Strategic partnership Amadeus/Microsoft to drive future innovation in travel

Amadeus and Microsoft today announce a global strategic partnership that will harness cloud technology to innovate and explore new products and solutions and create smoother travel experiences in the future.

Amadeus and Microsoft will specifically work together in three areas:

- Foster collaboration across the entire travel industry
- Focus on joint innovation and product development
- Accelerate the move of Amadeus' technical platform to the public cloud.

By moving to the public cloud, Amadeus will achieve increased flexibility to scale its operational capacity up or down or to adjust it as needed given market and demand conditions. Amadeus also expects to improve the resiliency of its solutions and services to customers, and to make a step change in the delivery of new technologies, whilst increasing the security of systems and data.
