Interim Consolidated Management Report
for the nine months ended September 30, 2022**

REPORT ON LIMITED REVIEW OF CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(Translation from the original in Spanish. In the event of discrepancy, the Spanish-language version prevails.)

To the shareholders of Banco Bilbao Vizcaya Argentaria, S.A. at the request of its Board of Directors:

Report on the condensed interim consolidated financial statements

Introduction

We have carried out a limited review of the accompanying condensed interim consolidated financial statements (the "interim financial statements") of Banco Bilbao Vizcaya Argentaria, S.A. (the "Bank") and subsidiaries which, along with the Bank, form the Banco Bilbao Vizcaya Argentaria Group (the "Group"), which comprise the condensed consolidated balance sheet as of September 30, 2022, the condensed consolidated income statement, the condensed consolidated statement of recognized income and expenses, the condensed consolidated statement of changes in equity, the condensed consolidated statement of cash flows and the notes to the accompanying condensed interim consolidated financial statements corresponding to the nine-month period then ended. Pursuant to article 12 of Royal Decree 1362/2007, the Directors are responsible for the preparation of these interim financial statements in accordance with International Accounting Standard (IAS) 34, Interim Financial Reporting, as adopted by the European Union. Our responsibility is to express a conclusion on said interim financial statements based on our limited review.

Scope of the review

We conducted our limited review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A limited review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A limited review is substantially less in scope than an audit conducted in accordance with prevailing audit regulations in Spain and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on the accompanying interim financial statements.

Conclusion

As a result of our limited review, which under no circumstances should be considered an audit of financial statements, nothing came to our attention that would lead us to conclude that the accompanying interim financial statements for the nine-month period ended as of September 30, 2022 are not prepared, in all material respects, in conformity with International Accounting Standard (IAS) 34, Interim Financial Reporting, as adopted by the European Union, for the preparation of interim condensed financial statements, pursuant to article 12 of Royal Decree 1362/2007.

Emphasis of matter

We draw attention to the matter described in accompanying explanatory note 1, which indicates that these interim financial statements do not include all the information that would be required for complete financial statements prepared in accordance with International Financial Reporting Standards, as adopted by the European Union and therefore, the accompanying interim financial statements should be read in conjunction with the Group's consolidated annual accounts for the year ended December 31, 2021. This matter does not modify our conclusion.

Report on other legal and regulatory requirements

The accompanying interim consolidated management report for the nine-month period ended September 30, 2022 contains such explanations as the Directors of the Bank consider relevant with respect to the significant events that have taken place in this period and their effect on the interim financial statements, as well as the disclosures required by article 15 of Royal Decree 1362/2007. The interim consolidated management report is not an integral part of the interim financial statements. We have verified that the accounting information contained therein is consistent with the interim financial statements for the nine-month period ended September 30, 2022. Our work is limited to the verification of the interim consolidated management report within the scope described in this paragraph and does not include a review of information other than that obtained from the accounting records of Banco Bilbao Vizcaya Argentaria, S.A. and subsidiaries.

Paragraph on other matters

This report has been prepared at the request of the Bank's Board of Directors in relation to the publication of the quarterly financial report voluntarily prepared by the Directors of the Bank.

The consolidated annual accounts of Banco Bilbao Vizcaya Argentaria, S.A. and subsidiaries for the year ended December 31, 2021 were audited by other auditors that expressed an unqualified opinion on said consolidated annual accounts on February 11, 2022. Additionally, the condensed interim consolidated financial statements of Banco Bilbao Vizcaya Argentaria, S.A. and subsidiaries for the nine-month period ended September 30, 2021 were reviewed by other auditors that expressed a favourable conclusion on said interim financial statements on October 29, 2021.

ERNST & YOUNG, S.L.

The accompanying Notes and Appendices are an integral part of the condensed interim consolidated financial statements as of and for the nine months ended September 30, 2022.

Notes to the condensed interim consolidated financial statements as of and for the nine months ended September 30, 2022

1. Introduction, basis for the presentation of the condensed interim consolidated financial statements and other information

1.1. Introduction

Banco Bilbao Vizcaya Argentaria, S.A. (hereinafter "the Bank", "BBVA" or "BBVA, S.A.") is a private-law entity subject to the laws and regulations governing banking entities operating in Spain. It carries out its activity through branches and agencies across the country and abroad.

The Bylaws and other public information are available for inspection at the Bank's registered address (Plaza San Nicolás, 4, Bilbao) as noted on its web site (www.bbva.com).

In addition to the activities it carries out directly, the Bank heads a group of subsidiaries, joint ventures and associates which perform a wide range of activities and which together with the Bank constitute the Banco Bilbao Vizcaya Argentaria Group (hereinafter "the Group" or "the BBVA Group"). In addition to its own separate financial statements, the Bank is required to prepare consolidated financial statements comprising all consolidated subsidiaries of the Group.

The consolidated financial statements of the BBVA Group for the year ended December 31, 2021 were approved by the shareholders at the Annual General Meeting ("AGM") on March, 18, 2022.

1.2. Basis for the presentation of the condensed interim consolidated financial statements

The BBVA Group's condensed interim consolidated financial statements (hereinafter the "Consolidated Financial Statements") as of and for the nine-month period ended September 30, 2022 are presented in accordance with the International Accounting Standard 34 "Interim Financial Reporting" (hereinafter "IAS 34"), pursuant to article 12 of Royal Decree 1362/2007 as regards the preparation of condensed interim financial information and taking into account the requirements of Circular 3/2018, of June 28, of the Spanish Securities and Exchange Commission (CNMV) and have been approved by the Board of Directors at its meeting held on October 27, 2022. In accordance with IAS 34, the interim financial information is prepared solely for the purpose of updating the last annual consolidated financial statements, focusing on new activities, events and circumstances that occurred during the period without duplicating the information previously published in those consolidated financial statements.

Therefore, the accompanying Consolidated Financial Statements do not include all information required by a complete set of consolidated financial statements prepared in accordance with International Financial Reporting Standards endorsed by the European Union (hereinafter "EU-IFRS"), consequently for an appropriate understanding of the information included in them, they should be read together with the consolidated financial statements of the Group as of and for the year ended December 31, 2021.

The aforementioned annual consolidated financial statements were prepared in accordance with the EU-IFRS applicable as of December 31, 2021, considering the Bank of Spain Circular 4/2017, as well as its successive amendments, and with any other legislation governing financial reporting which is applicable and with the format and mark-up requirements established in the EU Delegated Regulation 2019/815 of the European Commission.

The accompanying Consolidated Financial Statements were prepared applying principles of consolidation, accounting policies and valuation criteria, which, as described in Note 2, are the same as those applied in the consolidated financial statements of the Group as of and for the year ended December 31, 2021, taking into consideration the new Standards and Interpretations that became effective from January 1, 2022 (see Note 2.1), so that they present fairly the Group's consolidated equity and financial position as of September 30, 2022, together with the consolidated results of its operations and the consolidated cash flows generated by the Group during the nine months ended September 30, 2022.

The Consolidated Financial Statements and explanatory Notes were prepared on the basis of the accounting records kept by the Bank and each of the other entities in the Group. They include the adjustments and reclassifications required to harmonize the accounting policies and valuation criteria used by the entities in the Group.

All effective accounting standards and valuation criteria with a significant effect in the Consolidated Financial Statements were applied in their preparation.

The amounts reflected in the accompanying Consolidated Financial Statements are presented in millions of euros, unless it is more appropriate to use smaller units. Therefore, some items that appear without a balance in these Consolidated Financial Statements are due to how the units are expressed. Also, in presenting amounts in millions of euros, the accounting balances have been rounded up or down. It is therefore possible that the totals appearing in some tables are not the exact arithmetical sum of their component figures.

The percentage changes in amounts have been calculated using figures expressed in thousands of euros.

When determining the information to disclose about various items of the Consolidated Financial Statements, the Group, in accordance with IAS 34, has taken into account their materiality in relation to the Consolidated Financial Statements.

1.3. Comparative information

The information included in the accompanying Consolidated Financial Statements and the explanatory Notes relating to December 31, 2021 and September 30, 2021, is presented for the purpose of comparison with the information for September 30, 2022.

1.4. Responsibility for the information and for the estimates made

The information contained in the BBVA Group's Consolidated Financial Statements is the responsibility of the Group's Directors.

Estimates were required to be made at times when preparing these Consolidated Financial Statements in order to calculate the recorded or disclosed amount of some assets, liabilities, income, expense and commitments. These estimates relate mainly to the following:

- Loss allowances on certain financial assets (see Notes 6, 11, 12, 13 and 14).
- The assumptions used to quantify certain provisions (see Notes 21 and 22) and for the actuarial calculation of post-employment benefit liabilities and other commitments (see Note 23).
- The useful life and impairment losses of tangible and intangible assets (see Notes 15, 16 and 19).
- The valuation of goodwill and price allocation of business combinations (see Note 16).
- The fair value of certain unlisted financial assets and liabilities (see Notes 6, 7, 9, 10, 11 and 12).
- The recoverability of deferred tax assets (see Note 17).

The great uncertainty associated to the geopolitical strains and the COVID-19 pandemic (see Note 6.1) entails a greater complexity of developing reliable estimations and applying judgment. Therefore, these estimates have been made on the basis of the best available information on the matters analyzed, as of September 30, 2022. However, it is possible that events may take place in the future which could make it necessary to amend these estimations (upward or downward), which would be carried out prospectively, recognizing the effects of the change in estimation in the corresponding consolidated income statement.

During the nine-month period ended on September 30, 2022 there have been no significant changes in the estimates made at the end of the 2021 financial year, other than those indicated in these Consolidated Financial Statements.

1.5. Related party transactions

The information related to these transactions is presented in Note 53 of the consolidated financial statements of the Group for the year ended December 31, 2021.

As financial institutions, BBVA and other entities in the Group engage in transactions with related parties in the regular course of their business. None of these transactions are considered significant and the transactions are carried out under normal market conditions.

1.6. Separate condensed interim financial statements

The separate financial statements of the parent company of the Group (Banco Bilbao Vizcaya Argentaria, S.A.) are prepared under Spanish regulations (Circular 4/2017 of the Bank of Spain, as amended thereafter, and following other regulatory requirements of financial information applicable to it).

Appendix I shows the condensed interim financial statements of Banco Bilbao Vizcaya Argentaria, S.A. as of and for the nine months ended September 30, 2022.

2. Principles of consolidation, accounting policies, measurement bases applied and recent IFRS pronouncements and interpretations

The accounting policies and methods applied for the preparation of the accompanying Consolidated Financial Statements do not differ significantly to those applied in Note 2 of the consolidated financial statements of the Group for the year ended December 31, 2021, except for the application of IAS 29 "Financial Reporting in Hyperinflationary Economies" to the financial statements of the companies that the BBVA Group maintains in Turkey, and due to the entry into force of new standards and interpretations in the year 2022.

2.1. Standards and interpretations that became effective in the first nine months of 2022

Turkey

In accordance with the criteria established in IAS 29 "Financial Reporting in Hyperinflationary Economies", to determine whether an economy has a high inflation rate the country's economic situation is examined, analyzing whether certain circumstances are fulfilled, such as whether the general population prefers to keep its wealth or savings in non-monetary assets or in a relatively stable foreign currency, whether prices may be quoted in that currency, whether interest rates, wages and prices are linked to a price index or whether the cumulative inflation rate over three years is approaching or exceeds 100%. The fact that any of these circumstances is fulfilled will not be a decisive factor in considering an economy hyperinflationary, but it does provide some reasons to consider it as such.

Since June 30, 2022, Turkey's economy is considered hyperinflationary based on the criteria mentioned above. As a result, the financial statements of the BBVA Group's entities located in Turkey are adjusted to correct them for the effects of inflation, in accordance with IAS 29, with retrospective application from January 1, 2022. This means that:

- The historical cost of non-monetary assets and liabilities (see Notes 15, 16 and 17), assets contractually linked to changes in prices and various headings in equity should be adjusted to reflect changes in the purchasing power of the currency due to inflation from their date of acquisition or inclusion in the consolidated balance sheet, or if this is later, with the limit of its recoverable value. The restatement were made using the Consumer Price Index published by the Turkish Statistical Institute.
- The different lines of the income statement were adjusted by the inflation index since their inception, with a corresponding entry under the heading "Accumulated other comprehensive income (loss)".
- The loss of the net monetary position, which represents the loss of purchasing power of the entity due to maintaining an excess of monetary assets not linked to inflation (mainly loans, credits and bonds) over monetary liabilities, was recognized in the line "Other operating expense" in the income statement and with a credit to "Accumulated other comprehensive income (loss)".
- All the components of the financial statements of the subsidiaries were converted at the closing exchange rate, registering the conversion differences to the euro within "Accumulated other comprehensive income (loss)" as stated in IAS 21.
- The figures for years prior to 2022 were not modified since the Group's presentation currency is the euro.

The combined result derived from the application of the above criteria amounted to a loss of €2,205 million, of which €1,380 million was attributed to the parent company of the Group. This impact included mainly the loss of the net monetary position, which amounted to a gross amount of €2,070 million and was recorded in the line "Other operating expense" in the consolidated income statement, partially offset by the positive impact of the revaluation of certain bonds linked to inflation, for a gross amount of €1,351 million, given that, under IAS 29, these types of bonds are considered protective assets (see Note 33).

The first application of IAS 29 in the Turkish subsidiaries led to an increase in equity of €130 million as of January 1, 2022, and is mainly the result of the revaluation of tangible assets and inflation-linked bonds.

Accumulated inflation in the first nine months of 2022 stood at 52.4% and the exchange rate used as of September 30, 2022 was 18.08 Turkish lira per euro.

Minor changes to IFRS Standards (IAS 37 Provisions - Onerous Contracts, IAS 16 Property, Plant and Equipment and IFRS 3 Business Combinations) and Annual Improvements to IFRS 2018-2020 (IFRS 1 - First application of IFRS, IFRS 9 Financial Instruments, IAS 41 Agriculture and modifications to the illustrative examples of IFRS 16 - Leases)

From January 1, 2022, the following amendments to the IFRS standards or their interpretations (hereinafter "IFRIC") became effective:

The IASB has issued minor amendments and improvements to various IFRS to clarify the wording or correct minor consequences, oversights or conflicts between the requirements of the Standards as of January 1, 2022. The modified standards are: IAS 37 Provisions, IAS 16 Property, Plant and Equipment, IFRS 3 Business Combination, IFRS 1 First application of IFRS, IFRS 9 Financial Instruments, IAS 41 Agriculture and IFRS 16 Leases.

The amendments are effective for annual reporting periods beginning on or after January 1, 2022, with no significant impact on the BBVA Group's consolidated financial statements.

2.2. Standards and interpretations issued but not yet effective as of September 30, 2022

The following new International Financial Reporting Standards together with their Interpretations or Modifications had been published at the date of preparation of the accompanying Consolidated Financial Statements, but are not mandatory as of September 30, 2022. Although in some cases the International Accounting Standards Board (hereinafter IASB) IASB allows early adoption before their effective date, the BBVA Group has not proceeded with this option for any such new standards.

IFRS 17 – Insurance contracts

In May 2017, the IASB issued the new accounting standard for insurance contracts, which was later amended in June 2020, with the aim of helping entities in the implementation of the standard and to facilitate the understanding of the financial statements, although the amendment maintained the fundamental principles of the original standard. An entity shall apply IFRS 17 for annual reporting periods beginning on or after January 1, 2023 (with at least one year of comparative information). The standard has already been adopted by the European Union.

IFRS 17 establishes the accounting principles for insurance contracts. This new standard supersedes IFRS 4, by introducing substantial changes in the accounting of insurance contracts with the aim of achieving greater homogeneity and increasing comparability among entities.

Unlike IFRS 4, the new standard establishes minimum requirements for grouping insurance contracts for the purposes of their recognition and measurement, determining the units of account by considering three levels: portfolios (contracts subject to similar risks and managed together), annual cohorts and their possibility of becoming onerous.

Regarding the measurement model, the new standard contemplates several methods, being the General Model (Building Block Approach) the method that will be applied by default for the valuation of insurance contracts, unless the conditions are given to apply any of the two other methods: the Variable Fee Approach, or the Simplified Model (Premium Allocation Approach).

With the implementation of IFRS 17, the valuation of insurance contracts will be based on a model that will use updated assumptions at each balance sheet date.

The General Model requires entities to value insurance contracts for the total of:

- fulfillment cash flows, which comprise the estimation of future cash flows discounted to reflect the time value of money, the financial risk associated with future cash flows, and a risk adjustment for non-financial risk that would represent the compensation required for the uncertainty associated with the amount and timing of the expected cash flows;
- and the contractual service margin, which represents the expected unearned benefit from the insurance contracts, which will be recognized in the entity's income statement as the service is provided in the future, instead of being recognized at the time of the estimation.

The amounts recognized in the income statement shall be classified into insurance revenue, insurance service expenses and insurance finance income or expenses, assuming a relevant change with respect to the current disclosures as concepts such as volume of premiums and variation in technical provisions disappear. Insurance revenue and insurance service expenses shall exclude any investment components. Insurance revenue shall be recognized over the period the entity provides insurance coverage.

Since 2019, the Group has been developing a project to implement IFRS 17 in order to harmonize the criteria in the Group and with the participation of all involved areas and countries. A sound governance has been established in this project, through a Global Steering Committee with representation from the senior management of the affected areas and countries, which periodically reviews its progress. At the local level, each geography has defined a local governance structure with the participation of senior management.

The Group continues with the planned roadmap for the implementation of the standard, progressing during the years 2019, 2020 and 2021 with the definition of criteria, the actuarial modelling of cash flows and components required by the standard, the data supply, the systems technological adaptation, the preparation of accounting information, the governance of the reporting process to the Group and the development of the transition.

In 2022, the Group continues advancing with the tasks mentioned above according to the planning carried out. Additionally, the Group is focusing on the preparation of the parallel of the financial statements under IFRS 17, as well as on the calculation of the transition impact on the consolidated financial statements.

From the heading liabilities under insurance contracts held as of December 31, 2021, the Group estimates that approximately 89% correspond to long-term commitments that will be valued using the Building Block Approach. These contracts will be valued in transition using the fair value approach, given the disproportionate cost and difficulty of obtaining the historical data necessary to apply a full retrospective approach given the age of these products on the balance sheet and their remaining duration. Its impact in transition will come mainly from the "interest rate effect", resulting from the valuation of long-term insurance liabilities by the difference between the locked-in rate and the current rate, as the Group has chosen the option to disaggregate the financial income or expense of the insurance between the income statements and accumulated other comprehensive income. This effect will be partly offset by the associated financial assets, in some cases by the elimination of shadow accounting and, in others, by the fair value measurement of certain financial asset portfolios, in order to mitigate accounting asymmetries.

On the other hand, another part of the impact, although to a lesser extent, will come from the different hypotheses used with respect to the calculations under IFRS 4, including the additional components to it. The part from the identification of products classified as "onerous" is considered immaterial.

Regarding short-term contracts as of December 31, 2021, it is estimated that they represent approximately 11% of the total liabilities covered by the Group's insurance contracts. These will be valued by the Premium Allocation Approach, and in transition following the full retrospective approach, although no significant differences are expected in their accounting compared to the current situation.

Lastly, the Group expects that the contracts valued by the Variable Fee Approach represent a residual amount.

Consequently, the differences in accumulated other comprehensive income and in retained earnings will basically come from long-term contracts, although a significant impact on the Group's equity is not expected.

The Group does not plan to adopt the European exception on annual cohorts in cash-flow matched products.

Amendments to IAS 1 "Presentation of financial statements" and IAS 8 "Accounting policies, changes in accounting estimates and errors"

In February 2021 the IASB issued amendments to these standards with the aim of improving the quality of the disclosures in relation to the accounting policies applied by the entities with the ultimate aim of providing useful and material information in the financial statements.

The amendments to IAS 1 require companies to disclose their material accounting policy information rather than their significant accounting policies and include guidance on how to apply the concept of materiality to accounting policy disclosures. The amendments to IAS 8 also clarify how companies should distinguish changes in accounting policies from changes in accounting estimates. The amendments will be effective for annual reporting periods beginning on or after 1 January 2023. No significant impact is expected on BBVA's consolidated financial statements.

Amendment to IAS 12 "Accounting for deferred tax"

The IASB has issued an amendment to IAS 12 that clarifies how companies account for deferred tax on transactions such as leases and decommissioning obligations.

The amendments clarify that companies are required to recognize deferred tax on such transactions. The aim of the amendments is to reduce diversity in the reporting of deferred tax on leases and decommissioning obligations. The amendments will be effective for annual reporting periods beginning on or after 1 January 2023, with early application permitted. No significant impact is expected on the BBVA Group's consolidated financial statements.

Amendment to IFRS 16 "Leases"

The IASB has issued an amendment to IFRS 16 that clarifies the requirements for sale and leaseback transactions. The new requirements established that the seller-lessee shall determine 'lease payments' or 'revised lease payments' in a way that the seller-lessee would not recognize any amount of the gain or loss that relates to the right of use retained by the seller-lessee. The amendments will be effective for annual reporting periods beginning on or after 1 January 2024, with early application permitted. No significant impact is expected on the BBVA Group's consolidated financial statements.

3. BBVA Group

The BBVA Group is an international diversified financial group with a significant presence in retail banking, wholesale banking and asset management. The Group also operates in the insurance sector.

The following information is detailed in the Appendices to the consolidated financial statements of the Group for the year ended December 31, 2021:

- Appendix I shows relevant information related to the consolidated subsidiaries and structured entities.
- Appendix II shows relevant information related to investments in joint ventures and associates accounted for using the equity method.
- Appendix III shows the main changes and notification of investments and divestments in the BBVA Group.
- Appendix IV shows fully consolidated subsidiaries with more than 10% owned by non-Group shareholders.

The BBVA Group's activities are mainly located in Spain, Mexico, South America and Turkey, with an active presence in other areas of Europe, The United States and Asia (see Note 5).

Significant transactions in the first nine months of 2022

Investments

Announcement of the agreement with Neon Payments Limited

On February 14, 2022, BBVA announced the agreement with the company "Neon Payments Limited" ("the Company" in this section) for the subscription of 492,692 preference shares, representing approximately 21.7% of its share capital, through a share capital increase and in consideration of approximately USD 300 million (equal to approximately €263 million, using the applicable 1.14 EUR/USD exchange rate as of February 11, 2022). Despite owning more than 20% of the share capital, BBVA's ability to influence Neon Payments Limited financial and operating decisions policies is very limited, so the investment is recognized under the heading "Non-trading financial assets mandatorily at fair value through profit or loss".

Neon Payments Limited, a company incorporated and domiciled in the United Kingdom, is the owner of 100% of the shares of the Brazilian company "Neon Pagamentos S.A.".

As of February 14, 2022, BBVA was already the indirect owner of approximately 10.2% of the share capital of the Company (through "Propel Venture Partners Global, S.L." and "Propel Venture Partners Brazil, S.L."). BBVA owns more than 99% of the share capital of these two companies), consequently, once the subscription was completed, BBVA holds, direct and indirectly, approximately 29.7% (equal to approximately 25.6% of the share capital on a fully diluted basis) of the share capital of the Company.

Voluntary takeover bid for the entire share capital of Turkey Garanti Bankası A.Ş (Garanti BBVA)

On November 15, 2021, BBVA announced a voluntary takeover bid (hereinafter "VTB") addressed to the 2,106,300,000 shares¹ not controlled by BBVA, which represented the 50.15% of the total share capital of Turkey Garanti Bankası A.Ş (hereinafter "Garanti BBVA"). BBVA submitted for authorization an application of the VTB to the supervisor of the securities markets in Turkey (Capital Markets Board, hereinafter "CMB") on November 18, 2021.

On March 31, 2022, CMB approved the offer information document and, on the same day, BBVA announced the commencement of the VTB acceptance period on April 4, 2022. On April 25, 2022 BBVA informed of an increase of the cash offer price per Garanti BBVA share from the initially announced (12.20 Turkish lira) to 15.00 Turkish lira.

On May 18, 2022, BBVA announced the finalization of the offer acceptance period, with the acquisition of 36.12% of Garanti BBVA's share capital. The total amount paid by BBVA was approximately 22,758 million Turkish lira (equivalent to approximately €1,390 million² including the expenses associated with the transaction and net of the collection of the dividends corresponding to the stake acquired).

The transaction resulted in a capital gain of approximately €924 million (including the impacts after the application of IAS 29, see Note 2.1). An amount of €3,609 million was recorded under the heading "Other reserves" and there was a reclassification to "Accumulated other comprehensive income (loss)" corresponding to the 36.12% acquired from minority interests to "Accumulated other comprehensive income (loss)" of the parent company for an amount of €-2,685 million. The total derecognition associated with the transaction of the heading "Minority interests" considering "Other items" and "Accumulated other comprehensive income (loss)" amounted to €-2,541 million.

The percentage of total share capital of Garanti BBVA owned by BBVA (after the VTB) was 85.97%.

In relation to the rest of the effects of the application of IAS 29 "Financial Reporting in hyperinflationary economies" on the entities of the Group in Turkey, see Note 2.1 to these Consolidated Financial Statements.

Significant transactions in 2021

Divestitures

Sale of BBVA's U.S. subsidiary to PNC Financial Service Group

On June 1, 2021, after obtaining all the required authorizations, BBVA completed the sale to The PNC Financial Services Group, Inc. of 100% of the capital stock of its subsidiary BBVA USA Bancshares, Inc., which in turn owned all the capital stock of the bank, BBVA USA.

The consideration received in cash by BBVA amounted to approximately 11,500 million USD (price provided in the agreement minus the agreed closing price adjustments) equivalent to approximately €9,600 million (with an exchange rate of 1.20 EUR / USD).

¹ All references to "shares" or "share" shall be deemed made to lots of 100 shares, which is the trading unit in which Garanti BBVA shares are listed at Borsa Istanbul.

² Using the effective exchange rate of 16.14 Turkish lira per euro.

The accounting of both the results generated by BBVA USA Bancshares since the announcement of the transaction and the closing of its sale has had an aggregate positive impact on the BBVA Group's Common Equity Tier 1 ("fully loaded") ratio of approximately 294 basis points, which includes the generation of capital contributed by the subsidiary to the Group until the closing of the transaction (on June 1, 2021) and a profit net of taxes of €582 million. As a result thereof, the BBVA Group has been reflecting the results that BBVA USA Bancshares, Inc. has been generating, as well as the positive impact, mainly, of these results on the Common Equity Tier 1 ("fully loaded") ratio of BBVA Group. The calculation of the impact on Common Equity Tier 1 was made taking into account the amount of the transaction in euros and BBVA Group's financial statements as of June 2021.

The BBVA Group continues to develop an institutional and wholesale business in the United States that it currently carries out through its broker-dealer BBVA Securities Inc. and the New York branch. BBVA also maintains its investment activity in the fintech sector through its participation in Propel Venture Partners US Fund I, L.P.

Note 21 of the consolidated financial statements of the Group for the year ended December 31, 2021 showed a breakdown of the financial information of the companies sold in the United States as of December 31, 2021, 2020 and 2019 and the results of those companies as of and for the first five months of 2021 and the years ended 2020 and 2019.

4. Shareholder remuneration system

BBVA's Board of Directors announced, on November 18, 2021, the amendment of the Group's shareholder remuneration policy, which was communicated through relevant information on February 1, 2017, establishing as a new policy to distribute annually between 40% and 50% of the consolidated ordinary profit for each year (excluding amounts and items of an extraordinary nature included in the consolidated income statement), compared to the previous policy that established a distribution between 35% and 40%.

This policy is implemented through the distribution of an interim dividend for the year (which is expected to be paid in October of each year) and a final dividend or final distribution (which is expected to be paid at the end of the year and once the application of the result is approved, foreseeably in April of each year), with the possibility of combining cash distributions with share buybacks (the execution of the share buyback program scheme described below is considered as extraordinary shareholder remuneration and is therefore not included in the scope of the policy), all subject to the corresponding authorizations and approvals applicable at any given time.

The Annual General Meeting of BBVA held on March 18, 2022, approved, under item 2 of the Agenda, a cash distribution from the voluntary reserves account as additional shareholder remuneration for the 2021 fiscal year, for an amount equal to €0.23 (€0.1863 net of withholding tax) per outstanding BBVA share entitled to participate in this distribution, which was paid on April 8, 2022. The total amount paid amounted to €1,463 million.

The Board of Directors, at its meeting held on September 28, 2022, resolved the payment of a cash interim dividend of €0.12 (€0.0972 net of withholding tax) per outstanding BBVA share against 2022 results.

Share buyback program

On October 26, 2021, BBVA obtained the pertinent authorization from the European Central Bank (hereinafter "ECB") to buy back up to 10% of its share capital for a maximum of €3,500 million, in one or several tranches and over the course of a 12-month period (the "Authorization").

Upon receiving the authorization and making use of the delegation conferred by the BBVA Annual General Meeting held on March 16, 2018, at its meeting of October 28, 2021, BBVA Board of Directors resolved to carry out a share buyback program scheme in compliance with Regulation (EU) no. 596/2014 of the European Parliament and the Council of April 16, 2014 on market abuse and Delegate Regulation (EU) no. 2016/1052 of the Commission, of March 8, 2016, executed in various tranches up to a maximum of €3,500 million, with the aim of reducing BBVA's share capital (the "Program Scheme"), notwithstanding the possibility of terminating or cancelling the Program Scheme at an earlier date where advisable due to the concurrence of a series of specific circumstances, as well as to carry out a first share buyback program within the scope of the Program Scheme (the "First Tranche") for the purpose of reducing BBVA's share capital, which was notified by means of Inside Information on October 29, 2021.

On November 19, 2021, BBVA notified by means of Inside Information that the First Tranche would be executed externally, starting on November 22, 2021, through J.P. Morgan AG as lead manager, for a maximum amount of €1,500 million, for the purchase of a maximum number of shares of 637,770,016 representing, approximately, 9.6% of BBVA's share capital. By means of Other Relevant Information dated March 3, 2022, BBVA announced the completion of the execution of the First Tranche upon reaching the maximum monetary amount of €1,500 million, having acquired 281,218,710 own shares representing, approximately, 4.22% of BBVA's share capital as of that date. On June 15, 2022, BBVA notified the partial execution of the share capital reduction resolution adopted by the Annual General Shareholders' Meeting of BBVA held on 18 March 2022, through the reduction of BBVA's share capital in a nominal amount of €137,797,167.90 and the consequent redemption, charged to unrestricted reserves, of 281,218,710 own shares of €0.49 par value each acquired derivatively by the Bank in execution of the First Tranche and which were held in treasury shares (see Note 24).

On February 3, 2022, BBVA notified by means of Inside Information that its Board of Directors had agreed, within the scope of the Program Scheme, to carry out a second buyback program for the repurchase of own shares (the "Second Tranche") aimed at reducing BBVA's share capital, for a maximum amount of €2,000 million and a maximum number of shares to be acquired equal to the result of subtracting from 637,770,016 own shares (9.6% of BBVA's share capital at that date) the number of own shares finally acquired in execution of the First Tranche.

As a continuation of the previous communication, on March 16, 2022 BBVA informed by means of Inside Information that it had agreed to execute the Second Tranche: i) through the execution of a first segment for an amount of up to €1,000 million, and with a maximum number of shares to be acquired of 356,551,306 treasury shares (the "First Segment"), externally through Goldman Sachs International as lead manager, who would execute the purchase transactions through the broker Kepler Cheuvreux, S.A.; and (ii) once execution of the First Segment has been completed, through the execution of a second segment that would complete the Framework Program (the "Second Segment").

By means of Other Relevant Information dated May 16, 2022, BBVA announced the completion of the execution of the First Segment upon reaching the maximum monetary amount of €1,000 million, having acquired 206,554,498 shares representing, approximately, 3.1% of BBVA's share capital as of said date.

On June 28, 2022, BBVA communicated through Inside Information the agreement to complete the Program Scheme by executing the Second Segment, for a maximum amount of €1,000 million and a maximum number of own shares to be acquired of 149,996,808. The execution of the Second Segment will take place through Citigroup Global Markets Europe AG as lead manager, as BBVA informed through Inside Information on June 29, 2022. By means of Other Relevant Information dated August 19, 2022, BBVA announced the completion of the execution of the Second Segment upon reaching the maximum number of shares of 149,996,808, representing, approximately, 2.3% of BBVA's share capital as of said date (amounted to approximately €660 million). On September 30, 2022, BBVA notified through Other Relevant Information an additional partial execution of the share capital reduction resolution adopted by the Annual General Shareholders' Meeting of BBVA held on 18 March 2022, through the reduction of BBVA's share capital in a nominal amount of €174,710,139.94 and the consequent redemption, charged to unrestricted reserves, of 356,551,306 own shares of €0.49 par value each acquired derivatively by the bank in execution of the First Segment and Second Segment and which were held in treasury shares (see Note 24).

5. Operating segment reporting

Operating segment reporting represents a basic tool for monitoring and managing the different activities of the BBVA Group. In preparing the information by operating segment, the starting point is the lowest-level units, which are aggregated in accordance with the organizational structure determined by the Group's Management to create higher-level units and, finally, the reportable operating segments themselves.

As of September 30, 2022, the structure of the information by operating segments reported by the BBVA Group remains the same as that of the closing of 2021 financial year.

The BBVA Group's operating segments and the agreements reached are summarized below:

- Spain includes mainly the banking and insurance business that the Group carries out in Spain, including the proportional share of results of the company that emerged from the bancassurance agreement reached with Allianz at the end of 2020.
- Mexico includes banking and insurance businesses in this country as well as the activity that BBVA Mexico carries out through its branch in Houston.
- Turkey reports the activity of Garanti BBVA group that is mainly carried out in this country and, to a lesser extent, in Romania and the Netherlands.
- South America mainly includes the banking and insurance activity carried out in the region.
- Rest of business mainly incorporates the wholesale activity carried out in Europe (excluding Spain) and the United States, as well as the banking business developed through the BBVA branches located in Asia.

The Corporate Center performs centralized Group functions, including: the costs of the head offices with a corporate function, management of structural exchange rate positions; portfolios whose management is not linked to customer relationships, such as financial and industrial holdings; stakes in Funds & Investment Vehicles in tech companies; certain tax assets and liabilities; funds for employee commitments; goodwill and other intangible assets, as well as the financing of such portfolios and assets. Additionally, the results obtained by the Group's businesses in the United States until the sale to PNC on June 1, 2021 (see Note 19), are presented in a single line under the heading "Profit (loss) after tax from discontinued operations" in the condensed consolidated income statement.

Finally, the costs related to the Banco Bilbao Vizcaya Argentaria, S.A. restructuring process carried out in Spain in 2021 are included in this aggregated area and are registered in the line "Provisions" (see Note 22) and for the nine months ended September 30, 2021 in the lines "Provisions or reversal of provisions", "Impairment or reversal of impairment on non-financial assets" and "Gains (losses) from non-current assets and disposal groups classified as held for sale not qualifying as discontinued operations", respectively (see Notes 37, 39 and 40).

With regard to the information related to the business areas, in the first quarter of 2022 the Group changed the allocation criteria for certain expenses related to global technology projects between the Corporate Center and the business areas, therefore, to ensure that year-on-year comparisons are homogeneous, the figures corresponding to the financial year 2021 have been restated, which did not affect the consolidated financial information of the Group. Also in the first quarter of 2022, an equity team from the Global Markets unit was transferred from Spain to New York, with the corresponding transfer of the costs associated with this relocation from the Spain area to the Rest of Business.

The accompanying Interim Consolidated Management Report presents the condensed consolidated income statements under management criteria, as well as the main figures of the consolidated balance sheets by operating segments.

6. Risk management

The principles and risk management policies, as well as tools and procedures established and implemented in the Group as of September 30, 2022 do not differ significantly from those included in Note 7 in the consolidated financial statements of the Group for the year ended December 31, 2021.

6.1 Risk factors

Macroeconomic and geopolitical risks

The Group is sensitive to the deterioration of economic conditions or the alteration of the institutional environment of the countries in which it operates, and especially Spain, Mexico and Turkey. Additionally, the Group is exposed to sovereign debt, especially in these areas. Furthermore, the Group has recently increased its shareholding stake in Turkey Garanti Bankası A.Ş. (Garanti BBVA) in an additional 36.12% (reaching 85.97%) as a result of the voluntary takeover bid for the shares of Garanti BBVA not already owned by BBVA announced in November 2021.

In addition to the significant macroeconomic problems triggered by the COVID-19 pandemic, the global economy is currently facing a number of extraordinary challenges. Russia's invasion of Ukraine, the largest military attack on a European state since World War II, has led to significant disruption, instability and volatility in global markets, as well as higher inflation (including by contributing to further increases in the prices of oil, gas and other commodities and further disrupting supply chains) and lower economic growth. The European Union, The United States and other governments have imposed significant sanctions and export controls against Russia and Russian interests and additional sanctions and controls cannot be ruled out.

The conflict represents a significant supply shock for the global economy, which is likely to reinforce the moderating trend in economic growth and add to ongoing inflationary pressures, mainly in European countries, due to their relatively significant economic ties with Ukraine and Russia. The economic effects are being felt mainly through the higher commodity prices, mainly of energy commodities, but also through the financial and confidence channels, as well as through a further deterioration of the problems in global supply chains.

While the Group's direct exposure to Ukraine and Russia is limited, the war could adversely affect the Group's business, financial condition and results of operations. Geopolitical and economic risks have also increased lately as a result of trade tensions between the United States and China, Brexit, the rise of populism, among others. Growing tensions may lead, among others things, to a deglobalization of the world economy, an increase in protectionism, a general reduction of international trade in goods and services and a reduction in the integration of financial markets, any of which could materially and adversely affect the Group's business, financial condition and results of operations.

Moreover, the world economy could be vulnerable to other factors such as the aggressive interest rate hikes by central banks due to growing and widespread inflationary pressures, which could cause a significant growth slowdown - and, even, a sharp economic recession - as well as financial crises. The central banks of many developed and emerging economies have significantly augmented policy rates over the last year and the process of tightening monetary conditions is likely to continue going forward in most economies. In the United States, the Federal Reserve has begun in March 2022 to adjust up the policy rate, which, according to BBVA Research, could converge towards around 4.75% by the beginning of 2023. In the Eurozone, between July and September, the ECB has increased its reference interest rates by 125 basis points.

Another risk is a sharp slowdown in the global GDP growth caused by a deceleration in the Chinese economy due to the potential restrictions on mobility adopted to try to control eventual new waves of coronavirus infections or other factors, such as the imbalances on real estate markets.

The Group bears, among others, the following general risks with respect to the economic and institutional environment in which it operates: a deterioration in economic activity in the countries in which it operates, including recession scenarios; more persistent inflationary pressures, which could trigger a more severe tightening of monetary conditions; stagflation due to more intense or prolonged supply crises; changes in exchange rates; an unfavorable evolution of the real estate market; very high oil and gas prices could have a negative impact on disposable income levels in areas that are net energy importers, such as Spain or Turkey, to which the Group is particularly exposed; changes in the institutional environment of the countries in which the Group operates could give rise to sudden and sharp drops in GDP and/or changes in regulatory or government policy, including in terms of exchange controls and restrictions on the distribution of dividends; a growth in the public debt or in the external deficit could lead to a downward revision of the credit ratings of the sovereign debt and even a possible default or restructuring of said debt; and episodes of volatility in the markets, which could cause the Group significant losses.

Risks relating to the political, economic and social conditions in Turkey

In May 2022, the Group increased its shareholding stake in Garanti BBVA (Turkey) from 49.85% to 85.97% following the completion of a voluntary takeover bid (see Note 3).

Turkey has, from time to time, experienced volatile political, economic and social conditions. As of the date of the approval of these Consolidated Financial Statements, Turkey is facing an economic crisis characterized by strong depreciation of the Turkish lira, high inflation (the Turkish Statistical Institute (TUIK) established the inflation rate at 52.4% for the nine months ended September 30, 2022; see Note 2.1 for information on the impact of the application of IAS 29), a soaring trade deficit, depletion of the central bank's foreign reserves and rising external financing costs. Continuing unfavorable economic conditions in Turkey, such as the accelerated inflation and devaluation of the Turkish lira, may result in a potential deterioration in the purchasing power and creditworthiness of our clients (both individual and corporate).

Additionally, certain ongoing geopolitical and domestic political factors, referred to in this section, as well as continuing regional conflicts (such as in Syria, Armenia/Azerbaijan), may pose further strain on the country's economy.

There can be no assurance that these and other factors will not have an impact on Turkey and will not cause further deterioration of the Turkish economy, which may have a material adverse effect on the Turkish banking sector and the Group's business, financial condition and results of operations in Turkey.

Risk associated with the COVID-19 pandemic

The COVID-19 (coronavirus) pandemic has adversely affected the world economy, and economic activity and conditions in the countries in which the Group operates. New waves of contagion continue to be a source of concern and the emergence of new strains remains a risk, although increasing vaccination rates may continue to reduce its impact on economic activity. Among other challenges, these countries are still dealing with some supply disruptions and increasing inflationary pressures, while public debt has increased significantly due to the support and spending measures implemented by the government authorities. Furthermore, there has been an increase in loan losses from both companies and individuals, which has so far been slowed down by the impact of government support measures, including bank payment deferrals, credit with public guarantee and direct aid measures. With the outbreak of COVID-19, the Group experienced a decline in its activity. For example, the granting of new loans to individuals decreased during lockdowns. In addition, in several countries, including Spain, the Group closed a significant number of its branches and reduced the opening hours of working with the public, with central services teams having to work remotely. While these measures were progressively reversed, additional restrictions on mobility could be adopted that affect the Group's operations. Furthermore, the Group has been and may be affected by the measures or recommendations adopted by regulatory authorities in the banking sector, such as variations in reference interest rates, the modification of prudential requirements, the temporary suspension of dividend payments, the modification of the payment deferrals and the granting of guarantees or public guarantees to credit operations for companies and self-employed persons, the adoption of further similar measures or modification or the termination of those already approved, as well as any changes in financial assets purchase programs by the ECB.

Furthermore, pandemics like the COVID-19 pandemic could adversely affect the business and transactions of third parties that provide critical services to the Group and, in particular, the higher demand and/or the lower availability of certain resources, compounded by ongoing supply bottlenecks could, in some cases, make it more difficult for the Group to maintain the required service levels. In addition, the widespread use of remote work has increased the risks related to cybersecurity, as the use of non-corporate networks has increased.

Further, despite the progressive lessening of restrictions since 2020 and the increasing resumption of activities, the Group continues to face various risks, such as a greater impairment of the value of its assets (including financial instruments valued at fair value, which may suffer significant fluctuations) and of the securities held for liquidity reasons, an increase in non-performing loans (NPL) and risk-weighted assets (RWA), as well as an increase in the Group's cost of financing and a reduction in its access to financing (especially in an environment where credit ratings are affected).

The COVID-19 pandemic has also exacerbated and may continue to exacerbate other risks disclosed in this section, including but not limited to risks associated with the credit quality of the Group's borrowers and counterparties or collateral, any withdrawal of ECB funding (of which the Group has made and continues to make significant use), the Group's exposure to sovereign debt and rating downgrades, the Group's ability to comply with its regulatory requirements, including MREL and other capital requirements, and the deterioration of economic conditions or changes in the institutional environment.

6.2 Credit risk

Credit risk arises from the probability that one party to a financial instrument will fail to meet its contractual obligations for reasons of insolvency or inability to pay and cause a financial loss for the other party. The general principles governing credit risk management in the BBVA Group, as well as the credit risk management in the Group as of September 30, 2022 do not differ significantly from those included in Note 7 in the consolidated financial statements of the Group for the year ended December 31, 2021.

COVID-19 support measures

Since the beginning of the pandemic, the Group offered COVID-19 support measures to its customers in all the geographic areas where it operates, consisting of both deferrals on existing loans and new public-guaranteed lending. Deferral support schemes have expired in all geographical areas, only measures related to new government-guaranteed loans remain in force in Spain and Peru.

Spain:

- The Official Credit Institute (ICO by its Spanish acronym) published several support programs aimed at the self-employed, small and medium-sized enterprises (hereinafter "SME") and companies, through which a guarantee of between 60% and 80% (RDL Mar/2020, RDL Nov/2020, RDL 5/2021 and the Code of Best Practices).
- In March, 2022, the Council of Ministers agreed to modify the Code of Best Practices to lessen access conditions given the difficulties of clients, which are facing sharp increases in costs due to their special exposure to tensions in the prices of energy and other raw materials.
- As an additional measure of the Code of Best Practices, the Council of Ministers approved the agreement to establish the possibility of term extensions of ICO financing given to self-employed and companies, after June 30, 2022, after the expiry of the Temporary Framework of state support approved by the European Commission.

Peru:

- There were public support programs such as *Reactiva*, *Creceer* or FAE aimed at companies and micro-enterprises with secured amounts ranging from 60% to 98%, depending on the program and the type of company.
- Through a Decree published in May, for loans granted under the *Reactiva* program, both the maturity and grace period of such loans could be extended. Until December 31, 2022, the possibility to benefit from this measure exists.

New government-guaranteed financing was also granted in Turkey, Colombia and Argentina.

The outstanding balance of existing loans for which a payment deferral was granted under European Banking Authority (hereinafter "EBA") standards and for which financing was granted with public guarantees given at a Group level, as well as the number of customers of both measures, as of September 30, 2022 and December 31, 2021, are as follows:

Amount of payment deferrals and financing with public guarantees of the Group (Millions of Euros)

	Payment deferrals			Financing with public guarantees		Total payment deferrals and guarantees	(%) credit investment	
	Existing	Completed	Total	Number of customers	Total			Number of customers
September 2022	—	19,839	19,839	1,889,613	15,306	250,115	35,145	8.9 %
December 2021	189	21,743	21,931	2,188,720	16,093	264,809	38,025	10.9 %

The outstanding balance of existing loans for which a payment deferral was granted under EBA standards and for which financing was granted with public guarantees given at a Group level, broken down by segment, as of September 30, 2022 and December 31, 2021 are as follows:

Amount of payment deferral and financing with public guarantees (Millions of Euros)

	Payment deferrals		Financing with public guarantees	
	September 2022	December 2021	September 2022	December 2021
Group	19,839	21,931	15,306	16,093
Households	14,122	15,011	1,414	1,376
<i>Of which: Mortgages</i>	<i>10,232</i>	<i>10,291</i>	<i>6</i>	<i>6</i>
SMEs	3,281	3,994	10,581	10,911
Non-financial corporations	2,327	2,803	3,293	3,788
Other	109	122	18	18

Credit risk exposure

In accordance with IFRS 7 “Financial Instruments: Disclosures”, the BBVA Group’s credit risk exposure by headings in the consolidated balance sheets as of September 30, 2022 and December 31, 2021 is provided below. It does not consider the loss allowances and the availability of collateral or other credit enhancements to guarantee compliance with payment obligations. The details are broken down by the nature of the financial instruments:

Maximum credit risk exposure (Millions of Euros)					
	Notes	September 2022	Stage 1	Stage 2	Stage 3
Financial assets held for trading		70,189			
Equity instruments	9	5,169			
Debt securities	9	28,166			
Loans and advances	9	36,854			
Non-trading financial assets mandatorily at fair value through profit or loss		7,290			
Equity instruments	10	6,925			
Debt securities	10	106			
Loans and advances	10	259			
Financial assets designated at fair value through profit or loss	11	978			
Derivatives (trading and hedging)		60,907			
Financial assets at fair value through other comprehensive income		62,649			
Equity instruments	12	1,205			
Debt securities		61,418	60,521	871	26
Loans and advances to credit institutions	12	26	26	—	—
Financial assets at amortized cost		438,038	390,277	33,475	14,287
Debt securities		41,422	41,141	250	31
Loans and advances to central banks		7,058	7,058	—	—
Loans and advances to credit institutions		15,793	15,778	15	—
Loans and advances to customers		373,765	326,300	33,209	14,256
Total financial assets risk		640,052			
Total loan commitments and financial guarantees		195,553	182,154	12,309	1,090
Loan commitments given	28	139,792	132,484	7,124	184
Financial guarantees given	28	15,770	14,348	1,138	284
Other commitments given	28	39,991	35,322	4,046	623
Total maximum credit exposure		835,604			

Maximum credit risk exposure (Millions of Euros)					
	Notes	December 2021	Stage 1	Stage 2	Stage 3
Financial assets held for trading		92,560			
Equity instruments	9	15,963			
Debt securities	9	25,790			
Loans and advances	9	50,807			
Non-trading financial assets mandatorily at fair value through profit or loss		6,086			
Equity instruments	10	5,303			
Debt securities	10	128			
Loans and advances	10	655			
Financial assets designated at fair value through profit or loss	11	1,092			
Derivatives (trading and hedging)		43,687			
Financial assets at fair value through other comprehensive income		60,495			
Equity instruments	12	1,320			
Debt securities		59,148	58,587	561	—
Loans and advances to credit institutions	12	27	27	—	—
Financial assets at amortized cost		383,870	334,772	34,418	14,680
Debt securities		34,833	34,605	205	22
Loans and advances to central banks		5,687	5,687	—	—
Loans and advances to credit institutions		13,295	13,285	10	—
Loans and advances to customers		330,055	281,195	34,203	14,657
Total financial assets risk		587,789			
Total loan commitments and financial guarantees		165,941	152,914	12,070	957
Loan commitments given	28	119,618	112,494	6,953	171
Financial guarantees given	28	11,720	10,146	1,329	245
Other commitments given	28	34,604	30,274	3,789	541
Total maximum credit exposure		753,730			

The changes in the nine months ended September 30, 2022 and the year ended December 31, 2021 of impaired financial assets (financial assets and guarantees given) are as follows:

Changes in impaired financial assets and guarantees given (Millions of Euros)		
	September 2022	December 2021
Balance at the beginning	15,467	15,478
Additions	5,775	8,556
Decreases ⁽¹⁾	(4,582)	(4,555)
Net additions	1,192	4,001
Amounts written-off	(1,830)	(3,613)
Exchange differences and other	404	(399)
Balance at the end	15,233	15,467

(1) Reflects the total amount of impaired loans derecognized from the consolidated balance sheet throughout the period as a result of monetary recoveries as well as mortgage foreclosures and real estate assets received in lieu of payment.

Loss allowances

Below are the changes in the nine months ended September 30, 2022, and the year ended December 31, 2021 in the loss allowances recognized on the accompanying condensed consolidated balance sheets to cover the estimated loss allowances in loans and advances of financial assets at amortized cost:

Changes in loss allowances of loans and advances at amortized cost (Millions of Euros)		
	September 2022	December 2021
Balance at the beginning of the period	(11,142)	(12,141)
Increase in loss allowances charged to income	(6,214)	(9,000)
<i>Stage 1</i>	(1,352)	(1,563)
<i>Stage 2</i>	(1,152)	(1,200)
<i>Stage 3</i>	(3,711)	(6,237)
Decrease in loss allowances charged to income	3,841	5,969
<i>Stage 1</i>	1,151	1,441
<i>Stage 2</i>	1,069	1,210
<i>Stage 3</i>	1,621	3,318
Transfer to written-off loans, exchange differences and other	1,426	4,031
Closing balance	(12,088)	(11,142)

Additional adjustments to expected losses measurement

The description in Note 7 to the consolidated financial statements of the Group for the year ended December 31, 2021 on individualized and collective estimates of expected losses and macroeconomic estimates, must be taken into account for the estimation of the expected losses.

The estimate at the end of the nine months ended September 30, 2022, includes the effect on the expected losses of the update of the macroeconomic forecasts, which include elements such as the war in Ukraine, the evolution of interest rates, inflation rates or the prices of commodities. The estimate includes the update of such forecast which has been reviewed following the internal approval circuits established for this purpose, to reflect the effects of the new inflationary environment on the results of the collective estimates. The adaptations to the parameters of the models carried out in 2022 amounted to a total of €133 million assigned to the impaired group for subjective reasons, after having incorporated into the calculation methodology the adaptation in the parameters carried out during the first half of the year to reflect the macroeconomic environment described above.

Additionally, the Group can supplement the expected losses either by the consideration of additional risk drivers, the incorporation of sectorial particularities or that may affect a set of operations or borrowers. These adjustments should be of temporary nature, until the reasons for them disappear or they materialize. As of September 30, 2022, there are adjustments to expected losses which amounted to €243 million at Group level, €159 million in Spain, €4 million in Peru and €80 million in Mexico. As of December 31, 2021 there were €311 million at the Group level for the same concept, €226 million in Spain, €18 million in Peru and €68 million in Mexico.

7. Fair value of financial instruments

The criteria and valuation methods used to calculate the fair value of financial assets as of September 30, 2022 do not differ significantly from those included in Note 8 from the consolidated financial statements for the year ended December 31, 2021.

The techniques and unobservable inputs used for the valuation of the financial instruments classified in the fair value hierarchy as Level 3, do not significantly differ from those detailed in Note 8 of the consolidated financial statements for the year ended December 31, 2021.

The effect on the consolidated income statements and on the consolidated equity, resulting from changing the main assumptions used in the valuation of Level 3 financial instruments for other reasonably possible assumptions, does not differ significantly from that detailed in Note 8 of the consolidated financial statements for the year ended December 31, 2021.

Below is the carrying amount of the Group's financial instruments in the accompanying condensed consolidated balance sheets and their respective fair values as of September 30, 2022 and December 31, 2021:

Fair value and carrying amount of financial instruments (Millions of Euros)					
	Notes	September 2022		December 2021	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
ASSETS					
Cash, cash balances at central banks and other demand deposits	8	88,076	88,076	67,799	67,799
Financial assets held for trading	9	119,966	119,966	123,493	123,493
Non-trading financial assets mandatorily at fair value through profit or loss	10	7,290	7,290	6,086	6,086
Financial assets designated at fair value through profit or loss	11	978	978	1,092	1,092
Financial assets at fair value through other comprehensive income	12	62,524	62,524	60,421	60,421
Financial assets at amortized cost	13	425,854	423,223	372,676	377,451
Derivatives – Hedge accounting		1,913	1,913	1,805	1,805
LIABILITIES					
Financial liabilities held for trading	9	104,534	104,534	91,135	91,135
Financial liabilities designated at fair value through profit or loss	11	10,678	10,678	9,683	9,683
Financial liabilities at amortized cost	20	544,719	540,192	487,893	488,733
Derivatives – Hedge accounting		3,616	3,616	2,626	2,626

The following table shows the financial instruments in the accompanying condensed consolidated balance sheets, broken down by the measurement technique used to determine their fair value as of September 30, 2022 and December 31, 2021:

Fair Value of financial Instruments by Levels (Millions of Euros)	September 2022			December 2021		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
ASSETS						
Cash, cash balances at central banks and other demand deposits	87,749	—	327	67,581	—	218

8. Cash, cash balances at central banks and other demand deposits

Cash, cash balances at central banks and other demand deposits ⁽¹⁾	September 2022	December 2021
Cash on hand	6,640	6,877
Cash balances at central banks ⁽¹⁾	70,913	55,004
Other demand deposits	10,523	5,918
Total	88,076	67,799

(1) The variation is mainly due to an increase in balances of BBVA, S.A. at the Bank of Spain.

9. Financial assets and liabilities held for trading

Financial assets and liabilities held for trading (Millions of Euros)

	Notes	September 2022	December 2021
ASSETS			
Derivatives ⁽¹⁾		49,777	30,933
Equity instruments ⁽²⁾	6.2	5,169	15,963
Debt securities	6.2	28,166	25,790
Loans and advances ⁽³⁾	6.2	36,854	50,807
Total assets	7	119,966	123,493
LIABILITIES			
Derivatives ⁽¹⁾		47,936	31,705
Short positions		14,082	15,135
Deposits ⁽³⁾⁽⁴⁾		42,516	44,294
Total liabilities	7	104,534	91,135

(1) The variation is mainly due to the evolution of exchange rate derivatives at BBVA, S.A.

(2) The variation is mainly due to sales at BBVA, S.A.

(3) The variation corresponds mainly to the evolution of "Reverse repurchase agreement" of BBVA S.A., partially offset by the evolution of "Repurchase agreement" within the portfolio loans and advances to customers and customer deposits.

(4) The variation corresponds mainly to the evolution of "Repurchase agreement" of BBVA S.A within the portfolio deposits from credit institutions.

10. Non-trading financial assets mandatorily at fair value through profit or loss

Non-trading financial assets mandatorily at fair value through profit or loss (Millions of Euros)

	Notes	September 2022	December 2021

Investment property	308	191
Building rental	259	146
Other	2	2
Right to use assets	196	162
Accumulated depreciation	(89)	(64)
Impairment	(61)	(55)
Total	8,567	7,298

(1) The variation in 2022 corresponds mainly to the closing of the transaction with Merlin Properties for which 100% of the shares of Tree Inversiones Inmobiliarias, SOCIMI, S.A. were acquired by BBVA Group and the effect of the IAS 29 implementation in Turkey (see Note 2.1).

(2) In 2021, it includes allowances on right of use of the rented offices after the agreement with the union representatives on the collective layoff procedure proposed for Banco Bilbao Vizcaya Argentaria, S.A. in Spain (see Notes 19 and 22).

Purchase of Tree Inversiones Inmobiliarias SOCIMI, S.A. (Tree) to Merlin Properties SOCIMI, S.A.

On June 15, 2022, BBVA acquired from Merlin Properties SOCIMI, S.A. the shares representing the entire share capital of Tree Inversiones Inmobiliarias SOCIMI, S.A. (hereinafter "Tree") for an amount of €1,987 million. This company has 662 properties leased to BBVA that were part of the set of properties that BBVA sold between 2009 and 2010 under a sale and leaseback agreement. Prior to that date, these properties were registered as "Rights of use" in the assets of the consolidated balance sheet of the BBVA Group under the headings "Tangible assets - Property, plant and equipment" and "Tangible assets - Investment property" of the consolidated balance sheet and that, in liabilities, the payment obligation was reflected under the heading "Financial liabilities at amortized cost – Other financial liabilities", in accordance with IFRS 16 Leases.

The Tree purchase transaction has been considered an asset purchase given that the Group has determined that it is not acquiring a set of activities that present elements that could constitute a business. After the closing of this transaction, the BBVA Group has once again become owner of the properties and recorded them at their acquisition price in the Group's consolidated financial statements as of June 30, 2022. The assets acquired that are not used for the Bank's activity are recorded under the heading "Non-current assets and disposal groups classified as held for sale and liabilities included in disposal groups classified as held for sale" (see Note 19).

The impact of the transaction amounted to €-201 million (losses net of taxes) which have been registered under the headings "Gains (losses) from non-current assets and disposal groups classified as held for sale not qualifying as discontinued operations" for an amount of €-134 million and "Tax expense or income related to profit or loss from continuing operations" for an amount of €-67 million from the consolidated income statement of the BBVA Group.

16. Intangible assets

Intangible assets (Millions of Euros)		
	September 2022	December 2021
Goodwill	760	818
Other intangible assets	1,450	1,379
Computer software acquisition expense	1,391	1,239
Other intangible assets with an infinite useful life	12	12
Other intangible assets with a definite useful life	48	128
Total	2,211	2,197

Impairment Test

As mentioned in Note 2.2.7 of the consolidated financial statements for the year 2021, the cash-generating unit (hereinafter "CGU") to which goodwill has been allocated are periodically tested for impairment by including the allocated goodwill in their carrying amount. This analysis is performed at least annually or whenever there is any indication of impairment.

As of and for the nine months ended September 30, 2022, no indicators of impairment have been identified in any of the other CGU.

As a result of the application of IAS 29, as indicated in Note 2.1, the book value of the Turkish CGU has increased above the existing recoverable value as of December 31, 2021, and as a consequence the goodwill has been derecognized as well as other intangible assets assigned to the Turkish CGU.

17. Tax assets and liabilities

Tax assets and liabilities (Millions of Euros)		
	September 2022	December 2021
Tax assets		
Current tax assets	1,658	932
Deferred tax assets	14,519	14,917
Total	16,177	15,850
Tax liabilities		
Current tax liabilities	1,285	644
Deferred tax liabilities	1,264	1,769
Total	2,549	2,413

Total	1,135	1,061
LIABILITIES		
Companies held for sale	—	—
Total	—	—

(1) The variation in 2022 corresponds mainly to the reclassification of offices previously in own use and now closed after the closing of the transaction with Merlin Properties (see Note 15). In 2021 it includes the adjustments due to the closure of the owned offices and the decommissioning of facilities after the agreement with the union representatives on the collective layoff procedure proposed for Banco Bilbao Vizcaya Argentaria, S.A. in Spain (see Note 22).

(2) Accumulated depreciation until related asset was reclassified as "Non-current assets and disposal groups classified as held for sale".

Assets and liabilities from discontinued operations

As mentioned in Note 3, the agreement for the sale of the BBVA subsidiary in the United States was announced in 2020 and finally completed on June 1, 2021. The assets and liabilities corresponding to the 37 companies sold were reclassified to the headings "Non-current assets and disposal groups classified as held for sale" and "Liabilities included in disposal groups classified as held for sale" of the consolidated balance sheet; and the earnings of these companies for the first five months of 2021 were classified under the heading "Profit (loss) after tax from discontinued operations" of the accompanying condensed consolidated income statements.

The condensed consolidated income statements for the first five months of 2021, of the companies sold in the United States are provided below:

Condensed consolidated income statements of companies sold in the United States subsidiary for the period ended June 30, 2021

20. Financial liabilities at amortized cost

20.1 Breakdown of the balance

Financial liabilities measured at amortized cost (Millions of Euros)			
	Notes	September 2022	December 2021
Deposits		473,902	416,947
Deposits from central banks		52,971	47,351
<i>Demand deposits</i>		820	8
<i>Time deposits and other</i>		44,438	41,790
<i>Repurchase agreements</i>		7,712	5,553
Deposits from credit institutions		31,226	19,834
<i>Demand deposits</i>		13,242	7,601
<i>Time deposits and other</i>		10,669	8,599
<i>Repurchase agreements</i>		7,315	3,634
Customer deposits		389,705	349,761
<i>Demand deposits</i>		314,631	293,015
<i>Time deposits and other</i>		73,605	55,479
<i>Repurchase agreements</i>		1,470	1,267
Debt certificates issued		54,811	55,763
Other financial liabilities		16,006	15,183
Total	7	544,719	487,893

The amount recorded in "Deposits from central banks - Time deposits" includes the drawdowns of the TLTRO III facilities of the European Central Bank, mainly BBVA S.A., amounting to €38,692 million, in both periods, for the nine months ended September 30, 2022 and December 31, 2021.

The positive income generated by the drawdowns of the TLTRO III facilities is recorded under the heading of "Interest income and other similar income – other income" in the condensed consolidated income statements (see Note 29.1).

20.2 Debt certificates issued

Debt certificates (Millions of Euros)		
	September 2022	December 2021
In Euros	33,323	36,289
Promissory bills and notes	335	319
Non-convertible bonds and debentures	15,693	15,712
Covered bonds ⁽¹⁾	7,806	9,930
Hybrid financial instruments ⁽²⁾	452	366
Securitization bonds	2,697	2,302
Wholesale funding	80	438
Subordinated liabilities	6,261	7,221
Convertible perpetual certificates	3,000	3,500
Other non-convertible subordinated liabilities	3,261	3,721
In foreign currencies	21,488	19,475
Promissory bills and notes	426	579
Non-convertible bonds and debentures	9,537	7,885
Covered bonds ⁽¹⁾	118	178
Hybrid financial instruments ⁽²⁾	4,428	2,843
Securitization bonds	—	4
Wholesale funding	230	412
Subordinated liabilities	6,748	7,574
Convertible perpetual certificates	2,053	1,771
Other non-convertible subordinated liabilities	4,694	5,803
Total	54,811	55,763

(1) Including mortgage-covered bonds.

(2) Corresponds to structured note issuances with embedded derivatives that have been segregated according to IFRS 9.

20.3 Other financial liabilities

Other financial liabilities (Millions of Euros)		
	September 2022	December 2021
Lease liabilities ⁽¹⁾	1,342	2,560
Creditors for other financial liabilities	4,345	2,657
Collection accounts	3,403	3,839
Creditors for other payment obligations	6,916	6,127
Total	16,006	15,183

(1) The variation in 2022 corresponds mainly to the closing of the transaction with Merlin Properties for which 100% of the shares of Tree *Inversiones Inmobiliarias, SOCIMI, S.A.* were acquired by BBVA Group (see Note 15).

21. Assets and liabilities under insurance and reinsurance contracts

As of September 30, 2022 and December 31, 2021, the balance under the heading "Assets under reinsurance and insurance contracts" in the accompanying condensed consolidated balance sheets amounted to €227 million and €269 million, respectively.

Technical reserves (Millions of Euros)		
	September 2022	December 2021
Mathematical reserves	10,726	9,495
Provision for unpaid claims reported	635	706
Provisions for unexpired risks and other provisions	914	664
Total	12,275	10,865

22. Provisions

Provisions. Breakdown by concepts (Millions of Euros)

	September 2022	December 2021
Provisions for pensions and similar obligations ⁽¹⁾	2,747	3,576
Other long term employee benefits ⁽²⁾	486	632
Provisions for taxes and other legal contingencies	694	623
Commitments and guarantees given	803	691
Other provisions ⁽³⁾	399	366
Total	5,129	5,889

(1) The variation is mainly due to the lower valuation of defined benefit commitments after the interest rate hike in Spain and benefit payments..

(2) It includes a provision for the collective layoff procedure that was carried out at Banco Bilbao Vizcaya Argentaria, S.A. in 2021.

(3) Individually insignificant provisions or contingencies for various concepts in different geographies.

Collective layoff procedure

On June 8, 2021, BBVA reached an agreement with the union representatives on the collective layoff procedure proposed for Banco Bilbao Vizcaya Argentaria, S.A. in Spain on April 13, 2021, which would affect a maximum of 2,935 employees. The agreement also included the closing of 480 offices (all closed). The cost of the process amounted to €994 million before taxes, of which €754 million corresponded to the collective layoff and €240 million to the closing of offices (see Note 15 and 19). By the time the procedure was over, 2,899 employees had accepted the agreement and effectively departed BBVA.

23. Pension and other post-employment commitments

The Group sponsors defined-contribution plans for the majority of its active employees, with the plans in Spain and Mexico being the most significant. Most of the defined benefit plans are for individuals already retired, and are closed to new employees, the most significant being those in Spain, Mexico and Turkey. In Mexico, the Group provides post-retirement medical benefits to a closed group of employees and their family members, both in active service and retirements.

The amounts relating to post-employment benefits charged to the condensed consolidated income statement are as follows:

Condensed consolidated income statement impact (Millions of Euros)

	Notes	September 2022	September 2021
Interest income and expense		45	29
Personnel expense		94	92
<i>Defined contribution plan expense</i>	35.1	65	56
<i>Defined benefit plan expense</i>	35.1	29	35
Provisions or reversal of provisions	37	(12)	91
Total expense (income)		126	212

24. Capital

As of September 30, 2022, BBVA's share capital amounted to €2,954,757,116.36 divided into 6,030,116,564 shares (€3,267,264,424.20 divided into 6,667,886,580 shares as of December 31, 2021) as a result of the partial executions of the share capital reduction resolution adopted by the Ordinary General Shareholders' Meeting of BBVA held on March 18, 2022, under item seven of its agenda, which were notified by means of Other Relevant Information on June 15, 2022 and September 30, 2022 (see Note 4).

In both periods mentioned, the shares were fully subscribed and paid-up registered, all of the same class and series, at €0.49 par value each, represented through book-entry accounts. All of the Bank's shares carry the same voting and dividend rights, and no single stockholder enjoys special voting rights. Each and every share is part of the Bank's capital.

BBVA is not aware of any direct or indirect interests through which control of the Bank may be exercised. BBVA has not received any information on stockholder agreements including the regulation of the exercise of voting rights at its Annual General Meetings or restricting or placing conditions on the free transferability of BBVA shares. BBVA is not aware of any agreement that could give rise to changes in the control of the Bank.

25. Retained earnings, revaluation reserves and other reserves

Retained earnings, revaluation reserves and other reserves (Millions of Euros)		
	September 2022	December 2021
Retained earnings	32,623	31,841
Revaluation reserves	—	—
Other reserves	2,332	(1,857)
Total	34,955	29,984

26. Accumulated other comprehensive income

Accumulated other comprehensive income (loss). Breakdown by concepts (Millions of Euros)		
	September 2022	December 2021
Items that will not be reclassified to profit or loss	(1,864)	(2,075)
Actuarial gains (losses) on defined benefit pension plans	(795)	(998)
Non-current assets and disposal groups classified as held for sale	—	—
Fair value changes of equity instruments measured at fair value through other comprehensive income	(1,197)	(1,079)
Fair value changes of financial liabilities at fair value through profit or loss attributable to changes in their credit risk	128	2
Items that may be reclassified to profit or loss	(14,785)	(14,401)
Hedge of net investments in foreign operations (effective portion)	(1,771)	(146)
<i>Mexican peso</i>	(2,112)	(681)

Highlights

Invasion of Ukraine

Russia's invasion of Ukraine, the largest military attack on a European state since World War II, has had an immediate impact on geopolitics and the global economy. There has also been an increase in the level of uncertainty and tensions, which remains high at the date of elaboration of this report. The European Union, the United States, the United Kingdom and other governments have imposed harsh sanctions against Russia and Russian interests, and additional sanctions and controls cannot be ruled out. The impact of these measures, as well as the potential response by Russia, are currently uncertain and could negatively affect the Bank's business, financial position and results, although the Group's direct exposure to Ukraine and Russia is limited.

The Group observes this events with particular concern and unease because of the human tragedy that they entail.

Results and business activity

The BBVA Group generated a net attributable profit excluding non-recurring impacts of €5,044m in the first nine months of 2022, representing a year-on-year variation of +35.3%. Including those non-recurring impacts, i.e. €-201m from the purchase of offices in Spain from Merlin in June 2022 and €-416m from the results of discontinued operations corresponding to BBVA USA and the companies sold to PNC on June 1, 2021, together with the net cost related to the restructuring process of the same year, the Group's net attributable profit increased by 46.2% year-on-year.

Recurring income from banking activity (net interest income and commissions) continues to show an excellent performance, reflecting the good performance of activity and improvement in the customer spread, fostered by a more favorable interest rate environment.

Operating expenses increased at Group level (+12.8%, in an environment of high inflation in all countries in which BBVA operates. Notwithstanding the above, thanks to the remarkable growth in gross income, higher than that of expenses, the efficiency ratio stood at 42.9% as of September 30, 2022, with an improvement of 249 basis points in constant terms, compared to the ratio as of September 30, 2021, placing BBVA once again, in a leading position among its European peer group¹.

The provisions for impairment on financial assets increased (+6.4% in year-on-year terms and at constant exchange rates), with higher provisions in Turkey and Mexico.

Loans and advances to customers grew by 13.4% compared to the end of December 2021, strongly favored by the evolution of corporate loans in all business areas and, to a lesser extent, by the dynamism of retail loans.

Customer funds increased by 8.7% compared to the end of December 2021, thanks to the contribution of demand deposits (+7.4%) and time deposits (+32.6%), showing an outstanding growth in the quarter.

LOANS AND ADVANCES TO CUSTOMERS AND TOTAL CUSTOMER FUNDS (VARIATION COMPARED TO 31-12-2021)

¹ European peer group: Barclays, BNP Paribas, Crédit Agricole, Commerzbank, Credit Suisse, Deutsche Bank, HSBC, Intesa Sanpaolo, Lloyds Banking Group, Natwest, Banco Santander, Société Générale, UBS and Unicredit, data at the end of June 2022.

Business areas

As for the business areas, excluding the effect of currency fluctuation in those areas where it has an impact, in each of them it is worth mentioning:

- Spain generated a net attributable profit of €1,514m between January and September of 2022, up 27.1% from the result achieved in the same period of the previous year, due to the dynamism of recurring income from banking activity (net interest income and fees) and net trading income (NTI), which together with lower operating expenses and provisions, have driven the year-on-year evolution. This result does not include the net impact of €-201m from the purchase of Merlin Properties, SOCIMI, S.A. (hereinafter Merlin) of 100% of the shares of Tree Inversiones Inmobiliarias Socimi, S.A. (hereafter Tree), owner of 662 offices leased to BBVA. Including this impact, the area's net attributable profit amounts to €1,312m, an increase of 10.2% compared to the net attributable profit of the same period of the previous year.
- In Mexico, BBVA achieved a net attributable profit of €2,964m between January and September 2022, representing an increase of 47.5% compared to the first nine months of 2021, mainly as a result of the dynamism of the net interest income.
- Turkey generated a net attributable profit of €336m between January and September 2022, which includes the application of hyperinflation accounting in Turkey, with effect from January 1, 2022
- South America generated a net attributable profit of €614m in the first nine months of 2022, which represents a year-on-year variation of +98.3%, mainly due to the improved performance of recurring income (+50.0%) and NTI.
- Rest of Business achieved a net attributable profit of €183m accumulated at the end of the first nine months of 2022, 24.8% less than in the first nine months of the previous year, mainly due to the performance of the Group's businesses in the United States.

The Corporate Center recorded a net attributable loss of €-566m in the first nine months of 2022. This result compares positively to €-817m recorded in the same period of the previous year, although it should be taken into account that this figure included the net costs associated with the restructuring process in Spain carried out by the Group in 2021, in addition to the results generated by the Group's businesses in the United States until their sale to PNC on June 1, 2021.

Lastly and for a broader understanding of the Group's activity and results, supplementary information is provided below for the wholesale business carried out by BBVA, Corporate & Investment Banking (CIB), in the countries where it operates. CIB generated a net attributable profit of €1,353m in the first nine months of 2022. These results, which do not include the application of hyperinflation accounting, represent an increase of 45.5% on a year-on-year basis, due to the growth in recurring income and NTI, which comfortably offset the higher expenses and provisions for impairment on financial assets. It should also be noted that all business lines of the CIB area recorded growth compared to the first nine months of 2021, both in revenues and net attributable profit.

NET ATTRIBUTABLE PROFIT (LOSS) (MILLIONS OF EUROS)

General note: Jan-Sep.22 excludes net impact arisen from the purchase of offices in Spain. Jan-Sep.21 excludes BBVA USA and the rest of the companies in the United States sold to PNC and the net cost of the restructuring process.

NET ATTRIBUTABLE PROFIT BREAKDOWN ⁽¹⁾ (PERCENTAGE. JAN.-SEP. 2022)

⁽¹⁾ Excludes the Corporate Center and net impact arisen from the purchase of offices in Spain.

Solvency

The Group's CET1 Fully-loaded ratio stood at 12.45% as of September 30, 2022, which allows to maintain a large management buffer over the Group's CET1 requirement (8.60%), and also above the Group's established target management range of 11.5-12.0% of CET1.

Share buyback program

- On August 19, 2022 BBVA announced the end of the execution of its share buyback program once the maximum number of shares established in the terms and conditions announced on November 19, 2021 had been reached. Thus, the Bank has successfully concluded its share buyback program, having acquired a total of 637,770,016 shares, for an amount of €3,160m.
- On September 30, 2022, the redemption of the 356,551,306 shares acquired by the Bank in execution of the second tranche of the share buyback program was announced.

EXECUTION OF THE PROGRAM FOR THE BUYBACK OF SHARES

Tranche	Segment	Completion date	Number of shares	% of share capital*	Disbursement
First tranche		March 3	281,218,710	4.2	1,500
Second tranche	First segment	May 16	206,554,498	3.1	1,000
	Second segment	August 19	149,996,808	2.3	660
Total			637,770,016	9.6	3,160

*As of the date of tranche closure.

REDEMPTION OF SHARES

Tranche	Date	Number of redeemed shares
First tranche	June 15	281,218,710
Second tranche	September 30	356,551,306
Total		637,770,016

Dividend

- On September 29, 2022, BBVA informed that its Board of Directors approved the payment in cash of €0.12 gross per share, as gross interim dividend against 2022 results, which was paid on October 11, 2022.

Sustainability

Channeling sustainable business

SUSTAINABLE BUSINESS BREAKDOWN (PERCENTAGE. TOTAL AMOUNT CHANNELED 2018-SEPTEMBER 2022)

*Socially responsible investing.

BBVA has channeled a total of €124,000m in sustainable business between 2018 and September 2022. Close to €13,000m were channeled this quarter, which represents an increase of nearly 60% compared to the same period in 2021.

Within the channeling of sustainable business, which aims to promote the fight against climate change, the contribution of loans and the funding of projects stands out, which account for 78% of the amount channeled at the end of September 2022. It should be considered that these products have had a standard amortization rate since the beginning of their channeling. Third-party bond brokerage, a business activity that is registered off-balance sheet, represents 18% of the channeled business linked to the fight against climate change. Finally, mutual funds and other off-balance sheet products such as insurance and pension funds, represent 4%.

For its part, within the channeling of sustainable business, which aims to promote inclusive growth, loans and project financing account for 59% of the total amount channeled at the end of September 2022, showing a standard amortization rate since the beginning of its channeling. Third-party bond brokerage represents 14%, while mutual funds and other off-balance sheet products such as insurance and pension funds represent 6%. Finally, the activity of the Microfinance Foundation (BBVAMF), not recorded in the BBVA Group's balance sheet, whose objective is to support entrepreneurs with micro-credits, represent 21%.

The good performance of retail business related to energy efficiency stands out, which has doubled in the third quarter of 2022 compared to the same quarter of the previous year. The role of Spain stands out, doubling the funds directed to energy efficiency compared to the same quarter last year. The increase of 43% in retail business related to sustainable mobility has also been relevant, with financing lines for the acquisition of hybrid and electric vehicles, which has already exceeded that of the same quarter of the previous year and where Colombia has been crucial by channeling a quarter of the total amount. In corporate business, financing related to energy-efficient buildings stands out, multiplying its channeling by three compared to the same quarter of the previous year, where Mexico has been key by increasing its channeling in this line by 60%.

In inclusive growth, great progress has also been made, highlighting the financing of social housing or healthcare infrastructures, quadrupling the financing of the latter compared to the same quarter of the previous year. Financing the business segment plays a relevant role as it contributes more than half of the total channeling, with Spain standing out, which represents approximately 50% of it.

Finally, in corporate business, channeling has also increased by more than 130% compared to the same quarter of the previous year. Likewise, Project Finance activity multiplied by two compared to the same quarter of the previous year, highlighting wind farm projects, which account for almost a quarter of the channeling in Project Finance and where the United States is a key player, accounting for almost 80% of the channeling.

Relevant advances in sustainability matters

- **Sustainable business goal**

BBVA has raised up its sustainable business goal to €300,000m. This figure places BBVA as one of the European banks with the greatest ambition in its goal of channeling sustainable financing and it is a tangible example of the bank's commitment to sustainability, one of its strategic priorities. This new target, which was just made public in October, means raising the goal announced in July 2021 by 50%, when BBVA updated its sustainable financing roadmap. In addition, it triples the initial aspiration, detailed in February 2018.

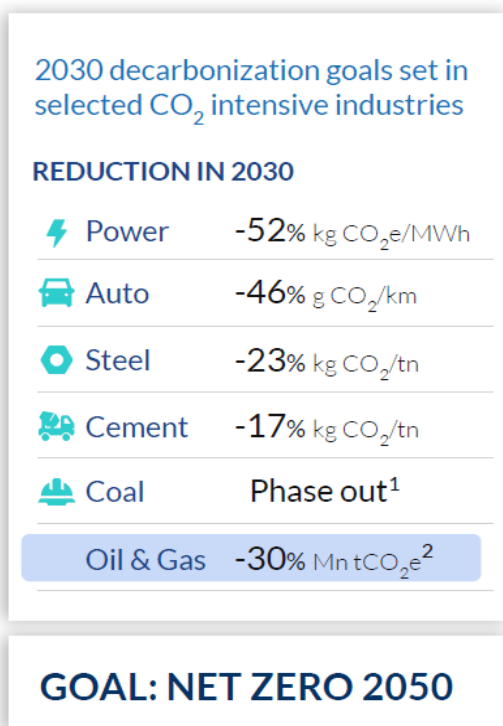

- **Strategy**

BBVA updates its Sustainability General Policy by adding the General Policy on Corporate Social Responsibility and updating the Group's sustainability goals. The three new objectives are: increase the growth of the Group's business through sustainability, achieve neutrality in greenhouse gas emissions and to promote integrity in the relationship with stakeholders. In addition, natural capital is incorporated as a focus of action to be prepared for the challenges ahead.

- **Decarbonization goals**

BBVA wants to accompany the energy sector in its transition and it is committed to clean energies. The Group is making progress in its commitment to be a carbon neutral Entity in 2050, not only through its own activity, already achieved since 2020, but also through the activity of the customers that it finances. Therefore, it has announced that it will reduce the emissions of its oil and gas portfolio by 30% before 2030. BBVA will align its balance sheet in the oil and gas sector according to the scenario of net zero emissions in 2050 following the absolute emissions metric. This commitment is in addition to the Group's 2021 targets in four other carbon-intensive sectors (see table below) and the decision to stop financing coal companies, in line with the zero net emissions banking alliance (NZBA).

COMMITMENT IN PORTFOLIO ALIGNMENT

⁽¹⁾ 2030 for developed countries and in 2040 for emerging countries.

⁽²⁾ For upstream related financing.

- **Innovation**

BBVA's strategic priorities are innovation and sustainability, as evidenced by the creation of a new "water footprint" loan for wholesale customers. This loan, a pioneer in the market, focuses on the customers' water footprint, being of special interest for both, companies that make intensive use of water in their production process, as well as those that operate in the energy, food and beverages, agriculture, textiles or packaging sectors, among others. With this new product, customers benefit from their efforts to reduce their water footprint, not only in terms of price, but also in terms of reputation and differentiation from competitors.

- **Carbon markets**

BBVA has joined the Carbonplace global platform as a founding member. The platform, which will be operational by the end of 2022, aims to simplify access to carbon credits for all those customers committed to decarbonization. It is an innovative global carbon credit transaction platform that allows the safe, simple and transparent exchange of certified carbon credits, in accordance with recognized international standards. Through this technological solution, BBVA will offer its customers around the world direct access to carbon credits to offset their emissions. BBVA is the first Spanish bank to join this platform integrated into the voluntary carbon market.

- **Training**

BBVA wants to "make the opportunities of this new era available to everyone", which is why it has launched the free online course "The ABC of Sustainability" open to the public on the Coursera platform. Within the course, it is described how sustainability is applicable to daily situations in the population, the use of natural resources, its application in the global economy and its interaction with the biosphere, as well as social aspects such as a fair transition, equity, equality, diversity, human rights, education and health.

In addition, since World Environment Day, the educational program "Learning Together" is transformed into "Learning Together 2030". This change sets the beginning of a new stage in the BBVA initiative that will strengthen and expand its global commitment to people and the planet. The program is the largest educational platform in Spanish, it already has more than seven million subscribers and its videos have more than 1,800m views.

Macroeconomic environment

Economic growth remained at relatively high levels during the first half of 2022. The savings previously accumulated, the normalization of activity following the restrictions and disruptions generated by the COVID-19 pandemic, as well as the dynamism of labor markets, have contributed significantly to the performance of private consumption and the service sector.

However, the global economy is showing increasing signs of slowdown, in an environment affected by strong inflationary pressures, an aggressive tightening of monetary conditions, the negative impact of the war in Ukraine and the slower growth in China.

Inflation remains high and continues to surprise on the upside. In annual terms, in September inflation reached 9.9% in the Eurozone and 8.2% in the United States. Many commodity prices and disruptions in global supply chains have moderated in recent months, to some extent due to the expected lower global demand, although they remain relatively high. The significant increase in the price of gas, caused by supply restrictions by Russia, has reinforced the pressure on prices, mainly in Europe. In addition to showing greater persistence, inflationary pressures have also spread to more types of goods and services in recent months.

Against this backdrop, central banks have launched a process of tightening monetary conditions, more aggressive than expected by most analysts. In particular, the US Federal Reserve ("the Fed") has raised policy rates by 300 basis points since the beginning of the year 2022 up to 3.25% in September and has started selling assets to reduce the size of its balance sheet. The Fed has also announced that interest rates will continue to rise in the coming months. According to BBVA Research, interest rates are expected to reach around 4.75% by the beginning of 2023. In the Eurozone, the ECB has raised official interest rates by 125 basis points from July to September. Therefore, both in the Eurozone and in the United States, it is most likely than not that interest rates will soon converge to clearly contractionary levels, given the commitment by central banks to control inflation despite the eventual negative effects on economic activity.

In a context of high uncertainty, BBVA Research's central scenario estimates that the global economy will slow down significantly in the near future, with possible episodes of recession in the Eurozone and the United States. The tightening of monetary conditions would be the main driver of this slowdown, in an environment where commodity prices (in particular, gas prices in Europe) and supply disruptions will continue to negatively weight on activity.

According to BBVA Research, after rising 6.2% in 2021, global GDP will grow 3.2% in 2022 and 2.4% in 2023, down 0.2 and 0.1 percentage points, respectively, from the previous estimate three months ago. In the US, growth would slow to 1.7% in 2022 and 0.5% in 2023, when strong monetary tightening is expected to cause a mild recession. In the Eurozone, GDP is expected to slightly fall in the coming quarters, mainly due to the disruptions caused by the war in Ukraine, including high gas prices. Annual growth in the region would be 3.1% in 2022 and -0.1% in 2023. China's economy is expected to grow at 3.6% in 2022 and 5.2% in 2023. However, the continued implementation of strict measures to contain the spread of Coronavirus which could lead to further restrictions on mobility in the future, and the financial strains caused by imbalances in real estate markets could trigger lower-than-expected economic growth.

The risks around this central scenario are significant and have a downward bias on BBVA Research's growth forecasts. In particular, sustained inflation could trigger even stronger interest rates hikes and therefore, a deeper and more widespread recession, as well as financial volatility scenario.

Group

Quarterly evolution of results

The result achieved by the BBVA Group in the third quarter of 2022 stood at €1,841m, or what is the same, 9.9% above the previous quarter, which included -201 million euros of non-recurring impact for the purchase of offices in Spain. Excluding this impact, the Group's attributable profit was 1.9% below the 1,877 million euros achieved in the previous quarter. In addition to the above, the following trends stand out:

- In recurring income, notable evolution of net interest income, supported by the higher interest rates environment and lower commissions, affected by the usual seasonality in certain geographical areas.
- The increase in operating expenses continues in an inflationary environment.
- Higher provisions for impairment on financial assets, mainly in Spain and Mexico.

CONSOLIDATED INCOME STATEMENT: QUARTERLY EVOLUTION (MILLIONS OF EUROS)

Year-on-year performance of results

The BBVA Group generated a net attributable profit excluding non-recurring impacts of €5,044m in the first nine months of 2022, representing a year-on-year variation of +35.3%. Including those non-recurring impacts, i.e. €-201m from the purchase of offices in Spain from Merlin in June 2022 and €-416m from the results of discontinued operations corresponding to BBVA USA and the companies sold to PNC on June 1, 2021, together with the net cost related to the restructuring process of the same year, the Group's net attributable profit increased by 46.2% year-on-year.

The result attributed to the Group for the first nine months of 2022 includes the application to the Group's entities in Turkey of IAS 29, "Financial Reporting in Hyperinflationary Economies"².

Unless expressly indicated otherwise, to better understand the changes under the main headings of the Group's income statement, the year-on-year rates of change provided below refer to constant exchange rates. When comparing two dates or periods in this report, the impact of changes in the exchange rates against the euro of the currencies of the countries in which BBVA operates is sometimes excluded, assuming that exchange rates remain constant. For this purpose, the average exchange rate of the currency of each geographical area of the most recent period is used for both periods, except for those countries whose economies have been considered hyperinflationary, for which the closing exchange rate of the most recent period is used.

The accumulated net interest income as of September 30, 2022 was higher than in the same period of the previous year (+32.6%), with increases in all geographical areas due to the improvement in customer spread and higher managed loan portfolio volumes. Mexico, Turkey and South America performed well.

All areas, with the exception of Rest of Business, showed a positive performance in the net fees and commissions line compared to the accumulated amount reported at the end of September 2021 (+17.4% at Group level), which is partly explained by the increase in activity and higher fees from payment systems and deposits in the first nine months of 2022.

² IAS 29 has not been applied to operations outside Turkey, in particular to the financial statements of Garanti Bank in Romania and Garanti Bank International N.V. in the Netherlands.

**NET INTEREST INCOME / AVERAGE TOTAL ASSETS ⁽¹⁾
(PERCENTAGE)**

⁽¹⁾ Excluding BBVA USA and the rest of the companies in the United States sold to PNC on June 1, 2021 for the 2021 figures.

**NET INTEREST INCOME PLUS NET FEES AND
COMMISSIONS (MILLIONS OF EUROS AT CONSTANT
EXCHANGE RATES)**

⁽¹⁾ At current exchange rates: +20.8%.

NTI showed a year-on-year variation of +17.4% at the end of September 2022, with a positive trend in Turkey, South America, Mexico and Spain, which offset the lower outcome of Rest of Business and the lower results recorded in the Corporate Center.

The other operating income and expenses line accumulated a result of €-1,145m as of September 30, 2022, compared to €-108m in the same period last year, mainly due to the more negative adjustment for inflation in Argentina, the recording of this adjustment in the Group's entities in Turkey in 2022 and the higher contribution to the Single Resolution Fund ("SRF") in Spain.

**GROSS INCOME (MILLIONS OF EUROS AT CONSTANT
EXCHANGE RATES)**

⁽¹⁾ At current exchange rates: +17.8%.

In year-on-year terms, operating expenses increased at the Group level (+14.5%), in an environment of high inflation in all countries in which BBVA operates. By areas, there was a year-on-year decrease in Spain, due to the lower headcount, and to a lesser extent, in the Corporate Center.

Notwithstanding the above, thanks to the remarkable growth in gross income (+21.2%), the efficiency ratio stood at 42.9% as of September 30, 2022, with an improvement of 249 basis points compared to the ratio recorded 12 months earlier. By geographical areas, Spain, Mexico and, to a lesser extent, South America recorded a favorable performance in terms of efficiency.

OPERATING EXPENSES (MILLIONS OF EUROS AT CONSTANT EXCHANGE RATES)

⁽¹⁾ At current exchange rates: +12.8%.

EFFICIENCY RATIO (PERCENTAGE)

Impairment on financial assets not measured at fair value through profit or loss (impairment on financial assets) closed September 2022 6.4% above the previous year, with higher credit impairments in Turkey and Mexico.

OPERATING INCOME (MILLIONS OF EUROS AT CONSTANT EXCHANGE RATES)

⁽¹⁾ At current exchange rates: +21.8%.

IMPAIRMENT ON FINANCIAL ASSETS (MILLIONS OF EUROS AT CONSTANT EXCHANGE RATES)

⁽¹⁾ At current exchange rates: +8.1%.

The provisions or reversal of provisions line (hereinafter "provisions") accumulated a negative balance of €241m as of September 30, 2022, mainly due to provisions for legal contingencies in Spain and was 2.2% below the accumulated figure in the same period of the last year.

For its part, the other gains (losses) line closed September 2022 with a positive balance of €37m, which compares positively to the figure reached the previous year (€-5m).

As a result of the above, the BBVA Group generated a net attributable profit, excluding non-recurring impacts, of €5,044m in the first nine months of 2022, representing a year-on-year increase of +37.1%. Taking into account the non-recurring impacts, registered within the line "Discontinued operations and Other," that is: (I) €-201m recorded in the second quarter of 2022 for the purchase of offices in Spain; (II) €+280m for the results generated by BBVA USA and the rest of the companies sold to PNC on June 1, 2021; and (III) €-696m of the net costs associated with the restructuring process, the cumulative net attributable profit of the Group at the end of September 2022 stood at €4,842m, 47.0% higher than that achieved in the first nine months of 2021.

The cumulative net attributable profits, in millions of euros, at the end of September 2022 for the business areas that compose the Group were as follows: €1,514m in Spain (excluding the impact from the purchase of offices), €2,964m in Mexico, €336m in Turkey, €614m in South America and €183m in Rest of Business.

NET ATTRIBUTABLE PROFIT (LOSS) (MILLIONS OF EUROS AT CONSTANT EXCHANGE RATES)

ADJUSTED EARNING PER SHARE ⁽²⁾ AND EARNING PER SHARE ⁽²⁾ (EUROS)

General note: adjusted earning per share excludes: (I) the net impact arisen from the purchase of offices in Spain in 2Q22; (II) the net cost related to the restructuring process for the period 2Q21; and (III) the profit (loss) after tax from discontinued operations derived from the sale of BBVA USA and the rest of the companies in the United States to PNC on June 1, 2021 for the periods 1Q21 and 2Q21.

The Group's profitability indicators improved in year on year terms, supported by the favorable performance of results.

ROE AND ROTE ⁽¹⁾ (PERCENTAGE)

ROA AND RORWA ⁽¹⁾ (PERCENTAGE)

⁽¹⁾ Excludes the net impact arisen from the purchase of offices in Spain in Jan.-Sep.22. Excludes BBVA USA and the rest of the companies in the United States sold to PNC on June 1, 2021 and the net cost related to the restructuring process for the periods Ene.-Sep.21 and 2021.

Balance sheet and business activity

The most relevant aspects related to the evolution of the Group's balance sheet and business activity as of September 30, 2022 are summarized below:

- Loans and advances to customers grew by 13.4% compared to the end of December 2021, strongly favored by the evolution of corporate loans (+20.9%) in all business areas and, to a lesser extent, by the dynamism of retail loans (+8.2% at Group level), in particular, in Mexico and South America, supported by the good performance of consumer loans, credit cards (+20.3% overall at Group level) and mortgage loans (+2.7% at Group level and flat in the quarter).
- Customer funds increased by 8.7% compared to the end of December 2021, thanks to the contribution of demand deposits (+7.4%) and time deposits (+32.6%), showing an outstanding growth in the quarter. For its part, off-balance sheet funds increased by 2.3% in the first nine months of 2022 with more notable growth in investment funds and managed portfolios.

Solvency

Capital base

The Group's CET1 fully-loaded ratio stood at 12.45% as of September 30, 2022, maintaining a large management buffer over the Group's CET1 requirement (8.60%), and also above the Group's established target management range of 11.5-12.0% of CET1.

During the third quarter of the year, the CET1 ratio remained at the level of the previous quarter. The generation of profit, net of dividends and remuneration of equity instruments, contributed 26 basis points to the CET1 ratio. This growth, together with the offset in equity of the effects of hyperinflation on earnings and the reversal of approximately 10 basis points of the effect on capital of the share buyback program, which was completed for an amount lower than previously deducted, mitigated the effect of market volatility and the growth of risk-weighted assets (RWA).

Fully-loaded risk-weighted assets (RWA) increased approximately €10,800 million euros in the quarter, mainly as a result of the organic generation and the currency effect mainly due to the appreciation of the U.S. dollar and the Mexican peso against the euro.

The consolidated fully-loaded additional Tier 1 capital (AT1) stood at 1.58% as of September 30, 2022, resulting in a 1 basis point decrease from the previous quarter.

The consolidated fully-loaded Tier 2 ratio at the end of September stood at 1.94%, with a decrease of 13 basis points in the quarter. The total fully-loaded capital adequacy ratio stands at 15.97%.

Following the latest SREP (Supervisory Review and Evaluation Process) decision, received in February 2022 and with entry into force as from March 1, 2022, the ECB informed the Group that the Pillar 2 requirement remains unchanged at 1.5% (of which at least 0.84% must be fulfilled with CET1). Therefore, BBVA must maintain a CET1 capital ratio of 8.60% and a total capital ratio of 12.76% at the consolidated level.

The phased-in CET1 ratio at the consolidated level stood at 12.55% as of September 30, 2022, considering the transitory effect of the IFRS 9 standard. AT1 reached 1.58% and Tier 2 reached 1.94%, resulting in a total capital adequacy ratio of 16.07%.

CAPITAL BASE (MILLIONS OF EUROS)

	CRD IV phased-in			CRD IV fully-loaded		
	30-09-22 ^{(1) (2)}	31-12-21	30-09-21	30-09-22 ^{(1) (2)}	31-12-21	30-09-21

Total capital ratio (%)	16.07	17.24	19.17	15.97	16.99	18.86

⁽¹⁾ As of September 30, 2022, the difference between the phased-in and fully-loaded ratios arises from the temporary treatment of certain capital items, mainly of the impact of IFRS 9, to which the BBVA Group has adhered voluntarily (in accordance with article 473bis of the CRR and the subsequent amendments introduced by the Regulation (EU) 2020/873).

⁽²⁾ Preliminary data.

Regarding shareholder remuneration, on April 8, 2022 and as approved by the Annual General Meeting held on March 18, 2022 on the second item of the agenda, a cash gross payment of €0.23 was made against voluntary reserves for each outstanding share of BBVA as an additional shareholder remuneration for the year 2021. Thus, the total amount of cash distributions for the year 2021 was €0.31 gross per share, the largest distribution in 10 years. Similarly, on September 29, 2022, BBVA informed that its Board of Directors approved the payment in cash of €0.12 gross per share, which was paid on October 11, 2022. This dividend is already considered in the Group's capital adequacy ratios.

The total shareholder remuneration includes, in addition to the aforementioned cash payments, the extraordinary remuneration resulting from the execution of the program scheme for the buyback of own shares announced on October 29, 2021 (the "Program Scheme").

Specifically, regarding the Program Scheme, on November 19, 2021, BBVA notified by means of Inside Information the execution of a first tranche (the "First Tranche"), for a maximum amount of 1,500 million euros, with a maximum number of shares to be acquired in the amount of 637,770,016 treasury shares, representing approximately 9.6% of BBVA's share capital. By means of Other Relevant Information dated March 3, 2022, BBVA communicated the completion of the execution of the First Tranche as the maximum monetary amount had been reached, having acquired 281,218,710 own shares in execution of the First Tranche, representing approximately 4.22 % of BBVA's share capital as of that date. On June 15, 2022, BBVA notified the partial execution of the share capital reduction resolution adopted by the Annual General Shareholders' Meeting of BBVA held on March 18, 2022, through the redemption of the 281,218,710 own shares acquired by the Bank in execution of the First Tranche and the consequent reduction in BBVA's share capital by a nominal amount of 137,797,167.90 euros.

On February 3, 2022, BBVA notified by means of Inside Information that its Board of Directors had agreed, within the scope of the Program Scheme, to carry out a second buyback program for the repurchase of own shares (the "Second Tranche") for a maximum amount of €2,000 million and a maximum number of shares to be acquired equal to the result of subtracting from 637,770,016 own shares (9.6% of BBVA's share capital at that date) the number of own shares finally acquired in execution of the First Tranche.

In this regard, on March 16, 2022, BBVA informed by means of Inside Information that it had agreed to execute the Second Tranche: i) through the execution of a first segment for an amount of up to €1,000 million, and with a maximum number of shares to be acquired of 356,551,306 treasury shares (the "First Segment"); and (ii) once execution of the First Segment has been completed, through the execution of a second segment that would complete the Framework Program (the "Second Segment").

By means of Other Relevant Information dated May 16, 2022, BBVA announced the completion of the execution of the First Segment upon reaching the maximum monetary amount of €1,000 million, having acquired 206,554,498 own shares in execution of the First Segment, representing, approximately, 3.1% of BBVA's share capital as of said date.

On June 28, 2022, BBVA communicated through Inside Information the agreement to complete the Program Scheme by executing the Second Segment, for a maximum amount of €1,000 million and a maximum number of BBVA shares to be acquired of 149,996,808. By means of Other Relevant Information dated August 19, 2022, BBVA announced the completion of the execution of the Second Segment of the Second Tranche upon reaching the maximum number of shares of 149,996,808, representing, approximately, 2.3% of BBVA's share capital as of said date (amounted to approximately €660 million). On September 30, 2022, BBVA notified, by means of Other Relevant Information, an additional partial execution of the share capital reduction resolution adopted by the Annual General Shareholders' Meeting of BBVA held on March 18, 2022, through the redemption of the 356,551,306 own shares acquired by the Bank in execution of the First Segment and the Second Segment and the consequent reduction of BBVA's share capital by a nominal amount of 174,710,139.94 euros.

After the redemptions of the shares acquired in execution of the First and Second Tranche indicated, BBVA's share capital has been set at 2,954,757,116.36 euros, represented by 6,030,116,564 shares with a nominal value of €0.49 each.

SHAREHOLDER STRUCTURE (30-09-2022)

More than 500,001	296	0.04	3,595,502,632 ⁽¹⁾	59.6
Total	813,683	100	6,030,116,564	100

⁽¹⁾ The number of shares issued takes into account the redemption of 356,551,306 shares, corresponding to the second tranche of the share buyback program.

With regard to MREL (Minimum Requirement for own funds and Eligible Liabilities) requirements, BBVA must maintain, from January 1, 2022, an amount of own funds and eligible liabilities equal to 21.46% of the total RWAs of its resolution group, at a sub-consolidated³ level (hereinafter, the "MREL in RWAs"). This MREL in RWA does not include the combined capital buffer requirement which, according to applicable regulations and supervisory criteria, would currently be 3.26%, and it is currently the most restrictive

³ In accordance with the resolution strategy MPE ("Multiple Point of Entry") of the BBVA Group, established by the SRB, the resolution group is made up of Banco Bilbao Vizcaya Argentaria, S.A. and subsidiaries that belong to the same European resolution group. As of June 30, 2021, the total RWAs of the resolution group amounted to €190,377m and the total exposure considered for the purpose of calculating the leverage ratio amounted to €452,275m.

requirement for BBVA. Given the structure of own funds and admissible liabilities of the resolution group, as of September 30, 2022, the MREL ratio in RWAs stands at 26.18%^{4,5}, complying with the aforementioned requirement.

With the aim of reinforcing compliance with these requirements, during 2022, BBVA has made the following debt issues: (i) senior non-preferred bond for an amount of €1,000m, with a maturity of 7 years and the option for early redemption in the sixth year, with a coupon of 0.875%; (ii) senior preferred issue in May, 2022 for €1,250m at a fixed rate of 1.750% over three and a half years; (iii) senior preferred issue in May, 2022 for an amount of €500m at a floating rate of 3-months Euribor plus a spread of 64 basis points (leaving a coupon of 3-months Euribor plus 100 basis points) at three years and a half; (iv) senior preferred issue in May, 2022 at two-year terms for €100m at a fixed 1% rate; (v) senior preferred issue in July for an initial amount of €400m at the 3-months Euribor floating rate plus 70 basis points, which was increased in amount on 3 occasions, reaching a total amount of 865 million euros; (vi) USD1 billion senior non-preferred issue in September, 2022 with a four-year maturity and a coupon of 5.862%; (vii) USD750 million senior non-preferred issue in September, 2022 with a maturity of six years and a coupon of 6.138%; (viii) senior preferred issue in September, 2022 for an amount of 1,250 million euros, maturing in five years and a coupon of 3.375%; (ix) preferred senior green issue in October, 2022 for a term of seven years and a coupon of 4.375%, whose aim is to finance the growth of commercial activity and meet the Group's objective of making at least one green or social issue per year; and (x) senior preferred issue in October, 2022 for €100m over 12 years and a coupon of 4.25%.

Lastly, as of September 30, 2022, the Group's fully-loaded leverage ratio stood at 6.3% (6.3% phased-in)⁶.

Ratings

During the first nine months of 2022, BBVA's rating has continued to show its stability and all agencies have maintained their rating in the A category. In March, S&P changed the outlook of BBVA's rating from negative to stable (affirming the rating at A), after taking a similar action in the Spanish sovereign rating. Following annual reviews of BBVA, Fitch and DBRS Morningstar affirmed their ratings at A- (May) and A (high) (March), respectively, both with a stable outlook. For its part, Moody's has kept BBVA's rating unchanged in the period at A3 (with a stable outlook). The following table shows the credit ratings and outlook assigned by the agencies:

RATINGS			
Rating agency	Long term ⁽¹⁾	Short term	Outlook
DBRS	A (high)	R-1 (middle)	Stable
Fitch	A-	F-2	Stable
Moody's	A3	P-2	Stable
Standard & Poor's	A	A-1	Stable

⁽¹⁾ Ratings assigned to long term senior preferred debt. Additionally, Moody's and Fitch assign A2 and A- rating, respectively, to BBVA's long term deposits.

⁴ Own resources and eligible liabilities to meet, both, MREL and the combined capital buffer requirement applicable.

⁵ As of September 30, 2022, the MREL ratio in Leverage Ratio stands at 10.59% and the subordination ratios in terms of RWAs and in terms of exposure of the leverage ratio, stand at 21.95% and 8.88%, respectively, being preliminary data.

⁶ The Group's leverage ratio is provisional at the date of release of this report. On April, 1st 2022 ended the period of temporary exclusion of certain positions with central banks.

Risk management

Credit risk

In addition to the significant macroeconomic challenges posed by the COVID-19 pandemic, the global economy is currently facing a number of exceptional challenges. Russia's invasion of Ukraine has caused significant disruption, instability and volatility in the world markets, as well as increased inflation (including contributing to further increases in energy, oil and other commodity prices and further affecting supply chains), and lower economic growth.

In relation to the relief measures for customers affected by the pandemic, and in the second instance, affected by the economic effects derived from the war in Ukraine, in Spain and Peru, the possibility of carrying out extensions both in the maturity period as well as in the grace period in financing with public guarantee are still in force. In Spain, they can be requested by companies and self-employed from June 30, 2022, after the expiration of the Temporary State Aid Framework approved by the European Commission, and in Peru, the Decree was approved in May, with eligibility in this measure in place until December 31, 2022.

Regarding the direct exposure of the Group to Russia and Ukraine, this is limited for BBVA, although the Group has taken different measures aimed at reducing its impact, among others, the initial lowering of limits followed by the suspension of operations with Russia, lowering of internal ratings and the inclusion of the country and its borrowers as impaired for subjective reasons.

However, the indirect risk is greater due to the activity of customers in the affected area or sectors. The economic effects are mainly shown through higher commodity prices, but also through financial and confidence channels, as well as a further deterioration of global supply chain issues.

Calculation of expected losses due to credit risk

In addition to the individualized and collective estimates of the expected losses and the macroeconomic estimates in accordance with what is described in IFRS 9, the estimate at the end of the quarter includes the effect on the expected losses of the macroeconomic forecasts' update, which have been affected by the war in Ukraine, the evolution of interest rates, inflation rates or the prices of commodities. This update includes an adaptation of these forecasts, which has been reviewed following the internal approval circuits established for this purpose, to reflect the effects of the new inflationary environment on the results of the collective estimates.

Additionally, the Group can supplement the expected losses either by the consideration of additional risk drivers, the incorporation of sectorial particularities or that may affect a set of operations or borrowers. These adjustments should be of temporary nature, until the reasons for them disappear or they materialize. As of September 30, 2022, there are adjustments to expected losses which amounted to € 243 million at Group level, €159 million in Spain, € 4 million in Peru and €80 million in Mexico. As of December 31, 2021 there were €311 million at the Group level for the same concept, €226 million in Spain, €18 million in Peru and €68 million in Mexico.

BBVA Group's credit risk indicators

The evolution of the Group's main credit risk indicators is summarized below:

- Credit risk has increased by 3.5% (+2.3% at constant exchange rates) between July and September 2022, with an almost generalized growth, at constant exchange rates at Group level, although in Spain the seasonality of the quarter favored the stability of this metric.
- Reduction in the balance of non-performing loans at Group level between June and September 2022 (-2.2% in current terms and -3.1% at constant rates) in the main geographical areas, mainly supported by recoveries and repayments in wholesale portfolios. Compared to the end of December 2021, the amount of non-performing loans decreased by -1.8% (-5.1% at constant exchange rates).

- The NPL ratio stood at 3.5% as of September 30, 2022, -21 basis points below the figure recorded in March 2022 and -57 basis points below the one of December 2021, with an improvement in this indicator in all business areas.
- Loan-loss provisions increased by 3.4% compared to the figure of the first quarter (+9.0 with respect to December 2021) with growth in the main business areas except for South America, which remained practically stable.
- The NPL coverage ratio stood at 83%, 446 basis points above the figure of June 2022 (+821 basis points higher than at the end of 2021), supported by the good performance of the balance of non-performing loans and the increase in funds.
- The cumulative cost of risk as of September 30, 2022 stood at 0.86%, higher than the end of the second quarter 2022 but still 7 basis points below the close of 2021. Although the recurring flows are higher than those registered in the first semester, they stand at more normalized levels.

NPL AND NPL COVERAGE RATIOS AND COST OF RISK (PERCENTAGE)

CREDIT RISK ⁽¹⁾ (MILLIONS OF EUROS)

	30-09-22	30-06-22	31-03-22	31-12-21	30-09-21
Credit risk	428,619	414,128	395,325	376,011	371,708
Non-performing loans	15,162	15,501	15,612	15,443	14,864

⁽¹⁾ Preliminary data.

Structural risks

Liquidity and funding

Liquidity and funding management at BBVA aims to finance the recurring growth of the banking business at suitable maturities and costs, using a wide range of instruments that provide access to a large number of alternative sources of financing. In this context, it is important to notice that, given the nature of BBVA's business, the funding of lending activity is fundamentally carried out through the use of stable customer funds.

Due to its subsidiary-based management model, BBVA is one of the few major European banks that follows the Multiple Point of Entry (MPE) resolution strategy: the parent company sets the liquidity policies, but the subsidiaries are self-sufficient and responsible for managing their own liquidity and funding (taking deposits or accessing the market with their own rating), without fund transfers or financing occurring between either the parent company and the subsidiaries or between the different subsidiaries. This strategy limits the spread of a liquidity crisis among the Group's different areas and ensures that the cost of liquidity and financing is correctly reflected in the price formation process.

The BBVA Group maintains a solid liquidity position in every geographical area in which it operates, with ratios well above the minimum required:

- The BBVA Group's liquidity coverage ratio (LCR) remained comfortably above 100% throughout the first nine months of 2022, and stood at 166% as of September 30, 2022. For the calculation of this ratio, it is assumed that there is no transfer of liquidity among subsidiaries; i.e. no type of excess liquidity levels in foreign subsidiaries is being considered in the calculation of the consolidated ratio. When considering these excess liquidity levels, the BBVA Group's LCR would stand at 215%.
- The net stable funding ratio (NSFR), defined as the result between the amount of stable funding available and the amount of stable funding required, demands banks to maintain a stable funding profile in relation to the composition of their assets and off-balance sheet activities. This ratio should be at least 100% at all times. The BBVA Group's NSFR ratio, stood at 134% as of September 30, 2022.

The breakdown of these ratios in the main geographical areas in which the Group operates is shown below:

LCR AND NSFR RATIOS (PERCENTAGE. 30-09-22)				
	Eurozone ⁽¹⁾	Mexico	Turkey	South America
LCR	198%	190%	274%	All countries >100
NSFR	125%	140%	168%	All countries >100

⁽¹⁾ BBVA, S.A. liquidity management perimeter: Spain + branches of the outside network.

One of the key elements in BBVA's Group liquidity and funding management is the maintenance of large high quality liquidity buffers in all the geographical areas. In this respect, the Group has maintained for the last 12 months an average volume of high quality liquid assets (HQLA) accounting to €136.3 billion, among which, 94% correspond to maximum quality assets (LCR Tier 1).

It should be noted that the war in Ukraine has not had a significant impact on the liquidity and financing situation of the BBVA Group units during the first nine months of 2022. The most relevant aspects related to the main geographical areas are the following:

- BBVA, S.A. has maintained a sound position with a large high-quality liquidity buffer. During the first nine months of 2022, commercial activity has been mainly neutral in terms of liquidity due to the growth in customer deposits at similar levels than the growth in lending activity. In the coming quarters, the Bank faces the maturities of the TLTRO III program from a comfortable position and with a liquidity and financing planning to maintain regulatory liquidity metrics well above the established minimums. On the other hand, collateral generation activities have continued with the issuance of mortgage and regional bonds to be retained for an amount of €2 billion, highlighting the creation of a new mortgage securitization fund held as collateral for an amount of €12.4 billion, which groups the assets previously held in seven funds, generating an additional collateral of approximately €3 billion.
- In BBVA Mexico, commercial activity has drained liquidity for the amount of approximately 128 billion Mexican pesos between January and September 2022, supported by the growth in lending activity, that exceeded the growth of customer funds. Despite this, BBVA Mexico continues to hold a comfortable liquidity position, which has contributed to a cost-efficient funding management in an environment of rising rates.
- In Turkey, in the first nine months of 2022, the lending gap in local currency has been reduced, due to a greater growth in deposits than in loans. The lending gap in foreign currency has increased due to reductions in deposits as a result of the mechanism settled to encourage Turkish lira deposits, partially offset by lower loans. Garanti BBVA continues to maintain a stable liquidity position with comfortable ratios. The Central Bank of Turkey has continued to implement measures in order to reduce the dollarization of the economy and encourage the purchase of fixed-rate longer-term bonds.
- In South America, the liquidity situation remains adequate throughout the region. In Argentina, liquidity continues to increase in the system and in BBVA due to a higher growth in deposits than in loans in local currency. In BBVA Colombia, a greater growth in lending activity is shown, compared to the growth in funds, non-compromising the liquidity situation of the bank. For its part, BBVA Peru maintains solid liquidity levels, due to the favorable evolution of deposits, in local currency.

The main wholesale financing transactions carried out by the companies of the BBVA Group are listed below:

- In January 2022, BBVA, S.A. issued a €1,000m senior non-preferred bond, with a maturity of 7 years and the option for early redemption in the sixth year, with a coupon of 0.875%. In May of the same year, BBVA, S.A. carried out a preferred senior debt issue for a term of three and a half years and separated into two tranches, one with a fixed coupon of 1.75% for an amount of €1,250m and another with a variable coupon set at three-month Euribor plus 64 basis points of spread (3-month Euribor coupon plus 100 basis points) for an amount of €500m. On the other hand, two private issues have been closed, one in May for €100m at a fixed 1% and another in July for €400m at the 3-month floating rate Euribor plus 70 basis points, both with a 2-year term, and in June 2022 a securitization of loans for the financing of vehicles was completed for an amount of €1,200m. In addition, in May 2022, the Group carried out the early redemption of the preference shares contingently convertible into ordinary shares of BBVA (CoCos) issued in May 2017 by BBVA. In September, a senior non-preferred debt issue was made for an amount of USD1,750m, in two tranches, one of USD 1,000m maturing in four years and another of USD 750m maturing in six years and with an early redemption option one year earlier, in both tranches. Likewise, also in September, an issue of a preferred senior bond was closed for an amount of €1,250m, maturing in five years with a coupon of 3.375%, and in October, a preferred senior debt green bond for an amount of €1,250m was closed with a term of seven years and a coupon of 4.375%, with the following goal: to finance the growth of the commercial activity and to comply with the Group's commitment to carry out at least one green or social emission per year. Additionally, increases in the above mentioned floating-rate private issue have been closed for €465m (reaching the total amount of €865m) and in October another for €100m at 12 years and a 4.25% coupon.
- On June 21, BBVA Mexico issued a sustainable bond for 10 billion Mexican pesos (€500m, approximately), thus becoming the first private bank to carry out an issue of this type in Mexico, using the TIIE (Balanced Interbank Interest Rate used in Mexico) as the funding benchmark.
- On June 7, Garanti BBVA renewed 100% of a syndicated loan indexed to environmental, social and corporate governance (ESG) criteria that consists of two separate tranches of USD 283.5m and €290.5m, both with a maturity of one year. Garanti BBVA also provided sustainable funding of USD 75m in the first nine months of 2022.
- On June 28, BBVA Colombia closed a 5-year financing with the International Finance Corporation (IFC) for USD 200m, the aim of which is to promote the financing and construction of energy-sustainable buildings and reduce CO₂ emissions, among others. On September 28, an additional loan with IFC was closed for USD 40m for a 3-year term.

Foreign exchange

Foreign exchange risk management of BBVA's long-term investments, mainly stemming from its overseas franchises, aims to preserve the Group's capital adequacy ratio and to ensure the stability of its income statement.

In the first nine months of the year, foreign exchange markets have been affected by strong central banks' actions and the deterioration of the geopolitical context. This context has benefited the U.S. dollar, which has appreciated 16.2% against a euro penalized by the consequences of the war in Ukraine. The currencies of Latin America have presented, in general, a positive performance in the first nine months of 2022, especially against the euro. The Mexican peso appreciated 17.8% against the euro, the Peruvian sol by 16.4%, the Colombian peso by 2.1% and the Chilean peso by 1.6%. For its part, the Argentine peso accumulated a depreciation of 18.8%. With regard to the Turkish lira, the high inflation environment and the very lax monetary policies continue to negatively affect the currency, losing a 15.8% against the euro in the first nine months of the year.

EXCHANGE RATES (EXPRESSED IN CURRENCY/EURO)

	Year-end exchange rates			Average exchange rates	
		Δ % on	Δ % on		Δ % on
	30-09-22	30-09-21	31-12-21	Jan.-Sep.22	Jan.-Sep.21
U.S. dollar	0.9748	18.8	16.2	1.0640	12.4
Mexican peso	19.6393	20.9	17.8	21.5551	11.7
Turkish lira ⁽¹⁾	18.0841	(43.1)	(15.8)	—	—
Peruvian sol	3.8703	23.6	16.4	4.0518	13.1
Argentine peso ⁽¹⁾	143.38	(20.3)	(18.8)	—	—
Chilean peso	941.66	(1.2)	1.6	912.37	(3.3)
Colombian peso	4,417.86	0.5	2.1	4,323.62	2.3

⁽¹⁾ According to IAS 21 "The effects of changes in foreign exchange rates", the year-end exchange rate is used for the conversion of the Turkey and Argentina income statement.

BBVA maintains its policies of actively hedging its main investments in emerging markets, covering on average between 30% and 50% of annual earnings and around 70% of the CET1 capital ratio surplus. The sensitivity of the Group's CET1 fully-loaded ratio to 10% depreciations in major currencies is estimated, after hedging, at: +19 basis points for the U.S. dollar, -4 basis points for the Mexican peso and -5 basis points for the Turkish lira. The coverage levels of the expected results for 2022 is close to 100% for Mexico, Peru and Colombia. For Turkey, the transition to hyperinflation accounting is generating significant volatility in the expected profits in 2022, although it is neutral in terms of equity generation. In this case, and given the high costs of hedging in this currency, the Group has chosen to make a holistic approach that takes into account, in addition to the expected earnings, the capital ratio volatility to currency movements and the book value of the franchise.

Interest rate

Interest rate risk management seeks to limit the impact that BBVA may suffer, both in terms of net interest income (short-term) and economic value (long-term), from adverse movements in the interest rate curves in the various currencies in which the Group operates. BBVA carries out this work through an internal procedure, pursuant to the guidelines established by the European Banking Authority (EBA), in order to analyze the potential impact that could derive from a range of scenarios on the Group's different balance sheets.

The model is based on assumptions intended to realistically mimic the behavior of the balance sheet. Of particular relevance are assumptions regarding the behavior of accounts with no explicit maturity and prepayment estimates. These assumptions are reviewed and adapted at least once a year to take into account any changes in observed behavior.

At the aggregate level, BBVA continues to maintain a moderate risk profile, in accordance with the established objective, showing positive sensitivity toward interest rate increases in the net interest income.

Regarding relevant events in financial markets, the ECB continued with the rate hike that began in July, with an additional increase in September of 75 basis points which might not be the last one if, as expected, inflation in Europe remains high. As for the impacts in financial markets, the quarter was once again highly volatile, with improvements in the fixed income markets during July, which disappeared during the months of August and September. The German bond curve has continued to flatten, derived from greater rises in the short end than in the longer end. The Spanish sovereign bond curve has behaved similarly to the German curve in the quarter, that is to say, the spread has remained relatively stable. For its part, the United States sovereign bond curve had a similar flattening trend to that of German bonds, with the Fed continuing its rate hike cycle, accumulating increases of 300 basis points in the year. With regard to the emerging markets, similar flattening moves have occurred to those of the United States, continuing with the rate hikes cycle. For its part, Turkey has set the monetary policy rate at 10.5%, making successive cuts of 100 basis points at its meetings in August and September and an additional 150 basis points at the October meeting.

By area, the main features are:

- Spain has a balance sheet characterized by a high proportion of variable-rate loans (basically mortgages and corporate lending) and liabilities composed mainly by customer demand deposits. The ALCO portfolio acts as a management lever and hedging for the bank's balance sheet, mitigating its sensitivity to interest rate fluctuations. The balance sheet interest rate risk profile remained stable during the year, the highest positive sensitivity to rates franchise in the Group.

On the other hand, as mentioned, at the end of September 2022 the ECB set the benchmark interest rate at 1.25%, held the marginal deposit facility rate at 0.75% and the marginal loan facility rate at 1.50%. This has been reflected in the European benchmark interest rates (Euribor), with significant increases in the year. In this regard, customer spread is starting to benefit from interest rate hikes, expected to continue in the coming quarters.

- Mexico continues to show a balance between fixed and variable interest rates balances. In terms of assets that are most sensitive to interest rate fluctuations, the commercial portfolio stands out, while consumer loans and mortgages are mostly at a fixed rate. With regard to the customer funds, the high proportion of non-interest bearing deposits should be highlighted, which are insensitive to interest rate movements. The ALCO portfolio is invested primarily in fixed-rate sovereign bonds with limited maturities. Net interest income sensitivity continues to be limited, registering a positive impact against 100 basis points increases in the Mexican peso, which is around 2,6%. The monetary policy rate stands at 9.25%, 375 basis points above the end-of-year level of 2021. Regarding client spread, there has been improvement so far in 2022, a trend which should continue supported by the higher interest rates environment.
- In Turkey, the sensitivity of loans, which are mostly fixed-rate but with relatively short maturities, and the ALCO portfolio balance the sensitivity of deposits on the liability side. The interest rate risk is thus limited, both in Turkish lira and in foreign currencies. With regard to benchmark rates, the Central Bank of the Republic of Turkey decided, at its October meeting, to cut 150 basis points, which together with the cuts made in August and September by 100 basis points, places the benchmark interest rate at 10.5%, as mentioned above. In addition, there has been a sharp upturn in inflation, which has generated positive impacts on Garanti BBVA's net interest income and on the valuation of the bond portfolio linked to it. Customer spread has continued to improve during the first nine months of 2022.
- In South America, the interest rate risk profile remains low as most countries in the area have a fixed/variable composition and maturities that are very similar for assets and liabilities, with limited net interest income sensitivity. In addition, in balance sheets with several currencies, interest rate risk is managed for each of the currencies, showing a very low level of risk. Regarding the benchmark rates of the central banks of Peru and Colombia, they continued to rise during the first nine months of the year, with increases of 450 (including the October meeting) and 700 basis points, respectively. Customer spreads have nearly not changed during the nine months of the year in both geographical areas, with slight increases in Peru and slight falls in Colombia, impacted by an environment of higher interest rates.

Business areas

This section presents the most relevant aspects of the Group's different business areas. Specifically, for each one of them, it shows a summary of the income statements and balance sheets, the business activity figures and the most significant ratios.

The structure of the business areas reported by the BBVA Group as of September 30, 2022, is identical with the one presented at the end of 2021.

The composition of BBVA Group's business areas is summarized below:

- Spain mainly includes the banking and insurance businesses that the Group carries out in this country, including the proportional share of the results of the company created from the bancassurance agreement reached with Allianz at the end of 2020.
- Mexico includes banking and insurance businesses in this country, as well as the activity that BBVA Mexico carries out through its branch in Houston.
- Turkey reports the activity of the group Garanti BBVA that is mainly carried out in this country and, to a lesser extent, in Romania and the Netherlands.
- South America mainly includes banking and insurance activity conducted in the region.
- Rest of Business mainly incorporates the wholesale activity carried out in Europe (excluding Spain) and in the United States, as well as the banking business developed through BBVA's branches in Asia.

The Corporate Center contains the centralized functions of the Group, including: the costs of the head offices with a corporate function; structural exchange rate positions management; portfolios whose management is not linked to customer relations, such as financial and industrial holdings; stakes in Funds & Investment Vehicles in tech companies; certain tax assets and liabilities; funds due to commitments to employees; goodwill and other intangible assets as well as such portfolios and assets' funding. Additionally, the results obtained by BBVA USA and the rest of the companies included in the sale agreement to PNC until the closing of the transaction on June 1, 2021, are presented in a single line of the income statements called "Profit (loss) after taxes from discontinued operations". Finally, the costs related to the BBVA, S.A. restructuring process carried out in Spain during the first half of the year 2021, are included in this aggregate and are recorded in the line "Net cost related to the restructuring process".

In addition to these geographical breakdowns, supplementary information is provided for the wholesale business carried out by BBVA, Corporate & Investment Banking (CIB), in the countries where it operates. This business is relevant to have a broader understanding of the Group's activity and results due to the important features of the type of customers served, products offered and risks assumed.

The information by business areas is based on units at the lowest level and/or companies that make up the Group, which are assigned to the different areas according to the main region or company group in which they carry out their activity. With regard to the information of the business areas, in the first quarter of 2022 the Group changed the allocation criteria for certain expenses related to global technology projects between the Corporate Center and the business areas, therefore, to ensure that year-on-year comparisons are homogeneous, the figures corresponding to the financial year 2021 have been restated, which did not affect the consolidated financial information of the Group. Also in the first quarter of 2022, an equity team from the Global Markets unit was transferred from Spain to New York, with the corresponding transfer of the costs associated with this relocation from the Spain area to the Rest of Business area.

Regarding the shareholders' funds allocation, in the business areas, a capital allocation system based on the consumed regulatory capital is used.

Finally, it should be noted that, as usual, in the case of the different business areas, that is, Mexico, Turkey, South America and Rest of Business, and, additionally, CIB, in addition to the year-on-year variations applying current exchange rates, the variations at constant exchange rates are also disclosed.

GROSS INCOME ⁽¹⁾, OPERATING INCOME ⁽¹⁾ AND NET ATTRIBUTABLE PROFIT ⁽¹⁾ BREAKDOWN (PERCENTAGE. JAN.-SEP. 2022)

⁽¹⁾ Excludes the Corporate Center and the net impact arisen from the purchase of offices in Spain.

Macro and industry trends

Economic activity has been quite dynamic in the first half of the year 2022, despite the war in Ukraine. However, this has put upward pressure on energy and food prices, contributing to a rise in inflation to 9.0% in September. According to BBVA Research, GDP is expected to grow by 4.4% this year, three-tenths of a percentage point higher than the previous forecast, an adjustment mainly driven by the surprising GDP growth in the second quarter of the year. The interest rate hikes by the ECB, disruptions in the gas market and the global and European slowdown are expected to moderate the economy, and GDP growth in 2023 would stand around 1.0, about 0.8 percentage points less than previous expectations by BBVA Research. Inflation will remain higher than previously forecast and above the ECB target of 2%, especially in 2022, but also in 2023 (averaging around 9.3% in 2022 and 4.8% in 2023).

With regard to the banking system, credit to the private sector increased slightly by 1.0% year-on-year as of July 2022, following an overall decrease of 0.1% in 2021. The non-performing loan ("NPL") ratio continued to fall and stood at 3.85% in July 2022, 54 basis points lower than July 2021 and 44 basis points better than end-2021. The system also maintains comfortable solvency and liquidity levels.

Activity

The most relevant aspects related to the area's activity during the first nine months of 2022 were:

- Lending activity (performing loans under management) was higher than at the end of 2021 (+3.1%), due largely to the growth in business segments, especially corporate loans (+12.7%) and SMEs (+9.5%), as well as higher consumer balances (+5.5%, including credit cards).
- Total customer funds remained stable, with a variation of -0.8% compared to 2021 year-end. In the first nine months of the year 2022, off-balance sheet funds recorded a decrease of 9.5%, mainly due to the negative effect of market evolution, despite the positive net contributions. For its part, the balance of customer deposits under management increased by 3.1% between January and September with an increase in demand deposits by 3.3% and 1.6% in time deposits.

The most relevant of the evolution of the area's activity in the third quarter of 2022 has been:

- Lending activity remained flat compared to the previous quarter (+0.1%), mainly due to the seasonal reduction in loans to the public sector (-12.7%) and impacted by lower mortgage balances (-1.5%). This was partially offset by growth in corporate loans (+8.2%), loans to SMEs (+1.7%) and consumer loans (+1.4% including credit cards).
- With regard to asset quality, the NPL ratio decreased 13 basis points in the quarter to 3.9% with a decrease in non-performing loans (-2.8%), lower NPL entries together with proactive management of recoveries and write-offs. In terms of coverage, the ratio increased in the quarter to 64%.
- Total customer funds also remained flat between July and September. By product, growth in time deposits (+13.0%), reduction in off-balance sheet funds (-1.9%, affected by the unfavorable market evolution) and flat evolution in demand deposits (-0.2%).

Results

Spain generated a net attributable profit of €1,514m between January and September of 2022, up 27.1% from the result achieved in the same period of the previous year, due to the dynamism of recurring income from banking activity (net interest income and fees) and net trading income (NTI), which together with lower operating expenses and provisions, have driven the year-on-year evolution. This result does not include the net impact of €-201m from the purchase of offices from Merlin, recorded in the second quarter of the year. If this impact is taken into account, the cumulative net attributable profit of the area at the end of September 2022 stands at €1,312m, 10.2% above the net attributable profit for the same period of the previous year.

The most notable aspects of the year-on-year changes in the area's income statement at the end of September 2022 were:

- Net interest income registered a year-on-year increase of 2.3%, mainly as a result of higher volumes and rates in the managed loan portfolio.
- Net fees and commissions had a positive performance (+2.4% year-on-year), mainly supported by a greater contribution from fees and commissions associated with banking services.
- NTI at the end of September 2022 was 24.0% above the one achieved in the same period of the previous year, mainly due to the greater contribution of the Global Markets unit.
- The other operating income and expenses line compares negatively to the first nine months of the previous year, mainly due to the higher contribution to the SRF, which was partially offset by the good performance of the insurance business (+7.8%).
- Year-on-year decrease in operating expenses (-4.3%), mainly due to lower personnel expenses as a result of the staff reduction.
- As a result of gross income growth and the declined expenses, the efficiency ratio stood at 46.4%, representing a significant improvement compared to the 49.9% recorded at the end of September 2021.
- Impairment on financial assets was 17.3% below the one recorded in the first nine months of 2021, due to the good performance of the underlying asset between January and September of 2022. As a result thereof, the accumulated cost of risk at the end of September 2022 stood at 0.24%, still contained, although slightly above the 0.20% at the end of June as a result of the usual review of the parameters used in estimation models.
- The provisions and other results line closed the first nine months of the year at €-37m, which compares very positively with last year, due to, among other factors, the higher results from real estate asset sales and lower provisions for off-balance sheet risks, compared to the same period in 2021.

In the third quarter of 2022, Spain generated a net attributable profit of €504m a 142.4% compared to the previous quarter, which included the net impact of the purchase of offices from Merlin and the contribution to the SRF.

Mexico

Highlights

- **Balanced investment growth in the first nine months**
- **Good performance of recurring income and NTI**
- **Significant improvement in the efficiency ratio**
- **Excellent net attributable profit in the quarter**

Macro and industry trends

Economic growth has picked up during the first half of 2022, mainly due to the good performance of domestic demand. GDP growth will be around 2.0% in the year, according to BBVA Research (unchanged from the previous forecast). It is also expected that growth will moderate significantly going forward and GDP will expand by 0.6% in 2023 (1 percentage point less than the previous forecast). The slowdown in the United States economy and the high inflation (around 8.0% in 2022 and 5.9% in 2023, on average) will foreseeably contribute to the slowdown in economic growth. This may require Banxico to raise interest rates to around 10.75% in the coming months.

With regards to the banking system, based on July 2022 data, lending volumes grew by 10.9% in the past year, at similar growth rates in the main portfolios: housing credit (+11.1%), consumer credit (+13.2%), and corporate credit (+11.7%) while deposits (demand and time deposits) increased by 9.6% year-on-year. The NPL ratio in the system decreased to 2.34% in July 2022 and capital indicators are within comfortable levels.

Unless expressly stated otherwise, all the comments below on rates of change, for both activity and results, will be given at constant exchange rate. These rates, together with changes at current exchange rates, can be found in the attached tables of financial statements and relevant business indicators.

Activity

The most relevant aspects related to the area's activity during the first nine months of 2022 were:

- Lending activity (performing loans under management) grew 12.6% between January and September 2022, with growth in the wholesale portfolio slightly above that of the retail portfolio. The wholesale portfolio, which includes larger companies and the public sector, recorded a growth of 12.2%, due to commercial efforts to attract and retain new customers. For its part, the retail segment accelerated its rate of growth to 11.4%. Within this segment, consumer loans (+13.3%), mortgage loans (+8.9%), and SMEs (+16.7%) stood out. The aforementioned has supported a stable composition in lending activity, where approximately half of the investment is located in each of the portfolios.
- Customer deposits under management increased in the first nine months of 2022 (+1.2%). This performance is explained by both the growth in time deposits (+6.7%) and demand deposits (+0.1%). For its part, off-balance sheet funds grew at a rate of 5.5% between January and September 2022.

The most relevant of the evolution of the area's activity in the third quarter of 2022 has been:

- Lending activity increased by 3.1% in the quarter, with growth in the retail segment (+3.9%) showing greater dynamism in demand (mainly in consumer loans, mortgage loans and credit cards) above the wholesale segment (+2.1%) where corporate banking and loans to developers stood out.
- With regard to the asset quality indicators, the NPL ratio stood at 2.5% at the end of September, which represents an improvement of 28 basis points in the quarter, as a result of a generalized increase in activity, with a decrease in non-performing loans due to the good performance of wholesale recoveries and repayments. For its part, the NPL coverage ratio recorded a significant improvement in the quarter and stood at 133% at the end of September.
- Total funds under management remained stable in the quarter (-0.4%) with growth in mutual funds and reduction in customer deposits explained by the withdrawal of balances from a wholesale customer.

Results

In Mexico, BBVA achieved a net attributable profit of €2,964m between January and September 2022, representing an increase of 47.5% compared to the first nine months of 2021, mainly as a result of the dynamism of the net interest income. In the lower part of the statement, a contained loan-loss provisions and an increase in operating expenses were recorded, which were offset by the good performance of recurring income.

The most relevant aspects of the year-on-year changes in the income statement at the end of September 2022 are summarized below:

- Net interest income increased by 23.9%, mainly as a result of the higher volume of customer portfolio loans and the improvement in the customer spread, supported by the successive rate hikes accumulated by the central bank (375 basis points so far this year).
- Net fees and commissions increased by 17.0% thanks to the higher level of transactions, especially on credit cards, as well as those arising from mutual funds management.
- NTI increased by 14.5% year-on-year, mainly due to the excellent results of the Global Markets unit.
- The other operating income and expenses line recorded a year-on-year growth of 137.4%, due to higher results of the insurance business.
- Operating expenses increased (+12.5%), mainly due to higher personnel expenses, impacted by the employee internalization process carried out in the second half of 2021. General expenses also increased, in an environment of rising prices where certain expenses are indexed to inflation, as well as by higher marketing and technology expenses. Notwithstanding the above, there was significant improvement of 351 basis points in the efficiency ratio, which stood at 31.9% compared to 35.4% recorded twelve months earlier.
- Increase in the impairment on financial assets line (+6.3%), due to higher loan loss-provisions in the retail portfolio. As a result of the above, the cumulative cost of risk at the end of September 2022 stood at 2.57%, in line with the previous quarter.
- Provisions and other results showed an unfavorable comparison, mainly due to provisions for commitments with personnel.

In the quarter, excluding the exchange rate effects, BBVA Mexico generated a net attributable profit of €1,092m, a growth of 4.7% compared to the previous quarter. This result was driven by the good performance of recurring revenue items (+9.4%), especially, net interest income, which benefited from the improved customer spread.

Turkey

Highlights

- Growth in activity, again driven by loans and deposits in Turkish lira
- Lower hyperinflation adjustment in the quarter
- Strength of risk indicators
- Year-on-year growth in net attributable profit

Macro and industry trends

Despite the complex local and global macroeconomic environment, economic activity has been stronger than expected in the first half of the year. According to BBVA Research's estimates, the resilience in activity could lead to growth of 6.0% in 2022. This figure is significantly higher than the 5.0% forecast 3 months ago. Moreover, the relative strength of demand, high commodity prices and the sharp depreciation of the Turkish lira in a context of negative interest rates in real terms (further after the recently announced interest rate cuts by the central bank) have contributed to an inflationary spike, with annual inflation reaching 83.5% in September 2022. According to BBVA Research's estimates, growth could slow down to 3.5% in 2023, therefore reducing inflationary pressure and improving the external balances. However, the economic environment remains highly unstable due to the combination of high inflation, very low real interest rates, pressure on the Turkish lira, high external funding needs and the current global context.

Total credit volumes in the banking system increased by 70.4% year-on-year in local currency terms as of August 2022 (+63.9% growth in the Turkish lira portfolio and +82.3% growth in the foreign currency credit portfolio). Meanwhile, deposits grew by 97.8%, adjusted, these growth rates, for both inflation and the depreciation of the Turkish lira. The system's NPL ratio stood at 2.38% in August 2022 (3.67% in July 2021 and 3.16% at the end of 2021).

Unless expressly stated otherwise, all comments below on rates of changes for both activity and income, will be presented at constant exchange rates. For the conversion of these figures, the exchange rate as of September 30, 2022 is used. These rates, together with changes at current exchange rates, can be observed in the attached tables of the financial statements and relevant business indicators.

Activity

The most relevant aspects related to the area's activity during the first nine months of 2022 were:

- Lending activity (performing loans under management) increased by 41.6% between January and September 2022, driven by the growth in Turkish lira loans (+55.6%). This growth was mainly supported by commercial loans and, to a lesser extent, credit cards and consumer loans. Regarding foreign currency loans (in U.S. dollars) deleveraging continues (-16.9%).
- Customer deposits under management (69% of the area's total liabilities as of September 30, 2022) remained the main source of funding for the balance sheet and increased by 46.2%. Especially noteworthy is the positive performance of Turkish lira time deposits (+87.8%), which represent a 72.4% of total customer deposits in local currency, as well as demand deposits (+77.8%). Balances deposited in foreign currency (in U.S. dollars) continued their downward path and decreased by 10.8%. For its part, off-balance sheet funds grew by 69.8%.

The most relevant of the evolution of the area's activity in the second quarter of 2022 has been:

- Lending activity was above the previous quarter (+8.4%), with a positive evolution of the Turkish lira loans, highlighting corporates (+14.6%), credit cards (+27.4%) and consumer loans (+9.7%).
- In terms of asset quality, the NPL ratio decreased by 32 basis points compared to the rate reached at the end of June 2022 to 5.6%, due to the increase in loans in Turkish lira, together with a slight decline in NPL balance, where recoveries have offset new inflows. The NPL coverage ratio improved to 86% as of September 30, 2022.
- Total funds under management showed a positive quarterly evolution (+15.7%), highlighting the growth of time deposits (+24.1%) and the dynamism of demand deposits (+22.2%), in local currency, as well as the growth of off-balance sheet funds (+18.1%).

Results

Turkey generated a net attributable profit of €336m between January and September 2022. This result includes the application of hyperinflation accounting in Turkey, with effect from January 1, 2022 which includes, among others, the loss of the net monetary position for a gross amount of €2,070m, partially offset by the gross impact of income from inflation-linked bonds (CPI linkers) of €1,351m, both recorded in the "Other operating income and expenses" line, as well as the impact of applying the period-end exchange rate as of September 30, 2022. These results are not comparable with those from the first nine months of 2021, as accounting for hyperinflation has been applied since January 1, 2022.

The most significant aspects of quarterly evolution in the area's income statement were:

- Net interest income recorded significant growth (+27.7%), due to higher Turkish lira loan volumes and the improvement in customer spread.
- Net fees and commissions increased by 3.0%, mainly driven by the positive performance in payment systems, money transfers and brokerage activity.
- Income from NTI was below the previous quarter (-5.1%), mainly due to lower gains from derivatives transactions, as well as to a lower currency position.
- Other operating income and expenses line includes, among others, the aforementioned loss in the value of the net monetary position due to the country's inflation rate, which was lower than that of the previous quarter. It should be noted that said loss is partially offset by the income derived from inflation-linked bonds (CPI linkers), which were lower between July and September, in relation to those obtained in the first quarter of 2022. Despite the above, there has been a greater contribution to the Deposit Guarantee Fund and higher income from the subsidiaries of Garanti BBVA.
- Operating expenses increased (+16.4%), mainly due to higher personnel expenses.
- Regarding the impairment on financial assets, they increased by 52.3% mainly due to the increase in coverage for individual clients that are sensitive to the depreciation of the Turkish lira, and greater impairment needs in the debt securities portfolio. The accumulated cost of risk at the end of September 2022 recorded a slight increase to 0.89% from the 0.88% accumulated at the end of the previous quarter, supported by the growth in lending activity.
- The provisions and other results line closed September with a higher loss than the previous quarter, mainly due to the results from real estate sales carried out in the previous quarter.

South America

Highlights

- Growth in lending activity and customer funds
- Improvement of the NPL ratio and coverage stability
- Favorable behavior of net interest income and NTI in the quarter
- Stability of the efficiency ratio in the quarter despite the growth of expenses in an inflationary environment

These rates, together with the changes at current exchange rates, can be found in the attached tables of the financial statements and relevant business indicators.

Activity and results

The most relevant aspects related to the area's activity during the first nine months of 2022 were:

- Lending activity (performing loans under management) increased +10.2% in the first nine months of 2022, with growth in all segments, particularly in the corporates (+7.5%) consumer (+17.6%) and credit cards (+36.5%) portfolios.
- Customer funds under management increased (+12.6%) compared to the closing balances at the end of 2021, with growth focused on time deposits (+58.3%) in an environment of rising reference rates in broadly the entire region and, to a lesser extent, on off-balance sheet funds (+5.9%) and demand deposits (+2.0%)

The most relevant aspects of the evolution of the area's activity in the quarter were:

- Lending activity (performing loans under management) was higher than in the previous quarter (+3.4%) with growth in all segments except the public sector, in particular, the corporate (+3.6%), consumer (+3.7%) and credit cards (+9.3%) portfolios.
- With regard to asset quality, the NPL ratio stood at 4.1%, with a decrease of 4 basis points in the quarter, supported by the aforementioned growth in activity, mainly due to the reduction originating in Colombia, as a result of both increased activity and the proactive management of recoveries and write-offs. For its part, the NPL coverage rate reached 100%.
- Total customer funds increased in the quarter, boosted by growth in time deposits (+16.9%) and off-balance sheet funds (+5.1%). For its part, demand deposits remained stable in the quarter (-0.1%).

South America generated a net attributable profit of €614m in the first nine months of 2022, which represents a year-on-year variation of +98.3%, mainly due to the improved performance of recurring income (+50.0%) and NTI, which together with lower loan-loss requirements, more than offset the growth of expenses in a highly inflationary environment throughout the region. At the end of September 2022, the cumulative impact of the hyperinflation in Argentina in the "Other operating income and expenses" line was €-669m, notably above the €-271m accumulated at the end of September 2021 under this caption.

In the third quarter of 2022, and excluding the effect of exchange rate fluctuations, South America generated a net attributable profit of €217m, 11.4% below the previous quarter, which is mainly explained by a more negative adjustment for inflation in Argentina.

More detailed information on the most representative countries of the business area is provided below:

Argentina

Macro and industry trends

In a less favorable global economic backdrop, the difficulty in correcting current macroeconomic distortions, further exacerbated by the uncertainty of meeting the objectives established in the loan agreement reached in March 2022 with the International Monetary Fund, volatility in the financial markets has increased significantly in recent months, particularly in the foreign exchange and the local currency government debt markets. High uncertainty regarding future policy developments exists. However, BBVA Research believes that inflation, which was 83.0% in September, will rise further. It also forecasts GDP growth by 4.0% in 2022 (above the previous forecast of 2.5%, largely due to the relatively positive GDP figure for the second quarter, which was stronger than expected) and slightly shrinking in 2023.

Banking system's balances continue to be driven by high inflation. At the end of August 2022, total lending accelerated after growing 67.6% compared to the same month of 2021, supported by both consumer and corporate portfolios, reaching a year-on-year growth of 73.8% and 65.4%, respectively. Meanwhile, deposits moderated their growth compared to previous months, growing in August 2022, 42.6% year-on-year. Finally, the NPL ratio continued to fall to 3.1% in July 2022 (210 basis points less than the same month of 2021).

Activity and results

- Lending activity increased by 51.6% compared to the close of December 2021, well below inflation, with growth in both the business portfolio (+62.6%) and the retail portfolio (+44.6%), highlighting in the latter credit cards (+43.6%) and, to a lesser extent, consumer loans (+49.8%). In the quarter, the NPL ratio stood at 1.5% with an increase in non-performing loans compared to the previous quarter due to higher entries in the retail and the wholesale portfolio, affected by a significant customer, although the rate is below the end of 2021. For its part, the NPL coverage ratio decreased to 165% due to the aforementioned increase in non-performing loans in the quarter.
- Balance sheet funds grew by 50.1% in the first nine months of 2022, mainly driven by the evolution of time deposits, and off-balance sheet funds (mutual funds) grew by 67.8% in the same period.
- The cumulative net attributable profit at the end of September 2022 stood at €156m, well above the figure achieved in the first nine months of 2021, mainly driven by the boost in the securities portfolio and, to a lesser extent, the impact of interest rate hikes, both impacting net interest income. The year-on-year performance of commissions was also positive, highlighting payment channels, as well as the evolution of NTI. The aforementioned was offset by a more negative inflation adjustment and higher expenses. In the third quarter of 2022, the growth in NTI, provided the higher volume of securities and futures trading operations, together with a less negative adjustment for inflation and the control of operating expenses, contributed to offsetting the lower recurring revenue performance.

Colombia

Macro and industry trends

Economic activity in general and domestic demand, in particular, have been more dynamic than expected in recent months. Thus, growth in 2022 could be 7.6%, significantly higher than the previous forecast of 6.8% by BBVA Research. In addition, high inflation has contributed to the Bank of the Republic raising interest rates in October to 10.0% from 1.75% in August 2021. Against this backdrop, BBVA Research forecasts that, with additional interest rate hikes on the horizon, inflation will remain relatively high in 2022 (9.9%, on average) and ease somewhat in 2023 (9.1%, on average), and growth will slow down significantly at around 0.7% in 2023 (seven-tenths of a percentage point lower than the previous forecast).

In June 2022 total credit growth in the banking system stood at 14.9% year-on-year, mainly driven by loans to households. Corporate credit growth accelerated to 12.3% year-on-year in the same month. In addition, total deposits at the end of June 2022 increased at 13.6% year-on-year, characterized by term deposits' recovery and certain restraint in demand deposits. The system's NPL ratio fell to 3.71% in June 2022, down 94 basis points from the same month in 2021.

Activity and results

- Lending activity continued to accelerate its growth rate compared to the end of 2021 by 16.5%, with a more dynamic performance in the wholesale portfolio (+24.7%), due to the behavior of the business portfolio. In terms of asset quality, the NPL ratio stood at 4.2% at the end of the first nine months of 2022, which represents a reduction of 16 basis points in the quarter due to an increase in the loan portfolio together with a slight decrease in non-performing loans. For its part, the NPL coverage ratio increased in the quarter to 107%.
- Customer deposits under management increased by 11.0% during the first nine months of 2022, as a result of the growth in time deposits (+37.2%) -resulting from the successive rate hikes implemented by the central bank- which offset the drop of demand deposits (-1.5%) and off-balance sheet funds (-5.7%). Between July and September, customer deposits fell by 2.1%, with growth in time deposits, which could't offset the reduction in demand deposits. For its part, off-balance sheet funds increased by 2.1% over the same time horizon.
- The net attributable profit in the first nine months of 2022 stood at €207m, or 29.9% above that achieved in the same period of the previous year, due to the boost in recurring revenue and the NTI, as well as lower provisions for impairment on financial assets. The foregoing offset the increase in operating expenses and income tax as a result of the increase in the tax rate from 34% to 38%. In the third quarter of 2022, the increases in reference rates made by the central bank (250 basis points between July and September) had a negative impact on the net interest income -due to the remuneration of liabilities-. For its part, commissions showed a slight increase in the quarter (+3.5%) and NTI evolved positively (+8.9%)

supported by the valuation of the derivatives portfolio and treasury gains. Lastly, there was an increase in provisions for impairment of financial assets (+7.0%) and in operating expenses (+9.4%).

Peru

Macro and industry trends

Activity indicators have been more positive than expected in the first months of the year, in part due to the process of economic reopening after pandemic-related mobility restrictions, the high level of private savings and tax stimulus measures. High inflation, tightening of monetary conditions and the global slowdown in economic growth will negatively impact future growth. Therefore, BBVA Research expects for 2022 a growth of around 2.3% — unchanged from the previous forecast — while it expects a growth rate of 2.5% in 2023, three-tenths of a percentage point lower than expected three months ago. Inflation is expected to remain high in 2022 (around 7.7%, on average), but should ease somewhat in 2023 (around 5.3%, on average), due in part to the tightening of local monetary conditions.

Total credit growth in the banking system moderated to 5.3% year-on-year in July 2022. The sharp slowdown in corporate lending continues, with a flat balance (+0.3% year-on-year) in this segment. It keeps offsetting the strong momentum in consumer loans, which grew by 25.0% year-on-year in July. The mortgage portfolio has maintained a stable growth rate compared to previous months, reaching a year-on-year increase of 8.5% in July. The system's total deposits decreased moderately (-1.1% year-on-year in July), with a greater contraction in demand deposits (-6.2% year-on-year), which contrasts with the strong rise in time deposits (+13.6% year-on-year,) growing the latter again after two years of falling balances. For its part, the system's NPL ratio fell slightly and reached 3.07% in August 2022 (3 basis points below the same month in 2021).

Activity and results

- Lending activity remained flat between January and September 2022 (-0.7%), with a very dynamic performance of consumer loans (+23.2%) and credit cards (+31.6%), which failed to offset the deleveraging of loans to corporates (-4.9%) in an environment of high competition, which failed to offset the amortizations of the program *Reactiva Peru*. In the quarter, the NPL ratio fell slightly to 4.9%, with a slight decrease in non-performing loans at constant exchange rate due to credit write-offs management. For its part, the NPL coverage ratio stood at 89%, in line with the previous quarter.
- Customers funds under management increased by 8.7% in the first nine months of 2022, due to the strong boost in time deposits (+89.1%), supported by the rise in reference rates by the central bank, which offset lower balances in demand deposits (-2.9%) and in off-balance sheet funds (-20.2%).
- BBVA Peru's net attributable profit stood at €168m at the end of September 2022, 96.5% higher than the figure achieved at the end of the same month of the previous year. During the first nine months of 2022, recurring income grew by 20.0%, thanks to the favorable evolution of the net interest income, which benefited from the increase in the customer spread, the income from marketable debt securities and those derived from excess liquidity, and commissions. The aforementioned, together with the lower provisions for impairment on financial assets (-34.8%), offset the increase in operating expenses (+15.0%). In the third quarter, BBVA Peru continues to show an outstanding evolution in net interest income (+9.4%), due to the higher yield of surplus liquidity, supported by the higher reference rates and a positive evolution of the activity, which are offset by higher credit impairment requirements and higher operating expenses. As a result thereof, the result generated between July and September is 25.8% lower than the one of the previous quarter.

Rest of Business

Highlights

- Growth in lending activity and in customer funds in the first nine months of 2022
- Strong net interest income, which grows at double-digit
- Increase in operating expenses
- The cost of risk remains at low levels

⁽²⁾ Excluding repos.

⁽³⁾ Includes pension funds.

Unless expressly stated otherwise, all the comments below on rates of change, for both activity and results, will be given at constant exchange rates. These rates, together with the changes at current exchange rates, can be found in the attached tables of the financial statements and relevant business indicators. Comments that refer to Europe exclude Spain.

Activity

The most relevant aspects of the activity of Rest of Business of BBVA Group between January and September 2022 were:

- Lending activity (performing loans under management) registered an increase (+26.2%), with a favorable performance, mainly from the New York branch and, to a lesser extent, from the branches in Europe and Asia.
- Customer funds under management increased by 27.8% during the first nine months of the year 2022, with growth in time deposits, mainly from the New York branch and Europe, which more than offset the decline in demand deposits and off-balance sheet funds.

The most relevant of the evolution of the area's activity in the third quarter of 2022 has been:

- Lending activity increased by 8.2% between July and September 2022, due to the growth in the business segment that offset the deleveraging in the retail segment.
- Regarding credit risk indicators, the NPL ratio stood at 0.4%, 17 basis points below the previous quarter, mainly due to the recovery of a wholesale client. The NPL coverage ratio increased notably to stand at 158%.
- Total customer funds grew in the quarter (+9.0%) supported by the increase in time deposits (+24.6%), originating mainly from the branches in Europe.

Results

Regarding the year-on-year evolution of the area's income statement at the end of September 2022:

- The net interest income increased +10.7% compared to the same period of the previous year, with a positive performance in Europe and the New York branch and, to a lesser extent, in BBVA Securities.
- Net fees and commissions decreased by 5.3% compared to the end of September 2021, due to the lower fees and commissions recorded by BBVA Securities, despite the good performances of the branches in New York and Europe.
- The NTI line recorded a year-on-year variation of -28.0% mainly due to the lower results of the business in the United States.
- Decrease in the contribution of the other operating income and expenses line, as a result of the evolution of BBVA Securities.
- Increase in operating expenses of 5.8% due to higher personnel expenses in Europe, partially offset by the lower expenses recorded by BBVA Securities.
- The impairment on financial assets line closed September 2022 with a slight provision compared to the release of the previous year, originated in the New York branch.
- Favorable performance of the provisions or reversal of provisions line and other results focused on lower provisions in New York.
- As a result, the area's cumulative net attributable profit between January and September 2022 was €183m (-24.8% year-on-year).

In the third quarter of 2022 and excluding the effect of the variation in exchange rates, the Group's Rest of Businesses as a whole generated a net attributable profit of €52m, which represents an increase of 15.5% compared to the previous quarter, mainly due to the favorable evolution of net interest income and NTI together with a lower level of provisions.

Results

The Corporate Center recorded a net attributable loss of €-566m in the first nine months of 2022. This result compares positively to €-817m recorded in the same period of the previous year, although it should be taken into account that this figure included the net costs associated with the restructuring process in Spain carried out by the Group in 2021, in addition to the results generated by the Group's businesses in the United States until their sale to PNC on June 1, 2021.

In addition to the aforementioned, the most relevant aspects of the year-on-year evolution of this aggregate are summarized below:

- Between January and September 2022, the NTI registered a negative result of €80m, which contrasts with the gains of €268m in the same period of the previous year, mainly due to the lower contribution of the portfolio of industrial and financial holdings.
- Operating expenses remained under control (-1.7%), mainly due to lower IT- related costs.

In the quarterly evolution of this aggregate, the evolution of the NTI stands out, which generated a positive result of €41m between July and September.

Other information: Corporate & Investment Banking

Highlights

- Strong performance in lending activity continues. Dynamism of customer funds in the quarter
- Double-digit gross income growth
- Improved efficiency ratio
- Increase in provisions for impairment on financial assets

Unless expressly stated otherwise, all the comments below on rates of change, for both activity and results, will be given at constant exchange rates. For the conversion of these figures in those countries in which accounting for hyperinflation is applied, the punctual exchange rate as of September 30, 2022 is used. These rates, together with changes at current exchange rates, can be found in the attached tables of financial statements and relevant business indicators.

Activity

The most relevant aspects related to the area's activity in the first nine months of 2022 were:

- Lending activity (performing loans under management) continued to grow at double digit rates and accumulates a growth of 23.6% in the first nine months of 2022, with a positive performance in all geographical areas, except for Peru. By products, both Investment Banking & Finance and Global Transactional Banking have shown very positive dynamics, although the latter showed a certain slowdown in the quarter.
- Customer funds increased during the first nine months of the year (+13.8%). Thanks to the active management of the area, deposits from the Group's wholesale customers continue to be a relevant lever for the BBVA's liquidity management. By geographical areas, the positive evolution in South America and Rest of Business stands out.

The most relevant developments in the area's activity in the third quarter of 2022 were:

- Lending activity (performing loans under management) increased in the quarter (+6.8%) especially due to the performance of New York, Spain and the branches in Europe, with outstanding operations with corporate clients and a good evolution of factoring.
- Customer funds increased by 9.7% between July and September, with growth in time deposits (+30.4%) offsetting the flat behavior of demand deposits (-0.1%).

Results

CIB generated a net attributable profit of €1,353m in the first nine months of 2022. These results, which do not include the application of hyperinflation accounting, represent an increase of 45.5% on a year-on-year basis, due to the growth in recurring income and NTI, which comfortably offset the higher expenses and provisions for impairment on financial assets. It should also be noted that all business lines of the CIB area recorded growth compared to the first nine months of 2021, both in revenues and net attributable profit.

The contribution by business areas, excluding the Corporate Center, to CIB's accumulated net attributable profit at the end of September 2022 was as follows: 28% Spain, 27% Mexico, 21% Turkey, 15% South America and 9% Rest of Business.

The most relevant aspects of the year-on-year evolution in the income statement of this aggregate are summarized below:

- At the end of the first nine months of the year, net interest income was 32.7% above the same period last year, with growth in the main geographical areas thanks to the aforementioned good performance of lending activity and the performance of the Global Markets and Global Transactional Banking units.
- Net fees and commissions recorded an increase of +20.5%, mainly due to the performance of transactional banking.
- NTI showed a good evolution (+55.5%), mainly due to the performance of the Global Markets unit, driven by the income from business activity and intraday trading in foreign exchange positions.
- Operating expenses increased by 14.7% in the first nine months of 2022, in a year-on-year comparison affected by the cost containment plans implemented by CIB in 2021, in addition to the high inflationary environment, although the area continues to focus its efforts on discretionary expenses. Despite the aforementioned, the efficiency ratio stood at 26.8%, which is a significant improvement over the same period last year (-504 basis points).
- Increase in provisions for impairment on financial assets mainly due to customers sensitive to changes in the exchange rate.
- Finally, the provision and other results line recorded a positive result of €9m due to the release of provisions for risks and contingent commitments made in the New York branch.

In the third quarter of 2022 and excluding the effect of the variation in exchange rates, the Group's wholesale businesses generated a net attributable profit of €450m (-1.8% compared to the previous quarter). This performance is mainly explained by the higher provisions for impairment of financial assets, which offset the good performance of revenues in the area, especially the double-digit growth in net interest income.

Alternative Performance Measures (APMs)

BBVA presents its results in accordance with the International Financial Reporting Standards (EU-IFRS). However, it also considers that some Alternative Performance Measures (hereinafter APMs) provide useful additional financial information that should be taken into account when evaluating performance. These APMs are also used when making financial, operational and planning decisions within the Entity. The Group firmly believes that they give a true and fair view of its financial information. These APMs are generally used in the financial sector as indicators for monitoring the assets, liabilities and economic and financial situation of entities.

BBVA Group's APMs are given below. They are presented in accordance with the European Securities and Markets Authority (ESMA) guidelines, published on October 5, 2015 (ESMA/2015/1415en) as well as the statement published by the ESMA on May 20, 2020 (ESMA 32-63-972), about implications of the COVID-19 outbreak on the half-yearly financial reports. The first guideline mentioned before are aimed at promoting the usefulness and transparency of APMs included in prospectuses or regulated information in order to protect investors in the European Union. In accordance with the indications given in the aforementioned guideline, BBVA Group's APMs:

- Include clear and readable definitions of the APMs.
- Disclose the reconciliations to the most directly reconcilable line item, subtotal or total presented in the financial statements of the corresponding period, separately identifying and explaining the material reconciling items.
- Are standard measures generally used in the financial industry, so their use provides comparability in the analysis of performance between issuer.
- Do not have greater preponderance than measures directly stemming from financial statements.
- Are accompanied by comparatives for previous periods.
- Are consistent over time.

Constant exchange rates

When comparing two dates or periods in this management report, the impact of changes in the exchange rates against the euro of the currencies of the countries in which BBVA operates is sometimes excluded, assuming that exchange rates remain constant. This is done for the amounts in the income statement by using the average exchange rate against the euro⁷ in the most recent period for each currency of the geographical areas in which the Group operates, and applying it to both periods; for amounts in the balance sheet and activity, the closing exchange rates in the most recent period are used.

Reconciliation of the Financial Statements of the BBVA Group

Below is the reconciliation between the income statements of the Condensed Interim Consolidated Financial Statements (hereinafter, "consolidated Financial Statements") and the consolidated management income statement, shown throughout this report, for the first nine months of 2022 and 2021.

In the first nine months of 2022, the main difference between the two accounts is in the treatment of the impact of the purchase from Merlin of 100% of the shares of Tree, which in turn owns 662 offices in Spain. For management purposes, this impact is included in a single line, net of taxes, of the income statement called "Discontinued operations and Other", compared to the treatment in the Consolidated Financial Statements, which record the impacts gross and its tax effect in the corresponding headings that are applicable to them.

In the first nine months of 2021, the main difference between them is the treatment of the cost related to the restructuring process carried out by the Group in 2021 which, for management purposes, are included in a single line, net of taxes, of the income statement called "Discontinued operations and Other", compared to the treatment in the consolidated Financial Statements, which record the gross impacts and their tax effect in the corresponding headings.

In addition, there is a difference in the positioning of the results generated in 2021 by BBVA USA and the rest of the companies until their sale to PNC on June 1, 2021. In the Consolidated financial statements, these results are included in the line "Profit (loss) after tax from discontinued operations" and are taken into account both for the calculation of the "Profit (loss) for the period" and for the profit (loss) "Attributable to the owners of the parent" whereas, for management purposes, they are not included in the "Profit (loss) for the period", as they are included in a line below it, as can be seen in the following table.

⁷ With the exception of those countries whose economies have been considered hyperinflationary, for which the closing exchange rate of the most recent period will be used.

Profit (loss) after tax from discontinued operations	280	(280)		
PROFIT (LOSS) FOR THE PERIOD	4,046	416	4,462	Profit (loss) for the period
ATTRIBUTABLE TO MINORITY INTEREST (NON-CONTROLLING INTERESTS)	(735)	—	(735)	Non-controlling interests
ATTRIBUTABLE TO OWNERS OF THE PARENT	3,311	416	3,727	Net attributable profit (loss) excluding non-recurring impacts
		(416)	(416)	Discontinued operations and Others
ATTRIBUTABLE TO OWNERS OF THE PARENT	3,311	—	3,311	Net attributable profit (loss)

(*) Included within the Other operating income and expenses of the Management Income Statements

(**) Depreciations included.

Profit (loss) for the period

Explanation of the formula: the profit (loss) for the period is the profit (loss) for the period from the Group's consolidated income statement, which comprises the profit (loss) after tax from continued operations and the profit (loss) after tax from discontinued operations which, for the periods of 2021, includes the results generated by BBVA USA and the rest of the companies in the United States sold to PNC on June 1, 2021. If the described metric is presented on a date prior to the end of the year, it will be presented on an annualized basis.

Relevance of its use: this measure is commonly used, not only in the banking sectors, for homogeneous comparison purposes.

Profit (loss) for the period		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
(Millions of euros) +	Annualized profit (loss) after tax from continued operations	6,890	5,338	5,270
(Millions of euros) +	Profit (loss) after tax from discontinued operations ⁽¹⁾	—	280	280
= Profit (loss) for the period		6,890	5,618	5,550

⁽¹⁾ The periods of 2021 include the results generated by BBVA USA and the rest of the companies in the United States included in the agreement until its sale to PNC as of June 1, 2021.

Adjusted profit (loss) for the period (excluding non-recurring impacts)

Explanation of the formula: the adjusted profit (loss) for the period is the profit (loss) from continued operations for the period from the Group's consolidated income statement, excluding those non-recurring impacts that, for management purposes, are defined at any given moment. If the described metric is presented on a date prior to the end of the year, it will be presented on an annualized basis.

Relevance of its use: this measure is commonly used, not only in the banking sector, for homogeneous comparison purposes.

Adjusted profit (loss) for the period		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
(Millions of euros) +	Annualized profit (loss) after tax from continued operations	6,890	5,338	5,270
(Millions of euros) -	Net cost related to the restructuring process	—	(696)	(696)
(Millions of euros) -	Net impact from the purchase from offices in Spain	(201)	—	—
= Adjusted profit (loss) for the period		7,091	6,034	5,966

Net attributable profit (loss)

Explanation of the formula: the net attributable profit (loss) is the net attributable profit (loss) of the Group's consolidated income statement from continued operations and the profit (loss) after tax from discontinued operations which, for the periods of 2021, includes the results generated by BBVA USA and the rest of the companies in the United States sold to PNC on June 1, 2021. If the described metric is presented on a date prior to the end of the year, it will be presented on an annualized basis.

Relevance of its use: this measure is commonly used, not only in the banking sector, for homogeneous comparison purposes.

Net attributable profit (loss)		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
(Millions of euros) +	Annualized net attributable profit (loss) from continued operations	6,542	4,373	4,288
(Millions of euros) +	Net attributable profit (loss) from discontinued operations ⁽¹⁾	—	280	280
= Net attributable profit (loss)		6,542	4,653	4,567

⁽¹⁾ The periods of 2021 include the results generated by BBVA USA and the rest of the companies in the United States included in the agreement until its sale to PNC as of June 1, 2021.

Adjusted net attributable profit (loss) (excluding non-recurring impacts)

Explanation of the formula: the adjusted net attributable profit (loss) is the net attributable profit (loss) of the Group's consolidated income statement from continued operations excluding those non-recurring impacts that, for management purposes are defined at any given moment. If the described metric is presented on a date prior to the end of the year, it will be presented on an annualized basis.

Relevance of its use: this measure is commonly used, not only in the banking sector, for comparison purposes.

Adjusted net attributable profit (loss)		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
(Millions of euros)	+ Annualized net attributable profit (loss) from continued operations	6,542	4,373	4,288
(Millions of euros)	- Net cost related to the restructuring process	—	(696)	(696)
(Millions of euros)	- Net impact arised from the purchase of offices in Spain	(201)	—	—
	= Adjusted net attributable profit (loss)	6,743	5,069	4,983

ROE

The ROE (return on equity) ratio measures the return obtained on an entity's shareholders' funds plus accumulated other comprehensive income. It is calculated as follows:

$$\frac{\text{Net attributable profit (loss)}}{\text{Average shareholders' funds + Average accumulated other comprehensive income}}$$

Explanation of the formula: the numerator is the net attributable profit (loss) previously defined in these alternative performance measures. If the metric is presented on a date before the close of the fiscal year, the numerator will be annualized.

Average shareholders' funds are the weighted moving average of the shareholders' funds at the end of each month of the period analyzed, adjusted to take into account the execution of the "dividend-option" at the closing dates on which it was agreed to deliver this type of dividend prior to the publication of the Group's results.

Average accumulated other comprehensive income is the moving weighted average of "Accumulated other comprehensive income", which is part of the equity on the Entity's balance sheet and is calculated in the same way as average shareholders' funds (above).

Relevance of its use: this ratio is very commonly used not only in the banking sector but also in other sectors to measure the return obtained on shareholders' funds.

ROE		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
Numerator	= Annualized net attributable profit (loss)	6,542	4,653	4,567
(Millions of euros)				
Denominator	+ Average shareholder's funds	60,575	60,030	60,021
(Millions of euros)	+ Average accumulated other comprehensive income	(15,570)	(15,396)	(15,064)
	= ROE	14.5 %	10.4 %	10.2 %

Adjusted ROE

The adjusted ROE (return on equity) ratio measures the return obtained on an entity's shareholders' funds plus accumulated other comprehensive income. It is calculated as follows:

$$\frac{\text{Adjusted net attributable profit (loss)}}{\text{Average shareholders' funds + Average accumulated other comprehensive income}}$$

Explanation of the formula: the numerator is the adjusted net attributable profit (loss) previously defined in these alternative performance measures. If the metric is presented on a date before the close of the fiscal year, the numerator will be annualized. The denominator items "Average shareholders' funds" and "Average accumulated other comprehensive income" are the same and they are calculated in the same way as that explained for ROE.

Relevance of its use: this ratio is very commonly used not only in the banking sector but also in other sectors to measure the return obtained on shareholders' funds.

Adjusted ROE		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
Numerator (Millions of euros)	= Annualized adjusted net attributable profit (loss)	6,743	5,069	4,983
Denominator (Millions of euros)	+ Average shareholder's funds	60,575	60,030	60,021
	+ Average accumulated other comprehensive income	(15,570)	(15,396)	(15,064)
	= Adjusted ROE	15.0 %	11.4 %	11.1 %

ROTE

The ROTE (return on tangible equity) ratio measures the return on an entity's shareholders' funds, plus accumulated other comprehensive income, and excluding intangible assets. It is calculated as follows:

$$\frac{\text{Net attributable profit (loss)}}{\text{Average shareholders' funds} + \text{Average accumulated other comprehensive income} - \text{Average intangible assets}}$$

Explanation of the formula: the numerator "Net attributable profit (loss)" and the items in the denominator "Average intangible assets" and "Average accumulated other comprehensive income" are the same items and are calculated in the same way as explained for ROE.

Average intangible assets are the intangible assets on the balance sheet, including goodwill and other intangible assets. The average balance is calculated in the same way as explained for shareholders funds in ROE.

Relevance of its use: this metric is generally used not only in the banking sector but also in other sectors to measure the return obtained on shareholders' funds, not including intangible assets.

ROTE		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
Numerator (Millions of euros)	= Annualized net attributable profit (loss)	6,542	4,653	4,567
	+ Average shareholder's funds	60,575	60,030	60,021
Denominator (Millions of euros)	+ Average accumulated other comprehensive income	(15,570)	(15,396)	(15,064)
	- Average intangible assets	2,097	2,265	2,286
	- Average intangible assets from BBVA USA	—	897	1,199
	= ROTE	15.2 %	11.2 %	11.0 %

Adjusted ROTE

The adjusted ROTE (return on tangible equity) ratio measures the return on an entity's shareholders' funds, plus accumulated other comprehensive income, and excluding intangible assets. It is calculated as follows:

$$\frac{\text{Adjusted net attributable profit (loss)}}{\text{Average shareholders' funds} + \text{Average accumulated other comprehensive income} - \text{Average intangible assets}}$$

Explanation of the formula: the numerator [adjusted net attributable profit (loss)] and the items of the denominator "Average shareholders' funds" and "Average accumulated other comprehensive income" are the same and calculated in the same way as explained for adjusted ROE.

Average intangible assets are the intangible assets on the balance sheet, excluding for the periods of 2021 the assets from BBVA USA and the rest of the companies in the United States included in the sale agreement signed with PNC, whose sale took place on June 1 of that same year. The average balance is calculated in the same way as explained for shareholders' funds in the adjusted ROE.

Relevance of its use: this metric is generally used not only in the banking sector but also in other sectors to measure the return obtained on shareholders' funds, not including intangible assets.

Adjusted ROTE		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
Numerator (Millions of euros)	= Annualized adjusted net attributable profit (loss)	6,743	5,069	4,983
	+ Average shareholder's funds	60,575	60,030	60,021
Denominator (Millions of euros)	+ Average accumulated other comprehensive income	(15,570)	(15,396)	(15,064)
	- Average intangible assets	2,097	2,265	2,286
	= Adjusted ROTE	15.7 %	12.0 %	11.7 %

ROA

The ROA (return on assets) ratio measures the return obtained on an entity's assets. It is calculated as follows:

$$\frac{\text{Profit (loss) for the period}}{\text{Average total assets}}$$

Explanation of the formula: the numerator is the profit (loss) for the period, previously defined in these alternative performance measures. If the metric is presented on a date before the close of the fiscal year, the numerator must be annualized.

Average total assets are taken from the Group's consolidated balance sheet. The average balance is calculated as explained for average shareholders' funds in the ROE.

Relevance of its use: this ratio is generally used not only in the banking sector but also in other sectors to measure the return obtained on assets.

ROA		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
Numerator (Millions of euros)	Annualized profit (loss) for the period	6,890	5,618	5,550
Denominator (Millions of euros)	Average total assets	690,782	678,563	686,458
	= ROA	1.00 %	0.83 %	0.81 %

Adjusted ROA

The adjusted ROA (return on assets) ratio measures the return obtained on an entity's assets. It is calculated as follows:

$$\frac{\text{Adjusted profit (loss) for the period}}{\text{Average total assets}}$$

Explanation of the formula: the numerator is the adjusted profit (loss) for the period previously defined in these alternative performance measures. If the metric is presented on a date before the close of the fiscal year, the numerator will be annualized.

Average total assets are taken from the Group's consolidated balance sheets, excluding for the periods of 2021 the assets from BBVA USA and the rest of the companies in the United States sold to PNC on June 1 of that same year. The average balance is calculated in the same way as explained for average equity in the adjusted ROE.

Relevance of its use: this ratio is generally used not only in the banking sector but also in other sectors to measure the return obtained on assets.

Adjusted ROA		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
Numerator (Millions of euros)	Annualized adjusted profit (loss) for the period	7,091	6,034	5,966
Denominator (Millions of euros)	Average total assets	690,782	640,142	635,089
	= Adjusted ROA	1.03 %	0.94 %	0.94 %

RORWA

The RORWA (return on risk-weighted assets) ratio measures the accounting return obtained on average risk-weighted assets. It is calculated as follows:

$$\frac{\text{Profit (loss) for the period}}{\text{Average risk-weighted assets}}$$

Explanation of the formula: the numerator [profit (loss) for the period] is the same and is calculated in the same way as explained for ROA.

Average risk-weighted assets (RWA) are the moving weighted average of the risk-weighted assets at the end of each month of the period under analysis.

Relevance of its use: this ratio is generally used in the banking sector to measure the return obtained on RWA.

RORWA		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
Numerator (Millions of euros)	Annualized profit (loss) for the period	6,890	5,618	5,550
Denominator (Millions of euros)	Average RWA	324,957	324,819	332,672
= RORWA		2.12 %	1.73 %	1.67 %

Adjusted RORWA

The adjusted RORWA (return on risk-weighted assets) ratio measures the return obtained on an entity's assets. It is calculated as follows:

$$\frac{\text{Adjusted profit (loss) for the period}}{\text{Average risk-weighted assets}}$$

Explanation of the formula: the numerator [adjusted profit (loss) for the period] is the same and is calculated in the same way as explained for adjusted ROA.

Average risk-weighted assets (RWA) are the moving weighted average of the risk-weighted assets at the end of each month of the period under analysis, excluding for the periods of 2021 those from BBVA USA and the rest of the companies in the United States sold to PNC on June 1 of that same year.

Relevance of its use: this ratio is generally used not only in the banking sector but also in other sectors to measure the return obtained on assets.

Adjusted RORWA		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
Numerator (Millions of euros)	Annualized adjusted profit (loss) for the period	7,091	6,034	5,966
Denominator (Millions of euros)	Average RWA	324,957	300,276	299,858
= Adjusted RORWA		2.18 %	2.01 %	1.99 %

Earning per share

The earning per share is calculated in accordance to the criteria established in the IAS 33 "Earnings per share".

Earnings (losses) per share		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
(Millions of euros)	+ Net attributable profit (loss)	4,842	4,653	3,311
(Millions of euros)	+ Remuneration related to the Additional Tier 1 securities (CoCos)	238	359	279
Numerator (millions of euros)	= Net attributable profit (loss) ex.CoCos remuneration	4,604	4,293	3,032
Denominator (millions)	+ Average number of shares issued	6,558	6,668	6,668
	- Average treasury shares of the period	11	12	11
	- Share buyback program (average) ⁽¹⁾	303	255	—
= Earning (loss) per share (euros)		0.74	0.67	0.46

⁽¹⁾ The period January-December 2021 includes 112 million shares acquired from the start of the share buyback program to December 31, 2021 and the estimated number of shares pending from buyback as of December 31, 2021 of the first tranche, in process at the end of that period.

Additionally, for management purposes, earnings per share are presented excluding, for the periods of 2021: (I) the profit after tax from discontinued operations, that is, the results generated by BBVA USA and the rest of the companies in the United States until their sale to PNC on June 1, 2021; and (II) the net cost related to the restructuring process recorded in the second quarter of fiscal year 2021; and for the January - September 2022 period, the impact on results of the purchase of offices in Spain.

Adjusted earnings (losses) per share		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
(Millions of euros)	+ Net attributable profit (loss) ex. CoCos remuneration	4,604	4,293	3,032
(Millions of euros)	- Discontinued operations	—	280	280
(Millions of euros)	- Net cost related to the restructuring process	—	(696)	(696)
(Millions of euros)	- Net impact arised from the purchase of offices in Spain	(201)	—	—
Numerator (millions of euros)	= Net Attributable profit (loss) ex.CoCos and non-recurring impacts	4,805	4,709	3,448
Denominator (millions)	+ Number of shares issued ⁽¹⁾	6,030	6,668	6,668
	- Average treasury shares of the period	11	12	11
= Adjusted earning (loss) per share (euros)		0.80	0.71	0.52

⁽¹⁾ In the period January-September 2022, the number of shares issued takes into account the redemption of 357 million shares, corresponding to the second tranche of the share buyback program.

Efficiency ratio

This measures the percentage of gross income consumed by an entity's operating expenses. It is calculated as follows:

$$\frac{\text{Operating expenses}}{\text{Gross income}}$$

Explanation of the formula: both "Operating expenses" and "Gross income" are taken from the Group's consolidated income statement. Operating expenses are the sum of the administration costs (personnel expenses plus other administrative expenses) plus depreciation. Gross income is the sum of net interest income, net fees and commissions, net trading income dividend income, share of profit or loss of entities accounted for using the equity method, and other operating income and expenses. For a more detailed calculation of this ratio, the graphs on "Results" section of this report should be consulted, one of them with calculations with figures at current exchange rates and another with the data at constant exchange rates.

Relevance of its use: this ratio is generally used in the banking sector. In addition, it is the metric for one of the six Strategic Priorities of the Group.

Efficiency ratio		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
Numerator (Millions of euros)	Operating expenses	7,872	9,530	6,976
Denominator (Millions of euros)	Gross income	18,366	21,066	15,589
= Efficiency ratio		42.9 %	45.2 %	44.7 %

Dividend yield

This is the remuneration given to the shareholders in the last twelve calendar months, divided by the closing price for the period. It is calculated as follows:

$$\frac{\sum \text{Dividend per share over the last twelve months}}{\text{Closing price}}$$

Explanation of the formula: the remuneration per share takes into account the gross amounts per share paid out over the last twelve months, both in cash and through the flexible remuneration system called "dividend option".

Relevance of its use: this ratio is generally used by analysts, shareholders and investors for companies that are traded on the stock market. It compares the dividend paid out by a company every year with its market price at a specific date.

Dividend yield		30-09-22	31-12-21	30-09-21
Numerator (Euros)	∑ Dividends	0.31	0.14	0.06
Denominator (Euros)	Closing price	4.62	5.25	5.72
= Dividend yield		6.7 %	2.6 %	1.0 %

Book value per share

The book value per share determines the value of a company on its books for each share held. It is calculated as follows:

$$\frac{\text{Shareholders' funds + Accumulated other comprehensive income}}{\text{Number of shares outstanding - Treasury shares}}$$

Explanation of the formula: the figures for both "Shareholders' funds" and "Accumulated other comprehensive income" are taken from the balance sheet. Shareholders' funds are adjusted to take into account the execution of the "dividend-option" at the closing dates on which it was agreed to deliver this type of dividend prior to the publication of the Group's results. The denominator includes the final number of outstanding shares excluding own shares (treasury shares). In addition, the denominator is also adjusted to include the capital increase resulting from the execution of the dividend options explained above. Both the numerator and the denominator take into account period-end balances.

Relevance of its use: it shows the company's book value for each share issued. It is a generally used ratio, not only in the banking sector but also in others.

Book value per share		30-09-22	31-12-21	30-09-21
Numerator (Millions of euros)	+ Shareholders' funds	62,891	60,383	60,622
	+ Dividend-option adjustment	—	—	—
	+ Accumulated other comprehensive income	(16,649)	(16,476)	(15,684)
Denominator (Millions of shares)	+ Number of shares issued	6,030	6,668	6,668
	- Treasury shares	10	15	16
	- Share buyback program ⁽¹⁾	—	255	—
= Book value per share (euros / share)		7.68	6.86	6.76

⁽¹⁾ As of 31-12-21, 112 million shares acquired from the start of the share buyback program to the end of the period and the estimated number of shares pending from buyback as of December 31, 2021 of the first tranche, in process at the end of that date, were included.

Tangible book value per share

The tangible book value per share determines the value of the company on its books for each share held by shareholders in the event of liquidation. It is calculated as follows:

$$\frac{\text{Shareholders' funds} + \text{Accumulated other comprehensive income} - \text{Intangible assets}}{\text{Number of shares outstanding} - \text{Treasury shares}}$$

Explanation of the formula: the figures for "Shareholders' funds", "Accumulated other comprehensive income" and "Intangible assets" are all taken from the balance sheet. Shareholders' funds are adjusted to take into account the execution of the "Dividend-option" at the closing dates on which it was agreed to deliver this type of dividend prior to the publication of the Group's results. The denominator includes the final number of shares outstanding excluding own shares (treasury shares). In addition, the denominator is also adjusted to include the result of the capital increase resulting from the execution of the dividend options explained above. Both the numerator and the denominator take into account period-end balances.

Relevance of its use: it shows the company's book value for each share issued, after deducting intangible assets. It is a generally used ratio, not only in the banking sector but also in others.

Tangible book value per share		30-09-22	31-12-21	30-09-21
Numerator (Millions of euros)	+ Shareholders' funds	62,891	60,383	60,622
	+ Dividend-option adjustment	—	—	—
	+ Accumulated other comprehensive income	(16,649)	(16,476)	(15,684)
	- Intangible assets	2,211	2,197	2,271
Denominator (Millions of shares)	+ Number of shares issued	6,030	6,668	6,668
	- Treasury shares	10	15	16
	- Share buyback program ⁽¹⁾	—	255	—
= Tangible book value per share (euros / share)		7.31	6.52	6.41

⁽¹⁾ As of 31-12-21, 112 million shares acquired from the start of the share buyback program to the end of the period and the estimated number of shares pending from buyback as of December 31, 2021 of the first tranche, in process at the end of that date, were included.

Non-performing loan (NPL) ratio

It is the ratio between the risks classified for accounting purposes as non-performing loans and the total credit risk balance. It is calculated as follows:

$$\frac{\text{Non-performing loans}}{\text{Total credit risk}}$$

Explanation of the formula: non-performing loans and the credit risk balance are gross, meaning they are not adjusted by associated accounting provisions.

Non-performing loans are calculated as the sum of "loans and advances at amortized cost" and the "contingent risk" in stage 3⁸ and the following counterparties:

- other financial entities
- public sector
- non-financial institutions
- households

The credit risk balance is calculated as the sum of "Loans and advances at amortized cost" and "Contingent risk" in stage 1 + stage 2 + stage 3 of the previous counterparts.

This indicator is shown, as others, at a business area level.

Relevance of its use: this is one of the main indicators used in the banking sector to monitor the current situation and changes in credit risk quality, and specifically the relationship between risks classified in the accounts as non-performing loans and the total balance of credit risk, with respect to customers and contingent liabilities.

Non-Performing Loans (NPLs) ratio		30-09-22	31-12-21	30-09-21
Numerator (Millions of euros)	NPLs	15,162	15,443	14,864
Denominator (Millions of euros)	Credit Risk	428,619	376,011	371,708
= Non-Performing Loans (NPLs) ratio		3.5 %	4.1 %	4.0 %

⁸ IFRS 9 classifies financial instruments into three stages, which depend on the evolution of their credit risk from the moment of initial recognition. The stage 1 includes operations when they are initially recognized, stage 2 comprises operations for which a significant increase in credit risk has been identified since their initial recognition and, stage 3, impaired operations.

NPL coverage ratio

This ratio reflects the degree to which the impairment of non-performing loans has been covered in the accounts via allowances. It is calculated as follows:

$$\frac{\text{Provisions}}{\text{Non-performing loans}}$$

Explanation of the formula: it is calculated as "Provisions" from stage 1 + stage 2 + stage 3, divided by non-performing loans, formed by "credit risk" from stage 3.

This indicator is shown, as others, at a business area level.

Relevance of its use: this is one of the main indicators used in the banking sector to monitor the situation and changes in the quality of credit risk, reflecting the degree to which the impairment of non-performing loans has been covered in the accounts via value adjustments.

NPL coverage ratio		30-09-22	31-12-21	30-09-21
Numerator (Millions of euros)	Provisions	12,570	11,536	11,895
Denominator (Millions of euros)	NPLs	15,162	15,443	14,864
= NPL coverage ratio		83 %	75 %	80 %

Cost of risk

This ratio indicates the current situation and changes in credit-risk quality through the annual cost in terms of impairment losses (accounting loan-loss provisions) of each unit of loans and advances to customers (gross). It is calculated as follows:

$$\frac{\text{Loan-loss provisions}}{\text{Average loans and advances to customers (gross)}}$$

Explanation of the formula: "Loans to customers (gross)" refers to the "Loans and advances at amortized cost" portfolios with the following counterparts:

- other financial entities
- public sector
- non-financial institutions
- households, excluding central banks and other credit institutions.

Average loans to customers (gross) is calculated by using the average of the period-end balances of each month of the period analyzed plus the previous month. "Annualized loan-loss provisions" are calculated by accumulating and annualizing the loan-loss provisions of each month of the period under analysis.

Loan-loss provisions refer to the aforementioned loans and advances at amortized cost portfolios.

This indicator is shown, as others, at a business area level.

Relevance of its use: this is one of the main indicators used in the banking sector to monitor the situation and changes in the quality of credit risk through the cost over the year.

Cost of risk		Jan.-Sep.2022	Jan.-Dec.2021	Jan.-Sep.2021
Numerator (Millions of euros)	Annualized loan-loss provisions	3,041	3,026	2,969
Denominator (Millions of euros)	Average loans to customers (gross)	352,550	325,013	324,022
= Cost of risk		0.86 %	0.93 %	0.92 %
