# Rating Action: Moody's downgrades to A3(sf) notes in 328 Spanish ABS, RMBS and CLO transactions

Global Credit Research - 02 Jul 2012

#### Most Spanish ABS, RMBS and CLO ratings are on review for downgrade

Madrid, July 02, 2012 -- Moody's Investors Service has today downgraded to A3(sf) the ratings of 583 securities across 328 structured finance transactions, including asset-backed securities, residential mortgage-backed securities and collateralised debt obligations (ABS, RMBS and CDOs). Concurrently, Moody's has also placed or maintained on review for downgrade the ratings of most Spanish ABS, RMBS and CDO securities.

Please click on this link http://www.moodys.com/viewresearchdoc.aspx?docid=PBS\_SF290362 for the List of Affected Credit Ratings. This list is an integral part of this Press Release and identifies each affected issuer.

The three drivers for today's downgrades and review placements are:

(i) Moody's decision on 26 June 2012 to lower the Spanish country ceiling, and therefore the maximum rating that Moody's will assign to a domestic Spanish issuer including structured finance transactions backed by Spanish receivables, to A3, in connection with our downgrade of Spain's government bond ratings to Baa3 from A3 on 13 June 2012and the initiation of a review for further downgrade.

(ii) Increased counterparty risks, following Moody's downgrade of various Spanish banks' long-term ratings and the placement of those bank ratings on review for further downgrade on 25 June 2012.

(iii) Moody's intention to re-assess the credit enhancement levels consistent with each structured finance rating category, given the deteriorating credit conditions in Spain.

For additional information on Structured Finance ratings, please refer to the webpage containing Moody's related announcements http://www.moodys.com/eusovereign.

#### RATINGS RATIONALE

--FIRST DRIVER --- NEW COUNTRY CEILING AND SOVEREIGN RATING REVIEW

Moody's lowered to A3 the Spanish country ceiling, which signifies the maximum rating that Moody's will assign to a domestic issuer, including SF transactions backed by Spanish receivables

(http://www.moodys.com/researchdocumentcontentpage.aspx?docid=PBC\_143384). The lowering of the ceiling was prompted by the increased risk of severe financial and economic dislocation implied by the weakening of the Spanish government's creditworthiness, as reflected by Moody's downgrade of Spain's government bond ratings to Baa3 from A3 on 13 June 2012, and the initiation of a review for further downgrade (http://www.moodys.com/research/Moodys-downgrades-Spains-government-bond-rating-to-Baa3-from-A3--PR 248236).

Spain's revised country ceiling captures Moody's assessment of 'country' risks that need to be factored into the rating of all locally domiciled obligors, i.e. risks that arise from immutable political, institutional, financial and economic factors within the country. They include the risk of systemic economic disruption, the crystallisation of severe financial stability risks and factors implying regulatory and legal uncertainty such as the possibility of currency redenomination. The assessment of country risk takes into account a number of the same factors that Moody's considers when determining a sovereign's credit strength.

The highest achievable rating for most Spanish structured finance transactions is now A3(sf), down from Aa2(sf) previously. This ceiling also applies to Spanish structured finance transactions issued by non-Spanish issuers, as these are backed entirely by Spanish assets with material exposure to the risks reflected in the country ceiling. The only Spanish structured finance securities that remain rated above A3(sf) are those that benefit from a full and unconditional guarantee provided by a non-Spanish counterparty rated higher than A3.

Moody's has placed or maintained on review the ratings of all Spanish structured finance securities now rated at the new country ceiling in consideration of the review for downgrade of the ratings of Spain's government bonds and of those of Spanish banks.

#### --SECOND DRIVER --- INCREASED COUNTERPARTY RISK

Following the 25 June downgrades of Spanish bank ratings, the ratings of both Banco Santander S.A. (Baa2 deposits; BFSR C-/BCA baa2, all on review for downgrade) and Santander Consumer Finance S.A. (Baa2 deposits; BFSR C-/BCA baa2, all on review for downgrade) are one notch higher than the sovereign's rating (please see Moody's press release "Moody's downgrades Spanish banks" (http://www.moodys.com/research/Moodys-downgrades-Spanish-banks--PR\_249316). All other affected banks' standalone ratings are now at or below Spain's Baa3 rating. Furthermore, Spanish bank ratings remain on review for further downgrade, creating the potential for increased operational and financial risks affecting Spanish ABS,RMBS and CDO securities exposed to these banks.

The deterioration in the credit quality of Spanish banks negatively affects structured finance securities because of the various roles that banks play in these transactions. Moody's review of Spanish structured finance ratings will reflect their degree of credit linkage to the affected banks, depending on the credit quality of these banks, their roles in the transactions and the likelihood of protection mechanisms being available if they fail to perform their roles.

Moody's has placed or maintained on review all structured finance securities rated in the Baa category due to the Spanish bank rating review and in order to re-assess credit enhancement levels consistent with this rating category.

## --THIRD DRIVER --- RE-ASSESSMENT OF CREDIT ENHANCEMENT FOR MEZZANINE AND JUNIOR SECURITIES

Moody's has placed on review for downgrade the ratings of Spanish mezzanine and junior securities in order to reassess the credit enhancement levels consistent with each structured finance rating category in light of deteriorating credit conditions in Spain and expected asset performance deterioration. However, Moody's did not place on review for downgrade ratings in these categories for a limited number of ABS and RMBS securities that benefited from a high level of credit enhancement that would be available to protect the notes against further shocks.

#### RATING METHODOLOGIES

Sovereign credit quality impacts structured finance and covered bonds ratings primarily through the performance of underlying collateral and the credit quality of counterparties, as detailed in the Rating Implementation Guidance "How Sovereign Credit Quality May Affect Other Ratings"

(http://www.moodys.com/researchdocumentcontentpage.aspx?docid=PBC\_139495). Structured finance and covered bond securities benefit from revenue diversification, credit enhancement and other structural features. As a result they can achieve higher ratings than other non-structured issuers and may, where certain conditions are met, exceed the sovereign by a limited number of notches, subject to the constraint of the relevant country ceiling.

The purpose of the country ceiling (or 'guideline') is described in the Rating Implementation Guidance "The Local Currency Deposit Ceiling" (http://www.moodys.com/researchdocumentcontentpage.aspx?docid=PBC\_98554). Moody's is considering reintroducing individual country ceilings for other euro area members, which could affect further the maximum structured finance rating achievable in those countries, as discussed in Moody's special report "Rating Euro Area Governments Through Extraordinary Times -- An Updated Summary" (http://www.moodys.com/research/Rating-Euro-Area-Governments-Through-Extraordinary-Times-Implications-of-Spains--PBC 142756).

For notes that benefit from an external guarantee, Moody's rating is the higher of the guarantor's rating and the underlying rating of the notes.

The rating considerations described in this press release complement the principal rating methodologies applicable to each Spanish ABS, RMBS and CLO transaction, which are listed in the list of affected credit ratings (link provided above in this press release).

Moody's rating methodology for the Spanish electricity tariff deficit transactions considers the strength of the specific legislation enacted to set forth the regulatory claims and the repayment mechanisms, the creditworthiness and strategic role of key counterparties. For further information on the rating approach, please see the new issue reports publicly available for these transactions on Moody's website.

#### OTHER DEVELOPMENTS MAY NEGATIVELY AFFECT THE NOTES

As the Euro area crisis continues, the rating of the structured finance notes remain exposed to the uncertainties of credit conditions in the general economy. The deteriorating creditworthiness of euro area sovereigns as well as the weakening credit profile of the global banking sector could negatively impact the ratings of the notes.

Key modeling assumptions, sensitivities, cash-flow analysis and stress scenarios for the affected transactions have not been updated as the rating action has been primarily driven by the lowering of Spain's country ceiling, the placement on review of Spanish bank ratings and Moody's decision to re-asses credit enhancement levels consistent with Spanish structured finance ratings.
