

Report of the Board of Directors

(Issued as of 13 February 2019)

Extract: Chapter 4 – Corporate Governance

4.	CORPORATE GOVERNANCE	2
4.1	Management and Control	2
4.2	Conflict of interest	12
4.3	Dutch Corporate Governance Code	12
4.4	Remuneration Report	15
4.5	Enterprise Risk Management System	37
4.6	Risk Factors	40

Dear Shareholders,

This is the Report of the Board of Directors (the “**Board Report**”) on the activities of Airbus SE (the “**Company**” and together with its subsidiaries “**Airbus**”) during the 2018 financial year, prepared in accordance with Dutch law.

For further information regarding Airbus’ business, finances, risk factors and corporate governance, please refer to the Company’s website: www.airbus.com

4. Corporate Governance

4.1 Management and Control

4.1.1 COMPOSITION, POWERS AND RULES

Under the Articles of Association, the Board of Directors consists of at most 12 Directors, who each retire at the close of the AGM held three years following their appointment. Under the Board Rules, at least a majority of the Members of the Board of Directors (i.e., 7/12) must be European Union (“EU”) nationals (including the Chairman of the Board of Directors) and a majority of such majority (i.e., 4/7) must be both EU nationals and residents. No Director may be an active civil servant. The Board of Directors has one Executive Director and 11 non-Executive Directors. While the Board of Directors appoints the CEO, the CEO is required to be an Executive Director and must be an EU national and resident; therefore it is anticipated that the Board of Directors will appoint as CEO the person appointed by the shareholders as an Executive Director. At least nine of the non-Executive Directors must be “Independent Directors” (including the Chairman of the Board of Directors).

Under the Board Rules, an “Independent Director” is a non-Executive Director who is independent within the meaning of the Dutch Corporate Governance Code (the “**Dutch Code**”) and meets additional independence standards. Specifically, where the Dutch Code would determine non-independence, in part, by reference to a Director’s relationships with shareholders who own at least 10% of the Company, the Board Rules determine such Director’s non-independence, in relevant part, by reference to such Director’s relationships with shareholders who own at least 5% of the Company. According to the criteria of the Dutch Code and the Board Rules, all non-Executive Directors (including the Chairman) presently qualify as an “Independent Director”.

The Remuneration, Nomination and Governance Committee (the “**RNGC**”) of the Board of Directors is charged with recommending to the Board of Directors the names of candidates to succeed active Board Members after consultation with the Chairman of the Board of Directors and the CEO.

The Board of Directors, deciding by simple majority vote, proposes individuals to the shareholders’ meeting of the Company for appointment as Directors by the shareholders’ meeting. No shareholder or group of shareholders, or any other entity, has the right to propose, nominate or appoint any Directors other than the rights available to all shareholders under general Dutch corporate law.

In addition to the membership and composition rules described above, the RNGC, in recommending candidates for the Board of Directors, and the Board of Directors in its resolutions proposed to the shareholders’ meeting regarding the renewal or appointment of Directors, are both required to apply the following principles:

- ▶ The preference for the best candidate for the position, and
- ▶ The preference for gender diversity between equal profiles, and
- ▶ The maintenance of appropriate skills mix and geographical experience, and
- ▶ The maintenance, in respect of the number of Members of the Board of Directors, of the observed balance among the nationalities of the candidates in respect of the location of the main industrial centres of Airbus (in particular among the nationals of France, Germany, Spain and the United Kingdom, where these main industrial centres are located), and

- ▶ At least a majority of the Members of the Board of Directors (i.e., 7/12) shall be EU nationals (including the Chairman), and a majority of such majority (i.e., 4/7) shall be both EU nationals and residents.

In accordance with these principles the Board of Directors shall continue to seek greater diversity with respect to gender, age, geography, education, profession and background.

In 2018, three new Members joined the Board of Directors, Mr. Clamadieu, Mr. Chu and Mr. Obermann. Respectively, with an industrial background, expertise in the Asian market and information technology and entrepreneurial background, they have the competencies and personal skills to fulfil these positions in line with the Board's expectations and the evolution of the Company's business.

At the end of 2018 more than half of the Members of the Board of Directors were aged 60 or under. The proportion of female representatives is today at 25% against 0% six years ago. The Board composition shows a balanced mix of experience with, for example, five Members having aerospace industry skills, eight having geopolitical or economics skills, five having information or data management skills and five having manufacturing and production skills. More details about the diversity of the Members of the Board of Directors are available in the table shown on page 20 (*Airbus SE Board of Directors until AGM 2019*).

The Board of Directors is required to take into account, in the resolutions proposed in respect of the nomination of Directors presented to the shareholders' meeting, the undertakings of the Company to the French State, pursuant to the amendment to the French State Security Agreement, and to the German State, pursuant to the German State Security Agreement, in each case as described more fully above. In practice, this means that at all times the Board of Directors needs to have: (i) two Directors who should also be French Defence Outside Directors (as defined above) of the French Defence Holding Company (as defined above) who have been proposed by the Company and consented to by the French State and (ii) two Directors who should also be German Defence Outside Directors (as defined above) of the German Defence Holding Company (as defined above) who have been proposed by the Company and consented to by the German State.

The RNGC endeavours to avoid a complete replacement of outgoing Directors by new candidates and draws up an appointment and reappointment schedule for the Directors after consultation with the Chairman and the CEO. In drawing up such a schedule, the RNGC considers the continuity of company-specific knowledge and experience within the Board of Directors, also taking into account that a Director should at the time of his/her appointment or re-appointment not be older than 75 years and ensuring that at least one third of Directors' positions are either renewed or replaced every year for a term of three years. This is to avoid large block replacements of Directors at one single AGM, with the corresponding loss of experience and integration challenges, provided that exceptions to these rules may be agreed by the Board if specific circumstances provide an appropriate justification for such exceptions.

Voting and rules

Most Board of Directors' decisions can be made by a simple majority of the votes cast by Directors (a "**Simple Majority**"), but certain decisions must be made by a two-thirds majority (i.e., eight favourable votes) of votes cast by the Directors regardless of whether they are present or represented in respect of the decision (a "**Qualified Majority**"). In addition, amendments to certain provisions of the Board Rules require the unanimous approval of the Board of Directors, with no more than one Director not being present or represented (including provisions relating to nationality and residence requirements with respect to Members of the Board of Directors and the Executive Committee). However, no individual Director or class of Directors has a veto right with respect to any Board of Directors' decisions.

Powers of the Members of the Board of Directors

The Board Rules specify that in addition to the Board of Directors' responsibilities under applicable law and the Articles of Association, the Board of Directors is responsible for certain enumerated categories of decisions. Under the Articles of Association, the Board of Directors is responsible for the management of the Company. Under the Board Rules, the Board of Directors delegates the execution of the strategy as approved by the Board of Directors and the day-to-day management of the Company to the CEO, who, supported by the Executive Committee and its executive management team, makes decisions with respect to the management of the Company. However, the CEO should not enter into transactions that form part of the key responsibilities of the Board of Directors, unless these transactions have been approved by the Board of Directors.

Matters that require Board of Directors' approval include among others, the following items (by Simple Majority unless otherwise noted):

- ▶ Approving any change in the nature and scope of the business of the Company and Airbus;
- ▶ Debating and approving the overall strategy and the strategic plan of Airbus;
- ▶ Approving the operational business plan of Airbus (the "Business Plan") and the yearly budget of Airbus (the "Yearly Budget"), including the plans for Investment, Research and Development ("R&D"), Employment, Finance and, as far as applicable, major programmes;
- ▶ Nominating, suspending or revoking the Chairman of the Board of Directors and the CEO (Qualified Majority);
- ▶ Approving of all of the Members of the Executive Committee as proposed by the CEO and their service contracts and other contractual matters in relation to the Executive Committee and deciding upon the appointment and removal of the Secretary to the Board on the basis of the recommendation of the RNGC;
- ▶ Approving the relocation of the headquarters of the principal companies of Airbus and of the operational headquarters of the Company (Qualified Majority);
- ▶ Approving decisions in connection with the location of new industrial sites material to Airbus as a whole or the change of the location of existing activities that are material to Airbus;
- ▶ Approving decisions to invest and initiate programmes financed by Airbus, acquisition, divestment or sale decisions, in each case for an amount in excess of € 300 million;
- ▶ Approving decisions to invest and initiate programmes financed by Airbus, acquisition, divestment or sale decisions, in each case for an amount in excess of € 800 million (Qualified Majority);
- ▶ Approving decisions to enter into and terminate strategic alliances at the level of the Company or at the level of one of its principal subsidiaries (Qualified Majority);
- ▶ Approving matters of shareholder policy, major actions or major announcements to the capital markets; and
- ▶ Approving decisions in respect of other measures and business of fundamental significance for Airbus or which involves an abnormal level of risk.

The Board of Directors must have a certain number of Directors present or represented at a meeting to take action. This quorum requirement depends on the action to be taken. For the Board of Directors to make a decision on a Simple Majority matter, a majority of the Directors must be present or represented. For the Board of Directors to make a decision on a Qualified Majority matter, at least ten of the Directors must be present or represented. If the Board of Directors cannot act on a Qualified Majority Matter because this quorum is not satisfied, the quorum would decrease to eight of the Directors at a new duly called meeting.

In addition, the Board Rules detail the rights and duties of the Members of the Board of Directors and set out the core principles which each Member of the Board of Directors shall comply with and shall be bound by, such as acting in the best interest of the Company and its stakeholders, devoting necessary time and attention to the carrying out of his/her duties and avoiding any and all conflicts of interest.

Airbus SE Board of Directors until AGM 2019

Board member Age*, Gender, Nationality	Status	Since	Term expires	Primary occupation & Other mandates	Director expertise	Board attendance	Committee attendance

Changes in the composition of the Board Committees in the course of 2018

Committee	Until AGM 2018*		From AGM 2018	
	Name	Status	Name	Status
Audit	Ms. Claudia NEMAT**	Member	Mr. Victor CHU	Member
			Mr. René OBERMANN	Member
ECC	Sir John PARKER	Member	Lord Paul DRAYSON	Member
	Sir John PARKER		Ms. Amparo MORALEDA	
RNGC	Mr. Hans-Peter KEITEL	Member	Mr. Jean-Pierre CLAMADIEU	Member
	Mr. Jean-Claude TRICHET	Member	Ms. Claudia NEMAT	Member

* Further information on the Committee members can be found in the above tables "Airbus SE Board of Directors until AGM 2019" and "Replacements of Board Members in the course of 2018"

** Ms. Nemat resigned from the Audit Committee in 2018 and was replaced by Mr. Victor Chu and Mr. René Obermann. The Audit Committee currently consists of 5 members instead of 4.

  Chair

Within the Company, each Member of the Board of Directors must have the required mix of experience, qualifications, skills and industrial knowledge necessary to assist the Company in formulating and achieving its overall strategy, together with the specific expertise required to fulfil the duties assigned to him or her as Member of one of the Board of Directors' committees. The Board of Directors also believes that a diverse composition among its Members with respect to gender, experience, national origin, etc. is valuable for the quality and efficiency of its work.

4.1.2 OPERATION OF THE BOARD OF DIRECTORS IN 2018

Board of Directors meetings

The Board of Directors met ten times during 2018 and was regularly informed of developments through business reports from the CEO, including progress on the strategic and operational activities. The average attendance rate at these meetings was 87%.

Throughout 2018, the Board of Directors reviewed and discussed the technical and commercial progress of significant new and running programmes. For Airbus Commercial this comprised inter alia the ramp-up of the A320neo programme and the respective measures taken to mitigate the engine issues hampering the production at Airbus and the operations with the customers, the development of the A330neo and the ramp-up of the A350. For Defence and Space it concerned for the A400M programme the progress on the military capabilities and the retrofit and delivery plan in line with the agreement reached with OCCAR and the states; on the space side the Ariane 6 programme was the subject of a thorough review with regards to progress and the competitive landscape. Turning to the Helicopter business, the review focused on the overall market situation and the preparation of the H160 programme for serial production. Regarding mergers and acquisitions, the most important topic was the closure of the acquisition of a majority stake in the Bombardier C-Series programme which represents an important addition to complement the Airbus product range at the smaller end of the aircraft market.

Last year's off-site Board meeting in September in Beijing focused on the review of the Division and product strategies and the related business developments as well as the overall strategy of Airbus. The Board of Directors seized the opportunity to visit the A320 final assembly line and the A330 completion and delivery centre in Tianjin.

In 2018, the Board of Directors continued to support the Company's digital transformation and to enhance Airbus ability to identify and capitalise on innovative technologies and business models. After thorough preparation, 2018 saw the industrialisation and acceleration of the digital concepts. One of the most advanced is the Skywise project (for further details see "**Error! Reference source not found.**: Other Corporate Activities"), a global data platform which can create significant value across the whole aerospace industry. Other projects transforming the engineering and manufacturing landscape are in progress.

Moreover the Board of Directors reviewed Airbus' financial results and forecasts and, in line with the recommendations of the Audit Committee (as defined in 4.1.3 Board Committees), emphasised the importance of both Enterprise Risk Management ("**ERM**") and a strengthened internal control system.

A substantial share of the Board activities was dedicated to compliance matters. Following a recommendation by the Ethics & Compliance Committee (as defined in 4.1.3 Board Committees), the Board strengthened the Ethics & Compliance organisation by allowing a reinforcement of its resources, so helping to improve Airbus' culture of integrity. The Board also continued to closely monitor the Serious Fraud Office / Parquet National Financier investigations. In addition, the Board received advice from the "Independent Compliance Review Panel", which is composed of renowned international experts, with respect to its compliance activities in order to build a state of the art Ethics & Compliance programme and organisation.

Following the departure of some members of the Executive Committee in early 2018 and the announcement that the current CEO and Chief Financial Officer ("**CFO**") would leave the Company at the next AGM, the Board dedicated a large part of its work in 2018 to the search and nomination of a new generation of leaders to prepare Airbus for the challenges of the next decade. The RNGC has run, for each of the positions to be filled, a thorough process in which internal and external candidates have been identified and assessed. The shortlisted candidates were then proposed to the Board and interviewed by Board Members. Already in the course of 2018, the vacancy for a Chief Technical Officer ("**CTO**") was filled by Grazia Vittadini, who became the first female member of the Executive Committee. By the end of

2018, successors for key positions had been selected and announced – in particular for the CEO, the CFO and the Chief Operating Officer (“**COO**”).

Board evaluation 2018

As a matter of principle, the Board of Directors has decided that a formal evaluation of the functioning of the Board of Directors and its Committees with the assistance of a third-party expert is conducted every three years. In the year succeeding the outside evaluation, the Board of Directors performs a self-evaluation and focuses on the implementation of the improvement action plan resulting from the third-party assessment. In the intervening second year, the General Counsel, being also the Secretary of the Board, issues a questionnaire and consults with Board Members to establish an internal evaluation which is then discussed with Board Members.

The year 2018 was the intervening second year of the abovementioned three-year cycle. In October 2018, the Board of Directors therefore performed a self-evaluation based on a questionnaire issued by the General Counsel and circulated to each Board Member.

The questionnaire primarily covered governance and Board agenda, Board and Board Committees functioning, interactions are dynamic amongst Board members and between Board and Management, Board composition and renewal process, Board and Board Committees fees, Board Committees contributions and involvement of Remuneration, Nomination and Governance Committee in succession planning. With respect to the Remuneration policy, the Board Members were provided the opportunity to express their views on their own remuneration.

In the 2018 self-evaluation, the Board Members confirmed overall satisfaction with the progress made in the implementation of the Board's “Improvement Action Plan” recommended by Heidrick & Struggles as its third-party expert, following the formal evaluation conducted in 2017.

The Board Members also confirmed overall satisfaction with the dynamics of the Company's governance and its performance. The outcome of the questionnaire notably highlighted the improved balance of powers and constructive interactions amongst Board Members and between the Board and Management, as well as open debates between the Board Members. The efficient decision-making process of the Board is supported by the adequate preparation of Board meetings, suitable time allocated to agenda items and valuable contributions of the Board Committees.

Following the last Board review, one-to-one sessions between Board Members took place to improve connections between them. Top Management team members have been regularly invited to participate to Board meetings to discuss specific topics; and Board Members expect the frequency of this participation to be improved in 2019.

In addition, the Board has dedicated more time to risk and performance management, succession planning and talent development, as well as to other important matters for which discussions need to be still further enhanced, such as strategy, digital transformation, Responsibility & Sustainability, employee engagement and anticipation of significant potential issues.

Finally, the Board Members expressed their overall satisfaction with regards to the Board composition and renewal process. They highlighted the necessity to continue with the principle of staggering Board appointments in order to further develop its diversity of expertise and gender.

4.1.3 BOARD COMMITTEES

The Audit Committee

Pursuant to the Board Rules, the Audit Committee, which is required to meet at least four times a year, makes recommendations to the Board of Directors on the approval of the annual financial statements and the interim accounts (Q1, H1, Q3), as well as the appointment of external auditors and the determination of their remuneration. Moreover, the Audit Committee has responsibility for verifying and making recommendations to the effect that the internal and external audit activities are correctly directed, that internal controls are duly exercised and that these matters are given due importance at meetings of the Board of Directors. Thus, it discusses with the auditors their audit programme and the results of the audit of the financial statements, and it monitors the adequacy of Airbus' internal controls, accounting policies and financial reporting. It also oversees the operation of Airbus' Enterprise Risk Management ("**ERM**") system and keeps a strong link to the Ethics & Compliance Committee. For further details in this regard, see " - 4.5: Enterprise Risk Management System". Please refer to Annex E of the Board Rules for a complete list of responsibilities of the Audit Committee.

The Chairman of the Board of Directors and the CEO are invited to attend meetings of the Audit Committee. The CFO and the Head Accounting Record to Report are requested to attend meetings to present management proposals and to answer questions. Furthermore, the Head of Corporate Audit & Forensic and the Chief Ethics & Compliance Officer are requested to report to the Audit Committee on a regular basis.

In 2018, this Committee met five times with an average attendance rate of 88%. It discussed all of the items described above during the meetings and it fully performed all of the duties described.

The Ethics and Compliance Committee

To reinforce oversight of ethics and compliance matters at the Board of Directors level, a dedicated Ethics and Compliance Committee ("**E&C Committee**" or "**ECC**") was established in 2017 and the Board Rules have been amended accordingly. Pursuant to the Board Rules the main mission of the E&C Committee is to assist the Board in monitoring Airbus' culture and commitment to ethical business and integrity. This committee is empowered to oversee Airbus' ethics and compliance programme, organisation and framework in order to make sure that Airbus ethics and compliance governance is effective (including all associated internal policies, procedures and controls). This includes the areas of money laundering and terrorist financing, fraud, bribery and corruption, trade sanctions and export control, data privacy, procurement and supply chain compliance and anti-competitive practices.

The E&C Committee makes recommendations to the Board of Directors and its Committees on all ethics and compliance-related matters and is responsible for providing to the Audit Committee any necessary disclosures on issues or alleged ethical and compliance breaches that are financial and accounting-related. The E&C Committee maintains a reporting line with the Chief Ethics and Compliance Officer, who is requested to provide periodic reports on its activities.

The Chairman of the Audit Committee and the Chairman of the RNGC are members of the E&C Committee. Unless otherwise decided by the E&C Committee, the CEO is invited to attend the meetings. From time to time, independent external experts and the Independent Compliance Review Panel are also invited to attend E&C Committee meetings.

The E&C Committee is required to meet at least four times a year. In 2018, the E&C Committee met in total 11 times with an average attendance rate of 93%. All of the above described items were discussed during the meetings and the E&C Committee fully performed all the above described duties.

The Remuneration, Nomination and Governance Committee

Pursuant to the Board Rules, besides its role described in section 4.1.1 above, the RNGC consults with the CEO with respect to proposals for the appointment of the members of the Executive Committee, and makes recommendations to the Board of Directors regarding the appointment of the Secretary to the Board of Directors. The RNGC also makes recommendations to the Board of Directors regarding succession planning (at Board, Executive Committee and Senior Management levels), remuneration strategies and long-term remuneration plans. Furthermore, the Committee decides on the service contracts and other contractual matters in relation to the Members of the Board of Directors and the Executive Committee. The rules and responsibilities of the RNGC have been set out in the Board Rules.

The Chairman of the Board of Directors and the CEO are invited to attend meetings of the RNGC. The Chief Human Resources Officer (“**CHRO**”) is requested to attend meetings to present management proposals and to answer questions.

In addition, the RNGC reviews the Company’s top talent, discusses measures to improve engagement and to promote diversity, reviews the remuneration of the Executive Committee Members, the Long-Term Incentive Plans (“**LTIP**”), and the variable pay for the previous year.

Finally, the RNGC performs regular evaluations of the Company’s corporate governance and makes proposals for changes to the Board Rules or the Articles of Association.

The guiding principle governing management appointments within Airbus is that the best candidate should be appointed to the position (“best person for the job”), while at the same time seeking to achieve a balanced composition with respect to gender, experience, national origin, etc. The implementation of these principles should, however, not create any restrictions on the diversity within the Company’s executive management team.

The RNGC is required to meet at least four times a year. In 2018, it met nine times with an attendance rate of 89%; it discussed all of the above described items during the meetings and it fully performed all of the above described duties.

4.1.4 EXECUTIVE COMMITTEE NOMINATION AND COMPOSITION

The CEO proposes all the Members of the Executive Committee of the Company (the “**Executive Committee**”) for approval by the Board of Directors, after consultation with (i) the Chairman of the RNGC and (ii) the Chairman of the Board of Directors, applying the following principles:

- ▶ the preference for the best candidate for the position;
- ▶ the maintenance, in respect of the number of Members of the Executive Committee, of the observed balance among the nationalities of the candidates in respect of the location of the main industrial centres of Airbus (in particular among the nationals of France, Germany, Spain and the United Kingdom, where these main industrial centres are located); and
- ▶ at least two-thirds of the Members of the Executive Committee, including the CEO and the CFO, being EU nationals and residents.

Role of CEO and Executive Committee

The CEO is responsible for executing the strategy, as approved by the Board of Directors, and for managing the day-to-day operations of Airbus’ business and he shall be accountable for its proper execution. For this purpose, the CEO regularly seeks advice from his core executive management team (EMT), which comprises some of the Executive Committee Members, on Airbus-wide topics such as corporate matters or major ongoing projects as well as on business development and performance improvement opportunities.

The Executive Committee further supports the CEO in performing these tasks, ensuring proper alignment of the Company's management beyond the EMT. The Executive Committee Members shall jointly contribute to the overall interests of the Company, in addition to each Member's individual operational or functional responsibility within Airbus. The CEO endeavours to reach consensus among the Members of the Executive Committee. In the event a consensus is not reached, the CEO is entitled to decide the matter.

The Executive Committee comprises the heads of the Divisions and key functions of the Company. It is dedicated to exchanging and agreeing on important matters such as:

- ▶ Appointment by the heads of the Airbus Divisions and functions of their management teams;
- ▶ Major investments/divestments;
- ▶ Setting up and control of the implementation of the strategy for Airbus' businesses;
- ▶ Airbus policy matters and management and organisational the structure of the business;
- ▶ Definition of the Company's financial performance and business performance strategy and targets; and
- ▶ Business issues, including the operational plan of the Company and its Divisions.

It is also the forum where the information or requests for approval destined for the Board are discussed and approved. The CEO is the only Executive Director within the Board of Directors and represents the Company on the Board. But, depending on the topic, he usually asks the responsible Executive Committee Member to join him at Board meetings to present the financials (CFO), programme/product topics (Division heads), HR matters (CHRO) or any other topic where a specialist is needed. This approach allows the Board Members to get to know the Executive Committee Members and equips them to make judgements when it comes to decisions about key positions.

4.2 Conflict of interest

Conflict of interest

The Company has a conflict of interest policy, which sets out that any potential or actual conflict of interest between the Company and any Member of the Board of Directors shall be disclosed and, where possible, avoided (please refer to the "Board Rules (Annex D – Article 8: Conflicts of interest)"). This policy is available on the Company's website: www.airbus.com (Company / Corporate Governance / Governance Framework and Documents), as is the related best practice provision 2.7 of the Dutch Code (as such term is defined in section 4.3 "Dutch Corporate Governance Code" below), which the Company complied with during 2018. Pursuant to the Articles of Association and the Board Rules, a conflicted Member of the Board of Directors should abstain from participating in the deliberation and decision-making process relating to the matters concerned. The Board of Directors must approve any decision to enter a transaction where a Director has conflicts of interest that are material to the Company or the individual Director.

In 2018, no transactions were reported. There were, however, related-party transactions: for an overview, please refer to "Notes to the IFRS Consolidated Financial Statements – Note 8: Related Party Transactions".

4.3 Dutch Corporate Governance Code

In accordance with Dutch law and with the provisions of the Dutch Corporate Governance Code (the "**Dutch Code**"), which includes a number of non-mandatory recommendations, the Company either applies the provisions of the Dutch Code or, if applicable, explains and gives sound reasons for their non-application. While the Company, in its continuous efforts to adhere to the highest standards, applies nearly all of the current recommendations of the Dutch Code, it must, in accordance with the "comply or explain" principle, provide the explanations below.

On 8 December 2016, the Dutch Code was revised; its updated recommendations apply to financial years starting on or after 1 January 2017. Airbus welcomed the updates to the Dutch Code and continues supporting the emphasis of the revised Dutch Code on topics such as long-term value creation and the importance of culture.

For the full text of the Dutch Code, please refer to: www.commissiecorporategovernance.nl.

For the financial year 2018, and in respect of compliance with the Dutch Code, the Company states the following:

1. Vice-Chairmanship

Provision 2.3.6 (ii) of the Dutch Code recommends the election of a vice-chairman, to, among other things, deal with the situation when vacancies occur.

The Board of Directors is headed by the Chairman of the Board of Directors and no vice-chairman has been appointed. In case of dismissal or resignation of the Chairman, the Board of Directors shall immediately designate a new Chairman. In Airbus' view there is no need for the appointment of a vice-chairman to deal with such situations or other circumstances.

2. Termination indemnity

Provision 3.2.3 of the Dutch Code recommends that the maximum remuneration in the event of dismissal of an Executive Board Member be one year's salary. Under this provision of the Dutch Code, severance pay should not be awarded if the Board membership is terminated early at the initiative of the Executive Board Member, or in the event of seriously culpable or negligent behaviour on the part of the Executive Board Member.

The Company foresees a termination indemnity for the sole Executive Board Member, the CEO, equal to one and a half times the annual total target salary (Base salary and target VR) in the event that the Board of Directors has concluded that the CEO can no longer fulfil his position as a result of change of the Company's strategy or policies, or as a result of a change in control of the Company. The termination indemnity for the current CEO dates from the period he was not yet a member of the Board of Directors and it was decided to maintain this indemnity when the current CEO was appointed as a member of the Board of Directors in order to honour the contractual arrangements between Airbus and the current CEO as they applied at that time.

As from the 2019 AGM and subject to approval of the proposed amendments to the remuneration policy described in Section 4.4.3 below, the termination indemnity will be equal to one year salary in line with the recommendation of the Dutch Code above mentioned.

The termination indemnity would be paid only provided that the performance conditions assessed by the Board of Directors had been fulfilled by the CEO.

3. Securities in the Company as long-term investment

Provision 3.3.3 of the Dutch Code recommends that non-Executive Directors who hold securities in the Company should keep them as a long-term investment.

The Company does not encourage non-Executive Directors to own shares, but also does not require its non-Executive Directors who hold shares in its share capital to keep such shares as a long-term investment. Although non-Executive Directors are welcome to own shares of the Company, the Company considers it is altogether unclear whether share ownership by non-Executive Directors constitutes a factor of virtuous alignment with stakeholder interest or may be a source of bias against objective decisions.

4. Dealings with analysts

Provision 4.2.3 of the Dutch Code recommends meetings with analysts, presentations to analysts, presentations to investors and institutional investors and press conferences shall be announced in advance on the Company's website and by means of press releases. In addition, it recommends that provisions shall be made for all shareholders to follow

these meetings and presentations in real time, and that after the meetings the presentations shall be posted on the Company's website.

The Company does not always allow shareholders to follow meetings with analysts in real time. However, the Company ensures that all shareholders and other parties in the financial markets are provided with equal and simultaneous information about matters that may influence the share price.

5. Gender diversity

The Company strives to comply with the composition guidelines regarding gender diversity under Dutch law pursuant to which the Board of Directors would be regarded as being composed in a balanced way if it contained at least 30% women and at least 30% men. The proportion of the female representation on the Board of Directors is currently at 25% (against 0% six years ago). The Company will continue to promote gender diversity within its Board of Directors in accordance with the principles mentioned in section 4.1.1 above. In addition, the Company will continue to give due consideration to any applicable gender targets in its search to find suitable candidates and to actively seek female candidates. However, the Company believes that candidates should not be recruited based on gender alone; the capabilities and skills of potential candidates are most important in this respect.

Furthermore, the Company is committed to supporting, valuing and leveraging the value of diversity. That being said, the importance of diversity, in and of itself, should not set aside the overriding principle that someone should be recommended, nominated and appointed for being "the right person for the job". Although the Company has not set specific targets with respect to particular elements of diversity, except for the principles described in 4.1.1 - "Composition, powers and rules" and those targets which apply by law, the Company is committed to seeking broad diversity in the composition of the Board of Directors and its Executive Committee and will consider attributes such as personal background, age, gender, experience, capabilities and skills when evaluating new candidates in the best interests of the Company and its stakeholders.

The Company believes that the composition of its Board of Directors and its Executive Committee is consistent with these diversity objectives.

For information on the operation of the Shareholders' Meeting, its key powers, the shareholders' rights and how such powers and rights can be exercised, see " - 3.1: Shareholding and voting rights – right to attend Shareholders' Meetings".

For information on the composition and operation of the Board of Directors and its respective committees, see " - 4.1.1: Composition, power and rules", " - 4.1.2: Operation of the Board of Directors in 2017", and " - 4.1.3: Board Committees".

For information on (i) significant direct and indirect shareholdings, (ii) holders of shares with special control rights, (iii) rules governing appointment and dismissal of Directors, (iv) amendments to the Articles of Association, and (v) the delegation to the Board of Directors of the power to issue or buy back shares, see " - 3.1: Shareholding and voting rights – Shareholding structure at the end of 2018", " – 3.2: Relationships with Principal Shareholders", " - 4.1.1: Composition, powers and rules", " -3.1: Shareholding and voting rights – Amendments to the Articles of Association" and " - 3.1: Shareholding and voting rights – Modifications of share capital or rights attached to shares".

4.4 Remuneration Report

4.4.1 INTRODUCTION

The **RNGC** is pleased to present the 2018 Remuneration Report.

The report comprises the following sections:

4.4.2 presents the Company's Remuneration Policy;

4.4.3 presents the amendments to the Remuneration Policy that will be proposed for adoption by the shareholders at the AGM to be held in 2019. The application of the Remuneration Policy in 2018 (see "- 4.4.4: Implementation of the Remuneration Policy: CEO" and "- 4.4.5: Implementation of the Remuneration Policy in 2018: Non-Executives") will be included as a separate agenda item for discussion at the AGM to be held in 2019.

4.4.4 illustrates how the Remuneration Policy was applied in 2018 in respect of the CEO, the only Executive Member of the Board of Directors (the cumulated remuneration of all Executive Committee Members is presented in the "Notes to the IFRS Consolidated Financial Statements – Note 31: Remuneration");

4.4.5 illustrates how the Remuneration Policy was applied in respect of the Non-Executive Members of the Board of Directors;

4.4.6 miscellaneous.

For departure terms and conditions of the current CEO see section 4.4.4.

In respect of the remuneration of the future CEO, subject to his appointment as Executive Board Member, see Section 4.4.2. A, Section 4.4.3. and Section 4.4.4 for Base Salary allocation.

4.4.2 REMUNERATION POLICY

The Remuneration Policy covers all Members of the Board of Directors: the CEO (who is the only Executive Director) and the other Members of the Board (who are the Non-Executive Directors).

It should be noted that although the policy relating to Executives' remuneration only refers to the CEO, these principles are also applied to the other Members of the Executive Committee, who do not serve on the Board of Directors, and to a large extent to all Executives across Airbus. Upon proposal by the CEO, the RNGC analyses and recommends, and the Board of Directors decides, the remuneration of the Members of the Executive Committee.

A — Executive Remuneration – Applicable to the CEO

Except with respect to the amendments proposed in Section 4.4.3. "Proposed amendments to the remuneration policy", related to contracts and severance provisions, there will be no change in the remuneration policy in connection with the proposed appointment of a future CEO at the 2019 AGM; the policy as presented below will continue to apply.

a) Remuneration Philosophy

The Company's remuneration philosophy aims to provide remuneration that will attract, retain and motivate high-calibre executives, whose contribution will ensure that the Company achieves its strategic and operational objectives, thereby delivering long-term sustainable returns for all shareholders and other stakeholders.

The Board of Directors and the RNGC are committed to making sure that the Executive remuneration structure is transparent and comprehensive for all stakeholders, and to ensure that executive rewards are consistent and aligned with the interests of long-term shareholders also taking into consideration salary evolution of employees across the group.

Before setting the targets to be proposed for adoption by the Board of Directors, the RNGC considers the financial outcome scenarios of meeting performance targets, including achieving maximum performance thresholds, and how these may affect the level and structure of the Executive remuneration.

b) Total Direct Compensation and Peer group

The CEO's total direct compensation ("Total Direct Compensation") comprises a base salary ("Base Salary"), an annual variable remuneration ("Annual Variable Remuneration" or "VR") and a Long-Term Incentive Plan ("LTIP"). The three elements of the Total Direct Compensation are each intended to comprise one-third of the total, assuming the achievement of performance conditions is 100% of target.

The level of Total Direct Compensation for the CEO (Base Salary, VR and LTIP) is set at the median of an extensive peer group and takes into account the scope of the role of the CEO and the level and structure of executive rewards within Airbus. The benchmark is regularly reviewed by the RNGC and is based on a peer group which comprises:

- ▶ Global companies in Airbus' main markets (France, Germany, UK and US); and
- ▶ Companies operating in the same industries as Airbus worldwide.

The latest benchmark performed in November 2018 was based on the relevant peer group composed of 76 companies selected from CAC40 in France, DAX 30 in Germany, FTSE 100 in the UK and DJ 30 in the US as well as large European companies having comparable economic indicators such as revenues, number of employees and market capitalisation. Financial institutions were excluded from the peer group.

The elements of the Total Direct Compensation are described below:

Remuneration Element	Main Drivers	Performance Measures	Target and Maximum
Base Salary	Reflects market value of position.	Not applicable	1/3 of Total Direct Compensation (when performance achievement is 100% of target).
VR	Rewards annual performance based on achievement of Company performance measures and individual objectives.	<p>Collective (50% of VR): divided between EBIT¹ (45%); Free Cash Flow² (45%) and RoCE (10%).</p> <p>Individual (50% of VR): Achievement of annual individual objectives, divided between Outcomes and Behaviour.</p>	The VR is targeted at 100% of Base Salary for the CEO and, depending on the performance assessment, ranges from 0% to 200% of target. The VR is capped at 200% of Base Salary.
LTIP	Rewards long-term commitment and Company performance, and engagement on financial targets subject to cumulative performance over a 3-year period.	Vesting ranges from 0% to 150% of initial grant, subject to performance over a three-year period. In principle, no vesting if cumulative negative EBIT. If cumulative EBIT is positive, vesting from 50% to 150% of grant based on EPS (75%) and Free Cash Flow (25%).	<p>The original allocation to the CEO is capped at 100% of Base Salary at the time of grant.</p> <p>Since 2012, the following caps apply to Performance Units only:</p> <ul style="list-style-type: none"> - overall pay-out is capped at a maximum of 250% of the original value at the date of grant. - The value that could result from share price increases is capped at 200% of the reference share price at the date of grant.

As illustrated in the table below, the structure of the CEO's Total Direct Compensation will remain unchanged in 2019. This will apply in the same way to a future CEO. Indeed, the on-target levels of VR and LTIP will each amount to 100% of the CEO's Base Salary.

¹ The Company continues to use the term EBIT (Earnings before interest and taxes). It is identical to Profit before finance cost and income taxes as defined by IFRS Rules.

² Airbus defines the alternative performance measure free cash flow as the sum of (i) cash provided by operating activities and (ii) cash used for investing activities, less (iii) change of securities, (iv) contribution to plan assets for pension schemes, (v) realised treasury swaps and (vi) bank activities ("Free Cash Flow" or "FCF"). It is a key indicator which allows the Company to measure the amount of cash flow generated from operations after cash used in investing activities.

SCENARIOS CURRENT CEO TOTAL DIRECT COMPENSATION

Indications are based on the current CEO's remuneration and are in million euros.

"Below Threshold" includes annual Base Salary; VR at 0%; LTIP not vesting.

"Target" includes Base Salary, VR at target and LTIP grant face value in cash and in shares.

"Maximum" includes Base Salary; maximum VR value (200% of VR at target); maximum LTIP cash grant projected at vesting date (250% of grant value); maximum performance applicable to the number of shares granted (150%). The share price development is unpredictable. The final value of performance shares cannot be capped.

c) Base Salary

The CEO's Base Salary is determined by the Board of Directors, taking into account the peer group analysis mentioned above.

d) Annual Variable Remuneration

The Variable Remuneration is a cash payment that is paid following the end of each financial year, depending on the achievement of specific and challenging performance targets as determined at the beginning of each financial year. The level of the CEO's Variable Remuneration is targeted at 100% of the Base Salary; it is capped at a maximum level of 200% of the Base Salary. The entire variable remuneration is at-risk, and therefore if performance targets are not achieved as per the defined objectives agreed by the Board of Directors, no variable remuneration is paid.

The performance measures that are considered when awarding the variable remuneration to the CEO are split equally between common collective performance measures and individual performance measures.

Common Collective Component

The common collective component is based on EBIT (45%), Free Cash Flow (45%) and return on capital employed (RoCE) (10%) objectives ("Common Collective Component"). At the beginning of each year, the Board of Directors sets the targets for these key value drivers at Company and Division levels. The common collective targets relate closely to internal planning and to guidance given to the capital markets (although there may be variations from these).

To calculate the common collective annual achievement levels, actual EBIT, Free Cash Flow and RoCE performance is compared against the targets that were set for the year. This comparison forms the basis for computing achievement levels, noting that the actual EBIT, Free Cash Flow and RoCE levels are occasionally normalised for a limited number of factors which are outside management control (such as certain foreign exchange impacts or unplanned merger and acquisition activities). The RNGC's intention is to ensure ambitious financial targets and to incentivise the CEO's commitment to meeting these targets.

In order to reinforce the alignment between the Company's strategy, values and remuneration structure, the Company is contemplating including in the Common Collective Component a specific R&S-related performance criterion in the future. The RNGC will seek to ensure alignment of the chosen R&S criteria with the 2018 Company's Priorities that are shared with all employees (See "- Section "2 Summary 2018"), while also making sure that the criteria can be measured.

Individual Component

The individual element ("Individual Component") focuses on Outcomes and Behaviour (a defined below). Individual performance is assessed in these two important dimensions:

- ▶ **Outcomes** encompass various aspects of what the CEO can do to contribute to the success of the business: specific business results he helps achieve, projects he drives and processes he helps improve. The individual targets of the CEO are comprehensive and shared with all employees via the 2018 Company Priorities;
- ▶ **Behaviour** refers to the way results have been achieved, which is also critical for long-term success: how the CEO and the Board of Directors work as a team, how the CEO leads the Executive Committee, quality of communication, encouragement of innovation, etc. A specific part of the behaviour assessment relates to ethics, compliance, R&S and quality issues.

e) Long-Term Incentive Plan

There are two types of long-term incentive plans ("Long-Term Incentive Plan" or "LTIP"): until 2015, LTIP was made up of performance units ("Performance Units" or "Units") only. Since 2016, following the approval of amendments by shareholders at the 2016 AGM, the LTIP has been composed of a mix of Performance Units and performance shares ("Performance Shares" or "Shares").

The value of the CEO's LTIP allocation is capped as a percentage of the Base Salary at the date of grant and subject to performance conditions.

The achievement of the performance criteria is assessed over a three-year period based on relevant financial criteria with stringent targets set in advance and agreed by the Board of Directors as demonstrated by past Company practices.

Both Performance Units and Performance Shares that vest can vary between 0% and 150% of the Units and Shares granted, subject to cumulative performance over a three-year period. The level of vesting is subject to the following performance measures:

- ▶ 0-50% of the allocation: In principle, this element of the Performance Unit/Share award will not vest if the Company reports negative cumulated **EBIT** results. Nonetheless, in case the Company's EBIT results are impacted by exceptional and unpredictable circumstances, the Board of Directors, upon recommendation of the RNGC, may decide that a maximum portion of 50% of the allocation will vest;
- ▶ 50-150% of the allocation: This element of the Performance Unit/Shares vests based on the two following performance criteria: average **earnings per share** (75%) ("Earnings per Share" or "EPS") and cumulative **Free Cash Flow** (25%). Before the 2013 plan, it used to vest according to one performance criteria only: average **Earnings Per Share**.

Earnings per Share Average over 3 years, €	Free Cash Flow Cumulated over 3 years, M€
<ul style="list-style-type: none"> Measures profitability Driven by net income and number of shares 	<ul style="list-style-type: none"> Measures cash generation Driven by cash provided by/used for operating and investment activities

For reasons of confidentiality, the precise targets set for the average EPS and cumulative Free Cash Flow, even though they have been properly established in a precise manner, cannot be publicly disclosed as these objectives are in part linked to the Company's strategy. Nonetheless, for the sake of transparency and to ensure compliance with best market practices, retrospective information demonstrating the stringency of the targets set by the Board of Directors is provided for the previous long-term incentive plans.

The vesting of Performance Units and Shares is subject to the following maximum cap:

- the maximum level of vesting is 150% of the number of Units/Shares granted.

The vesting of Performance Units is subject to the following maximum caps:

- the value that could result from share price increases is capped at 200% of the reference share price at the date of grant;
- the overall pay-out is capped at 250% of the value at the date of grant.

Performance Units plan characteristics (until and including 2015 plan)

Performance Units are the long-term equity-related incentive awards that were granted to the CEO until 2015. LTIP awards were granted each year. Each grant was subject to a three-year cumulative performance objective. At the end of the three-year period, the grant was subjected to a performance calculation to determine whether and to what extent it should vest. Depending on continued employment, grants attributed until 2013 vested in four tranches, the payment of which took place approximately 6, 12, 18 and 24 months following the end of the performance period. Depending on continuous employment, grants attributed in 2014 and 2015 would vest in two tranches, the payment of which would take place approximately 6 and 18 months following the end of the performance period.

At the date of grant, the CEO had to decide what portion of the allocation (subject to the performance calculation) was to be released as cash payments and what portion was to be converted into shares. At least 25% (and up to 75%) of

the award had to be deferred into shares, and would be released on the last vesting date. For the conversion into shares, one Unit corresponds to one Airbus share.

For each payment in cash, one Unit is equal to the value of one Airbus share at the time of vesting. The Airbus share value is the average of the opening share price, on the Paris Stock Exchange, during the 20 trading days preceding and including the respective vesting dates.

LTIP-SCHEME 2014 AND 2015

Performance Units & Performance Shares characteristics (since 2016)

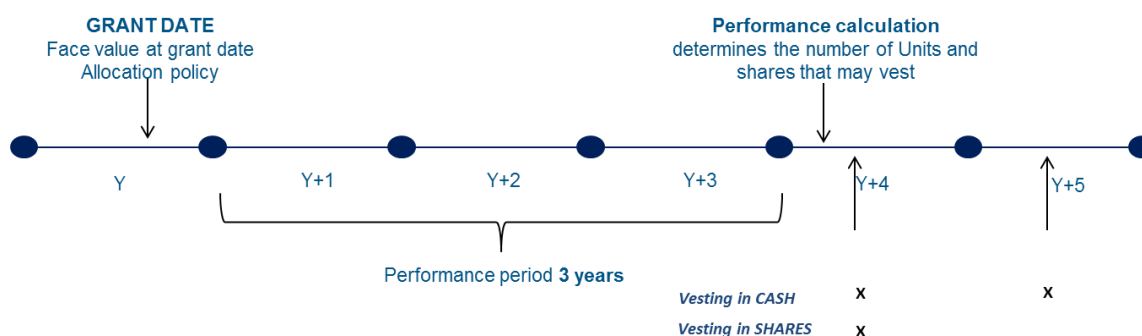

Since the 2016 plan, the CEO's LTIP is comprised of a mix of Performance Units and Performance Shares in order to increase the alignment with shareholders' interests.

For each payment in cash, one Unit is equal to the value of one Airbus share at the time of vesting. The Airbus share value is the average of the opening share price, on the Paris Stock Exchange, during the 20 trading days preceding and including the respective vesting dates.

For the CEO, the value of the Performance Unit and Share allocation is capped, at the time of grant, at 100% of the Base Salary.

At the end of the three-year period, the grant is subject to a performance calculation to determine whether and to what extent it should vest.

Depending on continued employment, Performance Units attributed since 2016 will vest in two tranches, the payment of which takes place approximately 6 and 18 months following the end of the performance period. Performance Shares would vest in one tranche, approximately six months following the end of the performance period.

f) Share Ownership Guideline

The Board of Directors has established a share ownership guideline pursuant to which the CEO is expected to acquire Airbus shares with a value equal to 200% of the Base Salary and to hold them throughout his tenure.

g) Benefits

The benefits offered to the CEO comprise a company car and accident insurance. Travel cost reimbursements are based on the Company travel policy, as applicable to all employees.

h) Retirement

The CEO is entitled to a retirement benefit. The Company's policy is to provide a pension at retirement age that equals 50% of the Base Salary, once the CEO has served on the Executive Committee for five years. This pension can increase gradually to 60% of the Base Salary, for Executives who have served on the Executive Committee for over ten years, and have been employed for at least 12 years.

i) Clawback

Recent changes to Dutch law introduced the possibility for the Company to deduct or claw back part of the CEO's variable cash remuneration (i.e. VR) or equity-related remuneration (excluding the LTIP element settled in cash) served by the Company if certain circumstances arise.

Any revision, claw back, or amounts deducted from the CEO's remuneration will be reported in the notes of the relevant financial statements.

j) Loans

The Company does not provide loans or advances to the CEO.

k) Contracts and Severance

In the case of contract termination, the CEO is currently entitled to an indemnity equal to 1.5 times the Total Target Remuneration (defined as Base Salary and target VR) with respect to applicable local legal requirements if any. This will not apply if the CEO mandate is terminated for cause, in case of dismissal, if he resigns or if the CEO has reached retirement age.

The CEO's contract currently includes a non-compete clause, which applies for a minimum of one year and can be extended at the Company's initiative for a further year. The Board of Directors has the discretion to invoke the

extension of the non-compete clause. The compensation under the non-compete clause is equal to 50% of the last Total Annual Remuneration (defined as Base Salary and VR most recently paid) with respect to applicable local legal requirements if any and paid in monthly instalments.

Past LTIP awards may be maintained, in such cases as in the case of retirement or if a mandate is not renewed by the Company without cause. The vesting of past LTIP awards follows the plans' rules and regulations including performance conditions and is not accelerated in any case. LTIP awards are forfeited for executives who leave the Company on their own initiative, but this is subject to review by the Board of Directors.

Proposal of Policy from 2019 AGM onwards applicable to a future CEO

In order to comply with the recommendation of provision 3.2.3 of the Dutch Code relating to the maximum remuneration payable in the event of departure of an Executive Board Member and in line with market practices, the Board confirmed on 13 February 2019 a proposal from the RNGC that the amount of the indemnity to be paid to the CEO in case of contract termination should be reduced to one year's salary. Consequently, the CEO will be entitled to an indemnity equal to one times the last Total Annual Remuneration (defined as Base Salary and VR most recently paid), subject to applicable local legal requirements if any. The other terms and conditions applicable to the payment of such indemnity, as per the remuneration policy currently in force, will remain unchanged. In particular such indemnity will not apply if the CEO's mandate is terminated for a specific cause, in case of dismissal, if he resigns or if the CEO has reached retirement age.

In addition, the Board confirmed on 13 February 2019 the recommendation of the RNGC to limit the non-compete compensation payable to the CEO in case of contract termination to a maximum of one year. The other terms and conditions applicable to the non-compete compensation, as per the remuneration policy currently in force, will remain unchanged. In particular, the compensation will remain equal to 50% of the last Total Annual Remuneration (defined as Base Salary and VR most recently paid), subject to applicable local legal requirements if any.

All other components of the remuneration policy will remain unchanged.

B — Non-Executive Remuneration – Applicable to Non-Executive Members of the Board

The Company's Remuneration Policy with regard to Non-Executive Members of the Board of Directors is aimed at ensuring fair compensation and protecting the independence of the Board's Members.

Fees and Entitlements

Non-Executive Members of the Board are currently entitled to the following:

- ▶ a base fee for membership or chair of the Board;
- ▶ a Committee fee for membership or chair on each of the Board's Committees; and
- ▶ an attendance fee for the attendance to Board meetings.

Each of these fees is a fixed amount. Non-Executive Members of the Board do not receive any performance or equity-related compensation, and do not accrue pension rights with the Company in the frame of their mandate, except what they would receive in the frame of a current or past executive mandate. These measures are designed to ensure the independence of Board Members and strengthen the overall effectiveness of the Company's corporate governance.

The Company does not encourage Non-Executive Directors to purchase Company shares.

Under the current policy and since 2016, the fees have been reviewed to recognise the increase in Board Members' responsibilities, their greater time commitment and Airbus' continuous need to attract and retain highly competent Directors. To incentivise Board attendance, the attendance fees have doubled. Members of the Board are entitled to the following fees:

Fixed fee for membership of the Board (EUR / year):

Chairman of the Board: 210,000

Member of the Board: 80,000

Fixed fee for membership of a Committee (EUR / year):

Chairman of a Committee: 30,000

Member of a Committee: 20,000

Attendance fees (EUR / Board meeting):

Chairman: 15,000

Member: 10,000

Attendance fees shall decrease by 50% in case of an attendance by phone or a Board meeting held by phone.

Committee chairmanship and Committee membership fees are cumulative if the concerned Non-Executive Director belongs to two different Committees. Fees are paid twice a year at the end of each semester (as close as possible to the Board meeting dates).

Proposal of Policy from 1 January 2019 onwards applicable to Non-Executive Directors

In order to ensure continuous commitment of the Members of the Board and Airbus' ability to retain highly competent members, regular reviews of the Board remuneration policy are undertaken by the Company. Following the benchmark performed in 2015, a comprehensive review of the remuneration policy applicable to the Non-Executive Members of the Board was undertaken in 2018.

In September 2018, the independent consultant Willis Towers Watson completed a compensation benchmark for the Non-Executive Directors (incl. the Chairman of the Board) against an extensive peer group.

This analysis encompassed approximately 50 comparable companies in various indices from five countries (France, Germany, Netherlands, Spain and the UK) and other large companies from the aerospace and defence sector (including BAE Systems, Boeing, Dassault Aviation, Honeywell International Inc., Lockheed Martin Corp., Northrop Grumman Corp., Raytheon, Rolls Royce, Safran, Textron, Thales, United Technologies Corp). Financial institutions were excluded from the peer group.

From the analysis, it appeared that the total target remuneration for the non-Executive Board members (i) for membership of the Board of Directors (fixed and attendance fees) and (ii) for membership of a Committee (fixed fee) are positioned within the market spectrum of the Company's peer group.

The remuneration policy for membership of a Committee has been applicable since 2008 and only provides for a fixed fee calculated on the basis of four regular meetings per Committee per year.

However, since 2016, due to exceptional circumstances, the Committees' workload has significantly increased. The current remuneration policy does not take into account directors' attendance to a greater number of Committee meetings when the workload substantially intensifies. Further, the current remuneration policy does not take into account such temporary increased intensity in the workload.

Therefore, in order to allow for a temporary increase in the remuneration of the non-Executive Members of the Board of Directors for their membership of a Committee when the workload increases), the Board approved in October 2018 the recommendation of the RNGC to allocate the following attendance fees per Committee above four Committee meetings per year (whether these meetings are held physically or by phone):

- in case of physical attendance: € 3,000 per additional meeting for Members based in Europe and € 6,000 per additional meeting for Members based outside Europe,
- in case of attendance by phone (whether the meeting is held physically or by phone): € 1,500 per additional meeting.

Such attendance fee will be identical for both the Chair and Members of a Committee.

As the fixed fees for membership of a Committee will remain unchanged (€ 30,000 for chair and € 20,000 for member), the allocation of an attendance fee per Committee above a certain number of meetings per year will ensure automatic return to the current level of remuneration when exceptional circumstances end and workload decreases.

The contemplated total remuneration for membership of a Committee (based on the average number of additional Committee meetings effectively attended physically or by phone by the Company's directors in 2017 and 2018) will remain within the market spectrum of the Company's peer group (between the median and Q3, as per the findings of the above-mentioned benchmark).

Fixed fee for membership of the Board and attendance fees for attendance of Board meetings will remain unchanged.

Under the new policy, and in greater details, non-Executive Members of the Board would be entitled to the following fees for their membership of a Committee:

The proposal is to add an attendance fee per Committee meeting above four meetings per year (whether these meetings were held physically or by phone). The fixed fee would remain unchanged.

Fixed fee for membership of a Committee (EUR / year):

- Chairman: 30,000
- Member of a Committee: 20,000

Attendance fee for membership of a Committee applicable to chair and members (EUR / additional meeting above four meetings per Committee per year, whether these meetings were held physically or by phone):

- Physical participation: 3,000 if the chair or member is based in Europe and double attendance fee amount, i.e. 6,000 if the chair or member is based outside Europe
- Participation by phone (whether the meeting is held physically or by phone): 1,500

C – Employee Share Ownership Plan (ESOP)

A key element in the Airbus benefits policy is enabling employees to participate in the results of the Company. Since its creation, the Company has developed a philosophy based on sharing the added value created by the Company with all employees (including the CEO). Therefore, the Company has regularly offered qualifying employees the opportunity to purchase shares on favourable terms through the ESOP.

According to shareholders' resolutions adopted at the AGM, the powers to issue shares and to set aside preferential subscription rights of existing shareholders have been granted to the Board of Directors at the 2018 AGM. Such powers include the approval of the ESOP.

The Company intends to implement an ESOP in 2019, subject to approval by the Board of Directors, open to all qualifying employees (including the CEO). With the 2019 ESOP, the Company aims to offer shares to eligible employees through the issuance of shares or free distribution of shares or other existing or new securities giving access to the capital as a matching contribution. This plan aims to promote the development of employee shareholdings.

4.4.3 PROPOSED AMENDMENTS OF THE REMUNERATION POLICY

At the 2019 AGM, the Board of Directors is proposing that shareholders adopt the following amendments to the Airbus Remuneration Policy:

Proposal of Policy from AGM 2019 onwards applicable to a future CEO:

In order to comply with the Dutch Code and in line with market practices, the Board proposes, as described in details above, that the termination indemnity will be equal to one times the last Total Annual Remuneration (defined as Base Salary and VR most recently paid) subject to applicable local legal requirements if any, and that the non-compete clause will apply for a maximum of one year.

The other terms and conditions applicable to the termination indemnity and the non-compete compensation as per the remuneration policy currently in force will remain unchanged. In particular the termination indemnity will not apply if the CEO's mandate is terminated for a specific cause, in case of dismissal, if he resigns or if the CEO has reached retirement age and the non-compete compensation will remain equal to 50 % of the last Total Annual Remuneration (defined as Base Salary and VR most recently paid).

Proposal of Policy from 1 January 2019 onwards applicable to non executive directors:

In order to ensure continuous commitment of the Members of the Board and Airbus' ability to retain highly competent members, the Company regularly reviews Board remuneration policy.

As described in detail above, in order to increase the remuneration of Non-Executive Directors who are Members of a Committee when the workload of that Committee increases, the Company proposes to allocate an attendance fee per Committee if and when such Committee would have more than four Committee meetings per year (whether these meetings are held physically or by phone).

Such an attendance fee is identical for chair and membership but differs depending on whether attendance of the meeting is physical or by phone and, in case of physical attendance, where the Committee Members are based.

As the fixed fees for membership of a Committee remain unchanged, the proposed amendment will ensure the automatic return to the current level of remuneration when workload decreases.

While incentivising attendance to the meetings and recognising the key role of the Committees for the Board of Directors, the contemplated total target remuneration (fixed and proposed attendance fees) for membership of a Committee remains within the market spectrum of the Company's peer group, as per the findings of the above-mentioned benchmark.

The other components of the remuneration policy will remain unchanged.

4.4.4 IMPLEMENTATION OF THE REMUNERATION POLICY: CEO

a) Benchmarking

Based on a review the RNGC performed in 2018 with the assistance of an independent consultant, Willis Towers Watson, it was concluded that the CEO's Total Direct Compensation was at the median level of the peer group as defined in Section 4.4.2 A b) above.

b) Base Salary

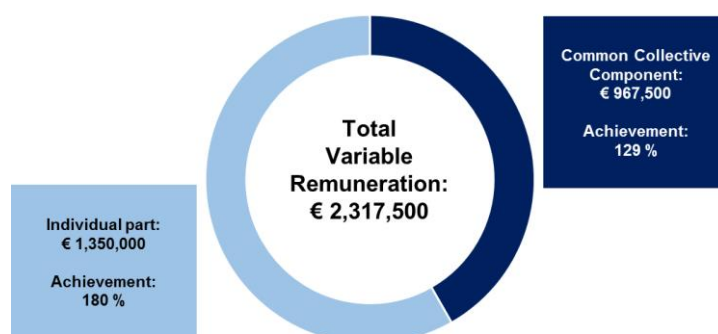

For 2018, the Base Salary of the current CEO remained at € 1,500,000. The CEO's Base Salary level was reviewed in 2015 and approved by shareholders at the 2016 AGM.

The Base Salary of the future CEO is € 1,350,000 on a full year basis. Any increase of the future CEO's Base Salary will also take into consideration salary increases of employees across the group.

c) Annual Variable Remuneration

As stipulated in the Company's Remuneration Policy, the CEO's VR is targeted at 100% of the Base Salary and capped at 200% of the Base Salary. It is subject to the fulfilment of collective and individual performance targets. This applies for both the current and future CEO.

For 2018, the VR of the current CEO amounted to an aggregate € 2,317,500 composed of € 967,500 (129%) for the Common Collective Component and € 1,350,000 (180%) for the Individual Component.

At the end of the financial year 2018, the **Common Collective Component** results from a composite 129% achievement of EBIT (45%), Free Cash Flow (45%) and RoCE (10%) objectives.

PERFORMANCE ACHIEVEMENT - COMMON COLLECTIVE COMPONENT 2018

This achievement mainly reflects a solid **EBIT** and strong **Free Cash Flow** generation against the budgeted targets. The main drivers of that success were the strong operational performance and programme execution in all our businesses, in particular record deliveries in Airbus, healthy pre-delivery payments inflows, on-going efforts to control working capital including payment terms to suppliers and sound CapEx spending.

Finally, **RoCE** was above the target.

Normalisations were made to exclude exceptional events such as currency exchange differences or those arising from phasing mismatches.

The **Individual part** results from an excellent achievement level of 180% out of 200%, assessed by the RNGC and approved by the Board on the basis of the CEO's performance and behaviour, mostly with respect to the four Airbus priorities agreed at the start of the year (see: Chapter 2 – Summary 2018). For each of these outcomes, leadership, personal performance and contributions were examined.

The factors determining the assessment in 2018 were among other achievements:

- ▶ Solid financial figures achieving the envisaged targets.
- ▶ Record delivery achievements despite industrial challenges especially on A320. Largest number of deliveries in Airbus history, +11% vs. 2017.
- ▶ Good progress in industrial milestones of key development programmes including first deliveries of Airbus A350-1000 and ULR.
- ▶ Remarkable successful closing of the acquisition of Bombardier C Series programme (A220 family) complementing the Airbus product portfolio and integration into Airbus organisation as C-SALP.
- ▶ Strong sales performance in Airbus Helicopters with book-to-bill above 1 and satisfactory delivery performance with 357 units within a high competitive market.
- ▶ Solid result in Airbus Defence and Space, Stabilisation of the A400M programme with good progress on capability development, retrofit campaign and solid contractual rebaselining. Record number of Military Aircraft deliveries and satellite launches. Notable progress on future programs with key decisions on political level for UAS and FCAS.
- ▶ Strong key advancement in the Company's further integration through successful closure of the "Gemini" project by merging Airbus and Airbus Group for a leaner and more efficient management, helping to prepare the future of the Company.
- ▶ Excellent progress on digital roadmap for product and services offerings with Skywise and internal processes with DDMS.
- ▶ Strong progress on innovation and R&T activities, growth in activities of Airbus ventures, establishing of innovation centres with opening of Shenzhen innovation centre. Strongly evolved Airbus role on UAM, exploration of new business models and smart partnering for future trends.
- ▶ Strong and very successful steering of management transition with selection, on-boarding and up-skilling of new C-level leaders. Including the new CEO.
- ▶ Strong and solid emphasis of ethics and compliance and responsibility & sustainability as key pillars for future developments. High momentum on values journey ensured CEO & leadership team consistently demonstrate values & behaviours and that E&C and R&S are interconnected drivers of culture change.
- ▶ Reinforced efforts on diversity in all its forms.

Due to the current CEO's departure in 2019, the VR for 2019 amounts to an aggregate € 416,096 composed of € 208,048 for the Common Collective Component (100%) and € 208,048 for the Individual Component (100%).

d) Long-Term Incentive Plan

Granting 2018 and 2019

Due to the announcement of his departure, the current CEO has been granted neither Performance Units nor Performance Shares for 2018 and 2019.

In 2019, the future CEO will be granted LTIPs in accordance with the applicable policy.

Vesting values in 2018 for the current CEO

In 2018, the CEO received both cash payments and vested shares in connection with the vesting of 2013 and 2014 LTIP awards:

- ▶ **Cash:** the total cash payment to the CEO amounted to € 1,364,541 in 2018 vs. € 1,372,048 in 2017.
- ▶ **Shares:**
 - In connection with the 2013 LTIP award, the CEO had elected that 50% of his grant should be deferred into shares. Therefore, the CEO received 11,360 vested shares (11,192 vested shares in 2017) on the fourth vesting date for LTIP 2013 (5 November 2018).
 - In connection with the 2014 LTIP award, the CEO had elected that 25% of his grant should be deferred into shares. Therefore, the vesting of 2,950 Performance Units for the LTIP 2014 will be released in the form of shares on the second vesting date for the 2014 LTIP (which will take place in 2019).

LTIP overview: granting and vesting

Date of grants	Grant Type	Share price at grant date	Value at grant date	(Un)conditional	Performance achievement	Units with performance achievement	Dates of vesting	Share value at vesting dates(*)
								1 st vesting – 3 May 2017: € 72.12
								2 nd vesting– 3 November 2017: € 81.92
								3 rd vesting – 3 May 2018: € 92.34
2013	Units	30,300	€ 46.17	€ 1,398,951	Conditional	75%	22,724	4 vestings in 2017 - 2018
								5 November 2018: € 92.34
2014	Units	29,500	€ 47.45	€ 1,399,775	Conditional	80%	23,600	2 vestings in 2018 - 2019
								1 st vesting – 3 May 2018: € 94.40
2015	Units	24,862	€ 56.31	€ 1,399,979	Conditional	75%	18,648	2 vestings in 2019 - 2020
								Not yet known
2016	Units	14,240	€ 52.67	€ 750,021	Conditional	Not yet known	Not yet known	2 vestings in 2020 - 2021
								Not yet known
2016	Shares	14,240	€ 52.67	€ 750,021	Conditional	Not yet known	Not yet known	1 vesting in 2020
								Not yet known
2017	Units	10,162	€ 73.81	€ 750,057	Conditional	Not yet known	Not yet known	2 vestings in 2021 - 2022
								Not yet known
2017	Shares	10,162	€ 73.81	€ 750,057	Conditional	Not yet known	Not yet known	1 vesting in 2021
								Not yet known

Calculations may involve rounding to the nearest unit.

* LTIP 2013 and 2014 cap was applied to the share price

* Vesting will occur according to the respective rules and regulations of each plan. There will be noaccelerated vesting due to the current CEO's departure in 2019.

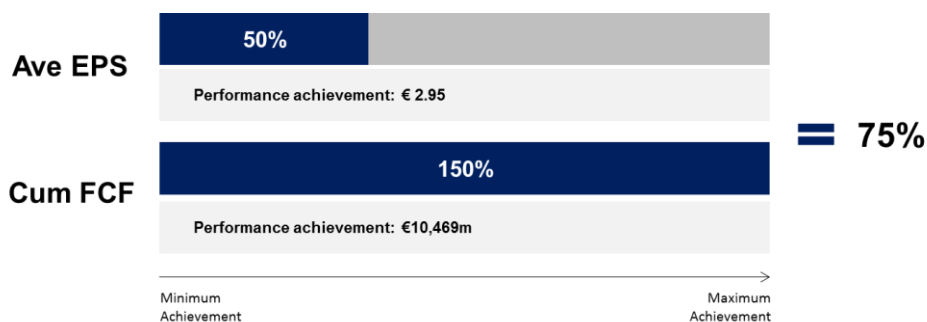

Performance Conditions of LTIP 2015:

- ▶ The performance conditions for LTIP 2015 were determined as follows: if Airbus reports negative cumulated EBIT results, the Board of Directors can decide at its sole discretion to review the vesting of the Performance Units, including the 50% portion which is not subject to performance conditions.
- ▶ 50% to 150% of the allocation would be granted depending on the compounded achievement of the two following performance criteria:
 - 75% of average EPS ("Ave EPS"): determined on a linear basis depending on three-year Ave EPS for the 2016, 2017 and 2018 fiscal years, with the three-year Ave EPS target for an allocation of 100% equal to € 4.02, and
 - 25% of cumulative FCF ("Cum FCF"): determined on a linear basis depending on three-year Cum FCF for the 2016, 2017 and 2018 fiscal years, with the three-year Cum FCF target for an allocation of 100% equal to € 8,281m.

Review of Achievement of Performance Conditions:

The Board of Directors on 13 February 2019 noted the achievement of the performance conditions of the 2015 plan, i.e. for the 2016, 2017 and 2018 fiscal years. The three-year Ave EPS was € 2.95 and the three-year Cum FCF was € 10,469m, after normalisation to align them with policies in force when setting the target (notably IFRS 15 and A220 impacts)

LTIP 2015 PERFORMANCE ACHIEVEMENT

Date of grants	KPI	Number of units	Target for a 100% allocation	Achieved	Performance achievement in percentage	Compounded performance achievement in percentage	Resulting vesting in number	For comparison, average EPS for the last 3 reported years at the date of grant
2013	Ave EPS	30,300	€ 3.64	€ 2.28	50%	75%	22,724	€ 1.15*
	Cum FCF before M&A		€ 2,650m	€ 3,440m	150%			
2014	Ave EPS	29,500	€ 3.31	€ 2.81	56%	80%	23,600	€ 1.51**
	Cum FCF		€ 4,298m	€ 9,741m	150%			
2015	Ave EPS	24,862	€ 4.02	€ 2.95	50%	75%	18,646	€ 2.10***
	Cum FCF		€ 8,281m	€ 10,469m	150%			

* Average EPS of 2012, 2011 and 2010

** Average EPS of 2013, 2012 and 2011

*** Average EPS of 2014, 2013 and 2012

e) Share Ownership

The CEO owned 76,521 Company shares on 31 December 2018, which represents more than 200% of the Base Salary. He herewith respects Airbus' share ownership policy.

Please refer to the AFM website www.afm.nl for any further information related to the transactions of the CEO.

f) Employee Share Ownership Plan (ESOP)

In March 2018, the Company offered all eligible employees the opportunity to subscribe to a share matching plan, through which the Company matches a certain number of directly acquired shares with a grant of matching shares. This ratio varies depending on the number of shares acquired at fair market value by the employees, with a maximum discount of 44%. The total offering was up to 2.2 million shares of the Company, open to all qualifying employees. Information about the plan can be found on the Company's website.

Under the umbrella of the ESOP 2018, a dedicated UK tax advantageous Share Incentive Plan ("SIP") was also deployed in March 2018.

Although the CEO was eligible for the plan, he did not participate to the ESOP 2018 plan favouring the development of a shareholding among other employees of the Company.

g) Benefits

As stipulated in the Company's Remuneration Policy, the CEO's benefits comprise a company car and accident insurance. The monetary value of these benefits for 2018 amounted to € 61,144.

h) Retirement

The defined benefit obligation for the current CEO's pension results from the Company's pension policy as described above and takes into account: (i) the seniority of the CEO in the Company and on its Executive Committee and (ii) the significantly lower public pension promise deriving from the German social security pension system, compared to a pension resulting from membership in the French pension system. There has been no change in the pension promise for the CEO in 2018.

The present value of the CEO's pension obligation including deferred compensation is estimated annually by an independent actuarial firm according to the international accounting standard IAS19 as applied by the group for post-employment benefits. As of 31 December 2018, the defined benefit obligation amounts to € 26,303,940 vs. € 21,176,042 at the end of 2017. The change in valuation is due to changes in actuarial assumptions (e.g. mortality table, expected pension increase, retirement age).

For the fiscal year 2018, the current service and interest costs related to the CEO's pension promise represented an expense of € 1,136,706. This obligation has been accrued in the 2018 Consolidated Financial Statements.

i) Clawback

The Board has not applied any clawback in 2018.

j) Pay ratio

The Dutch Corporate Governance Code recommends that the Company provides a ratio comparing the compensation of the CEO and that of a "representative reference group" determined by the Company.

The Airbus pay ratio is calculated by comparing the cash compensation of the CEO with a median full-time permanent employee from France, Germany, UK and Spain for Airbus, excluding subsidiaries.

The aggregate cash compensation over the 2018 fiscal year was used as a reference amount (i.e., excluding the value of equity incentive awards and other non-cash compensation components). To calculate the ratio, the gross

sum of the Base Salary, annual bonus, profit and success sharing, overtime, premium for work conditions and other premiums was taken in to account.

The full time equivalent headcount of this target European population was taken into account.

Based on this methodology, the ratio between the cash compensation of the CEO and the median full-time equivalent permanent employee for the fiscal year to which this report relates is 51 (rounded to the nearest integer). Airbus did not analyse the ratios in comparison with the previous financial year, because in 2017 ratios have not been calculated.

k) Contract and severance

With regards to his planned departure and according to the policy, the current CEO is not entitled to any termination indemnity.

The CEO's contract includes a non-compete clause, which will apply for one year. It will be paid in monthly instalments of € 266,854.

Past LTIP awards are maintained. There will be no accelerated vesting.

4.4.5 IMPLEMENTATION OF THE REMUNERATION POLICY IN 2018: NON-EXECUTIVE DIRECTORS

.....

The last review of the Board remuneration was undertaken in 2015. The Board remuneration is in line with market practice, incentivises attendance and recognises the strategic role played by the Board of Directors in Airbus' developments. The CEO is the only Member of the Board of Directors who is not entitled to any Board membership fee.

For personal reasons, and with regards to the implementation of remuneration policy approved at the AGM 2016, Denis Ranque decided in 2016 and onwards to waive the portion of his remuneration as Chairman of the Board of Directors which exceeds € 240,000 (his total target remuneration for 2015, based on six meetings per year and including chairmanship Board fixum and attendance fees) until further notice.

Taking into account the increased number of Board meetings in 2018, the remuneration of Denis Ranque for 2018 as Chairman of the Board of Directors (Board chairmanship fixum and attendance fees) is € 255,000.

Therefore, the Board recommended that the remuneration exceeding € 255,000 would be converted into an annual contribution to the Airbus Foundation, as long as Denis Ranque waived this part of his remuneration which corresponds to € 67,500 based on the number of Board meetings in 2018.

Summary Table of the 2018 and 2017 fees of all non-Executive Members of the Board (current and former):

(in €)	2018			2017		
	Fixum ⁽¹⁾	Attendance Fees ⁽²⁾	Total	Fixum	Attendance Fees	Total
Former Non-Executive Board Members						
Mr RANQUE Denis	210,000 €	75,000 €	285,000 €	204,293 €	80,000 €	284,293 €
Mr CROSBY JR Ralph	100,000 €	75,000 €	175,000 €	94,420 €	80,000 €	174,420 €
Mr DRAYSON ³ Paul	114,475 €	55,000 €	169,475 €	72,100 €	60,000 €	132,100 €
Ms GUILLOUARD Catherine	120,000 €	75,000 €	195,000 €	120,000 €	70,000 €	190,000 €
Mr KEITEL ⁴ Hans-Peter	27,900 €	10,000 €	37,900 €	100,000 €	60,000 €	160,000 €
Mr LAMBERTI Hermann-Josef	130,000 €	65,000 €	195,000 €	135,707 €	70,000 €	205,707 €
Ms MORALEDA Amparo	127,238 €	65,000 €	192,238 €	120,000 €	80,000 €	200,000 €
Ms NEMAT Claudia	100,000 €	75,000 €	175,000 €	100,000 €	70,000 €	170,000 €
Sir PARKER ⁴ John	36,270 €	10,000 €	46,270 €	135,707 €	65,000 €	200,707 €
Mr TAVARES Carlos	80,000 €	50,000 €	130,000 €	80,000 €	65,000 €	145,000 €
Mr TRICHET ⁴ Jean Claude	27,900 €	10,000 €	37,900 €	100,000 €	80,000 €	180,000 €

Mr CLAMADIEU ⁶ Jean-Pierre	72,376 €	50,000 €	122,376 €	0 €	0 €	0 €
Mr OBERMANN ⁵ René	72,376 €	55,000 €	127,376 €	0 €	0 €	0 €
Former Non-Executive Board Members						
Mr MITTAL Lakshmi	0 €	0 €	0 €	28,176 €	10,000 €	38,176 €
TOTAL	1,290,910 €	720,000 €	2,010,910 €	1,290,403 €	790,000 €	2,080,403 €

1) The fixum includes a base fee for a Board membership and a Committee fee membership within the Audit Committee, the RNGC and/or the E&C Committee.

The fixum for the year 2018 was paid 50% in January 2018 and 50% in July 2018. The fixum for the year 2017 was paid 50% in January 2017 and 50% in July 2017.

(2) The attendance fees related to the first semester 2018 were paid in July 2018, those related to the second semester 2018 were paid in January 2019.

The attendance fees related to the first semester 2017 were paid in July 2017; those related to the second semester 2017 were paid in January 2018.

(3) Member of the E&C Committee as of 11 April 2018.

(4) Not a Member of the Company Board of Directors as of 11 April 2018.

(5) Member of the Company Board of Directors and the AC as of 11 April 2018.

(6) Member of the Company Board of Directors and the RNGC as of 11 April 2018.

4.4.6 MISCELLANEOUS

Policy for Loans and Guarantees Granted

The Company's general policy is not to grant any loan to the Members of the Board of Directors. Unless the law provides otherwise, the Members of the Board of Directors shall be reimbursed by the Company for various costs and expenses, like reasonable costs of defending claims. Under certain circumstances, such as an act or failure to act by a Member of the Board of Directors that can be characterised as intentional, intentionally reckless, or seriously culpable, there will be no entitlement to this reimbursement. The Company has also taken out liability insurance ("D&O" – Directors & Officers) for the persons concerned.

4.5 Enterprise Risk Management System

Airbus' long-term development and production lifecycle make Enterprise Risk Management ("ERM") a crucial mechanism for both mitigating the risks faced by the Company and identifying future opportunities.

Applied across the Company and its main subsidiaries, ERM is a permanent top-down and bottom-up process, which is executed across Divisions at each level of the organisation. It is designed to identify and manage risks and opportunities. A strong focus is put on the operational dimension due to the importance of Programmes and Operations for Airbus.

ERM is an operational process embedded into the day-to-day management activities of Programmes, Operations and Functions. The key risks and their mitigations are reported to the Board of Directors through a reporting synthesis, consolidated on a quarterly basis.

The ERM system is articulated along four axes:

- ▶ Anticipation: early risk reduction and attention to emerging risks;
- ▶ Speak-up & early warnings;
- ▶ Robust risk mitigations; and
- ▶ Opportunities.

ERM Process

The objectives and principles for the ERM system, as endorsed by the Board of Directors, are set forth in the Company's ERM Policy and communicated throughout Airbus. The Company's ERM Policy is supplemented by directives, manuals, guidelines, handbooks, etc. External standards which contribute to the Company's ERM system include the standards as defined by the International Organisation for Standardisation ("ISO").

The ERM process consists of four elements:

- ▶ a strong operational process - derived from ISO 31000 - to enhance operational risk and opportunity management;
- ▶ a reporting process, which contains procedures for the status reporting of the ERM system and the risk/opportunity situation;
- ▶ an ERM compliance process, which comprises procedures to assess the effectiveness of the ERM system; and
- ▶ a support process, which includes procedures to maintain and increase the quality of the ERM system.

The ERM process applies to all relevant sources of risks and opportunities that potentially affect the Company's activities, its businesses and its organisation in the short-, mid- and long-term. The ERM process is part of the management process and inter-related with the other processes.

All Airbus organisations, including Divisions, subsidiaries and controlled participations, commit to and confirm the effective implementation of the ERM system. The annual ERM Confirmation Letter issued by each organisation is the formal acknowledgement about the effectiveness of the ERM system.

For the main risks to which Airbus is exposed, see “— Chapter 4.6 (Risk Factors)” of this document.

ERM Governance and Responsibility

The governance structure and related responsibilities for the ERM system are as follows:

- ▶ the Board of Directors with support of the Audit Committee supervises the strategy and business risk and opportunities, as well as design and effectiveness, of the ERM system;
- ▶ the CEO, with the top management, is responsible for an effective ERM system. He is supported by the CFO, who supervises the Head of ERM, and the ERM system design and process implementation;
- ▶ the Head of ERM has primary responsibility for the ERM strategy, priorities, system design, culture development and reporting tool. He supervises the operation of the ERM system and is backed by a dedicated risk management organisation in the Company focusing on the operational dimension, early warning and anticipation culture development while actively seeking to reduce overall risk criticality. The risk management organisation is structured as a cross-divisional Centre of Competence (“CoC”) and pushes for a proactive risk management; and
- ▶ the management at executive levels has responsibility for the operation and monitoring of the ERM system in its respective areas of responsibility and for the implementation of appropriate response activities to reduce risks and seize opportunities, considering the recommendations of the internal and external auditors.

ERM Effectiveness

The ERM effectiveness is analysed by:

- ▶ ERM centre of competence (“CoC”), based on ERM reports, confirmation letters, *in situ* sessions (e.g. risk reviews), participation to key controls (e.g. major Programme Maturity Gate Reviews); and
- ▶ Corporate Audit, based on internal corporate audit reports.

The combination of the following controls is designed to achieve reasonable assurance about ERM effectiveness:

Organisation	Explanations
Board of Directors/ Audit Committee	Regular monitoring The Board of Directors and the Audit Committee review, monitor and supervise the ERM system. Any material failings in, material changes to, and/or material improvements of the ERM system which are observed, made and/or planned are discussed with the Board and the Audit Committee.
Top Management	ERM as part of the regular divisional business reviews Results of the operational risk and opportunity management process, self-assessments and confirmation procedures are presented by the Divisions or other Airbus' organisations to top management.
Management	ERM confirmation letter procedure Entities and department heads that participate in the annual ERM compliance procedures must sign ERM Confirmation Letters.
ERM CoC	ERM effectiveness measurement Assess ERM effectiveness by consideration of ERM reports, ERM confirmations, <i>in situ</i> sessions (risk reviews etc.), participation to key controls (e.g. major Programme Maturity Gate Reviews).
Corporate Audit	Audits on ERM Provide independent assurance to the Audit Committee on the effectiveness of the ERM system.
E&C	Alert System Detect deficiencies regarding conformity to applicable laws and regulations as well as to ethical business principles.

Board Declaration

Based on the Company's current state of affairs, the reports made directly available to the Board of Directors, coming from different processes, audits and controls and the information it received from management, the Board of Directors believes to the best of its knowledge that:

- ▶ the internal risk management and control system provides reasonable assurance that the financial reporting does not contain any material inaccuracies;
- ▶ this report provides sufficient insight into any material failings in the effectiveness of the internal risk management and control systems;
- ▶ it is justified that the financial statements have been prepared on a going concern basis; and
- ▶ this report states the material risks and uncertainties that are relevant to the expectation of the Company's continuity for the period of 12 months after the preparation of the report.

It should be noted that no matter how well designed, the internal risk management and control system has inherent limitations, such as vulnerability to circumvention or overrides of the controls in place. Consequently, no assurance can be given that the Company's internal risk management and system and procedures are or will be, despite all care and effort, entirely effective.

4.6 Risk Factors

The Company is subject to many risks and uncertainties that may affect its financial performance. The business, results of operations or financial condition of the Company could be materially adversely affected by the risks described below. These are not the only risks the Company faces. Additional risks and uncertainties not presently known to the Company or that it currently considers immaterial may also impair its business and operations.

Although a certain degree of risk is inherent in the Company's business (as described in the risk factors mentioned in this section), the Company endeavours to minimise risk to the extent reasonably possible. To achieve its strategy, the Company is prepared to take modest or low event risks to provide sufficient predictability on profitability and cash flow given the necessity to stay competitive, invest in R&D and manage the diversified portfolio of business in a world of uncertain market and economic conditions. Due to the importance of programmes and operations for the Company, a particular focus is put on the operational dimension of risk identification and management. Within the area of legal and compliance risks, the Company seeks to ensure that its business practices conform to applicable laws, regulations and ethical business principles, while developing a culture of integrity. Regarding financial risks, our risk approach can be qualified as prudent and the Company aims to minimise the downside risk through appropriate liquidity buffer, the use of hedging derivatives and other insurance products.

4.6.1 FINANCIAL MARKET RISKS

Global Economic Concerns

As a global company, the Company's operations and performance depend significantly on market and economic conditions in Europe, the US, Asia and the rest of the world. Market disruptions and significant economic downturns may develop quickly due to, among other things, crises affecting credit or liquidity markets, regional or global recessions, sharp fluctuations in commodity prices (including oil), currency exchange rates or interest rates, inflation or deflation, sovereign debt and bank debt rating downgrades, restructurings or defaults, or adverse geopolitical events (including the impact of Brexit, discussed below, US policy and elections in Europe). Any such disruption or downturn could affect the Company's activities for short or extended periods and have a negative effect on the Company's financial condition and results of operations.

On 29 March 2017, the UK triggered Article 50 of the Lisbon Treaty, the mechanism to leave the European Union ("Brexit"), before having achieved a roadmap for the complex negotiations. The negotiation period ends on 29 March 2019 and if no agreement is ratified by this time, the UK leaves the European Union with effect from this date and is considered as a third country without a privileged relationship with the European Union. Although the terms of the UK's post-Brexit relationship with the EU are still unknown, the Company, its operations and supply chain may be disrupted by this uncertainty and may be affected by potentially divergent national laws and regulations between the EU and the UK. This will in particular include but not limited to:

- ▶ Greater restrictions on the import and export of goods and services between the UK and EU countries in which the Company operates along with increased regulatory and legal complexities;
- ▶ Changes in customs regime between the UK and the European Union which could result in significant changes at borders and customs controls. An insufficient level of preparedness could also significantly delay the import and export of goods including goods which are transferred between Airbus (and its suppliers') entities in the UK to Airbus (and its suppliers') entities in the EU; and
- ▶ Limitations on the free movement of people and skilled labour are also possible.

The administration of US President Donald Trump has introduced greater uncertainty with respect to US tax and trade policies, tariffs and government regulations affecting trade between the US and other countries.

Although the impact of these geopolitical events cannot reasonably be assessed, the consequences could have a negative effect on the Company's financial condition and results of operations.

If economic conditions were to deteriorate, or if more pronounced market disruptions were to occur, there could be a new or incremental tightening in the credit markets, low liquidity, and extreme volatility in credit, currency, commodity and equity markets. This could have a number of effects on the Company's business, including:

- ▶ requests by customers to postpone or cancel existing orders for aircraft (including helicopters) or decisions by customers to review their order intake strategy due to, among other things, lack of adequate credit supply from the market to finance aircraft purchases or change in operating costs or weak levels of passenger demand for air travel and cargo activity more generally;
- ▶ an increase in the amount of sales financing that the Company must provide to its customers to support aircraft purchases, thereby increasing its exposure to the risk of customer defaults despite any security interests the Company might have in the underlying aircraft;
- ▶ variations in public spending for defence, homeland security and space activities;
- ▶ financial instability, inability to obtain credit or insolvency on the part of key suppliers and subcontractors, thereby impacting the Company's ability to meet its customer obligations in a satisfactory and timely manner;
- ▶ continued de-leveraging as well as mergers, rating downgrades and bankruptcies of banks or other financial institutions, resulting in a smaller universe of counterparties and lower availability of credit, which may in turn reduce the availability of bank guarantees needed by the Company for its businesses or restrict its ability to implement desired foreign currency hedges;
- ▶ default of investment or derivative counterparties and other financial institutions, which could negatively impact the Company's treasury operations including the cash assets of the Company; and
- ▶ decreased performance of Airbus' cash investments due to low and partly negative interest rates.

The Company's financial results could also be negatively affected depending on gains or losses realised on the sale or exchange of financial instruments; impairment charges resulting from revaluations of debt and equity securities and other investments; interest rates; cash balances; and changes in fair value of derivative instruments. Increased volatility in the financial markets and overall economic uncertainty would increase the risk of the actual amounts realised in the future on the Company's financial instruments differing significantly from the fair values currently assigned to them.

In the Commercial Aircraft activities, revision clauses in sales contracts and in supplier contracts can be based on different indexes and therefore can evolve differently.

Foreign Currency Exposure

Airbus is exposed to certain price risks such as foreign exchange rate as well as interest rate risks, changes in commodity prices and in the price of its own stocks. Adverse movements of these prices may jeopardise Airbus' profitability if not hedged. Airbus intends to generate profits only from its operations and not through speculation on the development of such prices. Airbus uses hedging strategies to manage and minimise the impact of such price fluctuations on its profits, including foreign currency derivative contracts, interest rate and equity swaps and other non-derivative financial assets or liabilities denominated in a foreign currency.

The major part of its hedging activities is devoted to foreign exchange risks, as a significant portion of the Company's revenues is denominated in US dollars, while a major portion of its costs is incurred in euro, and to a lesser extent, in pounds sterling. Consequently, to the extent that the Company does not use financial instruments to hedge its exposure resulting from this foreign currency mismatch, its profits will be affected by market changes in the exchange rate of the US dollar against these currencies. The Company has therefore implemented a long-

term hedging portfolio to help secure the rates at which a portion of its future US dollar-denominated revenues (arising primarily at Airbus) are converted into euro or pound sterling.

There are complexities inherent in determining whether and when foreign currency exposure of the Company will materialise, in particular given the possibility of unpredictable revenue variations arising from order cancellations, postponements or delivery delays. The Company may also have difficulty in fully implementing its hedging strategy if its hedging counterparties are unwilling to increase derivatives risk limits with the Company, and is exposed to the risk of non-performance or default by these hedging counterparties. The exchange rates at which the Company is able to hedge its foreign currency exposure may also deteriorate, as the euro could appreciate against the US dollar for some time as has been the case in the past and as higher capital requirements for banks result in higher credit charges for uncollateralised derivatives. Accordingly, the Company's foreign currency hedging strategy may not protect it from significant changes in the exchange rate of the US dollar to the euro and the pound sterling, in particular over the long term, which could have a negative effect on its financial condition and results of operations. In addition, the portion of the Company's US dollar-denominated revenues that is not hedged in accordance with the Company's hedging strategy will be exposed to fluctuations in exchange rates, which may be significant.

Currency exchange rate fluctuations in currencies other than the US dollar in which the Company incurs its principal manufacturing expenses (mainly the euro) may affect the ability of the Company to compete with competitors whose costs are incurred in other currencies. This is particularly true with respect to fluctuations relative to the US dollar, as many of the Company's products and those of its competitors (e.g., in the defence export market) are priced in US dollars. The Company's ability to compete with competitors may be eroded to the extent that any of the Company's principal currencies appreciates in value against the principal currencies of such competitors.

The Company's consolidated revenues, costs, assets and liabilities denominated in currencies other than the euro are translated into the euro for the purposes of compiling its financial statements. Changes in the value of these currencies relative to the euro will therefore have an effect on the euro value of the Company's reported revenues, costs, earnings before interest and taxes ("EBIT"), other financial results, assets, liabilities and equity.

Sales Financing Arrangements

In support of sales, the Company may agree to participate in the financing of selected customers. As a result, the Company has a portfolio of leases and other financing arrangements with airlines and other customers. The risks arising from the Company's sales financing activities may be classified into two categories: (i) credit risk, which relates to the customer's ability to perform its obligations under a financing arrangement, and (ii) aircraft value risk, which primarily relates to unexpected decreases in the future value of aircraft. Measures taken by the Company to mitigate these risks include optimised financing and legal structures, diversification over a number of aircraft and customers, credit analysis of financing counterparties, provisioning for the credit and asset value exposure, and transfers of exposure to third parties. No assurances may be given that these measures will protect the Company from defaults by its customers or significant decreases in the value of the financed aircraft in the resale market.

The Company's sales financing arrangements expose it to aircraft value risk, because it generally retains security interests in aircraft for the purpose of securing customers' performance of their financial obligations to the Company, and/or because it may guarantee a portion of the value of certain aircraft at certain anniversaries from the date of their delivery to customers. Under adverse market conditions, the market for used aircraft could become illiquid and the market value of used aircraft could significantly decrease below projected amounts. In the event of a financing customer default at a time when the market value for a used aircraft has unexpectedly decreased, the Company would be exposed to the difference between the outstanding loan amount and the market value of the aircraft, net of ancillary costs (such as maintenance and remarketing costs, etc.). Similarly, if an unexpected decrease in the market value of a given aircraft coincided with the exercise window date of an asset value guarantee with respect to that aircraft, the Company would be exposed to losing as much as the difference between the market value of such aircraft and the guaranteed amount, though such amounts are usually capped. The

Company regularly reviews its exposure to asset values and adapts its provisioning policy in accordance with market findings and its own experience. However, no assurance can be given that the provisions taken by the Company will be sufficient to cover these potential shortfalls. Through the Airbus Asset Management department or as a result of past financing transactions, the Company is the owner of used aircraft, exposing it directly to fluctuations in the market value of these used aircraft.

In addition, the Company has outstanding backstop commitments to provide financing related to orders on Airbus' and ATR's backlog. While past experience suggests it is unlikely that all such proposed financing actually will be implemented, the Company's sales financing exposure could rise in line with future sales growth depending on the agreement reached with customers. Despite the measures taken by the Company to mitigate the risks arising from sales financing activities as discussed above, the Company remains exposed to the risk of defaults by its customers or significant decreases in the value of the financed aircraft in the resale market, which may have a negative effect on its future financial condition and results of operations.

Counterparty Credit

In addition to the credit risk relating to sales financing as discussed above, the Company is exposed to credit risk to the extent of non-performance by its counterparties for financial instruments, such as hedging instruments and cash investments. However, Airbus has policies in place to avoid concentrations of credit risk and to ensure that credit risk exposure is limited.

Counterparties for transactions in cash, cash equivalents and securities as well as for derivative transactions are limited to highly rated financial institutions, corporates or sovereigns. The Company's credit limit system assigns maximum exposure lines to such counterparties, based on a minimum credit rating threshold as published by Standard & Poor's and Moody's. If neither is present Fitch ratings is used. Besides the credit rating, the limit system also takes into account fundamental counterparty data, as well as sector and maturity allocations and further qualitative and quantitative criteria such as credit risk indicators. The credit exposure of the Company is reviewed on a regular basis and the respective limits are regularly monitored and updated. The Company also seeks to maintain a certain level of diversification in its portfolio between individual counterparties as well as between financial institutions, corporates and sovereigns in order to avoid an increased concentration of credit risk on only a few counterparties.

However, there can be no assurance that the Company will not lose the benefit of certain derivatives or cash investments in case of a systemic market disruption. In such circumstances, the value and liquidity of these financial instruments could decline and result in a significant impairment, which may in turn have a negative effect on the Company's financial condition and results of operations.

Moreover, the progressive implementation of new financial regulations (MiFID II / MiFIR, CRD4, Bank Restructuring Resolution Directive, etc.) will have an impact on the business model of banks (for example, the split between investment banking and commercial banking activities) and on the capital structure and cost of such banks' activities in relation to over-the-counter derivatives, and therefore on the funding consequences of central clearing and collateralisation of over-the-counter derivatives for corporations like the Company. This may ultimately increase the cost and reduce the liquidity of the Company's long-term hedges, for example, as banks seek to either pass-on the additional costs to their corporate counterparties or withdraw from low-profit businesses altogether.

Pension Commitments

The Company participates in several pension plans for both executive as well as non-executive employees, some of which are underfunded. For information related to these plans, please refer to the "Notes to the IFRS Consolidated Financial Statements — Note 29.1: Post-employment Benefits — Provisions for Retirement Plans". Although the Company has recorded a provision in its balance sheet for its share of the underfunding based on

current estimates, there can be no assurance that these estimates will not be revised upward in the future, leading the Company to record additional provisions in respect of such plans.

Necessary adjustments of such provisions include but are not limited to (i) the discount factor (dependent in part on interest rates) and the inflation rate applied to calculate the net present value of the pension liabilities, (ii) the performance of the asset classes which are represented in the pension assets, and (iii) additional cash injections contributed by the Company from time to time to the pension assets. The Company has taken measures to reduce potential losses on the pension assets and to better match the characteristics of the pension liabilities with those of the pension assets as a long-term objective. Nevertheless, any required additional provisions would have a negative effect on the Company's total equity (net of deferred taxes), which could in turn have a negative effect on its future financial condition.

Tax Exposure

As a multinational group with operations and sales in various jurisdictions, Airbus is subject to a number of different tax laws. It is the Company's objective to adhere to the relevant tax regulations and to ensure tax compliance in each country.

Airbus' policy is to have its economic results taxed in a compliant manner in all countries where it creates value.

The Company's decisions on its structure and on the transactions it enters into are based on its own fair interpretations of applicable tax laws and regulations. The Company aims for certainty on the tax positions it adopts, though in a complex environment with increasing uncertainty, there can be no assurance that the tax authorities will not seek to challenge such interpretations, consequently the Company or its affiliates could become subject to tax claims.

The Company will always act to minimise the risk associated with a tax position, while aiming for tax efficiency as described below. Where tax law is unclear or subject to interpretation, the Company may decide to take a written opinion from an independent third-party tax advisor, detailing the facts, risks and conclusions, so as to support the decision-making process, or to engage with tax authorities to secure alignment on interpretation of tax rules. The level of risk will be deemed to be acceptable where strong technical arguments exist to support the position and where stakeholders have been consulted appropriately according to the value at stake.

In case weaknesses may be identified in tax processes, the Company will act to remediate the issues in a timely manner to ensure continued compliance.

4.6.2 BUSINESS-RELATED RISKS

Commercial Aircraft Market Factors

Historically, order intake for commercial aircraft has shown cyclical trends, due in part to changes in passenger demand for air travel and the air cargo share of freight activity, which are in turn driven by a range of economic variables, such as gross domestic product ("GDP") growth, private consumption levels or working age population size. Other factors, however, play an important role in determining the market for commercial aircraft, such as (i) the average age and technical obsolescence of the fleet relative to new aircraft, (ii) the number and characteristics of aircraft taken out of service and parked pending potential return into service, (iii) passenger and freight load factors, (iv) airline pricing policies and resultant yields, (v) airline financial health and the availability of third party financing for aircraft purchases, (vi) evolution of fuel price, (vii) regulatory environment, (viii) environmental constraints imposed upon aircraft operations, such as the Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA), carbon standards and other environmental taxes; and (ix) market evolutionary factors such as the growth of low-cost passenger airline business models or the impact of e-commerce

on air cargo volumes. The market for commercial aircraft could continue to be cyclical, and downturns in broad economic trends may have a negative effect on its financial condition and results of operations.

The commercial helicopter market could also be influenced by a number of factors listed above. The civil & parapublic and oil & gas market softness has led to a postponement of investments in the acquisition of new platforms by offshore helicopter players and a reduction of flight hours. Structural changes of the oil & gas segment are not anticipated at current oil price levels. The uncertainty on the lead time of the market recovery may have an impact on Airbus Helicopters financial results and could lead to cancellations or loss of bookings and services.

Physical Security, Terrorism, Pandemics and Other Catastrophic Events

Past terrorist attacks and the spread of disease (such as the H1N1 flu pandemic or the Ebola epidemic in 2013-2016) have demonstrated that such events may negatively affect public perception of air travel safety, which may in turn reduce demand for air travel and commercial aircraft. The outbreak of wars, riots or political unrest or uncertainties may also affect the willingness of the public to travel by air. Furthermore, major aircraft accidents may have a negative effect on the public's or regulators' perception of the safety of a given class of aircraft, a given airline, form of design or air traffic management. As a result of such factors, the aeronautic industry may be confronted with sudden reduced demand for air transportation and be compelled to take costly security and safety measures. The Company may therefore suffer from a decline in demand for all or certain types of its aircraft or other products, and the Company's customers may postpone delivery or cancel orders.

In addition to affecting demand for its products, catastrophic events could disrupt the Company's internal operations or its ability to deliver products and services. Disruptions may be related to threats to infrastructure, personnel security and physical security and may arise from terrorism, drone attacks, natural disasters, damaging weather, and other crises. Any resulting impact on the Company's production, services or information systems could have a significant adverse effect on the Company's operations, financial condition and results of operations as well as on its reputation and on its products and services.

Cyber Security Risks

The Company's extensive information and communications systems are exposed to cyber security risks, which are rapidly changing, and increasing in sophistication and potential impact.

The Company is exposed to a number of different types of potential security risks, arising from actions that may be intentional and hostile, accidental or negligent. Industrial espionage, cyber-attacks including systems sabotage, data breaches (confidential data, personal data and intellectual property), and data corruption and availability (notably ransomware) are the main risks that the Company may face. Risks related to the Company's industrial control systems, manufacturing processes and products are growing, with the increase of interconnectivity and digitalisation, and with a growing gap developing between the defences of older, relatively insecure industrial systems and the capabilities of potential attackers as well as an increasingly competitive landscape in both historical and new businesses of the Company.

All of the above mentioned risks are heightened in the context of greater use of cloud services, increasingly capable adversaries, integration with the extended enterprise, the relatively insecure "internet of things" and the growing use in the Company's IT systems of sophisticated mobile devices. Social engineering is a growing threat, exacerbated by advances in machine learning.

Finally, the Company is exposed to reputational damage from the growing volume of false and malicious information injected to media and social networks.

While the Company continues to make significant efforts to prevent such risks from materialising, making targeted investments will reduce but not eradicate likelihood and impact through strengthening the business cyber resilience.

The materialisation of one or several of such risks could lead to severe damage including but not limited to significant financial loss, need for additional investment, contractual or reputational performance degradation, loss of intellectual property, loss of business data and information, operational business degradation or disruptions, and product or services malfunctions.

Dependence on Key Suppliers and Subcontractors

The Company is dependent on numerous key suppliers and subcontractors to provide it with the raw materials, parts, assemblies and systems that it needs to manufacture its products.

The Company relies upon the good performance of its suppliers and subcontractors to meet the obligations defined under their contracts. Supplier performance is continually monitored and assessed so that supplier development programmes can be launched if performance standards fall below expectations.

In case of supplier non-performance a systematic review and application of contractual liabilities linked to contract execution allows the Company to mitigate its financial exposure due to the supplier non-performance. The Company also implements performance improvement agreements with suppliers to incentivise suppliers to sustainably restore contractual performance levels.

In addition, the Company benefits from its inherent flexibility in production lead times to compensate for a limited non-performance of suppliers, protecting the Company's commitments towards its customers. In certain cases, dual sourcing is utilised to mitigate the risk. However, no absolute assurance can be given that these measures will fully protect the Company from non-performance of a supplier which could disrupt production and in turn may have a negative effect on its financial condition and results of operations.

Changes to the Company's production or development schedules may impact suppliers so that they initiate claims under their respective contracts for financial compensation. However the robust, long-term nature of the contracts and a structured process to manage such claims, limits the Company's exposure. Despite these mitigation measures, this could still result in a negative impact on the financial condition and results of operations of the Company.

As the Company's global sourcing footprint extends, some suppliers (or their sub-tier suppliers) may have production facilities located in countries that are exposed to socio-political unrest or natural disasters which could interrupt deliveries. Country-based risk assessment (including of applicable laws and regulations) is performed by the Company to monitor such exposures and to ensure that appropriate mitigation plans or fall-back solutions are available for deliveries from suppliers considered to be at risk. Despite these measures, the Company remains exposed to interrupted deliveries from suppliers impacted by such events and/or regulations, which could have a negative effect on the financial condition and results of operations of the Company.

Suppliers (or their sub-tier suppliers) may also experience financial difficulties requiring them to file for bankruptcy protection, which could disrupt the supply of materials and parts to the Company. However, financial health of suppliers is analysed prior to selection to minimise such exposure and then monitored during the contract period to enable the Company to take action to avoid such situations. In exceptional circumstances, the Company may be required to provide financial support to a supplier and therefore face limited credit risk exposure. If insolvency of a supplier does occur, the Company works closely with the appointed administrators to safeguard contractual deliveries from the supplier. Despite these mitigation measures, the bankruptcy of a key supplier could still have a negative effect on the financial condition and results of operations of the Company.

Industrial Ramp-Up

As a result of the large number of new orders for aircraft recorded in recent years, the Company is in the process of accelerating its production in order to meet the agreed upon delivery schedules for such new aircraft. The Company's ability to further increase its production rate will be dependent upon a variety of factors, including execution of internal performance plans, availability of raw materials, parts (such as aluminium, titanium and composites) and skilled

employees given the high demand by the Company and its competitors, conversion of raw materials into parts and assemblies, and performance by suppliers and subcontractors (particularly suppliers of engines and buyer-furnished equipment) who may experience resource or financial constraints due to ramp-up. Management of such factors is also complicated by the development of new aircraft programmes in parallel, across Airbus and the two Divisions, which carry their own resource demands. Therefore, failures relating to any or all of these factors could lead to missed or delayed delivery commitments, and depending on the length of delay in meeting delivery commitments, could lead to additional costs and customers' rescheduling or terminating their orders. The associated risks may increase as the Company and its competitors announce further production rate increases. Significant efforts have been made to improve supply chain stability and performance. Specific areas of risk with suppliers of engines and of cabin equipment continue to be carefully managed.

Technologically Advanced Products and Services

The Company offers its customers products and services that are technologically advanced, the design, manufacturing, components and materials utilised can be complex and require substantial integration and coordination along the supply chain. In addition, most of the Company's products must function under demanding operating conditions. Throughout the lifecycle of our products, Airbus performs checks and inspections, which may result in modifications, retrofits or other corrective actions each of which may have an adverse effect on production, operations, in-service performance or financial condition. Even though the Company believes it employs sophisticated design, manufacturing and testing practices, there can be no assurance that the Company's products or services will be successfully developed, manufactured or operated or that they will perform as intended.

Certain of Airbus' contracts require it to forfeit part of its expected profit, to receive reduced payments, to provide a replacement launch or other products or services, to provide cancellation rights, or to reduce the price of subsequent sales to the same customer if its products fail to be delivered on time or to perform adequately. No assurances can be given that performance penalties or contract cancellations will not be imposed should the Company fail to meet delivery schedules or other measures of contract performance — in particular with respect to new development programmes such as the A220, A350-900 and -1000 XWB, A400M, H175 or H160 and to modernisation programmes such as the A320neo and the A330neo. See “— Programme-Specific Risks” below.

In addition to the risk of contract cancellations, the Company may also incur significant costs or loss of revenues in connection with remedial action required to correct any performance issues detected in its products or services. Moreover, to the extent that a performance issue is considered to have a possible impact on safety, regulators could suspend the authorisation for the affected product or service.

Any significant problems with the development, manufacturing, operation or performance of the Company's products and services could have a significant adverse effect on the Company's financial condition and results of operations as well as on the reputation of the Company and its products and services.

Dependence on Public Spending and on Certain Markets

In any single market, public spending (including defence and security spending) depends on a complex mix of geopolitical considerations and budgetary constraints, and may therefore be subject to significant fluctuations from year to year and country to country. Any termination or reduction of future funding or cancellations or delays impacting existing contracts may have a negative effect on the Company's financial condition and results of operations. In instances where several countries undertake to enter together into defence or other procurement contracts, economic, political or budgetary constraints in any one of these countries may have a negative effect on the ability of the Company to enter into or perform such contracts.

The Company has a geographically diverse backlog. Adverse economic and political conditions as well as downturns in broad economic trends in certain countries or regions may have a negative effect on the Company's financial condition and results of operations generated in those regions.

Availability of Government and Other Sources of Financing

From 1992 to 2004, the EU and the US operated under an agreement that sets the terms and conditions of financial support that governments may provide to civil aircraft manufacturers. In late 2004, however, the US unilaterally withdrew from this agreement, which eventually led to the US and the EU making formal claims against each other before the World Trade Organization (“WTO”). While both sides have expressed a preference for a negotiated settlement that provides for a level playing field when funding future aircraft developments, they have thus far failed to reach agreement on key issues. Separately, Brazil has initiated WTO proceedings citing Canadian support to the C-Series aircraft. Here too, a negotiated outcome would be preferable. Domestic proceedings in the United States based on alleged subsidies to the C-Series were dismissed. The terms and conditions of any new agreement, or the final outcome of the formal WTO or other trade law proceedings, may limit access by the Company to risk-sharing-funds for large projects, may establish an unfavourable balance of access to government funds by the Company as compared to its US competitors or may in an extreme scenario cause the involved governments to analyse possibilities for a change in the commercial terms of funds already advanced to the Company.

In prior years, the Company and its principal competitors have each received different types of government financing of product research and development. However, no assurances can be given that government financing will continue to be made available in the future, in part as a result of the proceedings mentioned above. Moreover, the availability of other outside sources of financing will depend on a variety of factors such as market conditions, the general availability of credit, the Company’s credit ratings, as well as the possibility that lenders or investors could develop a negative perception of the Company’s long- or short-term financial prospects if it incurred large losses or if the level of its business activity decreased due to an economic downturn. The Company may therefore not be able to successfully obtain additional outside financing on appropriate terms, or at all, which may limit the Company’s future ability to make capital expenditures, fully carry out its research and development efforts and fund operations.

Competition and Market Access

The markets in which the Company operates are highly competitive. In some areas, competitors may have more extensive or more specialised engineering, manufacturing and marketing capabilities or better access to funding than the Company. In addition, some of the Company’s largest customers and/or suppliers may develop the capability to manufacture products or provide services similar to those of the Company. This would result in these customers/suppliers marketing their own products or services and competing directly with the Company for sales of these products or services, all of which could significantly reduce the Company’s revenues. Further, new players are operating or seeking to operate in the Company’s existing markets which may impact the structure and profitability of these markets. In addition, enterprises with different business models could substitute some of the Company’s products and services. There can be no assurance that the Company will be able to compete successfully against its current or future competitors or that the competitive pressures it faces in all business areas will not result in reduced revenues, market share or profit.

In addition, the contracts for many aerospace and defence products are awarded, implicitly or explicitly, on the basis of home country preference. Although the Company is a multinational company which helps to broaden its domestic market, it may remain at a competitive disadvantage in certain countries, especially outside of Europe, relative to local contractors for certain products. The strategic importance and political sensitivity attached to the aerospace and defence industries means that political considerations will play a role in the choice of many products for the foreseeable future.

Major Research and Development Programmes

The business environment in many of the Company’s principal operating business segments is characterised by extensive research and development costs requiring significant up-front investments with a high level of complexity. The business plans underlying such investments often contemplate a long payback period before these investments

are recouped, and assume a certain level of return over the course of this period in order to justify the initial investment. There can be no assurances that the commercial, technical and market assumptions underlying such business plans will be met, and consequently, the payback period or returns contemplated therein achieved.

Successful development of new programmes also depends on the Company's ability to attract and retain aerospace engineers and other professionals with the technical skills and experience required to meet its specific needs. Demand for such engineers may often exceed supply depending on the market, resulting in intense competition for qualified professionals. There can be no assurances that the Company will attract and retain the personnel it requires to conduct its operations successfully. Failure to attract and retain such personnel or an increase in the Company's employee turnover rate could negatively affect the Company's financial condition and results of operations.

No assurance can be given that the Company will achieve the anticipated level of returns from these programmes and other development projects, which may negatively affect the Company's financial condition and results of operations and competitiveness.

In the context of the post-Brexit relationship between the UK and the EU, there is a risk that the Company might lose access to pooled expertise and knowledge and could face disruptions within its interdependent and extensively integrated research and innovation networks across the UK and the EU countries. The Company may also face lack of certainty with respect to intellectual property rights for existing or new programmes and established or potential partnerships with private or public organisations, academic institutions and research councils, charities and government departments, where the relevant intellectual property frameworks or user-rights/ownership governing those relationships is dependent on the UK's status as a member state of the EU.

Digital Transformation, Continuous Improvement and Competitiveness Programmes

In order to improve current operational performance while preparing for the future, in 2017 the Company launched the integration of its headquarters and corporate functions with the largest Division, Airbus Commercial Aircraft, and has initiated a wide-reaching digital transformation programme, Quantum. In parallel, continuous improvement and competitiveness programmes running in all businesses are pursued.

Digital transformation

The Quantum transformation programme was launched to accelerate transformation of end to end operations and to define our future set-up (operations, new services, new business model) driven by customer requirements. In the short to mid-term Quantum will focus on accelerating and industrialising the most promising digitally-enabled performance improvement initiatives permitting a step change. In the longer term, Quantum will redesign end to end digital operations and enable new profitable business model and services for our customers. Quantum is supported by the Digital Transformation Office (DTO) and CTO organisations.

Traditional cost-saving and competitiveness programmes

To improve competitiveness in soft markets, offset costs and achieve profitability targets, among other things, the Company and its Divisions have launched several restructuring, cost saving and competitiveness programmes over the past several years. These include Boost Competitiveness in Commercial Aircraft, Adapt in Helicopters and Compete in Defence and Space.

In addition to the risk of not achieving the anticipated level of cost savings, efficiency gains and other benefits from these programmes, the Company may also incur higher than expected implementation costs. In many instances, there may be internal resistance to the various organisational restructuring and cost reduction measures contemplated. Restructuring, closures, site divestitures and job reductions may also harm the Company's labour relations and public relations, and have led and could lead to work stoppages and/or demonstrations. In the event that these work stoppages and/or demonstrations become prolonged, or the costs of implementing the programmes above are otherwise higher than anticipated, the Company's financial condition and results of operations may be negatively affected.

Acquisitions, Divestments, Joint Ventures and Strategic Alliances

As part of its business strategy, the Company may acquire or divest businesses and/or form joint ventures or strategic alliances. Executing acquisitions and divestments can be difficult and costly due to the complexities inherent in integrating or carving out people, operations, technologies and products. There can be no assurance that any of the businesses that the Company intends to acquire or divest can be integrated or carved out successfully, as timely as originally planned or that they will perform well and deliver the expected synergies or cost savings once integrated or separated. In addition, despite the efforts and expenditures of the parties, regulatory, administrative or other contractual conditions can prevent transactions from being finalised. While the Company believes that it has committed sufficient resources and established appropriate and adequate procedures and processes necessary to mitigate these risks, there is no assurance that these transactions will be successfully completed or produce the expected benefits.

Public-Private Partnerships and Private Finance Initiatives

Defence customers may request proposals and grant contracts under schemes known as public-private partnerships (“PPPs”) or private finance initiatives (“PFIs”). PPPs and PFIs differ substantially from traditional defence equipment sales, as they often incorporate elements such as:

- ▶ the provision of extensive operational services over the life of the equipment;
- ▶ continued ownership and financing of the equipment by a party other than the customer, such as the equipment provider;
- ▶ mandatory compliance with specific customer requirements pertaining to public accounting or government procurement regulations; and
- ▶ provisions allowing for the service provider to seek additional customers for unused capacity.

The Company is party to PPP and PFI contracts, for example Skynet 5 and related telecommunications services, and in the AirTanker (FSTA) project both with the UK MoD. One of the complexities presented by PFIs lies in the allocation of risks and the timing thereof among different parties over the life-time of the project.

There can be no assurances of the extent to which the Company will efficiently and effectively (i) compete for future PFI or PPP programmes, (ii) administer the services contemplated under the contracts, (iii) finance the acquisition of the equipment and the ongoing provision of services related thereto, or (iv) access the markets for the commercialisation of excess capacity. The Company may also encounter unexpected political, budgetary, regulatory or competitive risks over the long duration of PPP and PFI programmes.

Programme-Specific Risks

In addition to the risk factors mentioned above, the Company also faces the following programme-specific risks (while this list does not purport to be exhaustive, it highlights the current risks believed to be material by management and that could have a significant impact on the Company's financial condition and results of operations):

A320neo programme. In connection with the A320neo programme, the Company faces the following main challenges: A320neo (new engine option) ramp up including the A321neo ACF (Airbus Cabin Flex); management of the internal and external supply chain pressure as a result of the industrial ramp-up; ensuring maturity and high quality service support for a growing number of operators of A320neo. The main focus will be with the further ramp-up for Airbus and both engine suppliers. For both engine suppliers, challenges are to (i) meet the delivery commitments in line with agreed schedule and ensure sufficient engine availability; (ii) fix in-service maturity issues in line with Airbus and customer expectations and mitigate the associated consequences; (iii) manage engine upgrades and performance. The E2E industrial and delivery process at Airbus is under review and will result in significant process and organisation changes.

A400M programme. In 2018, Airbus continued with development activities toward achieving the technical capabilities, including the achievement of an important development milestone according to schedule. After the signature of a

Declaration of Intent (“DOI”) in February 2018, the Company has been working together with OCCAR and concluded the negotiations on the contract amendment. The customer Nations are now set to endorse the agreement to allow pursuing the domestic approval processes before signing the contract amendment.

Risks remain on development of technical capabilities and the associated costs, on securing sufficient export orders in time, on aircraft operational reliability in particular with regards to engines and on cost reductions as per the revised baseline.

For further information, please refer to the “Notes to the IFRS Consolidated Financial Statements — Note 10: Revenues and Gross Margin”.

A350 XWB programme. In connection with the A350 XWB programme, the Company faces the following main challenges: ensuring satisfaction of operators and high quality support to their operations; maintaining supply chain performance and production ramp-up; controlling and reducing the level of outstanding work in final assembly line; reducing recurring costs during the ongoing ramp-up; maintaining customisation and ramp-up of Heads of Version; maintaining the development schedule in line with learning curve assumptions beyond the initial ramp up phase of A350-1000 XWB; maintaining attention on engine development; and customer support for new type in service.

A380 programme. In connection with the A380 programme, the Company faces the following main challenges: ramp down the yearly production rate in line with demand and further reduce fixed costs and adjust resources to the new delivery level; and manage maturity in service.

A330 programme. In connection with the A330 programme, the main challenge the Company faces is to manage the transition to A330neo. The A330neo development progresses after successful EIS (Entry Into Service). For the engine supplier, the main challenges relate to meeting the delivery commitments and ensuring engine maturity.

A220 programme. In connection with the A220 programme, the main challenges the Company faces are to build commercial momentum, ramp up production and reduce costs.

H225 programme and AS332 L2 fleet. In connection with the H225 programme and the AS332 L2 fleet, the Company faces the following main challenges: since the crash in April 2016 of a H225 in Norway, the Company is dealing with protective measures validated by EASA who lifted the flight suspension on 7 October 2016 and by UK and Norwegian aviation authorities on 7 July 2017 to put the fleet back into flight operations. Publication of the final AIBN report in July 2018 confirmed the work on incremental improvements on the H225 as part of its ongoing, continuous improvement.

H175 programme. In connection with the H175 programme produced in cooperation with Avic, the Company faces the following main challenges: after the delivery of the first H175 in VIP configuration in 2016, the delivery of the six first H175 in Public Services intermediate operational configuration in 2018, the Company is working on the maturity plan of the aircraft with the associated industrial ramp-up and on the customer support.

NH90 and Tiger programmes. In connection with the NH90 and Tiger programmes, the Company is delivering according to contracts whilst negotiations for the end of some contracts and some new contract amendments are still ongoing. In connection with multiple fleets entering into service it faces the challenge of assuring support readiness.

H160 programme. In connection with the H160 programme, the main challenge the Company faces is to manage the certification and the production ramp-up. H160 development and supply chain performance and production ramp-up progress after 1,050 flights hours performed by the end of 2018 by prototypes and pre-serial 2 (PS2) move to the flight line.

Border security. In connection with border security projects, the Company faces the following main challenges: meeting the schedule and cost objectives taking into account the complexity of the local infrastructures to be delivered and the integration of commercial-off-the-shelf products (radars, cameras and other sensors) interfaced into complex system networks; assuring efficient project and staffing; managing the rollout including subcontractors and customers.

Negotiations on change requests and schedule re-alignments remain ongoing. Export licenses from Germany to Saudi Arabia are currently suspended.

4.6.3 LEGAL RISKS

Dependence on Joint Ventures and Minority Holdings

The Company generates a substantial proportion of its revenues through various consortia, joint ventures and equity holdings. These arrangements include primarily:

- ▶ the Eurofighter and AirTanker consortia; and
- ▶ four principal joint ventures: ArianeGroup, ATR, CSALP and MBDA.

The formation of partnerships and alliances with other market players is an integral strategy of the Company, and the proportion of sales generated from consortia, joint ventures and equity holdings may rise in future years. This strategy may from time to time lead to changes in the organisational structure, or realignment in the control, of the Company's existing joint ventures.

The Company exercises varying and evolving degrees of control in the consortia, joint ventures and equity holdings in which it participates. While the Company seeks to participate only in ventures in which its interests are aligned with those of its partners, the risk of disagreement or deadlock is inherent in a jointly controlled entity, particularly in those entities that require the unanimous consent of all members with regard to major decisions and specify limited exit rights. The other parties in these entities may also be competitors of the Company, and thus may have interests that differ from those of the Company.

In addition, in those holdings in which the Company is a minority partner or shareholder, the Company's access to the entity's books and records, and as a consequence, the Company's knowledge of the entity's operations and results, is generally limited as compared to entities in which the Company is a majority holder or is involved in the day-to-day management.

Product Liability and Warranty Claims

The Company designs, develops and produces a number of high profile products of large individual value, particularly civil and military aircraft and space equipment. The Company is subject to the risk of product liability and warranty claims in the event that any of its products fails to perform as designed. While the Company believes that its insurance programmes are adequate to protect it from such liabilities, no assurances can be given that claims will not arise in the future or that such insurance coverage will be adequate.

Intellectual Property

The Company relies upon patents, copyright, trademark, confidentiality and trade secret laws, and agreements with its employees, customers, suppliers and other parties, to establish and maintain its intellectual property (IP) rights in its products and services and in its operations. Despite these efforts to protect its IP rights, any of the Company's direct or indirect IP rights could be challenged, invalidated or circumvented. Further, the laws of certain countries do not protect the Company's proprietary rights to the same extent as the laws in Europe and the US. Therefore, in certain jurisdictions the Company may be unable to protect its proprietary technology adequately against unauthorised third-party copying or use, which could adversely affect its competitive position.

In addition, although the Company believes that it lawfully complies with the monopolies inherent in the IP rights granted to others, it has been accused of infringement on occasion and could have additional claims asserted against it in the future. These claims could harm its reputation, result in financial penalties or prevent it from offering certain products or services which may be subject to such third-party IP rights. Any claims or litigation in this area, whether the Company

ultimately wins or loses, could be time-consuming and costly, harm the Company's reputation or require it to enter into licensing arrangements. The Company might not be able to enter into these licensing arrangements on acceptable terms. If a claim of infringement were successful against it, an injunction might be ordered against the Company, causing further losses.

Export Controls Laws and Regulations

The export market is a significant market for the Company. In addition, many of the products the Company designs and manufactures for military use are considered to be of national strategic interest. Consequently, the export of such products outside of the jurisdictions in which they are produced may be restricted or subject to licensing and export control requirements, notably by the UK, France, Germany and Spain, where the Company carries out its principal activities relating to military products and services as well as by other countries where suppliers are based, notably, the US. There can be no assurance (i) that the export controls to which the Company is subject will not become more restrictive, (ii) that new generations of the Company's products will not also be subject to similar or more stringent controls or (iii) that geopolitical factors or changing international circumstances will not make it impossible to obtain export licenses for one or more clients or constrain the Company's ability to perform under previously signed contracts. Reduced access to military export markets may have a significant adverse effect on the Company's business financial condition and results of operations.

Operating worldwide, the Company must comply with several, sometimes inconsistent, sets of sanctions laws and regulations implemented by national / regional authorities. Depending on geopolitical considerations including national security interests and foreign policy, new sanctions regimes may be set up or the scope of existing ones may be widened, at any time, immediately impacting the Company's activities.

Although the Company seeks to comply with all such laws and regulations, even unintentional violations or a failure to comply could result in suspension of the Company's export privileges, or preclude the Company from bidding on certain government contracts (even in the absence of a formal suspension or debarment).

Furthermore, the Company's ability to market new products and enter new markets may be dependent on obtaining government certifications and approvals in a timely manner.

Anti-Corruption Laws and Regulations

The Company is required to comply with applicable anti-bribery laws and regulations in jurisdictions around the world where it does business. To that end, an anti-corruption programme has been put in place that seeks to ensure adequate identification, assessment, monitoring and mitigation of corruption risks. Despite these efforts, ethical misconduct or non-compliance with applicable laws and regulations by the Company, its employees or any third party acting on its behalf could expose it to liability or have a negative impact on its business.

In 2016, for example, the Company announced that it had discovered misstatements and omissions in certain applications for export credit financing for Airbus customers, and had engaged legal, investigative and forensic accounting experts to conduct a review. Separately, the UK Serious Fraud Office announced that it had opened a criminal investigation into allegations of fraud, bribery and corruption in the civil aviation business of Airbus, relating to irregularities concerning third party consultants. Airbus was subsequently informed that the French authorities, the Parquet National Financier ("PNF"), had also opened a preliminary investigation into the same subject and that the two authorities will act in coordination going forward. The Company has engaged with the government of the United States relating to conduct forming part of the SFO/PNF investigation that could fall within US jurisdiction. The Company has also engaged with the government of the United States concerning potential issues of ITAR Part 130 and related matters.

The Company cannot predict at this time the impact on it as a result of these matters, and accordingly cannot give any assurance that it will not be adversely affected. The Company may be subject to administrative, civil or criminal liabilities

including significant fines and penalties, as well as suspension or debarment from government or non-government contracts for some period of time. The Company may also be required to modify its business practices and compliance programme and/or have a compliance monitor imposed on it. Any one or more of the foregoing could have a significant adverse effect on the Company's reputation and its business, financial condition and results of operations.

Legal and Regulatory Proceedings

The Company is currently engaged in a number of active legal and regulatory proceedings. The Company expects to continue to incur time and expenses associated with its defence, regardless of the outcome, and this may divert the efforts and attention of management from normal business operations. Although the Company is unable to predict the outcome of these proceedings, it is possible that they will result in the imposition of damages, fines or other remedies, which could have a material effect on the Company's business, financial condition and results of operations. An unfavourable ruling could also negatively impact the Company's stock price and reputation.

In addition, the Company is from time to time subject to government inquiries and investigations of its business and competitive environment due, among other things, to the heavily regulated nature of its industry. In addition to the risk of an unfavourable ruling against the Company, any such inquiry or investigation could negatively affect the Company's reputation and its ability to attract and retain customers and investors, which could have a negative effect on its business, financial condition and results of operations. See “— Non-Financial Information — 6.1.4(a) Responsible Business — Ethical Business Practices”.

4.6.4 ENVIRONMENT, HEALTH & SAFETY RISKS

Given the scope of its activities and the industries in which it operates, the Company is subject to stringent environmental, health and safety laws and regulations in numerous jurisdictions around the world. The Company therefore incurs, and expects to continue to incur, significant capital expenditure and other operating costs to comply with increasingly complex laws and regulations covering the protection of the natural environment as well as occupational health and safety. This expenditure includes the identification and the prevention, elimination or control of physical and psychological risks to people arising from work, including chemical, mechanical and physical agents. Environmental protection includes costs to prevent, control, eliminate or reduce emissions to the environment, waste management, the content of the Company's products, and reporting and warning obligations. Moreover, new laws and regulations, the imposition of tougher licence requirements, increasingly strict enforcement or new interpretations of existing laws and regulations may cause the Company to incur increased capital expenditure and operating costs in the future in relation to the above, which could have a negative effect on its financial condition and results of operations.

If the Company fails to comply with health, safety and environmental laws and regulations, even if caused by factors beyond its control, that failure may result in the levying of civil or criminal penalties and fines against it. Regulatory authorities may require the Company to conduct investigations and undertake remedial activities, curtail operations or close installations or facilities temporarily to prevent imminent risks. In the event of an industrial accident or other serious incident, employees, customers and other third parties may file claims for ill-health, personal injury, or damage to property or the environment (including natural resources). Further, liability under some health, safety and environmental laws can be imposed retrospectively, on a joint and several basis, and, in relation to contaminated sites, without any finding of non-compliance or fault. These potential liabilities may not always be covered by insurance, or may be only partially covered. The obligation to compensate for such damages could have a negative effect on the Company's financial condition and results of operations.

In addition, the various products manufactured and sold by the Company must comply with relevant health, safety and environmental laws, for example those designed to protect customers and downstream workers, and those covering substances and preparations, in the jurisdictions in which they operate. Although the Company seeks to ensure that its products meet the highest quality standards, increasingly stringent and complex laws and regulations, new scientific

discoveries, delivery of defective products or the obligation to notify or provide regulatory authorities or others with required information (such as under the EU Regulation known as “REACH”, which addresses the production and use of chemical substances) may force the Company to adapt, redesign, redevelop, recertify and/or eliminate its products from the market. Seizures of defective products may be pronounced, and the Company may incur administrative, civil or criminal liability. Any problems in this respect may also have a significant adverse effect on the reputation of the Company and its products and services.

Despite compliance with all applicable laws and regulations, the Company’s reputation may also be affected by the public perception of environmental impacts of the company’s products in operation (such as the emission of greenhouse gases or noise) and of the local environmental impacts of Airbus and its supply chain industrial operations on local air and water quality.
