Financial and Operating Overview

Herein, figures presented above Operating Profit (other than non-recurring items and impairment charges) are shown excluding the impact of non-recurring items as well as the impact resulting from the application of IAS 29. Adjusted EBITDA refers to EBITDA¹ excluding all non-recurring items and not considering Argentine figures according to IAS 29 standards (inflation accounting). All figures are post the application of IFRS 16.

Following the October 12, 2020, amendment to IFRS 16 *Leases: Covid 19-Related Rent Concessions* by the IASB regarding the accounting for a concession, in the form of forgiveness or deferral of lease payments, as a negative variable lease payment instead of as financial income, we have adjusted retroactively our Q2 2020 reported rental expense to reflect this new approach. As a result, we have deducted €7.4 mm from financial income in the period and accounted for it as lower rental expense, positively impacting EBITDA. For detailed breakdown of this adjustment by country please see the Recent Events section at the end of this report.

- 9M 2020 Operating Revenue decreased by 55.9% to €460.6 mm as a result of the temporary closings related to the COVID-19 pandemic. Our entire retail operation was shuttered during most of Q2, with reopenings taking place progressively since June in Europe and during Q3 in Latam, mostly towards the end of the quarter.
- 9M 2020 Adjusted EBITDA reached €28.6 mm, 87.9% below 9M 2019, driven by a negative EBITDA of €23.7 mm in Q2 due to the abovementioned closings, already turning positive in Q3 thanks to the positive contributions from Spain, Italy, Online and Uruguay.
- 9M 2020 Adjusted EBITDA margin declined to 6.2%, 16.5 percentage points below 9M 2019 due to the lack of revenues not being offset by the decline in operating expenses.
- In 9M 2020 we generated a net loss of €239.7 mm, compared to a loss of €54.6 mm in the same period last year, as a result of the devaluation of our operating currencies vs. the USD and of the closings related to COVID-19.
- Capex in 9M 2020 was €25.2 mm, 55.3% below 9M 2019, and included €21.4 mm of maintenance capex and €3.8 mm for growth projects.
- As of September 30, 2020, we had €119.8 mm in cash and equivalents vs €103.1 mm as of December 31, 2019 (€145.5 mm including SSRCF availability). Our gross debt amounted to €1,033.8 mm and our net debt to €914.0 mm, or €1,228.8.0 mm and €1,109.0 mm, respectively, including capitalization of operating leases (as per IFRS 16).

This improvement in our liquidity figures reflects not only the strong operational performance in some of our markets in Q3 (such as Spain and Online), but also our ability to, on the back of the Refinancing Transaction, successfully renegotiate and expand our commercial payables throughout the Group on the back of the Refinancing Transaction.

As explained in the Recent Events section, the company completed the execution of the Refinancing Transaction on October 30, 2020, issuing €165 mm of Further New Super Senior Notes and repaying the SSRCF issued in November 2016. As of October 30, and after having paid the October coupon (last one prior to the amendments to the Existing Notes), the liquidity position of the company is c. €148 mm.

- In terms of gaming capacity, our active number of slots by September 30, 2020, was 25,067 (around 45% of our capacity by year end 2019), mostly in Spain and Italy and to a lesser extent in Mexico and Uruguay. In terms of venues, we had 59 gaming halls in operation, 1,089 arcades, 124 sports betting shops and 8,797 bars. These figures do not include further halls opened in Mexico and Colombia in October or the full reopening of the business in Panama as of October 12.

¹ EBITDA, as defined by the Company, is operating profit (EBIT) plus depreciation and amortization, variation in provisions for trade transactions, gains / (losses) on asset disposals, and impairment charges.

- **Operating Revenue** decreased by €584.7 mm or 55.9% to €460.6 mm in 9M 2020, due to the COVID-19 related closings. The most significant decreases took place in Argentina (€176.5 mm as it was the only market that remained closed in both Q2 and Q3), Mexico (€163.8 mm) and Italy (€122.1 mm).
- **Operating Expenses** (excluding depreciation and amortization) decreased by €376.1 mm or 46.5% to €432.0 mm, as a result of reductions across variable costs in all our markets and to the multiple temporary cost containment measures deployed by management, especially in Argentina (€118.9 mm), Italy (€102.3 mm), Mexico (€71.7 mm) and Spain (€38.4 mm).
- **Adjusted EBITDA** decreased by €208.6 mm to €28.6 mm in 9M 2020, as a result of the decrease in revenue and the closings affecting all of our markets. Most of our retail operations generated nil or very limited revenues during Q2 2020, and only Spain, Italy, Uruguay and Online generated meaningful revenues in Q3.
- **Non-Recurring Items** in 9M 2020 were €16.6 mm (€5.2 mm of which were related to the refinancing process) while growth online marketing investments accounted for an additional €9.8 mm.
- **Inflation Adjustment** in 9M 2020 represents a loss of €0.9 mm (impact on EBITDA). At the net income level, the impact is a net loss of €7.7 mm.
- **Impairment Charges** in 9M 2020 amounted to €2.0 mm.
- **Operating Profit** (prior to considering inflation accounting for Argentina) decreased by €207.2 mm to an operating loss of €126.6 mm in 9M 2020.
- **Interest Expense** (including financial expenses from capitalized operating leases) decreased by €3.0 mm to €82.2 mm.
- **Interest Income** increased by €0.2 mm to €2.2 mm.
- Gains on **Financial Investments** reached €0.9 mm in 9M 2020.
- Losses on **Exchange Rate Variations** reached €40.6 mm in 9M 2020 derived from the appreciation of the USD against our LATAM operating currencies by March 31, although the trend was partially reversed in Q2 and Q3.
- Provision for **Corporate Income Tax** decreased by €13.0 mm to €0.4 mm in 9M 2020 driven by significant decreases in accrued corporate income taxes as a result of the reduction of profit before taxes in all of our business units (specially in Argentina), and reduced withholding taxes payments across the Group.
- **Minority Interest** represents a gain of €14.7 mm in 9M 2020.
- As a result of the aforementioned results, the **Net Loss** in 9M 2020 was €239.7 mm, compared to a Net Loss of €54.6 mm in 9M 2019.

- **Operating Revenue** in 9M 2020 decreased by €163.8 mm (69.9%) compared to 9M 2019 due to the closing of all of our gaming halls in the country during the second quarter and only partial reopening during the third one (35 halls opened as of September 30).
- **Operating Expenses (excluding D&A)** decreased by €71.7 mm (50.4%) in 9M 2020 mainly as a result of our significant efforts to reduce and defer personnel, rentals and other fixed costs.
- **Adjusted EBITDA** decreased by €92.0 mm to negative €0.1 mm as a result of the significant decline in revenues due to the closings which resulted in negative EBITDA in both Q2 and Q3.
- As of October 30, the number of halls in operation had increased to 61 (after the reopening, among others, of those in Mexico City). Our horse racetrack, Hipódromo Las Américas, also restarted operations on October 2. Still, most of our halls are operating under different capacity or operational restrictions as defined in each specific state.

- **Operating Revenue** in 9M 2020 decreased by €176.5 mm or 73.1% compared to 9M 2019, due to the bingo hall closings since March 16, and throughout the entire second and third quarters, as well as to the significant devaluation of the Peso (52.1%) against the euro.
- **Operating Expenses (excluding D&A)** decreased by 64.8% driven by reductions across gaming taxes which are variable and all fixed operating expenses such as personnel and rentals.
- **Adjusted EBITDA** decreased by almost 100.0% to €0.3 mm, compared to €57.9 mm in 9M 2019 as a result of the absence of revenues in Q2 and Q3.
- As of October 30, our bingo halls remain closed.

- **Operating Revenue** in 9M 2020 declined by €58.0 mm (40.8%) to €84.1 mm compared to 9M 2019, driven by closings of bars, restaurants, arcades and bingo halls between March 14 and mid-June, when the Government lifted the restrictions imposed by the state of alarm, as well as by the capacity and opening hours limitations upon reopening.
- **Operating Expenses (excluding D&A)** decreased by 35.5% to €69.9 mm in 9M 2020, as a result of our significant cost containment efforts on all items, notably personnel where we achieved a 66% reduction in costs in Q2 and a 27% reduction in Q3 thanks to the temporary reductions of employment (ERTEs). Waived gaming taxes (which are fixed in Spain) also contributed to the 33.1% decrease in this line item.
- **Adjusted EBITDA** declined 57.8% to €14.3 mm. Adjusted EBITDA margin decreased by 6.8 percentage points to 17.0% versus last year driven by the limited revenues generated in the second quarter.
- However, Adjusted EBITDA in the third quarter was already above that of last year despite the 17.0% lower revenues, thanks to the significant cost savings mentioned above, especially on personnel expenses, which resulted in a 5.2 p.p. expansion of EBITDA margins to 29.8% in the quarter.

Other Operations includes results from Panama, Uruguay, Colombia and Online, but excludes Corporate Overhead.

Operating revenue decreased by €64.4 mm (37.1%), to €108.9 mm as a result of:

- A combined decrease in **Panama and Colombia** of €52.4 mm due to the closing of operations since March. Colombia resumed operations between September and October and Panama on October 12.
- A decrease in **Uruguay** of €15.1 mm due to the closing of its operations since March. The racetracks resumed their operation partially by mid-May, and the associated gaming halls (HRU) on August 6.

Please note that the revenue recognition mechanics in our gaming hall operation in Uruguay have delayed the impact of the closures in this business unit to the last quarter of 2020.

- An increase of €3.1 mm on **Online** revenues coming mostly from the third quarter, where the very strong performance (19.7% growth) offset the weak revenue trend in the second quarter due to the cancellation or postponement of most of the major sports events.

Adjusted EBITDA decreased by €19.7 mm (47.3%), to €21.9 mm as a result of:

- A decrease in **Panama** of €14.5 mm, affected by the casino closings in Q2 and Q3.
- A decrease in **Colombia** of €6.5 mm, also impacted by closings in Q2 and most of Q3.
- An increase in **Uruguay and Online** of €1.3 mm.

Adjusted EBITDA margin in 9M 2020 was 8.8%, 8.7 percentage points below that of 9M 2019.

- Cash flow from operations** in 9M 2020 was negative €8.1 mm, a decrease of €130.4 mm versus €122.3 mm in 9M 2019. This decrease is primarily attributable to the decrease of €212.1 mm in reported EBITDA partially offset by a €23.8 mm reduction in corporate income tax paid and a €55.9 mm decrease in the working capital outflow (to an inflow of €43.7 mm). Inflation adjustments (IAS 29 accounting in Argentina) and Capitalized Operating Leases (IFRS 16) are excluded in the cash flow calculations, as they are non-cash items in the Income Statement.
- Cash flow from investing** in 9M 2020 was €24.8 mm of capital expenditures, a decline of 57.6% vs. 9M 2019, and included €25.2 mm of capital expenditures partially offset by €0.4 mm of cash from acquired companies. Within capital expenditures, €21.4 mm were related to maintenance and €3.8 mm to growth initiatives.

Balance Sheet

- Total assets decreased by €255.6 mm in 9M 2020. This decrease is principally attributable to a decrease in fixed assets, intangible assets, right of use assets (IFRS-16) and goodwill.
- Current Assets decreased by €13.1 mm, as a result of a €32.2 mm decrease in taxes receivable partially offset by a €16.7 mm increase in cash & equivalents.
- Financial debt, including both the short and long term portion increased by €129.4 mm as a result of the issuance of €85.0 mm new super senior notes and a €41.4 mm drawing on the SSRCF (which is registered now as short term debt as its maturity was brought forward to November 15).
- Minority interests decreased by €32.8 mm to €48.3 mm and shareholders' equity decreased by €293.5 mm to negative €331.5 mm due to the €239.7 mm loss in the period together with exchange rate impacts.
- Increased commercial payables are reflected across several items of the balance sheet. First in short term tax assets and liabilities (as assets are significantly reduced as a result of the reduced activity while liabilities remain stable despite such reduction). Second, as we are reporting an increase of accounts payable when, due to the reduced activity, such amount should have decreased. Third, as deferred payments are only decreasing modestly when minimal capital expenditures are being done by the company, reflecting re-scheduling of expected payment installments in 2020 of prior years executed investments. On the other hand, significant devaluation of local currencies against the Euro have partially offset the impact of this increase of payables in the balance sheet.

Net Working Capital

- Net working capital decreased by €38.6 mm to negative €123.2 mm.
- This change in net working capital was primarily due to a €27.7 mm increase in taxes payable, net⁶ and a €12.4 mm increase in accounts payable partially offset by a €2.2 mm increase in prepaid expenses and a €1.8 mm increase in accounts receivable.

¹ The difference between this figure and the consolidated Cash Flow Statement corresponds mostly to non-cash FX movements in certain balance sheet items.

² Figures reflect gaming and other taxes (i.e. exclude corporate income taxes).

³ Figures exclude security deposits.

⁴ Figures reflect provisions for trade transactions.

⁵ Figures reflect other deferred payment obligations (i.e. exclude deferred payments and other partner investments related to capital expenditures).

Recent Events

- **COVID-19 business update.** Following the global outbreak of COVID-19 and the lockdowns imposed by governments across the globe, the Company closed all of its retail operations during March.

As of today, we have resumed operations in all markets but Argentina and some regions in Mexico, representing approximately one third of our gaming capacity in the country. Based on management expectations, as we do not have formal confirmation, our entire footprint could be open before year end.

Performance across opened markets continues to be strong, ranging between 70 and 90% of our 2019 revenue levels a few weeks after reopening. Nonetheless, the second wave of the pandemic has caused some temporary closings across parts of our European portfolio which will impact negatively our revenue in the last quarter of the year, the impact of these restrictions is not yet reflected in our Q3 2020 results.

Please refer to the presentation accompanying our Q3 2020 Results where a detailed operational update by country is provided.

- **Refinancing Transaction.** On October 30, the Company completed the refinancing transaction (described in detail in our Q2 2020 Earnings Release) which included, among other elements:
 - (i) The issuance of €165 mm of Further New Super Senior Notes (on top of the Initial €85 mm to a total of €250 mm NSSNs due September 2023). Upon completion on October 30, the existing SSRCF was fully repaid together with transaction costs and the October coupon on our existing notes. The remaining liquidity will help the company sustain its operations to post COVID-19 business normalization.
 - (ii) Amendments to the terms of the existing notes including an extension of maturities to November 1, 2023 and increased interest rates, comprising a mandatory 4.50% cash-pay component and, at the election of the Company, a further cash-pay (5.00% on the € notes; 5.875% on the \$ notes) or PIK (6.25% on the € Notes; 7.125% on the \$ Notes) component;
 - (iii) Amendments to the debt baskets to restrict debt to a €95.0 mm local debt basket (out of which no more than €75 mm can be incurred by non-guarantors) and a new €25 mm general debt basket;
 - (iv) Addition of a minimum liquidity covenant under which the Company shall maintain a minimum aggregate amount of €40 million in cash, cash equivalents, and borrowings available under credit facilities and to be tested monthly.
- **City of Buenos Aires online license.** The Government of the City of Buenos Aires, through its gambling administration body (LOTBA), has approved the implementation program for the online gaming platform presented by Codere, which includes its implementation and execution plans. This is the first step in the process towards obtaining the license that will allow the company's online gaming to be offered in this market, with Codere being the first company to achieve this milestone.
The next step in the process will be to execute the operational tasks necessary in order for the systems to be deployed, as well as the development and integration of certain components of the platform, which will allow the commercialization and distribution of the online games included in the approved application.
- **Advertising regulation in Spain.** On November 4, 2020, the Spanish Government approved a new Royal Decree introducing more restrictions on gambling advertising. The new law imposes a total ban on betting and gaming adverts online and on social media, and also bans it from airing on radio and television except between 1:00 am and 5:00 am. It also bans celebrities from endorsing any such adverts and prohibits betting and gaming operators from sponsoring sporting events or teams. Advertising contracts already in place will be subject to "a moratorium" until the end of the sporting season in August 2021.
- **Temporary hospital unit in the Citibanamex convention centre.** In late April, with the help of many local companies and support from authorities in Mexico and led by the Universidad Nacional Autónoma de México a temporary hospital unit was set in our Citibanamex convention centre. It has contributed 540 hospital beds and over 30 intensive care units to the city's overloaded health system during the pandemic, helping thousands of patients. We have extended the agreement to operate the unit by 2 months, until December 15, and it will be dismantled two weeks later.
- **Share capital reduction.** On July 24, 2020, the General Shareholder Meeting of Codere agreed to reduce the share capital of the Company by € 450,445,638.8 by reducing the nominal value of each share outstanding by €3.8, from €4.3 to €0.5.
