H1'20 Earnings Presentation

All. Together. Now.

Important information

Non-IFRS and alternative performance measures

In addition to the financial information prepared in accordance with International Financial Reporting Standards (“IFRS”) and derived from our financial statements, this presentation contains certain financial measures that constitute alternative performance measures (“APMs”) as defined in the Guidelines on Alternative Performance Measures issued by the European Securities and Markets Authority (ESMA) on 5 October 2015 (ESMA/2015/1415en) and other non-IFRS measures (“Non-IFRS Measures”). The financial measures contained in this presentation that qualify as APMs and non-IFRS measures have been calculated using the financial information from Santander Group but are not defined or detailed in the applicable financial reporting framework and have neither been audited nor reviewed by our auditors. We use these APMs and non-IFRS measures when planning, monitoring and evaluating our performance. We consider these APMs and non-IFRS measures to be useful metrics for management and investors to facilitate operating performance comparisons from period to period, as these measures exclude items outside the ordinary course performance of our business, which are grouped in the “management adjustment” line and are further detailed in Section 3.2. of the Economic and Financial Review in our Directors’ Report included in our Annual Report on Form 20-F for the year ended 31 December 2019. While we believe that these APMs and non-IFRS measures are useful in evaluating our business, this information should be considered as supplemental in nature and is not meant as a substitute of IFRS measures. In addition, other companies, including companies in our industry, may calculate or use such measures differently, which reduces their usefulness as comparative measures. For further details of the APMs and Non-IFRS Measures used, including its definition or a reconciliation between any applicable management indicators and the financial data presented in the consolidated financial statements prepared under IFRS, please see the 2019 Annual Report on Form 20-F filed with the U.S. Securities and Exchange Commission on 6 March 2020, as well as the section “Alternative performance measures” of the annex to the Banco Santander, S.A. (“Santander”) Q2 2020 Financial Report, published as Inside Information on 29 July 2020. These documents are available on Santander’s website (www.santander.com). Underlying measures, which are included in this presentation, are non-IFRS measures.

The businesses included in each of our geographic segments and the accounting principles under which their results are presented here may differ from the included businesses and local applicable accounting principles of our public subsidiaries in such geographies. Accordingly, the results of operations and trends shown for our geographic segments may differ materially from those of such subsidiaries

Forward-looking statements

Santander cautions that this presentation contains statements that constitute “forward-looking statements” within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by words such as “expect”, “project”, “anticipate”, “should”, “intend”, “probability”, “risk”, “VaR”, “RoRAC”, “RoRWA”, “TNAV”, “target”, “goal”, “objective”, “estimate”, “future” and similar expressions. These forward-looking statements are found in various places throughout this presentation and include, without limitation, statements concerning our future business development and economic performance and our shareholder remuneration policy. While these forward-looking statements represent our judgment and future expectations concerning the development of our business, a number of risks, uncertainties and other important factors could cause actual developments and results to differ materially from our expectations. The following important factors, in addition to those discussed elsewhere in this presentation, could affect our future results and could cause outcomes to differ materially from those anticipated in any forward-looking statement: (1) general economic or industry conditions in areas in which we have significant business activities or investments, including a worsening of the economic environment, increasing in the volatility of the capital markets, inflation or deflation, changes in demographics, consumer spending, investment or saving habits, and the effects of the COVID-19 pandemic in the global economy; (2) exposure to various types of market risks, principally including interest rate risk, foreign exchange rate risk, equity price risk and risks associated with the replacement of benchmark indices; (3) potential losses associated with prepayment of our loan and investment portfolio, declines in the value of collateral securing our loan portfolio, and counterparty risk; (4) political stability in Spain, the UK, other European countries, Latin America and the US; (5) changes in laws, regulations or taxes, including changes in regulatory capital and liquidity requirements, including as a result of the UK exiting the European Union and increased regulation in light of the global financial crisis; (6) our ability to integrate successfully our acquisitions and the challenges inherent in diverting management’s focus and resources from other strategic opportunities and from operational matters while we integrate these acquisitions; and (7) changes in our ability to access liquidity and funding on acceptable terms, including as a result of changes in our credit spreads or a downgrade in our credit ratings or those of our more significant subsidiaries.

PRINCIPLES FOR RESPONSIBLE BANKING

MEMBER OF Dow Jones Sustainability Indices In Collaboration with RobecoSAM

Santander Responsible Banking goals

We are building a more Responsible Bank aligned with our commitments

(1) According to relevant external indexes in each country (Great Place to Work, Top Employer, Merco, etc.)

(2) Senior positions represent 1% of total workforce

(3) Calculation of equal pay gap compares employees of the same job, level and function

(4) People (unbanked, underbanked or financially vulnerable), who are given access to the financial system, receive tailored finance and increase their knowledge and resilience through financial education

(5) Includes Santander overall contribution to green finance: project finance, syndicated loans, green bonds, capital finance, export finance, advisory, structuring and other products to help our clients in the transition to a low carbon economy. Commitment from 2019 to 2030 is EUR 220 bn

(6) In those countries where it is possible to certify renewable sourced electricity for the properties occupied by the Group

(7) People supported through Santander Universities initiative (students who will receive a Santander scholarship, will achieve an internship in an SME or participate in entrepreneurship programmes supported by the bank)

(8) People helped through our community investment programmes (excluded Santander Universities and financial education initiatives)
