## DBRS Morningstar Upgrades and Confirms Ratings on Three Rural Hipotecario RMBS Transactions

### RMBS

DBRS Ratings GmbH (DBRS Morningstar) took the following rating actions on the bonds issued by three Spanish residential mortgage-backed security (RMBS) transactions, originated and serviced by Spanish rural savings banks:

Rural Hipotecario XV, Fondo de Titulización de Activos (RH XV):

- Series A notes confirmed at AAA (sf)
- Series B notes upgraded to AA (low) (sf) from A (high) (sf)

Rural Hipotecario XVI, Fondo de Titulización de Activos (RH XVI):

- Series A Notes confirmed at AAA (sf)
- Series B Notes upgraded to AA (low) (sf) from A (high) (sf)

Rural Hipotecario XVII, Fondo de Titulización de Activos (RH XVII):

- Bonds confirmed at AAA (sf)

The ratings on the most senior notes in each transaction address the timely payment of interest and the ultimate payment of principal on or before the respective legal final maturity dates. The ratings on the subordinated notes address the ultimate payment of interest and principal on or before the respective legal final maturity dates.

The rating actions follow an annual review of the transactions and are based on the following analytical considerations:

- Portfolio performances, in terms of delinquencies, defaults, and losses;
- Portfolio default rate (PD), loss given default (LGD), and expected loss assumptions on the remaining receivables; and
- Current available credit enhancements to the notes to cover the expected losses at their respective rating level.

### PORTFOLIO PERFORMANCE

- For RH XV, the cumulative default ratio as of August 2022 was 0.6% and the 90+ delinquency ratio was 0.2%.
- For RH XVI, the cumulative default ratio as of July 2022 was 1.1% and the 90+ delinquency ratio was 0.7%.
- For RH XVII, the cumulative default ratio as of July 2022 was 0.0% and the 90+ delinquency ratio was 0.2%.

### PORTFOLIO ASSUMPTIONS AND KEY DRIVERS

DBRS Morningstar conducted a loan-by-loan analysis of the remaining pools of receivables and updated its base case PD and LGD assumptions as follows:

- For RH XV, DBRS Morningstar updated its base case PD and LGD assumptions to 1.5% and 7.3%, respectively.
- For RH XVI, DBRS Morningstar updated its base case PD and LGD assumptions to 1.7% and 11.2%, respectively.
- For RH XVII, DBRS Morningstar updated its base case PD and LGD assumptions to 2.0% and 7.3%, respectively.

## CREDIT ENHANCEMENTS

In each transaction, the credit enhancement to each class of notes is provided by subordination of junior classes and the reserve funds.

-- For RH XV, the credit enhancement to the Series A notes was 35.4% and the credit enhancement to the Series B notes was 12.1% as of the August 2022 payment date, up from 31.1% and 10.4%, respectively, as of the August 2021 payment date.

-- For RH XVI, the credit enhancement to the Series A notes was 42.0% and the credit enhancement to the Series B notes was 13.6% as of the July 2022 payment date, up from 37.2% and 12.0%, respectively, as of the July 2021 payment date.

-- For RH XVII, the credit enhancement to the Bonds was 56.7% as of the July 2022 payment date, up from 50.3% as of the July 2021 payment date.

## RESERVE FUNDS

-- For RH XV, the transaction benefits from a nonamortising reserve fund of EUR 26.2 million, slightly below the target level of EUR 26.5 million, and a liquidity reserve fund of EUR 0.9 million. The reserve fund is available to meet payments on the senior fees, interest, and principal on the Series A and Series B notes. The liquidity reserve fund provides liquidity support to cover for senior fees and interest shortfall on the Series A notes.

-- For RH XVI, the transaction benefits from a nonamortising reserve fund of EUR 7.5 million and a liquidity reserve fund of EUR 0.8 million. The reserve fund is available to meet payments on the senior fees, interest, and principal on the Series A and Series B Notes. The liquidity reserve fund provides liquidity support to cover for senior fees and interest shortfall on the Series A Notes.

-- For RH XVII, the transaction benefits from a nonamortising reserve fund of EUR 9.6 million and an interest reserve fund of EUR 5.9 million. The reserve fund is available to meet payments on the senior fees, interest, and principal on the Bonds. The interest reserve fund provides liquidity support to cover senior fees and interest shortfall on the Bonds.

Banco Santander SA (Banco Santander) acts as the account bank for the transaction. Based on the account bank reference rating of A (high) on Banco Santander (which is one notch below the DBRS Morningstar Long Term Critical Obligations Rating of AA (low)), the downgrade provisions outlined in the transactions documents, and other mitigating factors inherent in the transaction's structure, DBRS Morningstar considers the risk arising from the exposure to the account bank to be consistent with the ratings on the notes, as described in DBRS Morningstar's "Legal Criteria for European Structured Finance Transactions" methodology.

## ENVIRONMENTAL, SOCIAL, GOVERNANCE CONSIDERATIONS

There were no Environmental/Social/Governance factors that had a significant or relevant impact on the credit analysis.

A description of how DBRS Morningstar considers ESG factors within the DBRS Morningstar analytical framework can be found in the DBRS Morningstar Criteria: Approach to Environmental, Social, and Governance Risk Factors in Credit Ratings at: <https://www.dbrsmorningstar.com/research/396929/dbrs-morningstar-criteria-approach-to-environmental-social-and-governance-risk-factors-in-credit-ratings>.

DBRS Morningstar analysed the transaction structures in Intex DealMaker.

Notes:

All figures are in euros unless otherwise noted.

The principal methodology applicable to the ratings is the "Master European Structured Finance Surveillance Methodology" (19 May 2022).

Other methodologies referenced in these transactions are listed at the end of this press release. These may be found at: <http://>

[www.dbrsmorningstar.com/about/methodologies](http://www.dbrsmorningstar.com/about/methodologies).

DBRS Morningstar has applied the principal methodology consistently and conducted a review of the transaction in accordance with the principal methodology.

A review of the transactions legal documents was not conducted as the legal documents have remained unchanged since the most recent rating actions.

For a more detailed discussion of the sovereign risk impact on Structured Finance ratings, please refer to “Appendix C: The Impact of Sovereign Ratings on Other DBRS Morningstar Credit Ratings” of the “Global Methodology for Rating Sovereign Governments” at: <https://www.dbrsmorningstar.com/research/401817/global-methodology-for-rating-sovereign-governments>.

The DBRS Morningstar Sovereign group releases baseline macroeconomic scenarios for rated sovereigns. DBRS Morningstar analysis considered impacts consistent with the baseline scenarios as set forth in the following report: <https://www.dbrsmorningstar.com/research/384482/baseline-macroeconomic-scenarios-application-to-credit-ratings>.

The sources of data and information used for these ratings include investor reports and payment holiday information provided by Europea de Titulización S.A., S.G.F.T. and loan-level data provided by the European DataWarehouse GmbH.

DBRS Morningstar did not rely upon third-party due diligence in order to conduct its analysis.

At the time of the initial ratings, DBRS Morningstar was not supplied with third-party assessments. However, this did not impact the rating analysis.

DBRS Morningstar considers the data and information available to it for the purposes of providing these ratings to be of satisfactory quality.

DBRS Morningstar does not audit or independently verify the data or information it receives in connection with the rating process.

The last rating actions on these transactions took place on 10 September 2021, when DBRS Morningstar confirmed the ratings on all classes of notes.

Information regarding DBRS Morningstar ratings, including definitions, policies, and methodologies, is available at [www.dbrsmorningstar.com](http://www.dbrsmorningstar.com).

Sensitivity Analysis: To assess the impact of changing the transactions parameters on the ratings, DBRS Morningstar considered the following stress scenarios as compared with the parameters used to determine the ratings (the Base Case):

-- DBRS Morningstar expected a lifetime base case PD and LGD for the pools based on a review of the current assets. Adverse changes to asset performance may cause stresses to base case assumptions and therefore have a negative effect on credit ratings.

-- The risk sensitivity overview below illustrates the ratings expected if the PD and LGD increase by a certain percentage over the base case assumption. For example in RH XV, if the LGD increases by 50%, the rating of the Series A notes would be expected to remain at AAA (sf), assuming no change in the PD. Furthermore, if both the PD and LGD increase by 50%, the rating of the Series A notes would be expected to remain at AAA (sf). Furthermore, if both the PD and LGD increase by 50%, the rating of the Series A notes would still be expected to remain at AAA (sf).
