Fitch Affirms Cajamar RMBS Series Ratings Endorsement Policy

11 Feb 2014 1:49 PM (EST)

Link to Fitch Ratings' Report: Fitch Affirms Cajamar RMBS Series

Fitch Ratings-London-11 February 2014: Fitch Ratings has affirmed 25 tranches of five Cajamar RMBS transactions and revised the Outlook on seven tranches of Cajamar 2, 3 and 4 to Stable from Negative. A full list of rating actions is available at www.fitchratings.com or by clicking on the link above.

This series of Spanish prime RMBS transactions were originated by Cajamar Caja Rural, Sociedad Cooperativa de Credito (now part of Cajas Rurales Unidas, Sociedad Cooperativa de Credito; BB/Stable/B). The portfolios comprise loans with comparatively low original loan-to-value ratios between 65.7% and 67.3% with properties located mainly in the Andalucia and Murcia regions of Spain.

KEY RATING DRIVERS

Stabilising Arrears and Defaults

Loans in arrears by three months or more have fallen to between 0.6% and 1.4% of current balances as of the last interest payment dates (IPD) from between 0.8% and 2.2% 12 months ago. The slower entry of new arrears has resulted in gross cumulative default balances increasing slowly and reaching between 1.4% and 6.3% of original balances. Both of these trends are in line with other Fitch-rated Spanish RMBS transactions, and support the revision of the Outlook on the senior notes of IM Cajamar 3 and 4 to Stable.

Limited Information on Recoveries

Despite the relatively low original loan-to-value nature of the portfolios, the agency has concerns about the limited evidence of genuine recoveries following the repossession and subsequent sale of properties, and the associated timing of recoveries on defaulted loans. This is reflected in the Negative Outlooks on the class A, B, C and D notes of IM Cajamar 3-5 and the class A, B and C notes of IM Cajamar 6. Fitch has been informed by the SPV trustees that none of these securitisation vehicles is currently holding any property from foreclosure proceedings linked to defaulted loans.

The agency believes most of the recent recoveries are from buy backs by the originating bank. Fitch considers this source of recovery cash flows to be unsustainable in the long term and consequently ran a sensitivity analysis, stressing recovery expectations across the five Cajamar transactions.

Pro Rata Amortisation of TDA Cajamar 2

The combination of strong credit enhancement for Cajamar 2 and the expectations of continued pro-rata amortisation of all rated classes led Fitch to revise the Outlooks to Stable from Negative on all of the transaction's notes. Loans in arrears by more than three months stood at 0.6% as of the last IPD in December 2013, which compares favourably with Fitch's Spanish RMBS index average of 2.5%. This strong performance has permitted the pro-rata amortisation of the notes since September 2010, and we believe it will continue as none of the performance triggers are expected to be breached in the near future.

Reserve Funds Off Target

IM Cajamar 3-6 have reserve funds that are between 48.1% (Cajamar 6) and 87.7% (Cajamar 3) of their target amounts, as a consequence of recent draws due to large period defaults that could not be covered by excess spread. While Fitch expects IM Cajamar 3 and 4 to be replenished to target in the near future considering the robust excess spread and reducing arrears, it believes IM Cajamar 6's reserve is in a weaker position, given its much larger deficit and that it will not reach its target in the near future. This expectation is reflected in the Negative Outlooks on IM Cajamar 6's notes.

Payment Interruption Risk

Fitch believes IM Cajamar 5 and 6 are exposed to payment interruption risk in the event of a servicer disruption event, considering the insufficient structural arrangements within the transactions, the partly funded balance of reserve funds and the agency's expectation in terms of further liquidity constraints. This risk factor has been the rating driver since January 2013 and explains the 'Asf' maximum achievable rating on these two transactions.

No Hedging on IM Cajamar 5 and 6

Fitch believes the removal of interest rate hedge agreements on these two transactions formalised in 4Q13 introduces basis and reset risks to the transactions, which we have factored into the analysis. Nevertheless, the agency considers the available credit enhancement is sufficient to withstand the resulting stresses.

RATING SENSITIVITIES

A worsening of the Spanish macroeconomic environment, especially employment conditions, or an abrupt shift of the underlying interest rates could jeopardise the underlying borrowers' affordability.

As IM Cajamar 5 and 6 are unhedged, an unexpected sharp rise in interest rates beyond Fitch's stresses would cause the transactions to suffer cash shortfalls, which could cause the agency to take rating action.
