

QatarEnergy awards Técnicas Reunidas additional EPC off-plot facilities work for North Field South Project

- **The project consists of the development of facilities that will connect the southern part of Ras Laffan Industrial City (RLIC) to new Liquefied Natural Gas (LNG) storage tanks and to the export facilities located in the northern part of the Ras Laffan Industrial City.**
- **This represents the fourth award from QatarEnergy to Técnicas Reunidas in the last 24 months.**
- **Located north-east of the Qatar peninsula, the North Field is the largest non-associated gas field in the world, representing 10% of known natural gas reserves.**
- **The total value of the work is estimated at more than 560 million USD.**

Madrid, 21 August 2023 - QatarEnergy has awarded Técnicas Reunidas additional Engineering, Procurement and Construction (EPC) work including the pipelines, interconnections, ancillary systems, and other supporting components for the LNG Offplot facilities for the North Field South Project.

This award reinforces the relationship between QatarEnergy and Técnicas Reunidas which is currently executing the EPC works for the expansion of the Condensate, LPG, and MEG storage, distribution, and associated facilities for the North Field Expansion Project. Tecnicas Reunidas is also executing the EPC works for the Sulfur Handling Facility for the North Field Expansion Project in a Joint Venture with Wilson Engineering Ltd.

The new scope includes the engineering, procurement, construction, and commissioning of a range of off-plot facilities. These include the LNG rundown lines, boil-off gas (BOG) recovery and utility pipelines that will connect the southern part of Ras Laffan Industrial City to new storage tanks and export facilities in RLIC.

The scope of the project also includes the commissioning of LNG Tanks, an LNG loading berth, BOG compressors, and associated equipment.

Total contract value is around 560 million USD.

The North Field, located north-east of the Qatar peninsula, is the largest non-associated natural gas field in the world. It makes Qatar the country with the third largest proven reserves in the world, estimated at 10% of the world's known natural gas reserves.

This award cements Técnicas Reunidas' relationship with QatarEnergy as Tecnicas Reunidas has been working on large-scale projects related to the expansion of the North Field since 2021.

About Técnicas Reunidas

Spanish company Técnicas Reunidas is a global engineering company with a presence in 25 countries and a track record of more than 1,000 industrial plants in more than 60 years of experience.

Técnicas Reunidas specializes in the design and construction of large industrial plants, mainly for the production of clean fuels, natural gas and chemical products. The company is also a leader in technologies and solutions related to the energy transition, the circular economy and the decarbonization of plants. Its solutions include technologies such as renewable hydrogen and its derivatives, biofuels and biochemicals, and carbon capture.

With more than 8,000 employees, the majority of whom are highly qualified engineers, Técnicas Reunidas' headquarters in Spain is a major center of engineering excellence.
