

**INNOVATIVE SOLUTIONS ECOSYSTEM, S.A. ("ISE")**, in compliance with the provisions of article 227 of the Legislative Royal Decree 4/2015, of 23 October, which approves the Consolidated Text of the Securities Market Act, hereby informs you of the following

### **OTHER RELEVANT INFORMATION**

#### **Elections Nova Scotia, Canada, Chooses Scytl, subsidiary of ISE, as Online Voting Provider**

- **The technology firm has won a contract to develop the Canadian province's online voting solution.**
- **With this new milestone, Scytl consolidates its position in Canada, where it has already provided its online voting technology to 1.2 million voters in the October 2022 Ontario municipal elections.**

The independent body of *Elections Nova Scotia*, which is responsible for administering provincial elections in Nova Scotia, Canada, has chosen Scytl to develop the province's first-ever online voting solution.

The technology firm won the contract after presenting a complete proposal that includes all of the services related to software development, IT infrastructure and hosting, as well as for training, support, and management of the online voting solution, which will be equipped with maximum-security measures.

**Elections Nova Scotia's Chief Electoral Officer Dorothy Rice** said: *"We are pleased to advance the development of this innovative voting method. We plan to take a carefully measured approach and are confident in Scytl's ability to develop a **secure online voting solution.**"*

**Ben Fagg, Vice President of Business Development and Global Alliances at Scytl**, said: *"We are very excited about this joint venture with Elections Nova Scotia to work on a project of this magnitude. Canada is a key market for Scytl, and this alliance demonstrates our position as a leading provider of online voting in the region."*

The government of Nova Scotia made amendments to the *Elections Act* in 2021 to allow for the use of online voting technology, initially for members of the Canadian Armed Forces stationed outside the province on election day.

#### **Innovation in Canada since 2014**

Scytl has a long history in Canada, where it has helped municipalities in Ontario modernize their electoral experiences since 2014. In the recent municipal elections held in October 2022, Scytl provided its online voting technology and election services to 1.2 million voters.

Previously, in 2018, the firm's online voting solution ensured the efficient, transparent, and timely publication of final results, with municipalities being able to complete the process in less than 10 minutes on average after the closing of polling stations.

Since 2006, the province of Ontario has pioneered the implementation of online voting technology in its municipal elections, experiencing continued increases in online voting adoption among its municipalities with each election cycle.

We would like to take this opportunity to send you our warmest regards.
