TDA Ibercaja 5 Spanish RMBS Ratings Raised On Three Classes Of Notes; Two Classes Affirmed

March 10, 2023

Overview

- TDA Ibercaja 5 is a Spanish RMBS transaction securitizing a pool of prime residential mortgage loans. It closed in May 2007.
- Following our review, we raised our ratings on the B, C, and D notes. At the same time, we affirmed our rating on the class A2 and E notes.

MADRID (S&P Global Ratings) March 10, 2023--S&P Global Ratings today raised its credit ratings on TDA Ibercaja 5, Fondo de Titulizacion de Activos's class B, C, and D notes to 'AAA (sf)', 'AA (sf)', and 'A+ (sf)' from 'AA+ (sf)', 'AA- (sf)', and 'A- (sf)', respectively. At the same time, we affirmed our 'AAA (sf)', and 'D (sf)' rating on the class A and E notes, respectively.

Today's rating actions follow our full analysis of the most recent information that we have received and the transaction's current structural features.

Under our global RMBS criteria, our weighted-average foreclosure frequency assumptions decreased because of the transaction's reduced arrears and lower weighted-average effective loan-to-value (LTV). In addition, our weighted-average loss severity (WALS) assumptions also declined due to the lower weighted-average current LTV in the pool.

Table 1

Credit Analysis Results

Rating	WAFF (%)	WALS (%)	Credit coverage (%)
AAA	12.47	12.21	1.52
AA	8.66	9.26	0.80
A	6.74	5.07	0.34
BBB	5.17	3.32	0.17
BB	3.51	2.34	0.08
B	2.34	2.00	0.05

WAFF--Weighted-average foreclosure frequency. WALS--Weighted-average loss severity.

Loan-level arrears stand at 1.2%. Overall delinquencies remain well below our Spanish RMBS index (see "Related Research").

TDA Ibercaja 5 Spanish RMBS Ratings Raised On Three Classes Of Notes; Two Classes Affirmed

Cumulative defaults, defined as loans in arrears for a period equal to or greater than 18 months, represent 2.18% of the closing pool balance. The first interest deferral trigger is for the class D notes; it is not at risk of being breached because it is defined at 3.95%, and we do not expect that this level will be reached in the near term.

The reserve fund is at its floor value (€6.00 million) and will no longer amortize, providing further credit enhancement as the notes continue to amortize.

Our operational, counterparty, rating above the sovereign, and legal risk analyses remain unchanged, in line with our previous review. Therefore, the ratings assigned are not capped by any of these criteria.

The servicer, Ibercaja Banco S.A., has a standardized, integrated, and centralized servicing platform. It is a servicer for many Spanish RMBS transactions, and its transactions' historical performance has outperformed our Spanish RMBS index.

Our credit and cash flow results indicate that the credit enhancement available for the class A2 notes is still commensurate with our 'AAA (sf)' rating. We therefore affirmed our 'AAA (sf)' ratings on the class A2 notes.

The class B, C, and D notes' credit enhancement has increased to 5.6%, 3.6%, and 2.6%, respectively, due to the amortization of the notes. Considering this increase, and the good and stable asset performance, we raised to 'AAA (sf)', 'AA (sf)', and 'A+ (sf)', from 'AA+ (sf)', 'AA- (sf)', and 'A- (sf)', respectively, our ratings on the class B, C, and D notes.

Under our cash flow analysis, the class C and D notes could withstand stresses at higher ratings than those currently assigned. However, we have limited our upgrades based on their overall credit enhancement and position in the waterfall, the current macroeconomic environment, and continuation of pro rata payments with a lack of credit enhancement build-up before the upcoming interest payment dates.

The class E notes is not collateralized and is paid after amortization of the reserve fund. It is still uncertain whether future interest payments will be missed. Given its current credit enhancement and position in the waterfall, we affirmed our 'D (sf)' rating on the class E notes.

We expect Spanish consumer price inflation to reach 5.1% this year and 2.3% in 2024. Although elevated inflation is overall credit negative for all borrowers, some borrowers will face more constraints than others. Risks may emerge, for example, if inflation worsens more quickly or more severely than currently expected. We consider the borrowers in the transaction to be prime, meaning they are generally very resilient to inflationary pressures.

TDA Ibercaja 5 is a Spanish RMBS transaction securitizing a pool of prime residential mortgage loans. It closed in May 2007.
