## Fitch Upgrades 11 Tranches of MBS Bancaja; Affirms 5

Fitch Ratings-London-29 January 2019: Fitch Ratings has upgraded 11 tranches of three MBS Bancaja transactions and affirmed five tranches. 13 tranches have been removed from Rating Watch Positive (RWP). A full list of rating actions is at the end of this rating action commentary.

The transactions are Spanish prime RMBS comprising loans serviced by Bankia S.A. (BBB-/Positive/F3).

### KEY RATING DRIVERS

#### Counterparty Criteria Updated

Fitch placed the 13 tranches on RWP on 18 June 2018 following the publication of its Structured Finance and Covered Bonds Counterparty Rating Criteria Exposure Draft, and in particular the change in the way commingling risk is addressed. Based on the current criteria, Fitch views commingling risk as immaterial in these transactions, so that the agency no longer sizes for losses in the analysis.

#### Increasing Credit Enhancement (CE)

All transactions include amortisation mechanisms that allow the notes to be repaid on a pro-rata basis as long as performance and tranche thickness (tranche size relative to total outstanding) triggers are fulfilled. On the next interest payment date, all transactions are expected to pay sequentially due to the reserve fund trigger breach for MBS Bancaja 2 and 3 and the 3m+ delinquency trigger breach for MBS Bancaja 4.

MBS Bancaja 2's cash reserve fund (RF) has amortised to its floor of EUR5 million. This will allow CE to build up as the pool will amortise. For MBS Bancaja 3 and 4, the RFs are yet to amortise.

Fitch views CE across the series as sufficient to withstand the associated rating stresses, which is reflected in the affirmations and upgrades.

#### Stable Credit Performance and High Seasoning

The transactions continue to show sound asset performance. The balance of loans with over three payments in arrears as a percentage of the current pool balance were between 0.5% and 1.2% as of the relevant cut-off date for each of the transactions. Fitch expects performance to remain

to the base foreclosure frequency assumption to the portion of the portfolio that exceeds 2.5x the population within these regions.

#### RATING SENSITIVITIES

A downgrade of Spain's Issuer Default Rating and Country Ceiling could result in a reduction in the highest achievable rating (currently 'AAAsf').

Counterparty downgrades, followed by insufficient remedial action, could result in downgrades.

Deterioration in asset performance beyond those captured in Fitch's analysis, could result in negative rating action.

#### USE OF THIRD-PARTY DUE DILIGENCE PURSUANT TO RULE 17G-10

Form ABS Due Diligence-15E was not provided to, or reviewed by, Fitch in relation to this rating action.

#### DATA ADEQUACY

Fitch has checked the consistency and plausibility of the information it has received about the performance of the asset pools and the transactions.

Fitch applied the following data adjustments to the loan-level data. Fitch assumed the proportion of second homes in the portfolios was the same as at the closing date. For missing primary income information Fitch assumed an income of EUR1. For MBS Bancaja 4 Fitch assumed that loans with a maturity date change in the last four years were restructured loans between 12 and 24 months prior to the analysis date. Fitch has not reviewed the results of any third party assessment of the asset portfolio information or conducted a review of origination files as part of its ongoing monitoring.

Fitch did not undertake a review of the information provided about the underlying asset pools ahead of the transactions' initial closing. The subsequent performance of the transactions over the years is consistent with the agency's expectations given the operating environment and Fitch is therefore satisfied that the asset pool information relied upon for its initial rating analysis was adequately reliable. Overall and together with the assumptions referred to above, Fitch's assessment of the information relied upon for the agency's rating analysis according to its applicable rating methodologies indicates that it is adequately reliable.

The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.
