TDA CAM 8 Class B And C Spanish RMBS Notes Ratings Raised; Class A And D Ratings Affirmed

September 3, 2024

Overview

- Following our review of TDA CAM 8 under our relevant criteria, we have raised our ratings on the class B and C notes. At the same time, we have affirmed our ratings on the class A and D notes.
- TDA CAM 8 is a Spanish RMBS transaction that closed in June 2007.

MADRID (S&P Global Ratings) Sept. 3, 2024--S&P Global Ratings today raised its credit rating to 'BB- (sf)' from 'CCC+ (sf)' and to 'B (sf)' from 'CCC (sf)' on TDA CAM 8, Fondo de Titulizacion de Activos' class B and C notes, respectively. At the same time, affirmed our 'AAA (sf)' rating on the class A notes and our 'D (sf)' rating on the class D notes.

Today's rating actions follow our full analysis of the most recent information that we have received and the transactions' current structural features.

After applying our global RMBS criteria, expected losses decreased due to a decline in our weighted-average foreclosure frequency (WAFF) and weighted-average loss severity (WALS) assumptions. Our WAFF assumptions decreased due to the lower effective loan-to-value (LTV) ratio. In addition, our WALS assumptions have decreased, due to a lower current LTV ratio.

WAFF And WALS Levels

Rating level	WAFF (%)	WALS (%)	CC (%)
AAA	13.80	2.00	0.28
AA	9.38	2.00	0.19
A	7.25	2.00	0.14
BBB	5.02	2.00	0.10
BB	2.80	2.00	0.06
B	2.26	2.00	0.05

WAFF--Weighted-average foreclosure frequency. WALS--Weighted-average loss severity. CC--Credit coverage.

Loan-level arrears currently stand at 1.2%, and they have started stabilizing after increasing in April 2020. Overall delinquencies remain well below our Spanish RMBS index (see "Related Research"). The transaction has a high number of loans that defaulted during the financial crisis,

TDA CAM 8 Class B And C Spanish RMBS Notes Ratings Raised; Class A And D Ratings Affirmed

and a portion of these still need to be worked out. In our model, the WAFF is calculated based on the performing pool, while we assumed 50% on the defaulted assets.

The transaction is amortizing on a pro rata basis given the stable recent credit performance, with a fully funded reserve fund and low level of total arrears.

The class A, B, and C notes' credit enhancement has increased to 20.7%, 9.0%, and 4.2%, respectively, from 19.1%, 7.3%, and 2.6% since our previous review (see "Related Research"). The class D notes are not asset-backed as they were used at closing to fund the reserve fund.

Our operational, sovereign, and legal risk analysis remains unchanged since our previous review, and those rating pillars do not constrain the ratings on the notes. There are no rating caps due to counterparty risk.

Banco de Sabadell S.A. is the servicer in this transaction and JP Morgan Securities PLC is the swap counterparty. The hedge agreement mitigates basis risk arising from the different indexes between the securitized assets and the notes. In addition, JP Morgan Securities pays a margin of 65 basis points.

The application of our criteria and related credit and cash flow analysis indicates that the available credit enhancement for the class A notes is still commensurate with a 'AAA (sf)' rating. We have therefore affirmed our rating on the class A notes.

The class B and C notes experienced interest shortfalls following their interest deferral trigger breaches. Consequently, interest payments on the class B and C notes became subordinated in the priority of payments and defaulted between the May 2013 and the August 2017 and November 2017 payment dates, respectively. Due to recoveries and the negative interest rate environment, interest amounts due on these classes of notes have since fully repaid. Since then, interest payments on these classes of notes have continued, and will continue to be subordinated in the priority of payments until the amortization of their respective senior notes, but will remain senior to the reserve fund, which has been fully topped up.

Due to the negative three-month Euro Interbank Offered Rate (EURIBOR; the index to which the notes are referenced) in the past, no interest is due for the class B and C notes. Given the transaction's stable performance, with incoming recoveries that have repaid all due amounts on the class B and C notes in 2017, and a replenishment of the reserve fund, we do not expect these tranches to default again in the short term. Since our previous review, the reserve fund remains at its floor value, providing liquidity for the class A to C notes. The current reserve fund covers five years of senior fees in the transaction, which is higher than other Spanish transactions given the high level of defaults experienced historically.

Today's upgrades of the class B and C notes to 'BB- (sf)' and 'B (sf)', respectively, follow the implementation of our criteria and assumptions for assessing pools of Spanish residential loans (see "Related Criteria").

Under our cash flow analysis, the class B and C notes could withstand stresses at higher ratings than those currently assigned. However, we have limited our upgrades based on the position of timely interest payments in the waterfall, which are subordinated to the principal payments of the class A to C notes until the class B and C notes become the most senior. Increased defaults may result in reserve fund draws exposing classes B and C to liquidity risks.

In addition, the class C notes are subordinated to the class B notes and our ratings reflect the effect that a slowdown in recoveries and subsequent potential reserve fund depletion could have on these classes of notes.

The issuer used the class D notes at closing to fund the reserve fund. All the previous unpaid

TDA CAM 8 Class B And C Spanish RMBS Notes Ratings Raised; Class A And D Ratings Affirmed

interest has been repaid. However, in line with our principles of credit rating criteria, we believe the class D notes are highly likely to miss timely interest payments as they fully depend on excess spread and do not benefit from a reserve fund. We have therefore affirmed our 'D (sf)' rating on the class D notes.

TDA CAM 8 is a Spanish RMBS transaction, which closed in June 2007. Caja de Ahorros del Mediterráneo (CAM), now merged with Banco de Sabadell, originated the pool, which comprises loans granted to borrowers secured over vacation homes and owner-occupied residential properties in CAM's home market of Valencia.
