OVERVIEW

- Catalunya Banc's Hipocat 7, 8, 9, and 10 transactions have experienced considerable performance deterioration in recent months.
- Hipocat 10's class B notes defaulted on the October 2013 payment date.
- We have therefore placed on CreditWatch negative all of our ratings in Hipocat 7, 8, and 9, and we have lowered our ratings on Hipocat 10's class A2, A3, and B notes. At the same time, we have affirmed our 'D (sf)' ratings on Hipocat 10's class C and D notes.
- These transactions closed between 2004 and 2006, and are collateralized by residential mortgage loans granted to individuals to acquire a property. Catalunya Banc originated the loans in its home market in the Catalonia region.

MADRID (Standard & Poor's) Nov. 27, 2013--Standard & Poor's Ratings Services today took various credit rating actions in Hipocat 7, Fondo de Titulización de Activos; Hipocat 8, Fondo de Titulización de Activos; Hipocat 9, Fondo de Titulización de Activos; and Hipocat 10, Fondo de Titulización de Activos.

Specifically, we have:

- Placed on CreditWatch negative our ratings on Hipocat 7's class A2, B, C, and D notes;
- Placed on CreditWatch negative our ratings on Hipocat 8's class A2, B, C, and D notes;

Various Rating Actions In Four Of Catalunya Banc's Hipocat Spanish RMBS Transactions After Performance Deterioration

- Placed on CreditWatch negative our ratings on Hipocat 9's class A2a, A2b, B, C, and D notes; and
- Lowered our ratings on Hipocat 10's class A2, A3, and B notes, and affirmed our 'D (sf)' ratings on the class C and D notes (see list below).

These four residential mortgage-backed securities (RMBS) securitizations are backed by loans that Catalunya Banc S.A. originated in its home market in the Catalonia region. They closed between 2004 and 2006, and are collateralized by residential mortgage loans granted to individuals to acquire a property. The securitized product is the first draw of a flexible mortgage loan called "Crédito Total", which is effectively a flexible, revolving credit line with the possibility of having payment holidays.

We have placed on CreditWatch negative all of our ratings in Hipocat 7, 8, and 9 due to the credit quality deterioration in these transactions in recent months. The level of deterioration that we have observed has been greater than we expected in our December 2012 review, and is greater than what we have observed in other Spanish RMBS transactions that we rate (see "Ratings Lowered In Five Of Catalunya Banc's Hipocat Spanish RMBS Securitizations Following Performance Deterioration," published on Dec. 19, 2012).

The following table shows the increases in 90+ days delinquencies of the outstanding balance of the nondefaulted assets in January 2011, October 2012, and for the November 2013 review. For the November 2013 review figures, we used data from the October 2013 interest payment date (IPD) for Hipocat 7, 9, and 10, and we used data from the September 2013 IPD for Hipocat 8.

	January 2011	October 2012	November 2013
	(%)	(%)	review (%)
Hipocat 7	0.57	2.25	6.05
Hipocat 8	0.92	2.88	6.78
Hipocat 9	0.91	3.67	9.64
Hipocat 10	1.93	5.20	11.97

As the level of the available performing balance continues to decrease, it will cause the transactions' performance to deteriorate, for example, further depletion of the reserve funds and reduced collateralization levels. Therefore, we have placed on CreditWatch negative all of our ratings in Hipocat 7, 8, and 9. We will continue to monitor these transactions and will resolve these CreditWatch placements in due course.

Hipocat 10 was originated in July 2006. Since our December 2012 review, the transaction's performance has deteriorated and delinquencies have increases considerably (see table above). Moreover, as we expected in our December 2012 previous review, the class B notes have defaulted on their interest payment on the October 2013 IPD.

The current level of defaults has increased to 6.02% of the outstanding balance of the assets, from 4.17% a year ago. This increase has reduced the

Various Rating Actions In Four Of Catalunya Banc's Hipocat Spanish RMBS Transactions After Performance Deterioration

available credit enhancement for the notes. The class A notes have available credit enhancement (taking into account the performing balance, including loans in arrears up to 90 days, plus the reserve fund amount) of 8.29%, compared with 8.81% at closing. Similarly, the class C notes are undercollateralized with negative credit enhancement of minus 7.25%, compared with 1.70% at closing.

Taking into account the recent deteriorating performance, we have conducted our credit and cash flow analysis. Consequently, we have lowered to 'B (sf)' from 'BB+ (sf)' our ratings on the class A2 and A3 notes, and to 'D (sf)' from 'CCC- (sf)' our rating on the class B notes. At the same time, we have affirmed our 'D (sf)' ratings on the class C and D notes as they continue to default.

STANDARD & POOR'S 17G-7 DISCLOSURE REPORT

SEC Rule 17g-7 requires an NRSRO, for any report accompanying a credit rating relating to an residential mortgage-backed security as defined in the Rule, to include a description of the representations, warranties and enforcement mechanisms available to investors and a description of how they differ from the representations, warranties and enforcement mechanisms in issuances of similar securities. The Rule applies to in-scope securities initially rated (including preliminary ratings) on or after Sept. 26, 2011.

If applicable, the Standard & Poor's 17g-7 Disclosure Reports included in this credit rating report are available at <http://standardandpoorsdisclosure-17g7.com>.
