ANNEX 2

(This Annex forms part of the Final Terms to which it is attached)

For the information of potential purchasers: the Notes have a financial structure embedded to provide for the Automatic Early Redemption Amounts, for the Coupon Amounts and for the Final Redemption Amount. This financial structure can be understood as that of a security for which its implicit interests are used for the buying of nine binary options and for the selling of one put option which underlyings are the three Indices. The return and early redemption of the Notes will be a result of the combination of all those options:

a) First Option (relative to Automatic Early Redemption Date₁): a binary option bought on each Index, with maturity date the Valuation Date₁, and strike price equal to each Index_{0,i}: the option will only be exercised if for each of the three Indices, Index_{i,1} is higher than or equal to Index_{0,i}. In case the option is exercised, the pay-off of the option will be 0% of the Specified Denomination, and the rest of the options will be deactivated (and the Notes will be automatically redeemed at an amount equal to Specified Denomination * 100%). Otherwise, the Notes will not be early redeemed and the Notes will remain life.

b) Second Option (relative to Automatic Early Redemption Date₂): a binary option bought on each Index, with maturity date the Valuation Date₂, and strike price equal to each Index_{0,i}: the option will only be exercised if for each of the three Indices, Index_{i,2} is higher than or equal to Index_{0,i}. In case the option is exercised, the pay-off of the option will be 0% of the Specified Denomination, and the rest of the options will be deactivated (and the Notes will be automatically redeemed at an amount equal to Specified Denomination * 100%). Otherwise, the Notes will not be early redeemed and the Notes will remain life.

c) Third Option (relative to Automatic Early Redemption Date₃): a binary option bought on each Index, with maturity date the Valuation Date₃, and strike price equal to each Index_{0,i}: the option will only be exercised if for each of the three Indices, Index_{i,3} is higher than or equal to Index_{0,i}. In case the option is exercised, the pay-off of the option will be 0% of the Specified Denomination, and the rest of the options will be deactivated (and the Notes will be automatically redeemed at an amount equal to Specified Denomination * 100%). Otherwise, the Notes will not be early redeemed and the Notes will remain life.

d) Fourth Option (relative to Automatic Early Redemption Date₄): a binary option bought on each Index, with maturity date the Valuation Date₄, and strike price equal to each Index_{0,i}: the option will only be exercised if for each of the three Indices, Index_{i,4} is higher than or equal to Index_{0,i}. In case the option is exercised, the pay-off of the option will be 0% of the Specified Denomination, and the rest of the options will be deactivated (and the Notes will be automatically redeemed at an amount equal to Specified Denomination * 100%). Otherwise, the Notes will not be early redeemed and the Notes will remain life.

e) Fifth Option (relative to Interest Payment Date₁): a binary option bought on each Index, with maturity date the Valuation Date₁, and strike price equal to 50% of Index_{0,i} ("Strike"): the option will only be exercised if for each of the three Indices, Index_{i,1} is higher than or equal to the Strike. In case the option is exercised, the pay-off of the option will be 12.00% of the Specified Denomination (EUR 6,000 per Specified Denomination). Otherwise, the Notes will pay a Fixed Coupon Amount equal to 0 (nil).

f) Sixth Option (relative to Interest Payment Date₂): a binary option bought on each Index, with maturity date the Valuation Date₂, and strike price equal to 50% of Index₀ ("Strike"): the option will only be exercised if for each of the three Indices, Index_{i,2} is higher than or equal to the Strike. In case the option is exercised, the pay-off of the option will be 12.00% of the Specified Denomination (EUR 6,000 per Specified Denomination). Otherwise, the Notes will pay a Fixed Coupon Amount equal to 0 (nil).

g) Seventh Option (relative to Interest Payment Date₃): a binary option bought on each Index, with maturity date the Valuation Date₃, and strike price equal to 50% of Index₀ ("Strike"): the option will only be exercised if for each of the three Indices, Index_{i,3} is higher than or equal to the Strike. In case the option is exercised,

the pay-off of the option will be 12.00% of the Specified Denomination (EUR 6,000 per Specified Denomination). Otherwise, the Notes will pay a Fixed Coupon Amount equal to 0 (nil).

h) Eighth Option (relative to Interest Payment Date₄): a binary option bought on each Index, with maturity date the Valuation Date₄, and strike price equal to 50% of Index₀ ("Strike"): the option will only be exercised if for each of the three Indices, Index_{i,4} is higher than or equal to the Strike. In case the option is exercised, the pay-off of the option will be 12.00% of the Specified Denomination (EUR 6,000 per Specified Denomination). Otherwise, the Notes will pay a Fixed Coupon Amount equal to 0 (nil).

i) Ninth Option (relative to Interest Payment Date₅): a binary option bought on each Index, with maturity date the Valuation Date₅, and strike price equal to 50% of Index₀ ("Strike"): the option will only be exercised if for each of the three Indices, Index_{i,5} is higher than or equal to the Strike. In case the option is exercised, the pay-off of the option will be 12.00% of the Specified Denomination (EUR 6,000 per Specified Denomination). Otherwise, the Notes will pay a Fixed Coupon Amount equal to 0 (nil).

j) Put Option (relative to Final Redemption Amount): a put option with knock-in on 50% of Initial Value sold on each Index, with maturity date the Final Valuation Date and strike price equal to 100% of Initial Value ("Strike"). The option will only be activated if the Final Value for any of the Indices on the Final Valuation Date is lower than 50% of the Strike. In case the option is activated, the option will be exercised and as a result, the investor will lose, per Specified Denomination, and amount equal to:

$$\text{Specified Denomination} * \left(1 - \underset{i \rightarrow 1}{\overset{i=3}{\text{MIN}}} \left(\frac{\text{Index}_{i,5}}{\text{Index}_{i,0}} \right) \right)$$

The estimated value of the premiums of the above described options is 19.02% for the options which are implicitly bought and 20.51% for the put option sold (this means EUR 745 per Note of EUR 50,000 Specified Denomination).

These premiums are embedded in the Issue Price of the Notes.
