Fitch Revises PYME Bancaja 5's Outlook to Stable

Fitch Ratings-Madrid-21 March 2016: Fitch Ratings has revised the Outlook on PYME Bancaja 5, F.T.A. to Stable and affirmed the ratings as follows:

Class B (ISIN ES0372259038): affirmed at 'BBsf'; Outlook revised to Stable from Negative
 Class C (ISIN ES0372259046): affirmed at 'CCsf'; Recovery Estimate 50%
 Class D (ISIN ES0372259053): affirmed at 'Csf'; RE 0%

PYME Bancaja 5, F.T.A. is a static cash flow SME CLO originated by Caja de Ahorros de Valencia, Castellon y Alicante (Bancaja), now part of Bankia S.A. (BBB-/Stable/F3). The note proceeds were used to purchase a EUR1.15bn portfolio of secured and unsecured loans granted to Spanish small and medium.

KEY RATING DRIVERS

Performance Improving

Delinquencies have decreased markedly in the last year as 90+ delinquencies fell to 0.7% in January 2016 from 6.5% a year earlier. Total defaults since the transaction's closing in November 2006 reached EUR71m or 6.2% of the initial portfolio balance, up from EUR58m a year ago, but still low compared with our expectations. As a result Fitch has improved the annual average expected probability of default to 6.5% from 8.7%. This improved performance is reflected in the Outlook revision to Stable today.

Increasing Concentration

As the transaction has deleveraged (the remaining portfolio as a percentage of initial portfolio balance has decreased to 6.9% from 8.3% during the last 12 months) the pool has become increasingly concentrated. The 10 largest obligors now comprise 24% of the pool, up from 21% a year ago while obligors accounting for 0.5% each represent a combined 76% of the portfolio balance compared with 75% last year.

Slight Increase in Credit Enhancement

Credit enhancement for class B notes has remained fairly stable, currently standing at 32.9% compared with 31% a year ago. The credit enhancement build-up has been limited as asset amortisation has been partially offset by an increase in the principal deficiency ledger to EUR8.4m from EUR3.9m over the same period.

Under-collateralised Junior Notes

The class C notes have been affirmed at 'CCsf' with a recovery estimate of 50% as the note is only partially backed by performing collateral and will otherwise rely on recoveries. The class D notes are affirmed at 'Csf' as these notes are backed by the reserve fund, which is fully drawn. The reserve fund has been fully drawn since November 2013 and since then the principal deficiency ledger balance has shown an increasing trend.

RATING SENSITIVITIES

A 45% increase in the obligor default probability would lead to a downgrade of up to three notches for the class B notes.

A 45% reduction in expected recovery rates would lead to a downgrade of one notch for the class B notes.

DUE DILIGENCE USAGE

No third party due diligence was provided or reviewed in relation to this rating action.

DATA ADEQUACY

Fitch has checked the consistency and plausibility of the information it has received about the transaction. There were no findings that were material to this analysis. Fitch has not reviewed the results of any third party assessment of the asset portfolio information or conducted a review of origination files as part of its ongoing monitoring.

Fitch did not undertake a review of the information provided about the underlying asset pool ahead of the transaction's initial closing. The subsequent performance of the transaction over the years is consistent with the agency's expectations given the operating environment and Fitch is therefore satisfied that the asset pool information relied upon for its initial rating analysis was adequately reliable.

Overall, Fitch's assessment of the information relied upon for the agency's rating analysis according to its applicable rating methodologies indicates that it is adequately reliable.

SOURCES OF INFORMATION

The information below was used in the analysis.
