Transaction Summary

The transactions comprise residential mortgages serviced by Banco de Sabadell, S.A. (BBB-/Stable/F3) and Caixabank S.A (BBB+/Stable/F2) for Caixa Penedes 1 TDA, FTA (Penedes 1), Banco Bilbao Vizcaya Argentaria, S.A. (BBB+/Stable/F2) and Grupo Cooperativo Cajamar for TDA 19 - MIXTO, FTA (TDA 19), and Cajamar Caja Rural, Sociedad Cooperativa de Crédito, for TDA Cajamar 2, FTA (Cajamar 2).

KEY RATING DRIVERS

Credit Enhancement Trends: The rating actions reflect Fitch's view that the notes are sufficiently protected by credit enhancement (CE) to absorb the projected losses that are commensurate with the current and higher rating scenarios. While we expect CE ratios for Penedes 1 to remain broadly stable as the deal is amortising on a pro-rata basis (soon to switch to sequential when the current pool balance reduces to below 10% of the initial pool balance), CE protection for TDA 19 and Cajamar 2 is increasing as the deals are amortising sequentially until their final maturity dates.

Counterparty Risks Cap Ratings: The upgrade of TDA 19 class D note rating to 'AA-sf' from 'A+sf' reflects its CE protection (ie. around 32% as of the latest reporting date) being fully derived from a cash reserve fund held at the transaction account bank (TAB) provider, which is now BNP Paribas S.A. (A+/Stable/F1, deposit rating AA-). In accordance with Fitch's Structured Finance and Covered Bonds Counterparty Rating Criteria, TDA 19 class D note rating is capped at the TAB provider's deposit rating due to excessive counterparty dependency.

The rating of Cajamar 2 class D notes is also capped at the TAB provider's deposit rating (BNP Paribas) as the cash reserve fund represents the notes' only source of CE protection. However, the affirmation at 'A+sf' reflects tail-end risks from a low loan count and negative excess spread leading to material performance uncertainties and possible CE reductions. New entries of default and lower recoveries could quickly erode the reserve fund balance.

Geographic Concentration; Risky Pool Attributes: The portfolios are exposed to geographic concentration risk, mainly to the regions of Catalonia (Penedes 1 and TDA 19) and Murcia (Cajamar 2

and TDA 19). Fitch has applied higher rating multiples to the base foreclosure frequency assumption to the portion of the portfolios that exceed 2.5x the population within these regions relative to the total national population.

Additionally, all three portfolios include a relevant concentration to self-employed borrowers (ranging between 11% and 16.2%) that we consider higher-risk than third-party employed borrowers due to income volatility and are subject to a foreclosure frequency adjustment of 170% within the agency rating analysis.

High Seasoning; Low Arrears: All transactions have more than 19 years of seasoning, with a weighted-average (WA) loan to indexed current loan-to-value below 50%. The share of loans in arrears over 90 days is less than 0.5% in all three deals, and the balance of cumulative defaults stood at between 1.4% and 3.6% relative to the initial portfolio balance as of the latest reporting dates.

Penedes Partly Unhedged: Penedes 1 is exposed to open interest-rate risk especially in a rising interest-rate scenario, because the notes pay a floating coupon rate linked to three-month Euribor, but around 30% of the underlying mortgages pay a fixed interest rate. The rest of the portfolio pays a floating rate mainly linked to 12-month Euribor and is subject to a hedging arrangement that mitigates basis risk. Fitch views current and projected CE ratios on the notes as sufficient to withstand the cash flow stress associated with this unhedged portion of the collateral, as reflected in today's rating action.

ESG Considerations - Governance: Caixa Penedes 1 has an Environmental, Social and Governance (ESG) Relevance Score of '4' for Transaction & Collateral Structure due to loan modifications after transaction's closing that introduced interest-rate risk, which has a negative impact on the credit profile, and is relevant to the rating in combination with other factors.

RATING SENSITIVITIES

Factors that could, individually or collectively, lead to negative rating action/ downgrade:

- For the notes that are rated at 'AAAsf, a downgrade to Spain's Long-Term Issuer Default Rating (IDR) that could decrease the maximum achievable rating for Spanish structured finance transactions
- For TDA 19 and Cajamar 2 class D notes, a downgrade of the TAB provider's deposit rating, by one notch and two notches respectively, as the notes' ratings are capped at the bank's ratings due to excessive counterparty risk exposure
- Long-term asset performance deterioration such as increased delinquencies or larger defaults, which could be driven by changes to macroeconomic conditions, interest rate increases or borrower behaviour

Factors that could, individually or collectively, lead to positive rating action/upgrade:

- Notes rated at 'AAAsf' are at the highest level on Fitch's scale and cannot be upgraded

- Stable to improved asset performance driven by lower-than-expected delinquencies and defaults would lead to increasing CE levels and, potentially, upgrades

Best/Worst Case Rating Scenario

International scale credit ratings of Structured Finance transactions have a best-case rating upgrade scenario (defined as the 99th percentile of rating transitions, measured in a positive direction) of seven notches over a three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of seven notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAAsf' to 'Dsf'. Best- and worst-case scenario credit ratings are based on historical performance. USE OF THIRD PARTY DUE DILIGENCE PURSUANT TO SEC RULE 17G -10

Form ABS Due Diligence-15E was not provided to, or reviewed by, Fitch in relation to this rating action.

DATA ADEQUACY

Fitch has checked the consistency and plausibility of the information it has received about the performance of the asset pools and the transactions. Fitch has not reviewed the results of any third-party assessment of the asset portfolio information or conducted a review of origination files as part of its ongoing monitoring.

Fitch did not undertake a review of the information provided about the underlying asset pools ahead of the transactions' initial closing. The subsequent performance of the transactions over the years is consistent with the agency's expectations given the operating environment and Fitch is therefore satisfied that the asset pool information relied upon for its initial rating analysis was adequately reliable.

Overall, and together with any assumptions referred to above, Fitch's assessment of the information relied upon for the agency's rating analysis according to its applicable rating methodologies indicates that it is adequately reliable.

PUBLIC RATINGS WITH CREDIT LINKAGE TO OTHER RATINGS

TDA 19 class D note rating is linked to the TAB's deposit rating.

ESG Considerations

Caixa Penedes 1 has an Environmental, Social and Governance (ESG) Relevance Score of '4' for Transaction & Collateral Structure due to loan modifications after transaction's closing that introduced

interest-rate risk, which has a negative impact on the credit profile, and is relevant to the rating in combination with other factors.

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.
