DBRS Morningstar Upgrades Rating on Rural Hipotecario XVIII Fondo de Titulización

RMBS

DBRS Ratings GmbH (DBRS Morningstar) upgraded to AAA (sf) from AA (high) (sf) its rating on the Series A notes issued by Rural Hipotecario XVIII Fondo de Titulización (the Issuer).

The rating addresses the timely payment of interest and the ultimate repayment of principal on or before the legal final maturity date in December 2057.

The rating upgrade follows an annual review of the transaction and is based on the following analytical considerations:

- Portfolio performance, in terms of delinquencies, defaults, and losses, as of the September 2022 payment date;
- Portfolio default rate (PD), loss given default (LGD), and expected loss assumptions on the remaining receivables; and
- Current available credit enhancement to the Series A notes to cover the expected losses at the AAA (sf) rating level.

The transaction is a securitisation of residential mortgage loans secured by first-lien mortgages originated by Caja Rural de Aragón, Sociedad Cooperativa de Crédito (the seller) in Spain. At closing, the Issuer used the proceeds of the Series A and Series B notes to fund the purchase of the mortgage portfolio from the seller. In addition, the seller provided separate additional subordinated loans to fund both the initial expenses and the reserve fund. The transaction closed in December 2018 and took place in the form of a fund in accordance with Spanish securitisation law.

PORTFOLIO PERFORMANCE

As of September 2022, loans two to three months in arrears represented 0.3% of the outstanding portfolio balance, up from 0.2% in September 2021; the 90+ days delinquency ratio was 0.2%, down from 0.3% in the same period; and the cumulative default ratio was stable at 0.2%.

PORTFOLIO ASSUMPTIONS AND KEY DRIVERS

DBRS Morningstar conducted a loan-by-loan analysis of the remaining pool of receivables and updated its base case PD and LGD assumptions to 1.5% and 11.6%, respectively.

CREDIT ENHANCEMENT

As of the September 2022 payment date, credit enhancement to the Series A notes was 18.9%, up from 17.0% in September 2021. Credit enhancement comprises EUR 21.7 million in subordination of the Series B notes and EUR 11.5 million of the reserve fund, which is available to cover senior expenses as well as interest and principal payments on the Series A notes until paid in full. The reserve fund was at its target amount as of September 2022 and is available to cover interest and principal payments on the Series B notes once the Series A notes are fully amortised. The reserve fund will not amortise if certain performance triggers are breached. The Series A notes' principal is senior to the Series B notes' interest payments in the priority of payments.

Banco Santander SA (Santander) acts as the account bank for the transaction. Based on the account bank's reference rating of A

(high), which is one notch below the DBRS Morningstar Long Term Critical Obligations Rating of AA (low) on Santander, the downgrade provisions outlined in the transaction documents, and other mitigating factors inherent in the transaction structure, DBRS Morningstar considers the risk arising from the exposure to the account bank to be consistent with the rating assigned to the Series A notes, as described in DBRS Morningstar's "Legal Criteria for European Structured Finance Transactions" methodology.

ENVIRONMENTAL, SOCIAL, GOVERNANCE CONSIDERATIONS

Sensitivity Analysis: To assess the impact of changing the transaction parameters on the rating, DBRS Morningstar considered the following stress scenarios as compared with the parameters used to determine the rating (the Base Case):

- DBRS Morningstar expected a lifetime base case PD and LGD for the pool based on a review of the current assets. Adverse changes to asset performance may cause stresses to base case assumptions and therefore have a negative effect on the credit rating.
- The base case PD and LGD of the current pool of loans for the Issuer are 1.5% and 11.6%, respectively.
- The risk sensitivity overview below illustrates the ratings expected if the PD and LGD increase by a certain percentage over the base case assumption. For example, if the LGD increases by 50%, the rating of Series A notes would be expected to remain at AAA (sf), assuming no change in the PD. If the PD increases by 50%, the rating of Series A notes would be expected to remain at AAA (sf), assuming no change in the LGD. Furthermore, if both the PD and LGD increase by 50%, the rating of Series A notes would be expected to remain at AAA (sf).

Series A Risk Sensitivity:

- 25% increase in LGD, expected rating of AAA (sf)
- 50% increase in LGD, expected rating of AAA (sf)
- 25% increase in PD, expected rating of AAA (sf)
- 50% increase in PD, expected rating of AAA (sf)
- 25% increase in PD and 25% increase in LGD, expected rating of AAA (sf)
- 25% increase in PD and 50% increase in LGD, expected rating of AAA (sf)
- 50% increase in PD and 25% increase in LGD, expected rating of AAA (sf)
- 50% increase in PD and 50% increase in LGD, expected rating of AAA (sf)
