The rating actions are results of a review of each transaction following the publication of the DBRS's "European RMBS Insight Methodology" (the Methodology) and "European RMBS Insight – Spanish Addendum" (the Spanish Addendum or Addendum) on 17 May 2016. The Methodology introduced a new proprietary default model (European RMBS Insight Model or the Model) that forecasts the expected defaults and losses of portfolios of European residential mortgages. The Model combines a loan scoring approach and dynamic delinquency migration matrices to calculate loan level defaults and losses. The loan scoring models and dynamic delinquency migration matrices are developed using jurisdictional specific data on loans, borrowers and collateral types. In addition, the European RMBS Insight Model uses a home price model to generate market value declines (MVDs).

The Spanish Addendum outlines the country specific aspects of the Methodology to estimate

defaults and losses in Spain. Analysis of the Spanish residential mortgages per the Spanish Addendum includes indexation of the underlying property values for both default and loss calculations. The Spanish Addendum details the Spanish Mortgage Scoring Model (Spanish MSM), which was constructed using logistic regression with 19 parameters from 15 variables determined to assess the relative risk of Spanish residential mortgages. In addition, 16 risk segments were estimated based on scoring of the universe of eligible loans (per defined DBRS criteria) used to construct the Spanish MSM with a delinquency migration matrix estimated for each risk segment based on the observed roll rates. Rating scenario MVDs are determined for each of the 19 autonomous Spanish regions (as well as the national level) to calculate losses.

The ratings of 20 classes of notes were previously placed Under Review with Positive Implications as a result of the updated publication of “Legal Criteria for European Structured Finance Transactions” (Legal Criteria) on 19 February 2016. The Legal Criteria incorporated the Critical Obligation Ratings (COR) into counterparty replacement and other rating threshold levels to reflect an updated opinion on the reduced risk that these critical exposures could pose to structured finance transactions. As part of the Legal Criteria update, DBRS also provided more granular rating levels for account bank institution replacements and eligible investments. The removal of the Under Review with Positive Implications status and subsequent upgrades of these notes include account banks, which have been assigned a COR that crosses a rating trigger level compared with previous counterparty rating, as well as transactions that have rating triggers at the new, granular levels described in the Legal Criteria.

Each portfolio was analysed using the European RMBS Insight Model. Cash flow stresses were undertaken on each class of notes to test the ability of the transaction to pay principal and interest consistent with the terms and conditions for the assigned ratings, given the rating scenario defaults and losses.

Notes:

All figures are in euros unless otherwise noted.

The principal methodologies applicable are European RMBS Insight Methodology and European RMBS Insight: Spanish Addendum.

DBRS has applied the principal methodologies consistently and conducted a review of the transaction in accordance with the principal methodologies. A review of the transaction legal documents was not conducted as the documents have remained unchanged since the most recent rating action.

Other methodologies referenced in this transaction are listed at the end of this press release. This may be found on [www.dbrs.com](http://www.dbrs.com) at: <http://www.dbrs.com/about/methodologies>

- Portfolio Default Rate (PDR) and Loss Given Default (LGD)
- Risk Sensitivity Analysis

To assess the impact of changing the transaction parameters on a rating, DBRS considered stress scenarios, as compared to the parameters used to determine the rating (the Base Case). DBRS expected a lifetime base case PDR and LGD for each pool based on a review of the current assets. Adverse changes to asset performance may cause stresses to base case assumptions and therefore have a negative effect on the credit ratings. The Risk Sensitivity Analysis for each rating illustrates the ratings expected if the PDR and LGD increase by a certain percentage over the base case assumptions.

The lead responsibilities for these transactions have been transferred to Keith Gorman.

The information upon which DBRS ratings and reports are based is obtained by DBRS from sources DBRS believes to be reliable. DBRS does not audit the information it receives in connection with the rating process, and it does not and cannot independently verify that information in every instance. The extent of any factual investigation or independent verification depends on facts and circumstances. DBRS ratings, reports and any other information provided by DBRS are provided "as is" and without representation or warranty of any kind. DBRS hereby disclaims any representation or warranty, express or implied, as to the accuracy, timeliness, completeness, merchantability, fitness for any particular purpose or non-infringement of any of such information. In no event shall DBRS or its directors, officers, employees, independent contractors, agents and representatives (collectively, DBRS Representatives) be liable (1) for any inaccuracy, delay, loss of data, interruption in service, error or omission or for any damages resulting therefrom, or (2) for any direct, indirect, incidental, special, compensatory or consequential damages arising from any use of ratings and rating reports or arising from any error (negligent or otherwise) or other circumstance or contingency within or outside the control of DBRS or any DBRS Representative, in connection with or related to obtaining, collecting, compiling, analyzing, interpreting, communicating, publishing or delivering any such information. Ratings and other opinions issued by DBRS are, and must be construed solely as, statements of opinion and not statements of fact as to creditworthiness or recommendations to purchase, sell or hold any securities. A report providing a DBRS rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. DBRS receives compensation for its rating activities from issuers, insurers, guarantors and/or underwriters of debt securities for assigning ratings and from subscribers to its website. DBRS is not responsible for the content or operation of third party websites accessed through hypertext or other computer links and DBRS shall have no liability to any person or entity for the use of such third party websites.
