Commitment of the group and subcontractors

Target: 0 accidents

Frequency index in 2018

24%

in own personnel

18%

in subcontractors

The safety of all is not a choice but a duty

3. Naturgy Foundation

Power rehabilitation

Solidarity-based power rehabilitation fund for the homes of vulnerable families

Vulnerability Plan

Energy school: training for more than 10,000 people

Energy volunteer work: more than 1,550 people aided

Environment

Educational seminars: more than 1,700 people attended 15 seminars

Educational programmes: 320,000 beneficiaries

Committed to the communities where we operate

4. 2018-22 Strategic Plan

4. Vision of the transformation

Clients

- **Service** quality
- **Competitive** supply

Employees

- **Professional development**
- **Alignment** with the project

Shareholders

- **Sustainable** creation of **value**
- **Risk** control

Environment

- **Respect** for the environment
- **Social** commitment

4. Keys to the transformation

Simplicity

- Corporate Government
- Organisational structures

Focus

- Client
- Businesses

Efficiency

- Opex & Capex
- Capital structure

Transparency

- Reporting
- Responsibility

Discipline

- In investments
- In development

Innovation

- Digitisation
- Re-engineering

Six keys to create value

4. Simplicity: new Board structure

 **Chairman & CEO**

 **Proprietary directors**

 **Independent directors**

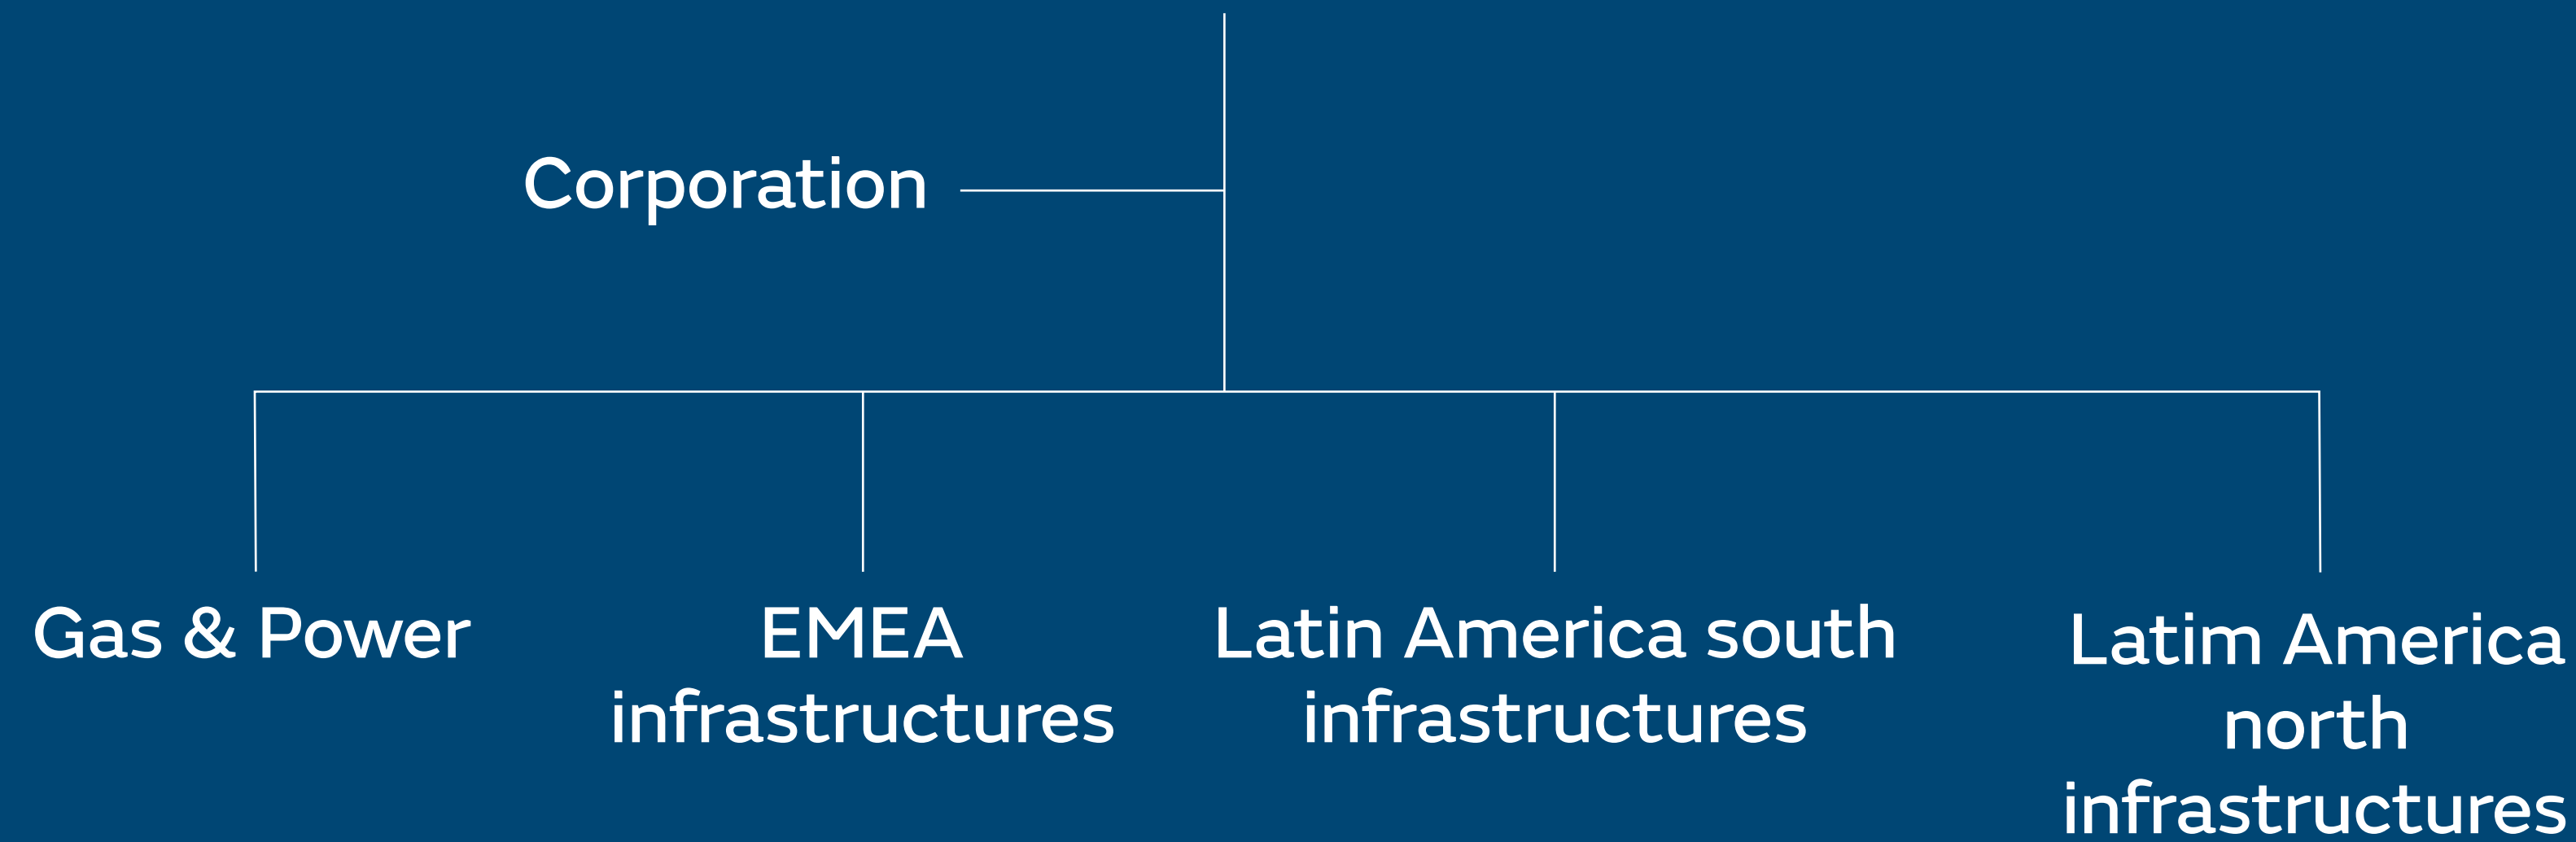

Agility: 12 members

Majority of independents on committees

Diversity of professional profiles

Simplification of by-laws and regulations

4. Simplicidad: nueva estructura organizativa

Reassignment of costs

Reduction of subsidiaries

Flatter management structure

Better traceability

4. Focus

Materialised sales

Gas distribution and marketing in Italy

Gas distribution and marketing in Colombia

Kangra in South Africa

Sales under negotiation

Electric distribution in Moldavia

Generation in Kenya

Renewal of the gas supply contract with Sonatrach (Algiers)

- 40% Naturgy supply
- Extended to 2030
- Strengthens a historic strategic relationship

Favourable decision against Egypt in the ISCID and type approval in the UK

- It condemns the Arab Republic of Egypt to pay 1,700 €m for the lack of supply since 2014

Disinvestments to focus on the markets with the greatest potential

4. Efficiency: improvement of OPEX

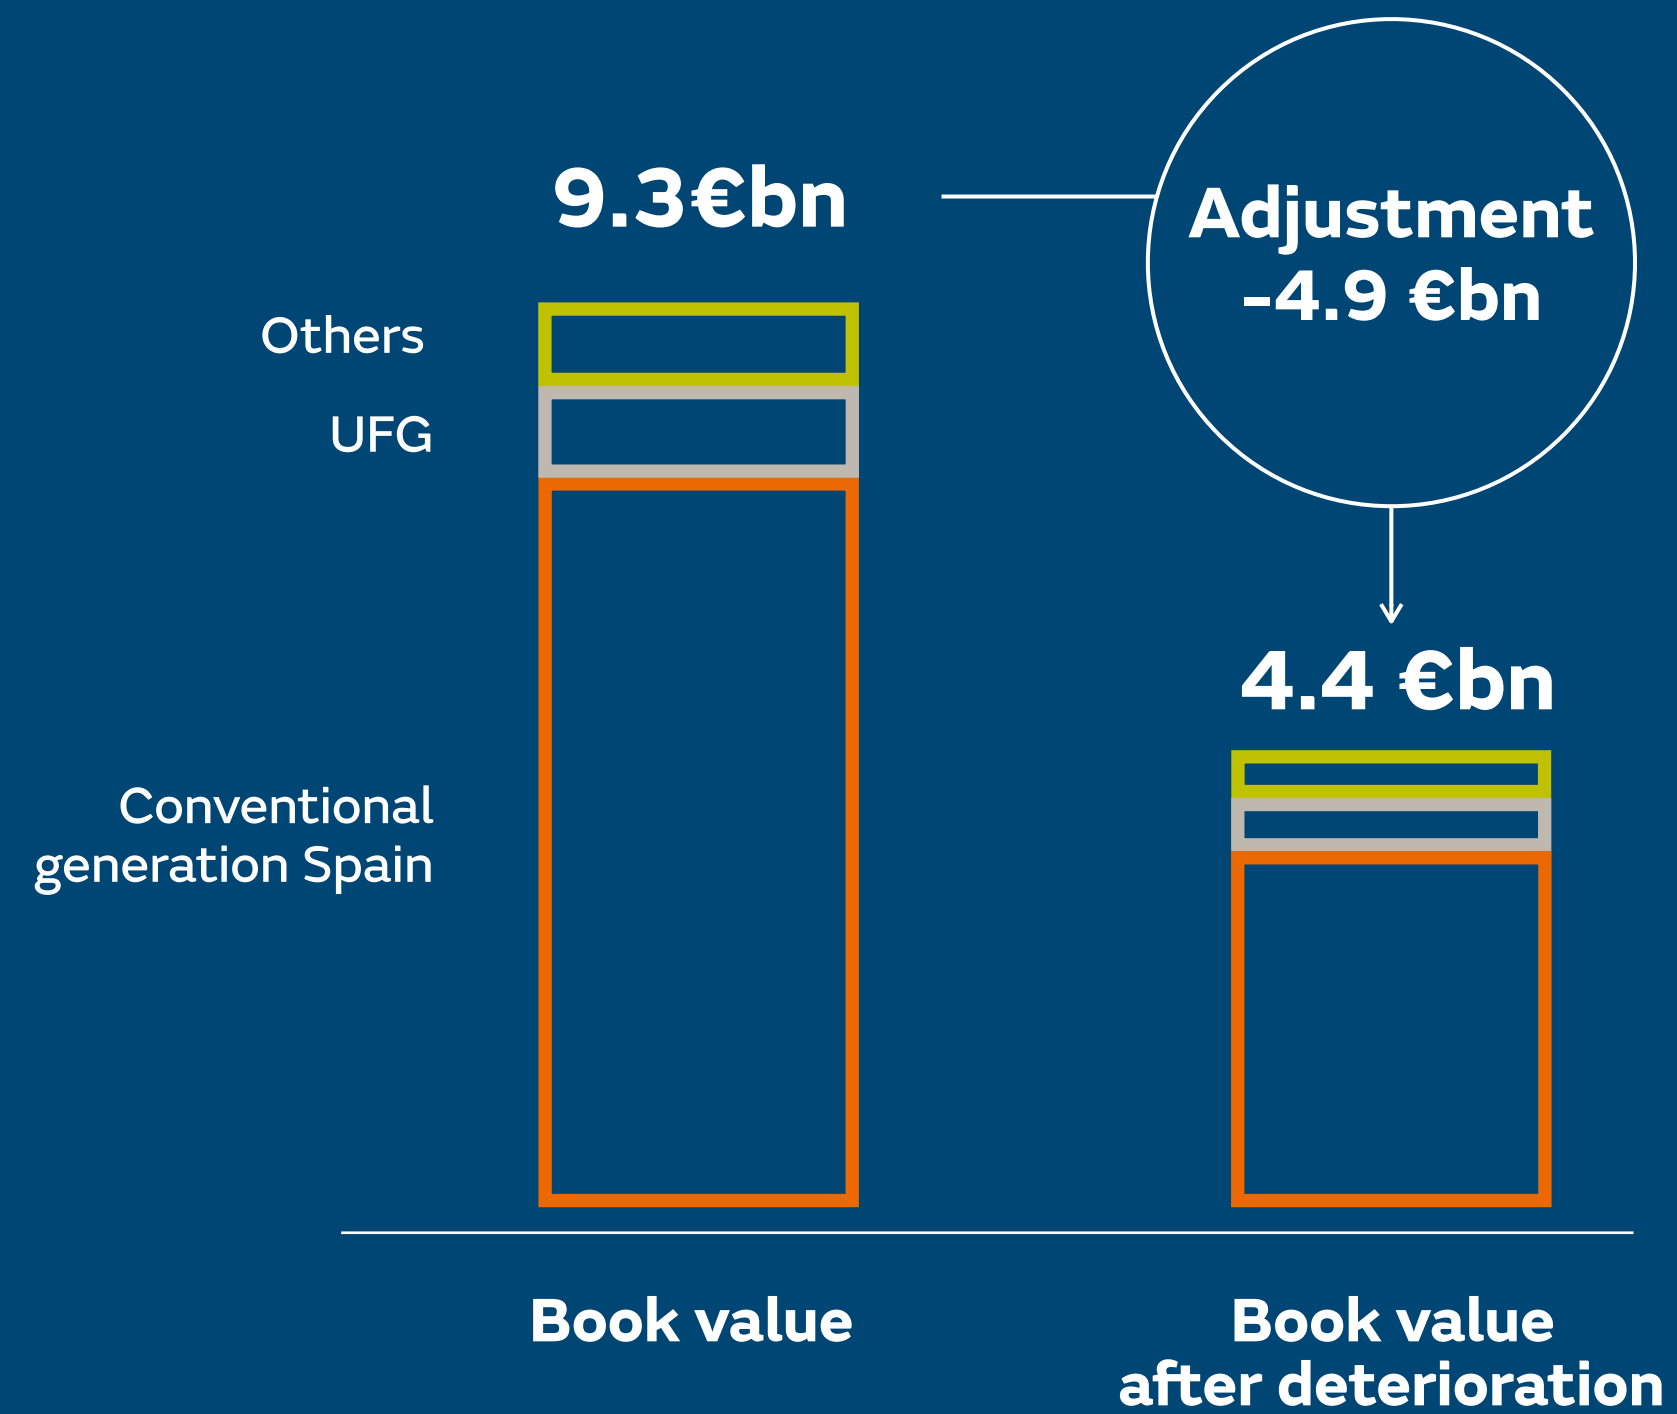

114 €m
are efficiencies in
the second half of
2018

Capture costs of 180 €m

Launch of capex & opex committees

257 ongoing initiatives

4. Transparency: review of book value of assets

Current valuation based on the hypotheses contemplated in the Strategic Plan

4. Investment discipline

Renewable generation capacity (GW/year)

1GW
2019E vs. 2018

Spain

- 9 new wind farms and 2 photovoltaic plants: 172 MW
- 21 wind farms and 3 photovoltaic plants under construction: 791 MW

Australia

- Two 271 MW wind farms

Brasil

- Four 150 MW photovoltaic plants

4. Innovation: long-term payment plan

It solely depends on the total returns for shareholders generated during the period of the Strategic Plan

Ordinary settlement in July 2023

It replaces five previously approved incentive plans

Directly aligns the management team with shareholder interests

5. Future perspectives

5. Macroeconomic scenario

International

GDP
(%) constant prices

Inflation
(%) constant prices

FX vs. EUR
(%) 2019E vs. 2018

- Slight deceleration due to geopolitical tension

Spain

- Growth above the European average

LatAm South

- Solid growth in Chile
- Start of recovery in Argentina
- Growth expectations in Brazil

LatAm North

- Outstanding growth in Panama
- Growth in Mexico
- Strengthening of the dollar

Continued economic growth expected

5. Keys for the future in the energy sector

Increase in energy requirements

Promoted by Asia, largely China and India

Greater electrification

It will represent 75% of the increase in primary energy

Growth of renewable generation

It will be the primary source of energy in the world in 2040. In Spain, it will gradually replace nuclear generation from 2025 onwards

Progressive decarbonisation

Paris Agreement (COP21) and EU emission targets. Progressive closure of coal plants

Fundamental role of natural gas

Combined cycle and GNL plants with ensure the system's backup

Growing digitisation

Modernisation of the entire value chain

A sector in transformation that requires a Transition Plan contemplating greater energy efficiency

5. Naturgy lines of action in 2019

Gas&Power

- Repositioning on the market
- Reduction of volatility (GNL)
- Investment in renewable sources

EMEA

- Network digitisation
- Introduction of renewable gas
- Promotion of sustainable mobility

South LatAm

- Chile: new electric regulation
- Brazil: new market positioning and new RTI
- Argentina: renegotiation of RTI

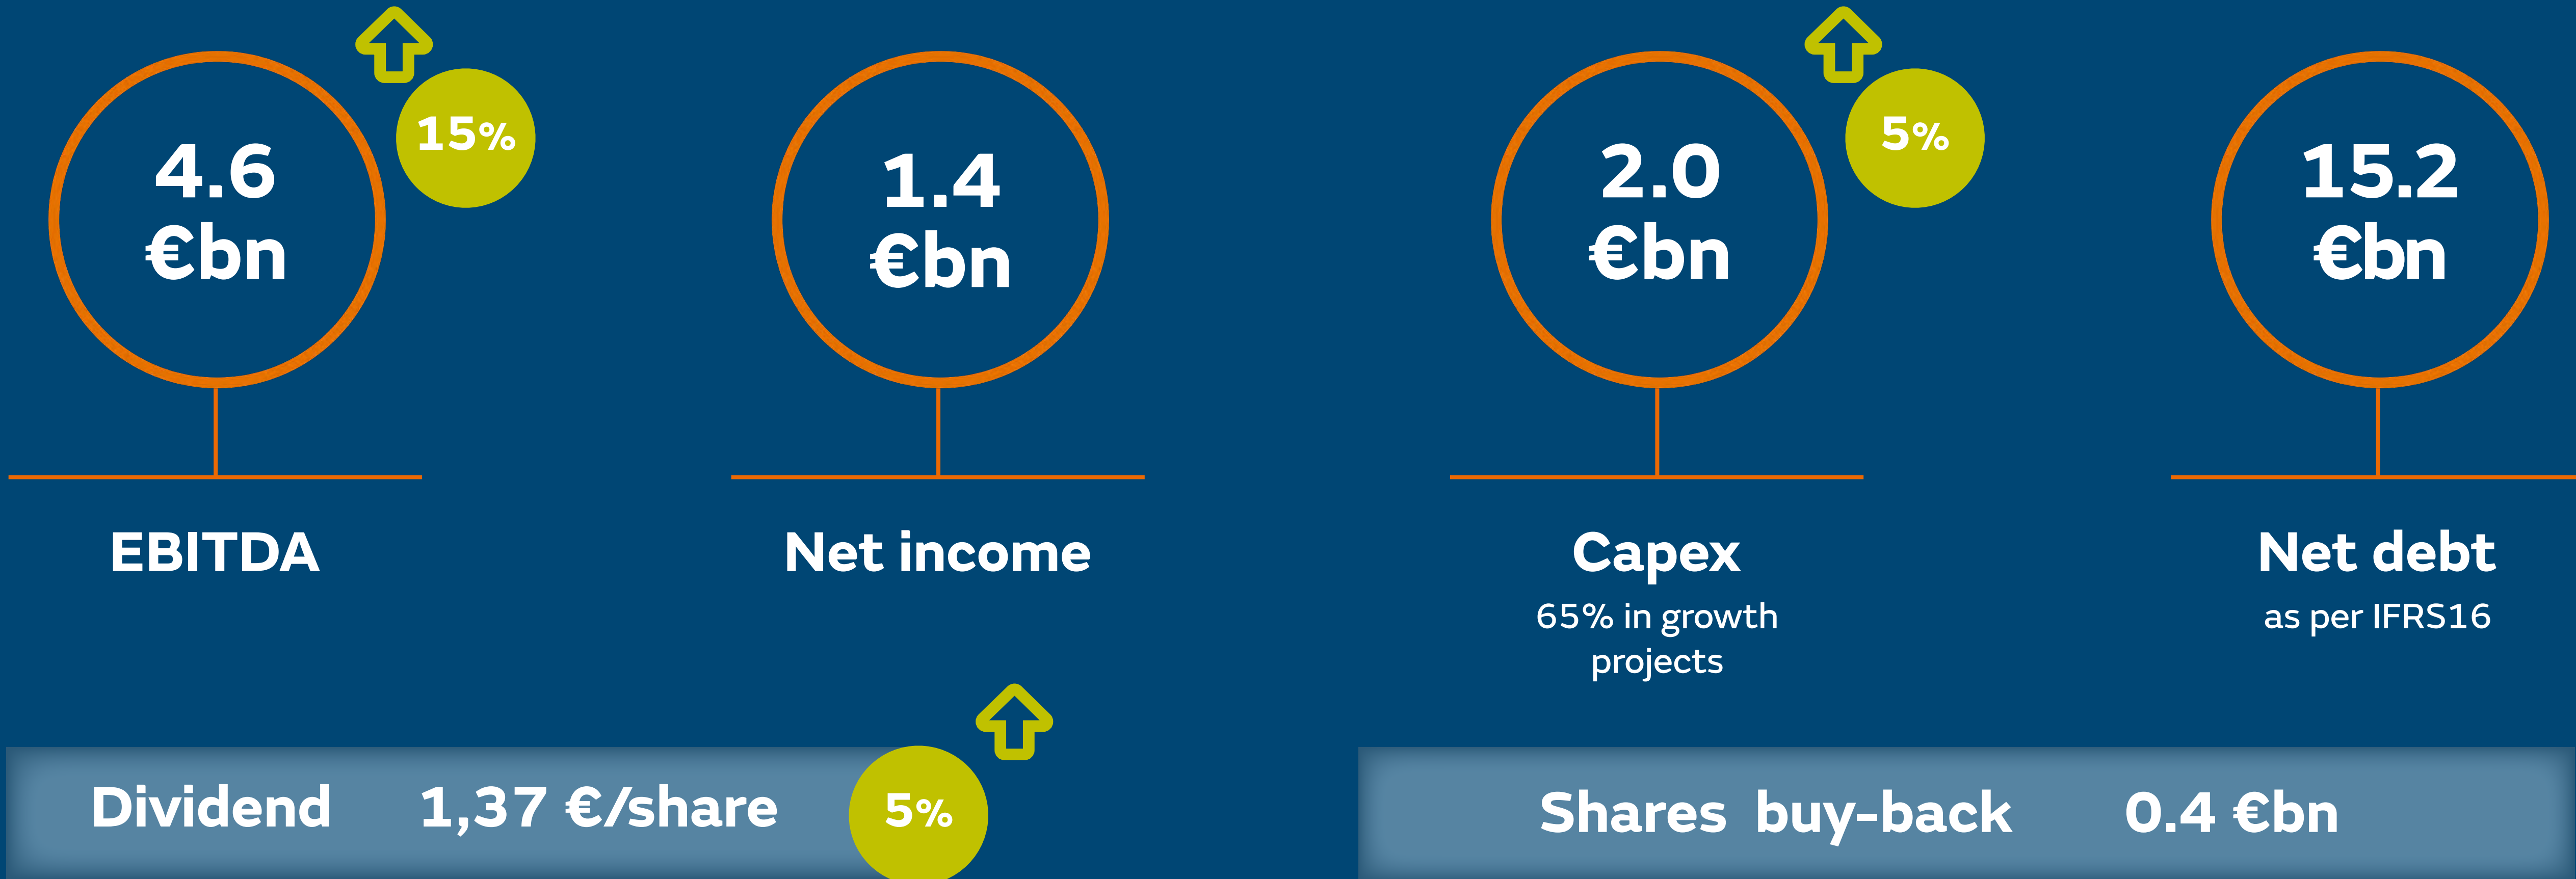

North LatAm

- Mexico: tariff update and market repositioning
- Panama: minimisation of network losses

Group

- Ongoing improvement of processes
- Excellence in safety
- Optimisation of financial and business structure

5. 2019 Financial targets

6. Proposed agreements

- 1** Approval of **financial statements:**
 - Individual
 - Consolidated
-

- 2** Approval of **Board management**
-

- 3** **Shareholders remuneration:**
 - Dividends
 - Share buy back programme
-

- 4** Changes in **corporate government:**
 - Appointment of Scott Stanley as proprietary director, proposed by GIP
 - Board Regulation
-

- 5** **Remuneration:**
 - Remuneration policy
 - Long-term incentive
 - Share plan for employees
