Link to Fitch Ratings' Report: Fitch Takes Rating Actions on 37 Tranches of TDA CAM Series

Fitch Ratings-London/Madrid-13 April 2012: Fitch Ratings has affirmed 31 tranches, and downgraded one tranche of 11 TDA CAM transactions, a series of Spanish MBS transactions originated and serviced by Banco CAM, S.A.U. ('BB+'/'Rating Watch Positive'/'B'). The transactions are:

TDA CAM 1, FTA
TDA CAM 2, FTA
TDA CAM 3, FTA
TDA CAM 4, FTA
TDA CAM 5, FTA
TDA CAM 6, FTA
TDA CAM 7, FTA
TDA CAM 8, FTA
TDA CAM 9, FTA
TDA CAM 11, FTA
TDA CAM 12, FTA

A spreadsheet, which provides details on the rating actions on a transaction basis is available at www.fitchratings.com or by clicking on the link above.

In affirming the ratings, Fitch has taken into account the collateral performance, as well as the current credit enhancement provided by the financial structure of each transaction. Fitch notes that the restructuring plan for Banco CAM to be integrated into Banco Sabadell could lead to variations in recovery trends if the servicing strategy changes.

The Rating Watch Negative on all the tranches rated above 'BBB+sf' reflect the transactions' exposure to counterparty risk, following Confederacion Espanola de Cajas de Ahorro's (CECA) downgrade to 'BBB+'/'Negative'/'F2' (see 'Fitch Places 59 Spanish SF Transactions on RWN Due to Counterparty Risk', dated 03 Apr 2012 at www.fitchratings.com).

The affirmation of TDA CAM 1 to 4's ratings reflects the strong collateral performance of the underlying assets. The loans backing the notes of TDA CAM 1 to 4 are highly seasoned and have deleveraged significantly since close. As of the March 2012 collection period, loans in arrears by more than 90 days ranged between 0.6% and 1.37% for these transactions. Meanwhile, the levels of gross cumulative defaults over initial collateral balances ranged between 0.45% and 1.45%.

TDA CAM 5 has performed in line with Fitch's expectations. As of the March 2012 collection period, 2.2% of loans were in arrears by more than 90 days, with 3.28% cumulative defaults. However, class B notes' Negative Outlook reflect Fitch's concerns over the increasing trend in arrears levels, which have more than doubled since the third quarter of 2011.

TDA CAM 6 to 8's performances differ from the more seasoned TDA CAM 1 to 5. As of the March 2012 collection period, arrears had reached levels between 3.3% and 3.4%, while cumulative gross default ratios, compared to the initial asset balance ranged between 4.67% and 6.46%. These arrears and default ratios exceed Fitch's initial expectations. However, in affirming the ratings, Fitch has also taken into account the current credit enhancement levels provided by the reserve funds, as well as available excess spread. TDA CAM 6's reserve fund is currently fully funded, while the reserve funds of TDA CAM 7 and 8 are at 86% and 83% of their target levels, respectively.

TDA CAM 9 is the worst performer in the series. Arrears have increased significantly since Q311, from below 2% to their current level at 4.5%. Cumulative defaults have also increased significantly during the past three quarters, to 7.16% from 6.1%. The reserve fund has been partially replenished on the most recent payment dates due to

recoveries and available excess spread, but is still at 74% of its required level. The downgrade on the class C notes to 'CCCSf' (from 'Bsf/Negative'), reflects Fitch's concerns about potential losses should the current performance trends persist in the future.

TDA CAM 11 and 12 have performed in line with the agency's initial expectations. As of the March 2012 collection period, the volume of loans in arrears by more than three months ranges between 2.6% and 3.2%. The transactions also had higher credit enhancement levels at closing, compared to the earlier TDA CAM series, and the reserve is almost fully funded, ranging between 99% and 95% of their required level.
