FITCH AFFIRMS HIPOCAT 7, 8 AND 9; OFF RATING WATCH NEGATIVE

Fitch Ratings-London/Madrid-12 December 2012: Fitch Ratings has affirmed 14 tranches of Hipocat 7, 8 and 9, a series of Spanish RMBS transactions. The agency has also removed ten tranches from Rating Watch Negative (RWN). A full list of rating actions is at the end of this commentary.

The affirmations reflect the sufficient levels of credit enhancement available for the rated notes despite the weakening performance of the assets in all three transactions.

The removal of the RWN on notes rated above 'BBBsf' follows the implementation of remedial actions on ineligible counterparties. The role of account bank and paying agent has been transferred to Barclays Bank Plc ('A'/Stable/'F1') from Banco Santander ('BBB+/'Negative/'F2') in all deals, in line with the transaction documentation. In Fitch's view, Barclays Bank Plc is deemed an eligible counterparty to support ratings of structured finance transactions of 'AA-sf'.

The transactions comprise of loans originated by non-rated entity Catalunya Banc to borrowers located mainly in the Catalonia region of Spain. The mortgage products offered feature a grace period option, allowing borrowers on up to five occasions and never for a period exceeding 12 months or in aggregate 36 months, to enter a grace period on the repayment of principal and interest on their mortgages. The main criterion to qualify for this forbearance option is to be current on existing mortgage payments.

In its analysis of the transaction, the agency assumes that borrowers who exercise this option are eventually more likely to default on their mortgages and so applied more conservative default assumptions to these borrowers.

Performance across the transactions has deteriorated significantly as a result of the current adverse macroeconomic environment within Spain. As of October 2012, the portion of arrears by more than three months excluding defaults increased to between 2.3% and 3.7% compared to between 1% and 1.5% six months ago.

In addition, the volume of borrowers utilising their grace period option has also risen to between 6.3% and 9.5% compared to 6.1% and 8.2% six months ago.

The credit enhancement available to the rated notes however was deemed sufficient to withstand the respective rating stresses and as such Fitch has affirmed the notes in these transactions. The Negative Outlooks on the junior and Hipocat 9 mezzanine notes reflects Fitch's concern about the arrears trend and the general outlook for the Spanish mortgage market.

The rating actions are as follows:
