Glossary (I/V)

In addition to the financial information prepared in accordance with International Financial Reporting Standards (IFRS), this document includes certain Alternative Performance Measures (APMs) as defined in the guidelines on Alternative Performance Measures issued by the European Securities and Markets Authority on 30 June 2015 (ESMA/2015/1057) (the "ESMA Guidelines"). CaixaBank uses certain APMs, which have not been audited, for a better understanding of the company's financial performance. These measures are considered additional disclosures and in no case replace the financial information prepared under IFRS. Moreover, the way the Group defines and calculates these measures may differ to the way similar measures are calculated by other companies. Accordingly, they may not be comparable. ESMA guidelines define an APM as a financial measure of historical or future performance, financial position, or cash flows, other than a financial measure defined or specified in the applicable financial reporting framework. In accordance with these guidelines, following is a list of the APMs used, along with a reconciliation between certain management indicators and the indicators presented in the consolidated financial statements prepared under IFRS.
