

AUDAX RENOVABLES, S.A.

In accordance with the provisions of article 227 of the revised text of the Securities Market Act, approved by Royal Legislative Decree 4/2015, of October 23, Audax Renovables, S.A. (the "**Company**") communicates the following:

OTHER RELEVANT INFORMATION

Audax Renovables (ADX.MC), a vertically integrated Spanish energy group that generates 100% renewable energy and supplies electricity and gas, has announced the commissioning of four photovoltaic plants located in Torija, in the province of Guadalajara. With a total capacity of 20 MWp, the Alberizas I, II, III and IV photovoltaic plants have 59,760 solar panels installed and will produce 32.44 GWh of energy per year, equivalent to the annual consumption of more than 9,400 homes.

The company is continuing with its strategy of focusing on generation activity and expects the plant to come on stream in a few weeks and begin to feed energy into the grid.

In the same vein, it should be noted that the company continues to work on the construction and commissioning of three other plants in Spain: Calañas in the province of Huelva, with a capacity of 4.48 MWp; and another two in the province of Toledo: Los Arenales (5 MWp) and El Toconal (5 MWp).

In addition, the group is already preparing the start of construction of its next projects in Spain, having closed the contracting of components and construction contracts with leading operators, in line with the roadmap set out in its Strategic Plan.

Over the coming weeks, the Group will continue to inform the market on a regular basis about the progress of the projects in its portfolio, in order to keep its stakeholders and its investors permanently informed.

Badalona (Barcelona), November 30th, 2021

Francisco José Elías Navarro
Chairman of the Board of Directors
of Audax Renovables, S.A.
