Basis of presentation

The consolidated income statement and balance sheet as of the end of December 2022 and 2021, together with the disclosures shown in this Financial Report, are presented in accordance with the accounting standards, principles and criteria defined in Note 1 to the Group's consolidated annual financial statements as of 31 December 2022.

Pursuant to the Guidelines on alternative performance measures published by the European Securities and Markets Authority on 5 October 2015 (ESMA/2015/1415), a glossary has been included with the definitions and the reconciliation with the items presented in the financial statements of certain alternative financial measures used in this document. See Glossary of terms on performance measures.

Excl. TSB

1. Summary

Net interest income

Net interest income followed a positive trend, ending 2022 at 3,799 million euros, representing year-on-year growth of 10.9%, due to higher loan book yields, improved revenue from the fixed-income portfolio, as well as strong growth of volumes, where it is particularly worth mentioning the growth of mortgages at TSB; all these facts served to offset higher wholesale funding costs.

In the quarter, this item grew by 11.6%, also supported mainly by higher yields and the increased contribution of the ALCO portfolio, which offset the increased wholesale funding costs.

Net fees and commissions

Net fees and commissions amounted to 1,490 million euros as at the end of 2022, representing year-on-year growth of 1.5%, driven by service fees, where it is particularly worth mentioning the higher levels of card transactions and currency exchange, and also driven by fees related to risk transactions.

In quarterly terms, this item fell by -4.1%, due to a reduction in service fees, in particular fees on payment cards affected by seasonality and fees on sight accounts.

Total costs

Total costs followed a positive trend, amounting to 2,883 million euros as at the end of 2022, representing a -12.8% reduction from the figure as at the end of 2021, which included non-recurrent costs arising from the efficiency plans carried out. Excluding this impact, recurrent costs fell by -3.5% year-on-year, driven by savings on staff expenses delivered by the efficiency plans and also by the efforts made to reduce general expenses.

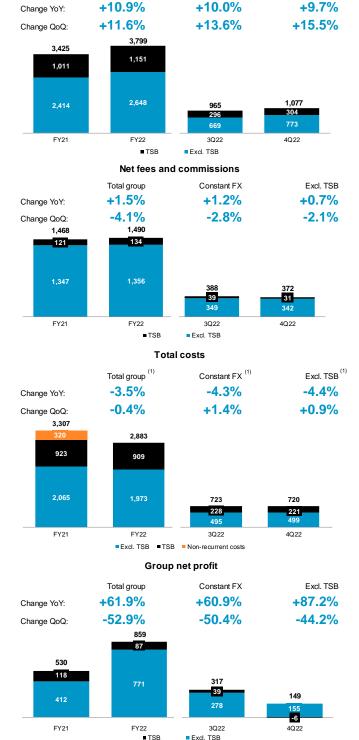

Quarter-on-quarter, total costs were down by -0.4%, mainly due to a reduction in general expenses.

Net profit of the Group

As at the end of 2022, the Group's net profit amounted to 859 million euros, with profit ex-TSB amounting to 771 million euros and profit at TSB to 87 million euros, representing year-on-year growth of 61.9%. ROTE stood at 7.8%.

In the quarter, profit amounted to 149 million euros, impacted by the expense related to the contribution to the Deposit Guarantee Fund (DGF) and the payment of the tax on deposits of credit institutions (IDEC), and by the impact of the agreement regarding the issues emerged following the migration of the TSB's IT platform, which was partially offset by insurance claims.

It is worth highlighting the good performance of core results (net interest income + net fees and commissions – recurrent costs), which increased by 26.3% year-on-year and by 15.5% in the quarter.

Net interest income

Total group

⁽¹⁾ Change in recurrent costs.

Performing loans

Performing loans grew by 0.8% year-on-year, affected by the depreciation of the pound sterling over the year. At a constant exchange rate, performing loans grew by 2.0%, driven by growth in all geographies, although particular note should be taken of the growth of TSB's mortgage book and of the good performance in Spain, mainly in terms of its lending to individuals, notably mortgages, and in terms of its lending to SMEs and Corporates.

In quarterly terms, lending dropped by -0.4%, also impacted by currency depreciations. At a constant exchange rate, this item grew by 0.3%, supported by the growth of foreign businesses.

Customer funds

On-balance sheet customer funds increased by 1.3% year-on-year and by 0.5% in the quarter, affected by the evolution of foreign currencies. At a constant exchange rate, they grew by 2.5% year-on-year and by 1.0% in the quarter, due to both the positive evolution of term deposits, in particular at TSB, and by the growth of sight accounts.

Off-balance sheet funds recorded a reduction of -7.6% yearon-year, impacted by volatility in financial markets, particularly in mutual funds, while in the quarter the trend shifts and they grew by 1.2%, also driven by positive flow of net mutual fund subscriptions.

Non-performing assets

The balance of NPAs fell during the quarter and amounted to 6,971 million euros (gross) as at the end of 2022, with coverage remaining steady at 52.3% considering total provisions.

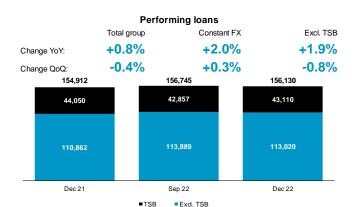

The Group's stage 3 ratio stood at 3.4%, while the stage 3 coverage ratio considering total provisions stood at 55.0% and the stage 3 coverage ratio increased during the quarter to 39.4%.

The gross NPA ratio was 4.1%, while the net NPA ratio stood at 1.9% considering total provisions.

The Group's credit cost of risk stood at 44 bps and the total cost of risk stood at 60 bps as at the end of 2022, improving by 5 bps and 11 bps respectively compared to the end of 2021.

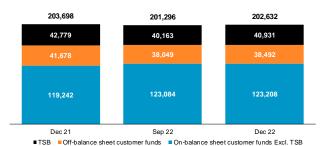

Capital ratio

The phase-in CET1 ratio stood at 12.66%, while the Total Capital ratio stood at 17.13%, which is above the requirements, with an MDA buffer of 402 bps. The fully-loaded CET1 ratio stood at 12.54%.

3. Performance review

Macroeconomic environment

Global economic, political and financial context

The energy crisis in Europe has become a less central topic and everything suggests that strict energy rationing over the winter can be avoided. This is thanks to unusually mild temperatures, which have considerably reduced the demand for gas. Europe has also been able to find other energy sources to serve as an alternative to Russian gas (gas from Norway, liquefied natural gas and the use of other forms of energy). This all helped gas reserves on the continent to reach record-high levels.

On the other hand, inflation has eased off on a global scale and it would appear to be past its peak. In the Eurozone, the most recent price data have surprised to the downside, thanks to the fall of energy prices. On a more negative note, it is worth noting that underlying inflation, which excludes energy and food, has continued to rebound and has reached an all-time high. Another example of this easing of inflationary pressures on a global scale can be seen in the United States, where inflation in December fell to its lowest since October 2021

With regard to activity, there have been persistent concerns over global economic growth as a result of the interest rate hikes, the inflation shock and the cut of Russian gas supplies to Europe, although the bleakest forecasts for the European economy have not materialised as yet. In the United States, the sectors most sensitive to interest rates, such as the real estate sector, have shown clear signs of deterioration. In the Eurozone, the hardest-hit sectors have been those that are more electricity-intensive, with notable declines in production. This is in sharp contrast with the still-positive evolution of the labour market in the Eurozone and in the United States, where the unemployment rate remains at a record low.

Lastly, in China, in December the country's authorities announced that they would be scrapping the zero-Covid policy, which translated into an increase in mobility and, consequently, a greater number of infections. However, economic activity in the Asian country continued to be affected by the lockdown measures put in place in response to the pandemic and GDP became stagnant in Q4 2022.

Economic situation in Spain

After recording robust growth in the first half of the year, economic activity indicators from the last few months of the year suggest that GDP growth will remain subdued in Q4 2022 (Q3 2022: 0.1% quarter-on-quarter). According to the Bank of Spain, companies are expecting turnover to have stabilised in Q4 2022, while business and consumer confidence levels have been recovering during the quarter and are therefore expected to end the year at levels similar to those recorded in Q3 2022. In terms of consumption data, on the other hand, there have been mixed signals, while industrial production, for its part, performed poorly in October and November. Against this backdrop, the Bank of Spain expects to see quarterly GDP growth of 0.1% in Q4 2022.

Inflation data surprised to the downside, in line with that observed in the Eurozone, and in December inflation fell for the fifth consecutive month (to 5.5% year-on-year), influenced by the fall in prices of electricity and fuel. On the negative side, underlying inflation continued to climb to 6.7% year-on-year in December and is already the highest it has been since 1992.

Lastly, with regard to economic policy, a particularly noteworthy development was the government's approval of a new financial aid package, which extends many of the already existing measures put in place to tackle inflation and which also adds other new measures such as a VAT cut for basic food items and a 200 euros cheque for vulnerable households, in addition to limiting fuel discounts to specific groups of people only.

Economic situation in the United Kingdom

Rishi Sunak's new government put UK financial markets at ease following the turbulent episode triggered by the mini budget unveiled by the previous government. Under Sunak's leadership, the UK executive unveiled a new budgetary plan in the medium term, which was more prudent than the one presented by the previous government and which considered a reduction of public spending and a tax increase.

On the other hand, inflation continued to ease off, in the same way as in other developed economies, and in December it fell to 10.5%. All of the signs are that inflation reached its peak in October.

In terms of economic activity, this was weighed down by high inflation and monetary policy tightening. The real estate market, which is particularly sensitive to interest rate hikes, has been especially hard-hit. House prices have already recorded four consecutive months of declines.

The labour market, for its part, continued to prove resilient to economic weakness and, although the unemployment rate rose to 3.7%, it remains at historically low levels. Against this backdrop, wages have been rising at a historically robust pace.

Economic situation in Mexico

The Mexican economy has proved resilient to the effects of the military conflict in Ukraine. GDP recovered pre-Covid levels in Q3 2022, much earlier than consensus expectations. On the other hand, inflation indicators have showed signs that it is easing off, although certain upside risks do remain. In December, CPI inflation fell to 7.8% year-on-year after having peaked at 8.7% in August. In more negative terms, food prices remain high. The Mexican currency performed well in this context, standing out as one of the most resilient emerging currencies thanks, in part, to China's abandonment of its zero-Covid policy.

Fixed-income markets

Central banks continued to focus on combatting inflation and, in general, they maintained a hawkish tone.

In December, the ECB reduced the scale of its rate hikes to 50 bps and it placed the deposit facility rate at 2.00%, a level that can be considered to be at neutrality. Since July, the central bank has raised interest rates by an unprecedented 250 bps. The ECB displayed a hawkish stance, signalling that interest rates would need to keep increasing significantly until restrictive levels were reached. With regard to its quantitative tightening policy, the ECB indicated that it would begin reducing its balance sheet in March 2023 and that it would no longer reinvest all of the principal payments from maturing securities acquired under its Asset Purchase Programme (APP). With regard to TLTRO III, banks have already repaid almost half of all the liquidity injected through these operations.

The Fed also maintained a clearly hawkish tone and signalled that interest rates will need to remain at restrictive levels for some time as, although inflation is easing off, it remains high. In its November and December meetings it therefore continued to raise interest rates until they reached the 4.25-4.50% range. Altogether, the Fed raised interest rates by a total of 425 bps in nine months, making this the most aggressive rate hike cycle in several decades. In its most recent forecasts, the Fed announced that rates would be 5.10% at the end of 2023 and 4.10% at the end of 2024. The central bank also forged ahead with its balance sheet reduction policy.

The BoE increased the base rate in its last few meetings, raising it to 3.50%, the highest rate since 2008. The central bank stated that it believed further base rate hikes were

necessary given the continued labour market tightness, and it appeared particularly concerned over wage growth. In early November, the BoE also began selling assets from its balance sheet and it has already begun to unwind the gilts it acquired during the turbulent financial episode triggered by the government under Liz Truss.

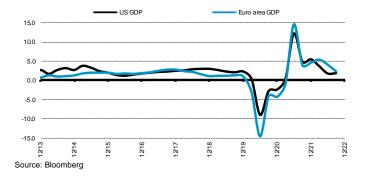

German 10-year government bond yields rebounded sharply during the quarter, reaching their highest levels since 2011, in light of the ECB's clearly hawkish discourse. In the United States, 10-year government bond yields fluctuated. They rebounded sharply in the first part of the quarter, influenced by the hawkish tone of the Fed. However, in the last few weeks of the year, bond yields practically reversed their previous swing, amid signs that inflation was easing off and following the Fed's confirmation that it would be slowing the pace of its rate hikes.

Risk premiums of peripheral countries declined, particularly that of Italy, influenced by China's abandonment of its zero-Covid policy and the signs that inflation was easing off.

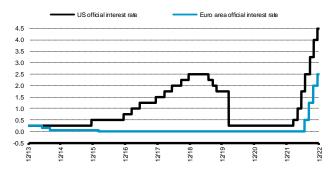

Equity markets

Equity markets performed well in Q4 2022, influenced by China's abandonment of its zero-Covid policy, the signs that inflation is easing off on a global scale, and the indications that the deterioration of economic activity in the Eurozone was less severe than initially estimated. In Europe, the Euro Stoxx rebounded by 14.3%, while the IBEX posted growth of almost 12% during the quarter. In the United States, the S&P 500 also posted a 7.1% increase in dollars (dropping by 2.1% in euros, due to the appreciation experienced by the euro during the quarter). Lastly, the Chinese Hang Seng also posted gains (almost 15% in yuan and 5.6% in euros).

Income statement

Summary of results:

Banco Sabadell Group generated attributable profit of 859 million euros as at the end of 2022, of which 771 million euros are recorded ex-TSB and 87 million euros correspond to TSB, thus representing year-on-year growth of 61.9% and bringing the Group's ROTE to 7.8%.

This Group profit was mainly driven by the good performance of core results (net interest income + net fees and commissions – recurrent costs), which increased by 26.3% year-on-year, due to the improvement of net interest income and net fees and commissions, as well as the efforts made to reduce costs. In the quarter, core results grew by 15.5%, with the increase of net interest income being particularly worthy of note.

It should also be mentioned that the efforts made to reduce costs allowed the Group's cost-to-income ratio to be brought down during the year to 45.1% as at the end of 2022, compared to 55.3% as at the end of 2021. Considering amortisations and depreciations, the cost-to-income ratio fell to 55.6% as at year-end, from 65.8% in 2021.

It should be borne in mind that the fourth quarter of the year was impacted, as usual, by Banco Sabadell's contribution to the Deposit Guarantee Fund (DGF), which amounted to -114 million euros in 2022, and by the payment of the tax on deposits of credit institutions (IDEC), which amounted to -35 million euros.

In addition, this quarter was also affected by the impact of the agreement regarding the issues emerged following the migration of the IT platform of TSB, amounting to -57 million euros, net. This was partially offset by a tax-payable amount of 45 million euros (32 million euros, net) of insurance claim recoveries. Excluding the net impact of -25 million euros, the Group's ROTE stood at 8.0%.

⁽¹⁾ Calculation taking account of recurrent costs.

Net interest income:

Net interest income continued with its positive trend and amounted to 3,799 million euros as at the end of 2022, representing growth of 10.9% year-on-year and of 11.6% in the guarter.

This year-on-year growth is due mainly to higher yields on the loan book, in turn supported by higher interest rates, the increased contribution of the ALCO portfolio, as well as the good evolution of volumes, which it is particularly worth mentioning TSB's loan book growth. All these facts served to offset the higher wholesale funding costs.

In the same way, the increase during the quarter was mainly driven by higher loan book yields and increased revenue from the fixed-income portfolio, which served to offset the higher wholesale funding costs.

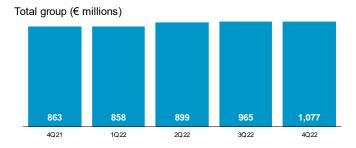

Customer spread and margin on average total assets:

The customer spread increased by 21 bps in the quarter and by 33 bps compared to the fourth quarter of 2021, standing at 2.53%, driven by the increase in loan yields, which offset the higher cost of deposits, impacted by TSB, Mexico and Miami.

Similarly, the net interest margin as a percentage of average total assets rose by 18 bps in the quarter and by 28 bps compared to the fourth quarter of 2021, reaching 1.64%.

Financial income or expenses arising from the application of negative interest rates are recorded in line with the nature of the associated asset or liability. The credit institutions heading on the liabilities side includes negative interest rates applied to balances of credit institutions on the liabilities side, the most significant item being TLTRO III borrowing.

Net trading income and exchange differences:

As at the end of 2022, this item amounted to a total of 104 million euros, a reduction compared to the previous year, which included 324 million euros gained on sales from the ALCO portfolio executed to fund the second phase of the efficiency plan carried out in Spain. This item showed a quarter-on-quarter reduction, as fewer gains on trading derivatives were recognised.

Net fees and commissions:

Net fees and commissions grew by 1.5% year-on-year, ending the financial year 2022 at 1,490 million euros, driven by service fees, on which point it is particularly worth mentioning the higher levels of card transactions and currency exchange, as well as the increased fee revenue from risk transactions, which offset the reduction of asset management fees, which in turn were impacted by the drop in success fees received on asset and insurance management.

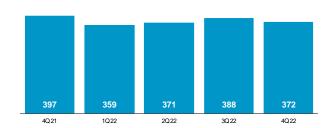

They fell by -4.1% in quarter-on-quarter terms, due a decline in service fees, in particular the drop in card fees revenue due to the seasonal effect and the fall in sight account fees, which in the previous quarter included positive one-off impacts at TSB.

Income from equity method and dividends:

This item amounted to 125 million euros as at the end of 2022, increasing from the previous year, mainly due to the increased contribution of the insurance business. In the quarter, this item showed a reduction due to the reduced earnings of BanSabadell Capital investees.

Other operating income and expenses:

This item amounted to -337 million euros as at the end of 2022, increasing from the end of 2021 due to the recognition of a larger contribution of the Single Resolution Fund (SRF) owing to an increase in the contribution rate at the systemic level, and also because this year does not include the positive contribution of BanSabadell Renting after its sale.

It is worth mentioning that this quarter includes the recognition of -57 million euros, net, resulting from the agreement regarding the issues emerged following the migration of the IT platform of TSB, which were partially offset with a tax-payable amount of 45 million euros (32 million euros, net) due to insurance claim recoveries, amounting to a total net of -25 million euros. Also worth noting is Banco Sabadell's contribution to the Deposit Guarantee Fund (DGF) of -114 million euros and the payment of the tax on deposits of credit institutions (IDEC) of -35 million euros.

Total costs:

Total costs followed a positive trend, amounting to -2,883 million euros as at the end of 2022, representing a -12.8% reduction from the figure as at the end of 2021, which included -320 million euros of non-recurrent costs arising from the efficiency plans carried out in Spain and the United Kingdom. Not including this impact, recurrent costs fell by -3.5% year-on-year, driven by savings on staff expenses delivered by the efficiency plans and also by a reduction of general expenses.

In the quarter, costs fell by -0.4%, mainly due to a decline of general expenses at TSB.

Core results:

Core results (net interest income + net fees and commissions - recurrent costs) followed a positive trend, standing at 2,406 million euros as at the end of 2022, growing by 26.3% year-on-year as a result of the good

evolution of net interest income and the growth of net fees and commissions, as well as the reduction of costs. In the quarter, they grew by 15.5%, mainly supported by the improvement of net interest income.

Core results	631	729	15.5	1,905	2,406	26.3

Provisions for loan losses and other impairments:

This item amounted to -1,032 million euros as at the end of 2022, compared to -1,225 million euros at the end of the previous year, representing a year-on-year reduction of -15.7% due to lower credit provisions and a reduction of real estate provisions.

In the quarter, provisions increased as a result of greater loan loss provisions allocated following updates in the macroeconomic environment.

This level of provisions resulted in a Group credit cost of risk for the year of 44 bps and a total cost of risk of 60 bps as at the end of 2022, improving by 5 bps and 11 bps respectively compared to the end of 2021.

Gains on sale of assets and other results:

Capital gains on the sale of assets and other results amounted to -23 million euros as at the end of 2022, mainly including write-offs of IT assets. The change from the end of the previous year is due to the fact that the previous year mainly included 83 million euros (gross) from the sale of the depositary business and 42 million euros (gross) from the sale of the BanSabadell Renting business, while the quarterly change is explained by the recognition of write-offs from IT assets in Mexico in the fourth guarter of the year.

Net profit:

The Group's net profit amounted to 859 million euros as at the end of 2022, representing year-on-year growth of 61.9%, mainly driven by the core revenue improvement, cost savings and the booking of fewer provisions.

Balance sheet

Highlights:

Performing loans continued to follow a positive trend over the year, despite being negatively impacted by the depreciation of the pound sterling. Not including the exchange rate effect, lending volumes grew year-on-year in all geographies, and they also grew in the quarter, supported by foreign business.

Term deposits also followed a positive trend and this, alongside the growth of sight accounts, was the driving force behind the year-on-year and quarterly growth of on-balance sheet customer funds, affected by the evolution of foreign currencies.

Off-balance sheet funds recorded a year-on-year reduction, impacted by volatility in financial markets, particularly in mutual funds, while in the quarter the trend shifts and they grew, also driven by a positive flow of net mutual fund subscriptions.

Assets:

The Group's total assets amounted to 251,380 million euros, representing a decrease of -0.2% year-on-year and of -3.5% in the quarter, affected by the evolution of foreign currencies. At constant exchange rates, they grew by 0.8% year-on-year and fell by -3.2% in the quarter, affected by the 10,000 million euros TLTRO III repayment.

Similarly, excluding TSB, total assets amounted to 198,894 million euros, falling by -0.2% year-on-year and by -4.2% in the quarter.

Loans and advances to customers:

Gross performing loans ended the year 2022 with a balance of 156,130 million euros, growing by 0.8% year-on-year and dipping by -0.4% in the quarter, due to foreign currency depreciation. At constant exchange rates, this item increased by 2.0% year-on-year and by 0.3% in the quarter.

In Spain, gross performing loans grew by 1.7% year-onyear, due mainly to lending to individuals, in particular mortgages, as well as SMEs and Corporates. Conversely, in the quarter, lending volumes dipped by -0.7%, impacted mainly by the depreciation of the US dollar.

Gross performing loans in foreign branches (included in the Spain perimeter) amounted to 9,485 million euros, up by 7.9% year-on-year and down by -2.8% in the quarter, in both cases impacted by changes in the US dollar currency. At constant exchange rates, year-on-year growth stood at 5.3%, while the quarter saw growth of 2.9% due to the increased levels of business.

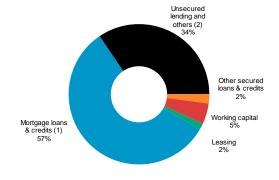

At TSB, lending was impacted by the depreciation of the pound sterling in the year and in the quarter, recording a year-on-year decline of -2.1% and a quarterly increase of 0.6%. At a constant exchange rate, it increased by 3.3% year-on-year and by 1.0% in the quarter, in both cases supported by the growth of the mortgage book.

Mexico recorded year-on-year growth of 9.5%, underpinned by the appreciation of the Mexican peso and the US dollar, while in the quarter, currency depreciation caused a -2.9% decline in lending. At constant exchange rates, year-on-year growth stood at 1.4%, and the quarter saw growth of 4.8%, due to increased levels of lending.

Liabilities:

Customer funds:

As at the end of 2022, on-balance sheet customer funds amounted to a total of 164,140 million euros, representing a year-on-year increase of 1.3% and quarterly growth of 0.5%, affected by the evolution of foreign currencies. At constant exchange rates, they grew by 2.5% year-on-year and by 1.0% in the quarter, due to both the positive evolution of term deposits, in particular at TSB, and sight accounts.

Sight account balances amounted to 147,540 million euros, growing by 0.2% year-on-year and dropping by -0.1% in the quarter, affected by the depreciation of foreign currencies, as if one considers constant exchange rates, they actually grew by 1.5% in the year and by 0.2% in the quarter.

Term deposits came to a total of 16,141 million euros, growing by 9.0% compared to the end of 2021, and by 1.5% in the quarter. Considering constant exchange rates, growth was 8.3% in the year and 3.1% in the quarter.

Total off-balance sheet funds amounted to 38,492 million euros as at the end of 2022, representing a reduction of -7.6% year-on-year, impacted by volatility in financial markets, particularly in mutual funds, while in the quarter the trend shifts and they grew by 1.2%, also driven by positive flow of net mutual fund subscriptions.

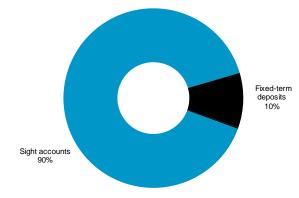

Funds under management and third-party funds:

This item amounted to a total of 225,146 million euros, representing a slight year-on-year increase of 0.1% and a quarterly increase of 0.9%.

Exposures to central banks included 22,000 million euros of ECB borrowing, with the balance falling during the quarter by 10,000 million euros following the early repayment of TLTRO III. It also includes 6,201 million euros with the Bank of England, which remained stable in the quarter.

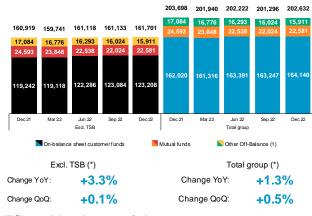

It is worth noting that a further 6,000 million euros of TLTRO III funding was repaid in January 2023, meaning that 50% of the total amount has now been repaid.

Risk management

Highlights:

The Group's stage 3 ratio stood at 3.4% as at year-end 2022, falling by -25 bps with respect to the previous year.

In the quarter, non-performing assets (NPAs) were reduced by -68 million euros, of which -15 million euros correspond to the stage 3 balances and -53 million euros correspond to the reduction of foreclosed assets.

With regard to the breakdown of loans by stages, it should be noted that 88.2% are classified as stage 1 with a coverage level of 0.3%, the balance of stage 2 loans represents 8.4% of the total with coverage of 3.6%, and the balance of stage 3 loans represents 3.4% of the total with coverage of 39.4%.

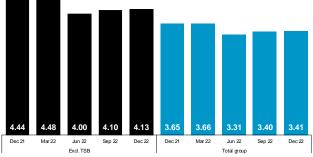

The NPA coverage ratio including total provisions remained stable in the quarter at 52.3%, with the stage 3 coverage ratio including total provisions standing at 55.0% and the foreclosed asset coverage ratio standing at 38.3%.

Risk management:

Non-performing assets showed a balance of 6,971 million euros as at the end of 2022, of which 5,814 million euros correspond to stage 3 assets and 1,157 million euros correspond to foreclosed assets.

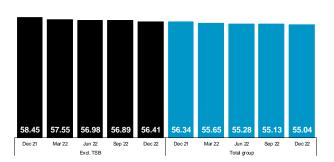

The gross NPA ratio stood at 4.1%, while the net NPA ratio considering total provisions stood at 1.9%.

Capital management and credit ratings

Highlights:

The phase-in CET1 ratio stood at 12.66% as at the end of 2022, increasing by 1 bps compared to September 2022.

This CET1 ratio includes 12 bps of IFRS 9 transitional adjustments, therefore the fully-loaded CET1 ratio is 12.54%, growing by 2 bps in the quarter. Of this quarterly growth, 8 bps correspond to organic capital generation and 7 bps to the reduction of risk-weighted assets, which offset the -11 bps due to the increase of the pay-out ratio to 50% and the -2 bps of valuation adjustments of the fair value portfolio. This year, the fully-loaded CET1 ratio increased by

The minimum prudential requirements applicable to Banco Sabadell following the Supervisory Review and Evaluation Process (SREP) were 8.64% for CET1 and 13.08% for Total Capital, including the countercyclical buffer (0.18%), linked to exposures in the United Kingdom, where a countercyclical buffer of 1% has been established effective from December 2022.

The phase-in Total Capital ratio stood at 17.13% as at the end of 2022, thus remaining above requirements with an MDA buffer of 402 bps.

The phase-in leverage ratio was 4.62%.

The MREL ratio as a percentage of RWAs stood at 26.34%, above the requirement for the year 2024 (25.33%), while the MREL ratio as a percentage of the Leverage Ratio Exposure (LRE) was 8.26%, also above the requirement for 2024 (6.36%).

The pay-out ratio increased to 50%, combining a cash dividend with a share buyback.

On 18 May 2022, **DBRS Ratings GmbH** affirmed Banco Sabadell's long-term rating of A (low), upgrading its outlook from negative to stable, in order to reflect its view that the impact of COVID-19 on the Bank has been less than anticipated in both Spain and the United Kingdom, Sabadell's key operating markets. The short-term rating was also maintained at R-1 (low). The full report on the revision was published on 7 July.

On 20 October 2022, **S&P Global Ratings** revised and upgraded its long and short-term issuer credit ratings of Banco Sabadell to BBB/A-2 from BBB-/A-3 with a stable outlook. It also revised and upgraded its ratings of senior preferred debt to BBB from BBB- and its long-term resolution counterparty rating to BBB+ from BBB. The remaining ratings all remained unchanged. The stable outlook reflects the progress made on the strategic plan and the expectation that Sabadell will continue to deliver on its plan and gradually enhance the solidity and profitability of the franchise. The full report on the revision was published on 21 November.

On 7 November 2022, **Moody's Investors Service** affirmed the ratings of Banco Sabadell's long-term deposits and long-term senior debt of 'Baa2' and 'Baa3', upgrading its outlook to positive from stable, reflecting the possibility that the rating could improve over the next 12-18 months if Banco Sabadell continues improving its profitability due to the growth of its net interest income and its containment of operating costs and credit provisions. The short-term rating was also affirmed at 'P-2'. The full report on the revision was published on 21 December.

On 30 June 2022, **Fitch Ratings** affirmed Banco Sabadell's long-term rating of 'BBB-', with a stable outlook, reflecting the Group's adequate capitalisation and risk diversification and its challenges in relation to profitability and keeping cost of risk contained. It indicated that the factors that had a negative outlook (asset quality and profitability) had stabilised. The short-term rating was kept at 'F3'. The full report on the revision was published on 15 July.

Results, by business unit

This section gives information regarding results and other indicators of the Group's business units.

The criteria that Banco Sabadell Group uses for its segment reporting are:

- Three geographical areas: Banking Business in Spain, United Kingdom and Mexico.
- Each business unit is allocated capital equivalent to 12% of its risk-weighted assets, assigning all of the corresponding deductions to each business unit and allocating the surplus of own funds to Banking Business Spain.

In terms of the other criteria applied, segment information is first structured with a breakdown by geographical region and then broken down according to the customers at which each segment is aimed.

Segmentation by geographical region and business unit

- Banking Business Spain groups together the Retail Banking, Business Banking and Corporate Banking business units, where Individuals and Businesses are managed under the same Branch Network:
 - Retail Banking: Offers financial products and services to individuals. These include investment products and medium- and long-term finance, such as consumer loans, home mortgages and leasing or rental services, as well as short-term finance. Funds come mainly from customer deposits and sight deposit accounts, savings insurance, mutual funds and pension plans. The main services also include payment methods such as cards and insurance linked to consumer loans and mortgages.
 - Business Banking: Offers financial products and services to companies and self-employed workers.
 These include investment products and finance, such as working capital products, revolving loans and medium- and long-term finance. It also offers custom structured finance and capital market solutions, as well as specialised advice for businesses. Funds mainly come from deposits, customer sight deposit accounts and mutual funds. The main services also include collection/payment methods such as cards and POS terminals, as well as import and export services.

Corporate Banking: This unit is responsible for managing the segment of large corporations which, because of their unique characteristics, require a tailor-made service, supplementing the range of transaction banking products with the services of the specialised units, thus offering a single, allencompassing solution to their needs, taking into account the particular features of the economic activity sector and the markets in which they operate. It has units that develop custom products for large corporations and financial institutions. The units responsible for the development of these custom products do so for the entire Banco Sabadell Group, extending their capabilities to the Corporate and Institutional Banking segment. Through its international presence in 17 countries, with representative offices and operational branches, it offers financial and advisory solutions to large Spanish and international corporations and financial institutions. It has operational branches in London, Paris, Lisbon, Casablanca and Miami.

Banking Business United Kingdom:

The TSB franchise includes business conducted in the United Kingdom, which includes current and savings accounts, loans, credit cards and mortgages.

- Banking Business Mexico:

Offers banking and financial services for Corporate Banking and Commercial Banking in Mexico.

The information presented herein is based on the standalone accounting records of each Group company, after all consolidation disposals and adjustments have been made.

Each business unit bears its own direct costs, calculated on the basis of general accounting.

Key information relating to the segmentation of the Group's activity is given hereafter.

Banking Business Spain

Net profit as at the end of 2022 amounted to 740 million euros, representing sharp year-on-year growth, mainly as a result of the good performance of net interest income, the reduction of costs, and the booking of fewer provisions.

Net interest income amounted to 2,499 million euros as at 2022 year-end, growing by 8.6% year-on-year due to higher loan book yields, in turn supported by higher interest rates, the increased contribution to the ALCO portfolio and the good growth of volumes, which all served to offset higher wholesale funding costs.

Net fees and commissions amounted to 1,344 million euros, 0.6% higher than at the end of 2021, due to the increase in service fees, were it is particularly worth mentioning the higher levels of card transactions and currency exchange, as well as fees related to risk transactions.

Net trading income and exchange differences amounted to 95 million euros, a reduction compared to the previous year, which included 324 million euros gained on sales from the ALCO portfolio executed to fund the second phase of the efficiency plan.

Equity-accounted results and dividends showed year-on-year growth of 22.9% due mainly to the increased contribution of the insurance business.

Other income and expenses were positively impacted by the insurance claim recoveries associated with TSB's IT migration.

Total costs fell by -17.1% year-on-year, as the previous year included -301 million euros of non-recurrent costs related to the efficiency plan carried out. Not including this impact, costs decreased by -4.5% due to both lower staff expenses as a result of the cost savings delivered by the efficiency plans, and due to the recognition of lower general expenses.

Provisions and impairments amounted to -920 million euros, down by -22.9% year-on-year, due to the booking of fewer provisions for both loan losses and real estate assets.

Gains on the sale of assets and other results showed a yearon-year reduction, as the previous year mainly included 83 million euros (gross) gained on the sale of the depository business and 42 million euros (gross) from the sale of the BanSabadell Renting business.

Banking Business UK

Net profit amounted to 87 million euros as at 2022 year-end, impacted by -57 million euros (net), following the agreement regarding the issues emerged following the migration of the IT platform, recognised in the fourth quarter of 2022.

Net interest income amounted to a total of 1,151 million euros, 13.8% higher than in the previous year due to the growth of mortgage volumes and higher interest rates.

Net fees and commissions increased by 11.0% year-on-year, mainly due to higher service fees, particularly card fees.

Total costs amounted to -909 million euros, falling by -3.5% year-on-year, whereas in the previous year total costs were impacted by -19 million euros of non-recurrent costs arising from the efficiency plan. Not including this impact, total costs fell by -1.5%, due both to improved staff expenses and lower general expenses.

Provisions and impairments amounted to -104 million euros, representing year-on-year growth, mainly because the previous year included releases of provisions.

Corporation tax reflected an impact of -15 million euros as at the end of 2022 as a result of the impact on deferred tax assets following the bank levy review in the United Kingdom, which reduced this levy from 8% to 3%. However, the figure as at the end of 2021 includes +23 million euros due to the corporation tax increase.

In TSB, lending fell by -2.1% year-on-year, negatively impacted by the depreciation of the pound sterling. Considering a constant exchange rate, this item showed an increase of 3.3% as a result of the growth of the mortgage book.

Similarly, on-balance sheet customer funds decreased by -4.3% in the year, affected by the depreciation of the pound sterling, whereas, considering a constant exchange rate, they actually grew by 1.0% due to the larger volume of term deposits.

Mexico

Net profit as at the end of 2022 was 31 million euros, representing sharp year-on-year growth supported mainly by improved net interest income and by a reduced allocation of provisions.

Net interest income amounted to 149 million euros, increasing by 32.4% year-on-year, due to the interest rate hike and the appreciation of the Mexican peso.

Net fees and commissions amounted to 12 million euros as at the end of 2022, growing by 1 million euros compared to the previous year due to increased commercial activity.

Total costs came to -86 million euros, falling by -3.5% yearon-year due to improved general and staff expenses, which offset the increase of amortisations/depreciations.

Provisions and impairments were below the previous year's levels due to an improvement in the loan book, as well as payments received from single-name customers.

Gains on sale of assets and other results includes the recognition of asset write-offs from IT.

S&P upgrades ratings for Banco Sabadell

On 20 October 2022, S&P Global Ratings, raised the following ratings of Banco Sabadell:

- Long and short-term issuer credit rating (ICR) to BBB/A-2 from BBB-/A-3, setting the outlook stable.
- Senior preferred debt rating to BBB from BBB-.
- Long-term resolution counterparty rating (RCR) to BBB+ from BBB.

The rest of the ratings assigned to Banco Sabadell by S&P Global Ratings remain unchanged.

The Banco Sabadell Board of Directors resolves to distribute a dividend

In a meeting held on 26 October 2022, the Banco Sabadell Board of Directors resolved to distribute an interim cash dividend out of the earnings of 2022 amounting to EUR 0.02 (gross) per share, to be paid on 30 December 2022.

Moody's upgrades outlook for Banco Sabadell

On 7 November 2022, Moody's Investors Service changed the outlook on the Banco Sabadell's long-term deposit and senior unsecured debt ratings to positive from stable, maintaining deposits ratings and senior unsecured debt ratings at "Baa2/Baa3" respectively.

Banco Sabadell receives notice of SREP requirements for 2023

On 15 December 2022, Banco Sabadell received the European Central Bank decision regarding the minimum prudential requirements as a result of the supervisory review and evaluation process (SREP) that apply from 1 January 2023.

The requirement for Banco Sabadell at consolidated level is to keep at all times a minimum Common Equity Tier I ratio of 8.65% (CET1 phased-in) and a minimum Total Capital phased-in of 13.09%

These ratios include the minimum Pillar 1 requirement (8.00%, of which CET1 4.50%), the Pillar 2 requirement (2.15%, of which CET1 1.21%), the capital conservation buffer (2.50%), the requirement derived from its consideration as "other systemically important institution" (0.25%) and the countercyclical buffer (0.19%), linked to exposures in UK, where a 1% countercyclical buffer has been established applying from December 2022.

TSB Bank plc. reaches agreement regarding the incidents occurring following the migration of its IT platform.

Related to the Relevant Fact number 266505 filed by Banco Sabadell on 7th June 2018, TSB Bank plc. (TSB), on 16th December 2022 has reached an agreement with British regulators on the conclusions of the investigation into the causes and circumstances related to the issues that emerged following the migration of the IT platform of TSB. Said agreement requires TSB to pay 48.65 million pounds to the British Regulators, which will be accounted for by TSB in the fourth quarter.

Banco Sabadell receives notice of MREL requirements for 2024

On 11 January 2023, Banco Sabadell has received the communication through the Bank of Spain of the decision made by the Single Resolution Board (SRB) on the minimum requirement for own funds and eligible liabilities (MREL) and the subordination requirement applicable to Banco Sabadell on a consolidated basis.

Banco Sabadell needs to meet the following requirements from 1 January 2024:

- The minimum requirement for MREL is 22.22% of the total risk exposure amount (TREA) and 6.36% of the leverage ratio exposure (LRE).
- The subordination requirement is 17.23% of TREA and 6.36% of LRE.

The decision sets out the following interim requirements that must be met from 1 January 2022:

- The MREL requirement is 21.05% of TREA and 6.22% of LRE.
- The subordination requirement is 14.45% of TREA and 6.06% of LRE.

The own funds used by the entity to meet the combined buffer requirement (CBR) will not be eligible to meet its MREL and subordination requirements expressed in terms of TRFA

Banco Sabadell is already compliant with the requirements that need to be met from 1 January 2024 onwards, which are consistent with Banco Sabadell's expectations and in line with its funding plans.

The Banco Sabadell Board of Directors resolves to propose the distribution of a dividend

In a meeting held on 25 January 2023 and complying with the Shareholder Remuneration Policy approved at the same meeting, the Banco Sabadell Board of Directors has resolved to propose to the next Annual General Meeting of Shareholders a supplementary dividend of €0.02 (gross) per share charged to the results of the 2022 financial year, to be paid in cash foreseeably in the month following the holding of the Annual General Meeting of Shareholders.

This dividend adds on to the interim cash dividend amounting to €0.02 (gross) per share which was approved by the Banco Sabadell Board of Directors on 26th October 2022, and which was paid on 30th December 2022.

In addition to this cash dividend, Banco Sabadell Board of Directors has also agreed to establish, out of the 2022 earnings, a share buyback programme, subject to the corresponding previous authorizations, up to a maximum of €204 million euros, whose terms will be the content of a new announcement before its execution.

The total shareholders remuneration corresponding to 2022, which combines the cash dividend and the share buyback programme, will, therefore, be equivalent to a 50% of the attributable net profit.

6. Glossary of terms on performance measures

In the presentation of its results to the market, and for the purpose of monitoring the business and decision-making processes, the Group uses performance indicators pursuant to the generally accepted accounting regulations (EU-IFRS), and also uses other unaudited measures commonly used in the banking industry (Alternative Performance Measures, or "APMs") as monitoring indicators for the management of assets and liabilities, and the financial and economic situation of the Group, which facilitates its comparison with other institutions.

Following the ESMA guidelines on APMs (ESMA/2015/1415 of October 2015), the purpose of which is to promote the use and transparency of information for the protection of investors in the European Union, the Group presents below, for each APM, the reconciliation with items shown in the financial statements (in each section of the report) as well as its definition and calculation:

		Definition and calculation	Page
ROA	(*) (**)	Consolidated income during the year / ATA. In the numerator the annualization of the profit obtained to date is considered and adjusted by contributions to	
		deposit guarantee and resolution funds (DGF and SRF) and tax on deposits of credit institutions (IDEC), except year end.	5
ROE	(*) (***)	Profit attributed to the Group / average equity. In the numerator the annualization of the profit obtained to date is considered and adjusted by contributions to deposit guarantee and resolution funds (DGF and SRF) and tax on deposits of credit institutions (IDEC), except year end.	5
RORWA	(*)	Profit attributed to the Group / risk-weighted assets (RWA). In the numerator the annualization of the profit obtained to date is considered and adjusted by	
NORWA	()	contributions to deposit guarantee and resolution funds (DGF and SRF) and tax on deposits of credit institutions (IDEC), except year end.	
DOTE	(*) (***)	Profit attributed to the Group / average equity. In the numerator the annualization of the profit obtained to date is considered and adjusted by contributions to	
ROTE	(*) (***)	deposit guarantee and resolution funds (DGF and SRF) and tax on deposits of credit institutions (IDEC), except year end. The denominator excludes intangible assets and the goodwill of the investees.	5
		Administrative expenses / adjusted gross income. The denominator includes the linear accrual of contributions to deposit guarantee fund and resolution fund	
Efficiency ratio	(*)	and tax on deposits of credit institutions, except year end.	5
Efficiency ratio with amortication 9 depreciation	(*)	Administrative expenses and amortisation & depreciation / adjusted gross income. The denominator includes the linear accrual of contributions to deposit	
Elliciency ratio with amortisation & depreciation	(1)	guarantee fund and resolution fund and tax on deposits of credit institutions, except year end.	5
Other operating income/expense		Includes the following accounting items: other operating income and other operating expense as well as income from assets and expenses on liabilities under	
		insurance or reinsurance contracts.	8
		Includes the following accounting items: (i) provisions or reversal of provisions, (ii) impairment or reversal of impairment on financial assets not measured at fair	
Total provisions & impairments		value through profit or loss and net modification losses or gains, (iii) impairment of reversal of impairment of investments in joint ventures and associates, (iv) impairment or reversal of impairment on non-financial assets, (v) profit or loss from non-current assets and disposal groups classified as held for sale not	
Total provisions & impairments		impaintent or teretaral or impaintent or informatical assets, (v) proint in loss attention for the properties in the ret gains or qualifying as discontinued operations (excluding gains or losses on sales of equity holdings and other items) and (v) investment properties in the net gains or	
		losses on derecognition of non-financial assets.	8
		Includes the following accounting items: net gains or losses on derecognition of non-financial assets, excluding investment properties, and gains or losses on	
Gains on sale of assets and other results		sales of equity holdings and other items included in the profit or loss from non-current assets and disposal groups classified as held for sale not qualifying as	
		discontinued operations.	8
Pre-provisions income		Comprised of the following accounting items: gross income plus administration and amortisation/depreciation expenses.	8
		Difference between return and cost of assets and liabilities related to customers. The ratio has been calculated taking into account the difference between the	
Customer spread	(**)	average rate charged by the bank for customers loans and the average rate paid by the bank for the customers deposits. The average customers loans rate is	
		the annualised ratio between the financial income from customer loans and the average daily balance of customer loans. The average rate of customers funds is the annualised ratio between the financial expenses on customers funds and the average daily balance of customers funds.	9
		the aniiudinest ratio between in terminational expenses on customers industrial the average daily obtained in customers in the Ratio between provisions for NPLs / gross loans to customers excluding repos and guarantees granted. The numerator considers the linear annualization of the	
Customer spread Custom	provisions for NPLs. In addition, the costs associated with the stage 3 management assets are adjusted.	14	
		Ratio between total provisions & impairments / gross loans to customers excluding repos and guarantees granted and problematic RE Assets. The numerator	
Total cost of risk (bps)		considers the linear annualization of total provisions & impairments.	14
Other assets		Includes the following accounting items: derivatives - hedge accounting, fair value changes of the hedged items in portfolio hedge of interest rate risk, tax	
Other assets		assets, other assets, assets under insurance or reinsurance contracts and non-current assets and disposal groups classified as held for sale.	15
Other liabilities		Includes the following accounting items: derivatives - hedge accounting, tax liabilities, fair value changes of the hedged items in portfolio hedge of interest rate	
		risk, other liabilities and liabilities included in disposal groups classified as held for sale.	15
		Includes loans and advances to customers excluding impairment allowances.	16
On-balance sheet customer funds		Includes gross loans to customers excluding repos, stage 3 assets and accrual adjustments. Includes customer deposits (ex repos) and other liabilities placed by the branch network (Banco Sabadell non-convertible bonds, commercial paper and others).	18
Off-balance sheet customer funds		Includes mutual funds, asset management, pension funds and third-party insurance products.	18
On-balance sheet funds		Includes accounting sub-headings of customer deposits, debt securities issueds (debt and other tradable securities and subordinated liabilities).	18
Funds under management and third-party funds		Sum of on-balance sheet and off-balance sheet customer funds.	18
Stage 3 coverage ratio with total provisions		Shows the % of stage 3 exposures covered by total provisions. Calculated using the ratio between the allowance of loans and advances to customers (including	
- Otage o coverage ratio with total provisions		allowances for guarantees granted) / total stage 3 exposures (including stage 3 guarantees granted).	19
Stage 3 coverage ratio		Shows the % of stage 3 exposures covered by stage 3 provisions. Calculated using the ratio between the stage 3 allowance of loans and advances to	
		customers (including stage 3 allowances for guarantees granted) / total stage 3 exposures (including stage 3 guarantees granted).	19
Problematic assets coverage		Ratio between provisions associated with problematic assets / total problematic assets. Calculated using the ratio where the numerator includes: i) the assets classified in stage 3 including other valuation adjustments (accrued interest,	19
Stage 3 ratio		commissions and others) classified in stage 3 of loans and advances that are not classified as non-current assets held for sale and ii) the guarantees granted	
<u>.</u>		classified in stage 3. The denominator includes: (i) gross loans to customers excluding repos and (ii) guarantees granted.	19
Problematic assets		Sum of stage 3 exposures and problematic real estate assets. Also referred to as non-perfoming assets (NPAs).	21
		Ratio between allowances for impairment of problematic RE assets / total problematic RE assets. Amount of problematic RE assets includes property	
Problematic Real Estate coverage ratio		classified in the portfolio of non-current asset and disposable groups classified as held for sale, excluding real estate investments with significant latent capital	
		gains and rental properties, for which there is an agreement of sale that will be carried out after a reform process.	21
Stage 3 exposures		Includes: (i) stage 3 assets including other valuation adjustments (accrued interest, commissions and others) classified in stage 3 of loans and advances that are not classified as non-current assets held for sale and ii) guarantees granted classified in stage 3.	21
		Net loans and receivables divided by retail funding. The numerator excludes mediation loans. The denominator considers real estate funding and customer	21
Loan-to-deposits ratio		funds.	23
		Ratio between total capital and the risk weighted assets. Total capital includes the accounting profit assuming a pay-out of c.30% in 2021 y c.50% in 2022,	
Total capital ratio		that is different from the regulatory criteria which decreases that amount based on the obligations to fulfil for the rest of the year. The denominator has been	
		calculated based on the Group's best estimate.	24
Market capitalisation		Share price multiplied by the average number of outstanding shares at the end of the period.	31
Earnings per share	(*)	Ratio between net profit attributed to the Group and the average number of outstanding shares at the end of the period. In the numerator the annualization of the	
Lamings per share	(*)	profit obtained to date is considered and adjusted by the Additional Tier I coupon payment registered in equity as well as by contributions to deposit guarantee and resolution funds (DGF and SRF) and tax on deposits of credit institutions (IDEC), except year end.	31
	***	and resolution funds (DGF and as of plant as of repulsions to clear institutions (DEC), except year error. Ratio between book value / average number of outstanding shares at the end of the period. Book value refers to equity, adjusted by contributions to deposit	
Book value per share	(*)	guarantee and resolution funds (DGF and SRF) and tax on deposits of credit institutions (IDEC), except at year end.	31
		Ratio between tangible book value and the average number of outstanding shares at the end of the period. The tangible book value is calculated as the sum of	
TBV per share	(*)	equity adjusted by intangible assets and the goodwill of the investees, and by contributions to deposit guarantee and resolution funds (DGF and SRF) and tax	
		on deposits of credit institutions (IDEC), except year end.	31
			31
Price / Tangible book value (times) Price / Earnings ratio (P/E) (times)	(*)	Ratio between share price / tangible book value per share. Ratio between share price / earnings per share.	31

^(*) The accrual on a straight-line basis of contributions to the deposit guarantee fund and the resolution fund, as well as the tax on deposits of credit institutions, has been calculated based on the Group's best estimates. (**) Arithmetic mean calculated as the sum of daily balances during the reference period divided by the number of days during that period. (***) Average funds calculated using the month-end balance from December of the previous year.
