

Madrid, 28 October 2020

In compliance with article 228 of Royal Legislative Decree 4/2015, dated 23 October 2015, which approved the recast text of the Stock Market Law, Aena, SME, SA, hereby reports the following

### **OTHER RELEVANT INFORMATION**

AENA SME S.A., in view of the publication in the newspapers today of the economic and financial estimates for 2020 and 2021 contained in the Law Project of 2021 National Budget ([http://www.congreso.es/docu/pge2021/pge\\_2021-web/PGE-ROM/N\\_21\\_A\\_R\\_5\\_0\\_0N\\_0.htm](http://www.congreso.es/docu/pge2021/pge_2021-web/PGE-ROM/N_21_A_R_5_0_0N_0.htm)), hereby reports that these estimates are affected by the following factors:

1. The quick evolution of the effects stemming from the COVID-19 pandemic which got underway since these forecasts were made.
2. The changes in expectations on reaching agreements with the operators of commercial activities in airports, which to date have not materialised; in consequence, the accounting related to the revenues from the minimum guaranteed incomes from those contracts.

As a result of the above, the estimates published do not correspond to the current forecast for the closure of financial year 2020.

With regard to financial year 2021, Aena does not have a reference traffic forecast given the vast uncertainty surrounding the evolution of traffic in the forthcoming months and the extraordinary breadth in the range of estimates in this regard published by different international bodies associated with the air transport sector.

The Economic-Financial Director

José Leo Vizcaíno
