

AUDAX RENOVABLES, S.A.

In accordance with the provisions of article 227 of the revised text of the Securities Market Act, approved by Royal Legislative Decree 4/2015, of October 23, Audax Renovables, S.A. (the "**Company**") communicates the following:

OTHER RELEVANT INFORMATION

Audax Renovables (ADX.MC), the energy group whose business involves generating 100% renewable energy as well as supplying 100% renewable electricity, is once again boosting its generation projects by starting the 20 MWp construction works in the province of Guadalajara.

Today, Audax Renovables has begun the construction of new 20 MW in the photovoltaic plants of Las Alberizas I, II, III and IV located in the Guadalajara Municipality of Torija, which will have the installation of 59,760 solar panels and producing 32.44 GWh per year of energy, which is equivalent to the annual consumption of more than 9,400 households.

The Audax Group's commitment to renewable energy generation facilities remains clear, being these plants the seventh that the group has built in Castilla-La Mancha with an investment that exceeds 9 million euros.

The construction of the aforementioned facility will be carried out, in part, thanks to the first issuance of green bonds that Audax Renovables carried out last September and amounted to 20 million euros. The rest will be financed with own resources.

This project is part of the Audax Group's strategy to increase its generation portfolio with the aim of supplying its customers with renewable energy produced in its own plants.

Badalona (Barcelona), October 22th, 2020

Francisco José Elías Navarro
Chairman of the Board of Directors
of Audax Renovables, S.A.
