenarios have been defined based on the historic information provided by the Seller as of January 2017 as described in section 3.5 of the Base Prospectus;
- (l) the calculation of the weighted average life (in years) is calculated on an Actual/Actual basis;
- (m) the Note Series 2017-01 Clean-Up Call Conditions will not be considered applicable;
- (n) none of the Fund Liquidation Events are considered applicable;
- (o) payment of principal and interest due and payable under the Notes will be received on the 26th day of each corresponding Payment Date;
- (p) zero per cent investment return is earned on the Issuer Accounts;
- (q) no Revolving Termination Event has occurred;
- (r) no Accelerated Amortisation Event has occurred; and
- (s) it is not necessary to use the Commingling Reserve or the General Reserve.

The actual characteristics and performance of the Purchased Receivables will differ from the assumptions used in constructing the tables set forth below, which are hypothetical in nature and provided only to give a general sense of how the principal cash flows might behave under varying monthly rate of principal payment scenarios. For example, it is unlikely that the receivables will pay at a constant monthly rate of principal payment until maturity. Any difference between such assumptions and the actual characteristics and performance of the Purchased Receivables, or actual monthly rate of principal payment of loss experiences, will affect the percentage of principal amount outstanding as well as interest payment over time and the Weighted Average Life and Internal Rate of Return of the Class A2017-01 Notes.

Subject to the foregoing discussion and assumptions, the following tables indicate the Weighted Average Life, Duration and the Internal Rate of Return of the Class A2017-01 Notes under the constant MPPR shown and depending on the exercise of the optional redemption of the Note Series 2017-01 on the Note Series 2017-01 Call Date.
